Section 1

Introduction

1.1 Introduction and Overview

This policy provides the philosophical and legal basis as well as the practices and procedures necessary to provide foster care services. Foster care is a comprehensive, complex array of services for children who, for any number of reasons, cannot live with their families. It is part of the larger child welfare system designed to support and nurture the healthy development of children and their families. Foster care is intended to be a partnership of all parties involved including the Department, families, children, foster parents, courts, private agencies, and other entities.

Foster care for children has been evolving for centuries. By the mid-1800s, family foster care emerged as an effort to rescue children whose parents were “inadequate” or unable to care for them. Due to the first White House Conference on Children, held at the turn of the century, foster care was redefined as a temporary service whose purpose was to reunite children with their families or, if necessary, place them with another family. During this time, a complex child welfare system of government and voluntary agencies began to emerge with an emphasis on family counseling and psychoanalysis.

By the 1960s landmark research studies revealed several important findings in regards to foster care, including: foster care placements were often permanent rather than temporary; frequent moves to new placements left many children with little sense of stability or continuity in their lives; children were often inappropriately removed from their homes; and children from poor and minority families were disproportionately represented in foster care. A growing concern over the negative impact separation from their families had on children also emerged. In addition to these findings, several sociological changes began to impact the perception of out of home care e.g., the rapid increase in the number of children entering foster care, the resurgence of interest in child abuse and neglect, the emergence of advocacy as part of the civil rights movement, and the acceptance of the family as an important social unit.

Pressure to reform the child welfare system evolved along two major themes: out of home care services for children should be provided in the least restrictive appropriate environment and permanency for children shall be a primary goal of services. With the enactment of the [*Adoption Assistance and Child Welfare Act of 1980 \(P.L. 96-272\)*](#) states were mandated to promote permanency planning for all children in out of home care and for children at-risk of removal from their homes. States were also required to make reasonable efforts to prevent out of home placements of children and to reunify children already removed from their homes.

In 1993, Congress enacted the [Family Preservation and Family Support Services Program \(P.L. 103-66\)](#) which provided additional funding for preventive services and crisis services for children and families at-risk of entering the foster care system. Implementation of these programs required active involvement of a broad community of stakeholders to focus on needs and services for children and families.

In response to major concerns about the extended length of stay and poor outcomes for minority children and the prevalence of using race to determine placements for children in foster care, the [Multiethnic Placement Act \(P.L. 103-382\)](#) and the [Interethnic Placement Provisions \(P.L. 104-188\)](#) were enacted. This legislation forbids the delay or denial of a foster or adoptive placement based solely on the race, color, ethnicity, or national origin of the prospective foster parent, adoptive parent or the child involved. It also compels states to make diligent efforts to recruit and retain foster and adoptive families that reflect the racial and ethnic diversity of the children for whom foster homes are needed.

The [Adoption and Safe Families Act of 1997 \(P.L. 105-89\)](#) was enacted to ensure that children's safety would be the paramount concern of all child welfare decision-making and to promote the adoption of children who cannot return safely to their own homes. This law has five key principles: safety is the paramount concern that must guide all child welfare services; foster care is temporary; permanency planning efforts should begin as soon as a child enters care; the child welfare system must focus on results and accountability; and innovative approaches are needed to achieve the goals of safety, permanency, and well-being.

The [Fostering Connections to Success and Increasing Adoptions Act](#) was enacted on October 7, 2008. This legislation addresses some of the most important needs affecting foster children, including extending federal foster care payments up to 23 years old, providing federal support for relatives caring for foster children, increasing access to foster care and adoption services to Native American tribes, providing foster parents with the right to be heard, and improving the oversight of the health and education needs of children in foster care.

Together, these actions and policies have moved foster care into a new phase. Foster care has become a complex system of services and placements that are designed to ensure that children are safe, permanency is achieved, and the child's social, emotional and intellectual well-being is addressed.

1.2 Philosophical Principles

Philosophical beliefs about children in foster care and their families is the single most important variable in the provision of quality foster care services. Values and beliefs about children and their families drive decision making, interaction, and

involvement.

Safety is the paramount concern that must guide all child welfare services. When making decisions about a child, including those decisions regarding service provision, placement, and permanency planning, the safety of the child must be the foremost issue in determining what is in the best interest of the child.

Foster care is temporary. Foster care placement provides a substitute living arrangement for a child for a planned period of time. The child's placement must be the most appropriate living situation that can meet the individual child's needs. The time the child is in out-of-home care must be productive in terms of services provided to address the identified needs of the child in order for him to grow, develop, and achieve his permanency plan.

Permanency planning efforts should begin as soon as a child enters foster care. A child should only be placed in foster care when appropriate and only when efforts to strengthen the family's situation have failed or when a child is unsafe, and a plan cannot be implemented which controls the threats to child safety. Concurrent planning should be utilized to allow staff to work to reunify the family, while at the same time planning for the possibility that reunification will not succeed. All children are entitled to have safe, permanent living situations that promote their safety and well-being. Permanent placements, whether it is reunification, adoption, legal guardianship, placement with relatives or other permanent planned living arrangement **must be achieved in a timely manner**, with the goal of limiting the number of children who remain in foster care for more than twenty-four (24) months. The total number of children in foster care for more than twenty-four (24) months should not exceed twenty (20) percent of the foster care population at any point in time.

Interventions and decisions should be defined through child-centered, family-focused principles. This system of operation requires that children and families take part in all decisions that impact their lives. Children, their parents, and extended family must be full partners in the process that develops, implements, and reviews their cases. Being part of the case work process makes families more likely to be invested in making the changes necessary to positively address the reasons their children were removed from their homes. Child-centered, family-focused practice also demands that services are individualized to meet the specific needs of the children and families that are being served.

Foster care is a process and not a series of discreet, unrelated steps. It is a continuum of care that is offered in conjunction with other services such as family preservation, child protective services, youth services, or adoption. Foster care involves looking backward to assess the home situation and determine the steps necessary to make it possible for the child to return home. It also requires looking forward to the steps necessary to provide a permanent substitute living arrangement.

1.3 Mission

The West Virginia Department of Health and Human Resources, Bureau for Children and Families is committed to ensuring that children in out-of-home care and their families receive adequate and appropriate services that best meet their needs for safety, permanency, and well-being.

1.4 Purpose

There are three (3) primary purposes for foster care:

- a)** To reunite the child in foster care with his family by providing interventions aimed at reunification whenever possible and when the safety of the child can be assured.
 - It is vital to always remember that children should not be separated from their families longer than necessary. If safety can be re-established within the home, the child/children should be returned to that home and reunified with their parents/guardians once safety is re-established. Legal and physical custody of the child/children should be discussed with the Multi-Disciplinary Team (MDT) and the Courts.
- b)** To provide a permanent substitute living arrangement for the child in foster care when reunification is not possible. Such an arrangement may include adoption, placement with relatives, legal guardianship, or another court-sanctioned permanent living arrangement.
- c)** To aid a child over the age of fourteen (14) to attain independent living skills necessary to become a successful adult.

1.5 Staff Roles

Many of the staff involved in providing foster care services for the Department is not classified specifically as foster care workers. Instead, staff has various responsibilities for children who come to the attention of the Department for any number of reasons. Regardless of the classification, all of the following staff play a role in assuring that children in the custody of the Department are safe, well-being is continuously assessed and promoted and that children achieve their permanency plan.

Child Protective Services Worker

a) Problem Identifier

The worker gathers studies and analyzes information about the child and the family. The worker also offers help to families in which risk is

identified, secures the safety of the child, justifies the need for child protective services intervention and evaluates the causes of risks.

b) Case Manager

When a child is removed from his home due to an investigation of abuse and/or neglect, the Child Protective Service worker becomes, in essence, a Foster Care worker. As such, the worker is the primary case manager for the child while the child resides away from his home. In this capacity the child's worker, with the assistance of the Multidisciplinary Treatment Team, assesses the family's problems and concerns and develops a detailed, appropriate plan to address the issues for which the child was removed from the home. The worker is responsible for orchestrating all of the planning, reporting and follow-up activities related to the case and facilitates the use of agency and community services to assist the child and his family. The worker also reviews the family's progress, maintains accurate documentation and records, and advocates for the appropriate, necessary services to address the identified issues which lead to the child's removal.

c) Treatment Provider

The child's worker works directly with families in helping them to address the issues that necessitated removal of their children by learning new ways of relating to and being responsible for their children. The worker also serves as a role model, encourages client motivation and facilitates problem solving and decision making on the part of families.

d) Permanency Planner

The child's worker, with the assistance of the Multidisciplinary Treatment Team, develops a detailed plan that addresses the permanency needs of the child. The worker is responsible for ensuring that the services provided to the child and their families, if appropriate, are in coordination with the child's identified permanency plan. In addition, the worker must also have a concurrent permanency plan for which services are coordinated in case the primary permanency plan no longer becomes appropriate.

Child Protective Services Supervisor

a) Administrator

The supervisor makes decisions on specific case activities, case assignments and on relevant personnel matters. The supervisor also regulates the practice of social workers with foster care cases and ensures the quality of practice. The supervisor ensures case activities

and decisions are congruent with policy, state and federal statutes, and court rules. The supervisor serves as a link between workers and community resources and with administrative staff

b) Educator

The supervisor plans and carries out activities related to the professional development of employees.

c) Coach

The supervisor motivates and reinforces employees in the performance of their duties.

Foster Care Worker

a) Case Manager

When a child is removed from his home, the worker becomes the primary case manager for the child. In this capacity the child's worker, with the assistance of the Multidisciplinary Treatment Team, assesses the family's problems and concerns and develops a detailed, appropriate plan to address the issues for which the child was removed from the home. The worker is responsible for orchestrating all of the planning, reporting and follow-up activities related to the case and facilitates the use of agency and community services to assist the child and his family. The worker also reviews the family's progress, maintains accurate documentation and records, and advocates for the appropriate, necessary services to address the identified issues which lead to the child's removal.

b) Treatment Provider

The child's worker works directly with families in helping them to address the issues that necessitated removal of their children by learning new ways of relating to and being responsible for their children. The worker also serves as a role model, encourages client motivation and facilitates problem solving and decision making on the part of families.

c) Permanency Planner

The child's worker, with the assistance of the Multidisciplinary Treatment Team, develops a detailed plan that addresses the permanency needs of the child. The worker is responsible for ensuring that the services provided to the child, and his family if appropriate, are in coordination with the child's identified permanency plan. In addition, the worker must also have a concurrent permanency plan for which services are coordinated in case the primary permanency plan no longer becomes appropriate.

Foster Care Supervisor

a) Administrator

The supervisor makes decisions on specific case activities, case assignments and on relevant personnel matters. The supervisor also regulates the practice of social workers with foster care cases and ensures the quality of practice.

b) Educator

The supervisor plans and carries out activities related to the professional development of employees.

c) Coach

The supervisor motivates and reinforces employees in the performance of their duties.

Youth Services Worker

a) Problem Identifier

The worker gathers studies and analyzes information about the child and the family. The worker also offers help to families whose children come into the custody of the state as a result of juvenile justice intervention or court proceedings, secures the safety of the child and the child's community, justifies the need for youth services intervention and evaluates the causes of risks.

b) Case Manager

When a child is removed from his home, the worker becomes the primary case manager for the child while the child resides away from his home. In this capacity the child's worker, with the assistance of the Multidisciplinary Treatment Team, assesses the family's problems and concerns and develops a detailed, appropriate plan to address the issues for which the child was removed from the home. The worker is responsible for orchestrating all of the planning, reporting, and follow-up activities related to the case and facilitates the use of agency and community services to assist the child and his family. The worker also reviews the family's progress, maintains accurate documentation and records, and advocates for the appropriate, necessary services to address the identified issues which lead to the child's removal.

c) Treatment Provider

The child's worker works directly with families in helping them to address the issues that necessitated removal of their children by learning new ways of relating to and being responsible for their children. The worker

also serves as a role model, encourages client motivation and facilitates problem solving and decision making on the part of families.

d) Permanency Planner

The child's worker, with the assistance of the Multidisciplinary Treatment Team, develops a detailed plan that addresses the permanency needs of the child. The worker is responsible for ensuring that the services provided to the child and his family is in coordination with the child's identified permanency plan. In addition, the worker must also have a concurrent permanency plan for which services are coordinated in case the primary permanency plan no longer becomes appropriate.

Youth Services Supervisor

a) Administrator

The supervisor makes decisions on specific case activities, case assignments, and on relevant personnel matters. The supervisor also regulates the practice of social workers with foster care cases and ensures the quality of practice.

b) Educator

The supervisor plans and carries out activities related to the professional development of employees.

c) Coach

The supervisor motivates and reinforces employees in the performance of their duties.

Homefinding Specialist

a) Recruiter

The Homefinding Specialist is responsible for recruiting prospective foster/adoptive families to care for the children who are in foster care. It is also the responsibility of the Homefinding Specialist to promote general awareness of foster/adoptive care in the communities.

b) Trainer

The Homefinding Specialist must provide each prospective foster/adoptive family with the opportunity to receive training on the foster/adoptive care system, the children who come into the custody of the state, and the skills required to provide care for these children. This training involves self-evaluation through discussions, participation in small group exercises, and discussion with experienced foster/adoptive parents.

c) Certification Provider

The Homefinding Specialist must evaluate all prospective foster/adoptive families on their ability to and experience in parenting children, their home for safety and capacity measures, and their motivation for becoming foster/adoptive parents.

d) Case Manager

It is the responsibility of the Homefinding Specialist to provide support and guidance to foster/adoptive parents. In this capacity, the Homefinding Specialist must help foster/adoptive families receive any assistance or services necessary to address problems or concerns that the family may develop. Such assistance and services may include respite, additional child-specific training, family counseling, etc. The Homefinding Specialist also reviews the family's progress, maintains accurate documentation and records, and ensures that the family is compliant with policy and regulations that govern foster/adoptive families.

Homefinding Supervisor

a) Administrator

The supervisor makes decisions on specific case activities, case assignments, and on relevant personnel matters. The supervisor also regulates the practice of social workers with foster/adoptive care cases and ensures the quality of practice.

b) Educator

The supervisor plans and carries out activities related to the professional development of employees.

c) Coach

The supervisor motivates and reinforces employees in the performance of their duties.

1.6 Definitions

Absent from Supervision - When a foster care youth, without consent, is not under the supervision of the caregiver and the youth's location cannot be determined.

Adoption - Adoption is a family-building permanency option that provides a permanent home for a child until adulthood. A voluntary surrender or termination of parental rights from the birth parents must occur before the adoption can be finalized in a court of law. The adoptive parent then becomes the child's legal

parent and as such has the formal and legal responsibility for the child.

AFCARS - The “Adoption and Foster Care Analysis and Reporting System” is designed to collect uniform, reliable information on children who are under the responsibility of the title IV-B/IV-E agency for placement, care, or supervision. Adoption and foster care data collection is mandated by the [Social Security Act, Section 479](#).

Aftercare Plan - A plan which is developed by the child’s caseworker when the child is placed outside of the home, as required by [Senate Bill 393](#). The plan must be finalized 60 days prior to the child’s release and must be specific to the available community resources and the child’s needs, including but not limited to, education, counseling, and treatment.

Age or Developmentally Appropriate - activities or items that are generally accepted as suitable for children of the same chronological age or level of maturity or that are determined to be developmentally-appropriate for a child, based on the development of cognitive, emotional, physical, and behavioral capacities that are typical for an age or age group; and in the case of a specific child, activities or items that are suitable for the child based on the developmental stages attained by the child with respect to the cognitive, emotional, physical, and behavioral capacities of the child.

ASO - Is an Administrative Services Organization that provides socially necessary services for child welfare cases as laid out in Child Welfare policy. KEPRO Intelligent Value, is contracted by BCF as the Administrative Service Organization (ASO) to provide the socially necessary services.

CASA - A Court Appointed Special Advocate (CASA) representative is appointed primarily in civil protection proceedings involving child abuse and/or neglect. Duties of a CASA representative include an independent gathering of information through interviews and review of records; facilitating prompt and thorough review of the case; protecting and promoting the best interests of the child; follow-up and monitoring of court orders and case plans; making a written report to the court with recommendations concerning the child’s welfare; and negotiating and advocating on behalf of the child.

Child Placing Agencies - Agencies organized for the purpose of placing children in private family homes for foster care and/or adoption. These agencies are responsible for training, completing home studies, approving, and supervising the homes. These agencies are licensed by the Department.

Child’s Case Plan - The plan prepared by the Department pursuant to the federal requirements for a comprehensive plan for every child in foster care developed within 60 days of the date the child entered foster care and the requirements of WV State Code’s [§49-4-608](#) following the adjudication by the court that the child is an abused and/or neglected child. For youth entering foster care through

juvenile proceedings, the same requirements for all foster children including the Child's Case Plan must be followed. The Child's Case Plan is a comprehensive document which directs the provision of all casework services including the services provided to the child. All casework services provided to the child while the child is in placement must be delivered in accordance with the Child's Case Plan.

CIB/NCIC - Criminal Information Background/National Crime Information Center are entities that provide a history of a person's state and federal criminal activity.

Cultural Competence - The ability of individuals and systems to interact responsively, respectfully, and effectively with people of all cultures, classes, races, ethnicity, and religious backgrounds in a manner that recognizes, affirms, and values the worth of individuals, families, and communities while protecting and preserving the dignity of each.

Discharge Plan - A plan which residential treatment facilities are required to provide to the worker, the youth, and the youth's family, upon release from their facility. The plan should provide instruction on how to continue with the child's aftercare treatment, any medication they may require, additional outpatient services, and any follow-up appointments with service providers or community resources.

Emergency Shelter Care - Substitute care providers who deliver short term care (less than sixty days) for children just entering foster care or those who are between placements. Emergency shelter care foster parents must meet the same basic qualifications as other foster care providers. Emergency shelter care is also provided in facility settings.

Family Foster Care - Continuous 24-hour care and support services provided for a child in a family foster/adoptive home.

Foster/Adoptive Family Adoption - A permanency option that should be considered for any child who has been in a foster /adoptive home a sufficient amount of time to bond with the family and establish family connections.

Foster/Adoptive Family Care - Services provided by a person not related to the child who has been certified to provide care in an out-of-home living situation.

Foster Care - 24-hour substitute care for children placed away from their parents or guardians and for whom the State agency has placement and care responsibility. This includes, but is not limited to, placements in foster family homes, foster homes of relatives, group homes, emergency shelters, residential facilities, child care institutions, and pre-adoptive homes.

Foster Care Candidacy - Those children and youth who are at imminent risk of removal from their home, absent effective preventative services. A child or youth is at imminent risk of removal from the home if the state is pursuing removal or attempting to prevent removal by providing in-home services. A child or youth is

not a candidate for foster care if the planned out of home placement for the child or youth is an arrangement outside of foster care, such as a detention facility.

Guardian ad Litem (GAL) - The attorney appointed to represent the best interest of the child in legal proceeding until permanency is achieved.

Home Study - A home study or family assessment is the process by which information is gathered and evaluated to assess a family's ability to provide care for children who may be placed in the home through foster care. This assessment includes evaluating the physical environment of the home for safety and to determine adequate space, the family's capacity for parenting, as well as, the family's motivation and commitment to providing a safe, caring environment for children.

Human Trafficking Victim - A victim who has been forced, coerced, enticed, transported, isolated, harbored, obtained, or received for the purpose of debt bondage, sexual servitude, a commercial sex act, or forced labor.

Legal Guardianship - A legally binding, permanent relationship between a child and a caretaker, other than the child's biological parent, which may be considered as a permanent placement option for the child. This arrangement transfers all the rights and responsibilities for a child from the Department to the caretaker through a court sanctioned process. A monthly maintenance subsidy, medical card, and non-recurring subsidy may be provided to eligible children to ease the financial burden of caring for the child.

Interstate Compact for the Placement of Children (ICPC) - An agreement that has been enacted into law by all 50 states in the United States and the District of Columbia, which controls the lawful movement of all children from one state to another from the purpose of placement.

Multidisciplinary Treatment Teams (MDTs) - A team designed to assess, plan, and implement a comprehensive, individualized service plan for a child who is involved in court proceedings either because of child abuse and neglect, status offense, or delinquency proceedings. This team includes the child's custodial parent(s) or guardian(s), other immediate family members, the attorney(s) representing the parent(s) of the child, the child if over the age of twelve (12) or the child's participation is deemed appropriate, the Guardian Ad Litem, the prosecuting attorney, and any other person who may contribute to the team's efforts to assist the child and the family.

Normalcy – The right for all youth in out of home care to be provided with the opportunity for normal growth and development, which includes age-appropriate activities, recreation, and life skills.

Open Adoption - An adoptive arrangement that permits on-going communication and/or contact between the birth family and the child subsequent to a finalized adoption.

Out-of-Home Care - Assignment of a child in the custody of the state, including those placed by voluntary agreements, to a residence that may include an emergency shelter, foster family, group or residential facility, institution, adoptive family, relative foster family, or a transitional living apartment.

Permanency Plan - A formal written part of the Child's Case Plan that determines the permanent placement for a child in the state's custody. Permanent placements include return home, kinship care, adoption, legal guardianship, or another permanent plan that is sanctioned by the court such as emancipation or continued foster care.

Permanency Planning - A systematic effort to provide long-term continuity for children in foster care. This planning must begin the moment the child enters foster care and must drive services and actions for the child.

Placement - The child's living arrangement. For a child to be considered in foster care, the Department must have legal custody of the child and the child is placed outside their own home and in a certified foster home, relative/kinship home, or with a licensed facility.

Pre-service Orientation - The training provided to prospective foster/adoptive families to provide those interested in becoming certified foster/adoptive parents with an understanding of the foster care and adoption system, the children who are in foster care and who are available for adoption, and the responsibilities of foster/adoptive parents.

Reasonable and Prudent Parenting Standard - the standard characterized by careful and sensible parental decisions that maintain the health, safety, and best interests of a child while at the same time encouraging the emotional and developmental growth of the child, that a caregiver shall use when determining whether to allow a child in foster care under the responsibility of the State to participate in extracurricular, enrichment, cultural, and social activities.

Relative/Kinship Care - Services provided by any person related to the child by blood or marriage including cousins and in-laws. This includes persons who the child considers a relative, such as a godparent or significant others whom the child claims as kin, who may also be considered as a placement resource.

Residential Treatment - Placement of children in state custody in facilities licensed to provide psychiatric and/or behavioral health care on an acute or long-term basis.

Respite Care - The temporary ease of the responsibilities of a person who provides for the care of another. Respite may also be used for children to ease stressful situations.

School of Origin - The school in which the child was enrolled at the time of placement in foster care.

Sex Trafficking Victim - A victim of the recruitment, harboring, transportation, provision, or obtaining of a person for the purpose of a commercial sex act.

Sibling - Any individual who the child considers to be a sibling or an individual who satisfies at least one of the following conditions with respect to a specific child: 1) The individual is considered by state/tribal law to be a sibling of the child; 2) The individual would have been considered a sibling of the child under state/tribal law but for a termination or other disruption of parental rights, such as the death of a parent.

Specialized Family Care - Foster/adoptive family care provided through private agencies for children with mental retardation and/or developmental disabilities that are in the state's custody as a member of the Medley class or is considered Medley-at-Risk.

Specialized/Therapeutic Foster/Adoptive Care - A service that combines the benefits of the protection, support and nurturing of a family foster/adoptive care setting with the benefits of treatment services provided by the agency and foster /adoptive parents. Specialized foster/adoptive care is designed to serve children with a variety of issues such as emotional/behavioral disturbance, psychiatric diagnoses, delinquency, developmental disorders, intellectual functioning deficiencies, and medical disorders.

State Custody - Assignment of a child into the legal custody of the Department of Health and Human Resources. Children may enter into the custody of the Department through court ordered child abuse and neglect proceedings, through the juvenile justice system, or by voluntary placement or relinquishment by the parents and voluntary placement by a child age eighteen to twenty-one (18-21).

State Ward - A child who has had all parents' rights terminated either by legal action, relinquishment or death.

Subsidized Adoption - The provision of short term or ongoing financial and/or medical assistance for the child with identified special needs which may be required in order to enable the adoptive placement of that child.

Transition Plan - A personalized plan that must be developed no later than 60 days after a youth reaches age 14 years. The plan is developed collaboratively by the youth, the youth's casework, and appropriate family but must be guided and detailed by the youth. The plan must determine the needs of the youth including but not limited to; education, health insurance, housing, and employment services; and the plan must be developed to address those needs to assure that the youth reaches their full developmental potential in transitioning into adulthood.

Transitional Living - Children over the age of fourteen (14) in foster care must be taught the skills needed to become a successful, self-sufficient adult. These skills must be part of the child's service plan regardless of the type of placement. Children over the age of seventeen (17) may be allowed to live semi-independently

in their own households in the community prior to discharge from the foster care system. Youth who are placed in a transitional living apartment have the supervision and services available to them to ensure that their needs are being met.

Transitioning Adult - An individual with a transfer plan to move to an adult setting who meets one of the following conditions: (1) Is eighteen (18) years of age but under twenty-one (21) years of age, was in departmental custody upon reaching eighteen (18) years of age, and committed an act of delinquency before reaching eighteen (18) years of age, remains under the jurisdiction of the juvenile court, and requires supervision and care to complete an education and or treatment program which was initiated prior to the eighteenth birthday. (2) Is eighteen (18) years of age but under twenty-one (21) years of age, was adjudicated abused, neglected, or in departmental custody upon reaching eighteen (18) years of age and enters into a contract with the department to continue in an educational, training, or treatment program which was initiated prior to the eighteenth birthday.

1.7 Legal Basis for Foster Care

Foster care is a complex array of services for thousands of children provided through dozens of service providers in multiple placement settings coordinated by hundreds of social service staff. Because of this complexity, there are many laws and regulations that determine how foster care services are provided to children and their families.

1.7.1 State Statute

Under [§49-1-106](#) of the West Virginia State Code, the Department of Health and Human Resources is empowered to administer a foster care program for dependent and neglected children. This allows the Department to accept custody of children and place them outside of their families of origin in order to protect and care for them. When children are in foster care, the Department assumes part or all of the responsibility for children that ordinarily rests with the parents. If parental rights have not been terminated, it is the responsibility of the Department to help parents stay involved in their children's lives by exercising their remaining rights and responsibilities concerning their children.

1.7.2 Federal Regulations/Legislation

- a) [The Child Abuse Prevention and Treatment Act \(CAPTA\), originally enacted in 1974 in 1974 \(P. L. 93-247\)](#) and amended most recently and re-authorized on October 3, 1996, by the [Child Abuse Prevention and Treatment Act Amendments of 1996 \(P. L. 104-235\)](#). CAPTA provides Federal funding to States in support of prevention, assessment, investigation, prosecution, and treatment activities and

also provides grants to public agencies and nonprofit organizations for demonstration programs and projects.

- b) [*The Indian Child Welfare Act of 1978 \(P. L. 95-608\)*](#) mandates that the placement of American Indian children be governed by their tribe, whose authority was legislated by the United States government. By this Act, tribes are given the authority to care for Indian children, to intercede in court cases regarding adoptive placement of Indian children, and to place Indian children with tribal members or with members of other tribes.
- c) [*Public Law 96-272, the Adoption Assistance and Child Welfare Act of 1980*](#) was enacted to require states to develop foster care policies and practices that conform to specific standards of casework practice. This federal law discourages excessive reliance on foster care placement and promotes the greater use of services to assist and rehabilitate families, preventing out of home placements.
- d) [*Omnibus Budget and Reconciliation Act of 1993 \(P. L. 103-66\)*](#) The Family Preservation and Family Support Services Program was enacted as part of the Omnibus Budget and Reconciliation Act of 1993, to authorize funding for Title IV-B, Subpart 2, Family Preservation and Support Services programs.
- e) [*The Multiethnic Placement Act of 1994*](#) as part of the [*Improving America's Schools Act \(P. L. 103-382\)*](#) removed barriers to permanency for children in foster care waiting for permanent homes, and to ensure that adoption and foster placements are not delayed or denied based on race, color or national origin.
- f) The Removal of Barriers to Interethnic Adoption (IEP) provisions included in the [*Small Business Job Protection Act*](#) which amended MEPA (P. L. 104-188) to not allow placement decisions to be based on race, color or national origin.
- g) [*The Personal Responsibility and Work Opportunities Reconciliation Act of 1996 \(P. L. 101-193\)*](#) requires states to give preference to an adult relative over a non-relative adult caretaker when determining a placement for a child in foster care provided that the relative meets all foster home standards.
- h) [*The Adoption and Safe Families Act of 1997 \(PL 105-89\)*](#) ensures that children's safety is the paramount concern of all child welfare decisions and amends federal regulations and law so that children are moved through the child welfare system into permanent placements.

- i) [The Foster Care Independence Act of 1999 \(P. L. 106-169\)](#) was enacted to provide States with more funding and greater flexibility in carrying out programs designed to help children make the transition from foster care to self-sufficiency.
- j) Titles IV-B and IV-E of the Social Security Act contain regulations on how states must provide foster care services. These regulations are incorporated into the policies and procedures of the Department.
- k) [Fostering Connections to Success and Increasing Adoptions Act of 2008\(P.L. 110-351\)](#) promotes permanent families through additional funding for relative guardianship and adoption programs. The legislation also emphasizes the importance of placing children with relatives by allowing waivers of non-safety standards for relative/kinship providers and by awarding Family Connection Grants.

1.7.3 State Consent Decrees

- a) Gibson vs. Ginsberg is a consent decree which addresses case work practices in child abuse and neglect cases and specifies the circumstances in which children may be removed from their homes. Most of the provisions of this decree can be met by following the requirements in Child protective services policy including the Legal Requirements and Processes Child Protective Services policies which are on line in FACTS and by meeting the requirements in the Court Rules issued by the Supreme Court.
- b) Medley vs. Ginsberg required the development of a system of community-based services which “*allow mentally delayed or developmentally delayed people to live in the communities rather than institutions.*”
- c) Hartley vs. Ginsberg decree is similar to the Medley decree in that it requires the state to develop community services for mentally ill adults and children.
- d) Sanders vs. Panepinto decree mandates that foster children participate in the Early, Periodic, Screening, Diagnosis and Treatment (EPSDT) program for health care services. (EPSDT is now known as Healthcheck.)

1.7.4 Federal Supreme Court Decisions

The Yokum decision does not allow states to discriminate against relative/kinship care providers in placement decisions in cases where the state has custody of a child in foster care.

1.8 How Children Enter Foster Care

There are seven (7) separate avenues defined by statute through which children may enter foster care. Each requires specific actions by the parents, child, legal system, and the Department.

- a) A parent may request temporary help in caring for their child while a family crisis is resolved. (Voluntary Placement)
- b) A parent may request help in meeting the child's physical or mental health needs. (Voluntary Placement)
- c) Child Protective Services or law enforcement may take a child into emergency custody or a petition may be filed alleging abuse/neglect after completing an assessment of the family situation that finds the child unsafe. (Emergency Custody/Temporary Custody)
- d) A status offense has brought the child to the attention of the juvenile court. (Temporary Custody)
- e) The child has been charged and/or adjudicated as a delinquent for engaging in criminal behavior. (Temporary Custody)
- f) A former foster care youth age eighteen (18) or older may decide to continue living as a foster child provided that the youth meets one of the following conditions;
 - the child is completing secondary education or a program leading to an equivalent credential;
 - the child is enrolled in an institution which provides post-secondary or vocational education;
 - the child is participating in a program or activity designed to promote, or remove barriers to, employment;
 - the child is employed for at least 80 hours per month; or
 - the child is incapable of doing any of the above described activities due to a medical condition.
- g) The youth signs his consent to continue to receive foster care services through the SS-FC-18 contract.

1.9 Foster Care Candidacy

A child is considered to be a candidate for foster care if they are at imminent risk of removal from their home, absent effective preventative services. A child or youth is at imminent risk of removal from the home if the state is pursuing removal or attempting to prevent removal by providing in-home services. A child or youth

is not a candidate for foster care if the planned out of home placement for the child or youth is an arrangement outside of foster care, such as a detention facility.

1.10 Voluntary Placement

Under the provisions of ([§49-4-116](#)) the Department is authorized and empowered in its discretion to accept children for care from their parent or parents, guardian, custodian or relatives, and to accept the custody of children committed to its care by the courts.

A parent may voluntarily request placement of their child into foster care for a specific period of time when the parent is temporarily incapacitated or there exists circumstances which prohibit the child remaining in his own home.

In general, the purpose of a SS-FC-4 or voluntary placement agreement (VPA) is to provide a temporary placement for a child whose parent(s) are unable to care for the child for a limited period of time. As the name implies, voluntary placement agreements are expected to be short-term, temporary placement arrangements.

Situations under which a VPA may be used include the following:

- a)** Mental or physical illness of one or both of the parents
- b)** Death of one parent and the inability of the surviving parent to provide care for the child for a determined period of time.
- c)** A single parent who requests temporary placement for a child while considering whether to raise him or relinquish the child for adoption.
- d)** The foster child who becomes a parent while in foster care and the child cannot be placed in the same placement with the minor parent.
- e)** A single parent who is active in the military and has been deployed without family or resources to provide care for the child/children.
- f)** Parental incarceration where no abuse and/or neglect issues are present and the parent is unable to identify an appropriate adult to provide care to the child.

The decision to use a VPA in situations other than those listed above must be approved by the Regional Program Manager or his/her designee.

The decision to accept a voluntary placement request from a parent is discretionary on the part of the Department. The worker must do the following when accepting a voluntary placement contract:

- a)** Thoroughly evaluate all such requests to determine that foster care is the best living arrangement for the child.

- b)** If a voluntary placement is requested and services are available to alleviate the need to place the child in out-of-home care, the worker will make the caretaker aware of these services and utilize alternatives to placement.
- c)** According to federal regulations, it is not permissible under any circumstances to accept the voluntary placement of an infant of a foster child if the child is to be placed in the same foster home or group/residential agency as the minor parent. For those infants placed in the same foster home or group/residential agency as their minor parent who is in foster care, the costs of care for this child must be included in the foster care maintenance payment made for the parent. Children of minors in foster care are eligible for medical assistance under Medicaid through application with the Office of Family Support.
- d)** The parent or legal guardian who has custody of the child must sign the SS-FC-4 Agreement for Foster Care contract. If both parents share custody, both must sign the agreement. If custody is received from a guardian of the child, proof that the guardian has legal authority to sign the document must be provided and attached to the agreement. The worker will reference the agreement in FACTS document tracking.
- e)** Supervisory approval of the voluntary placement must be obtained and the document notarized. The agreement should be approved and signed by the Regional Director or designee.
- f)** A copy of this agreement is given to the parents or guardian and a copy is placed in the family's record.
- g)** When a voluntary placement is requested the worker will complete a "Receive Service" intake in FACTS with "Foster Care" selected as the case type.
- h)** The VPA must be documented on the custody status screen in FACTS. The reason for placement as well as removal information and reasonable efforts documentation must be completed on the placement child removal screen in FACTS.
- i)** The child must be placed in the least restrictive, most family like placement available to meet the child's needs.
- j)** The Worker must continue to monitor and assess the child's placement to ensure the child is safe, receiving adequate care, and that his/her needs are being met.
- k)** If at any time there is an indication the child may have been abused or neglected while in the care of their parent(s) or custodians, or it is believed the child may be unsafe at the time the voluntary placement agreement expires or revocation has been requested, the worker must immediately consult with their supervisor and refer the family to Child Protective Services(CPS) for assessment.

- l)** If a CPS assessment determines the child would be unsafe if returned to the parent(s) or custodian(s), the Department must petition the Circuit Court for custody of the child through the appropriate Child Protective Services proceedings.
- m)** Within ninety (90) days of signature, the worker must petition the Circuit Court to review the VPA as required by [§49-4-116](#). When using the VPA, the worker should re-evaluate the situation at least forty-five (45) days prior to the ninety (90) day expiration date. The petition should include the child's situation, and the circumstances that gave rise to the placement agreement. If the Department intends to extend the VPA the worker must file a copy of the child's case plan with the court as directed in West Virginia State Code.
- n)** The court must then determine if continued voluntary placement is in the best interests of the child.
- o)** If such a determination is made, the court must enter an order containing the statement that it is in the child's best interest to remain in care, specify under what conditions the child's placement shall continue, and whether or not the Department has made reasonable efforts to preserve and to reunify the family.
- p)** If the parent requests return of custody prior to filing the petition for court review, the parent must submit a written request for revocation to the Social Worker. If possible, the Social Worker will convene a meeting with the parent the same day the revocation request is received. The worker will assess the current situation to determine if the circumstances requiring voluntary placement have been resolved and if referral(s) for community services would be beneficial. After supervisory consultation custody of the child shall be returned to the parent. The Social Worker must convene the meeting with the parent, consult their supervisor and facilitate the return of the child/children to the parent's custody within seventy-two (72) hours of the receipt of the written request for revocation.
- q)** The worker must enter the end date of the VPA on the Custody Status Screen.
- r)** If a parent/custodian requests return of custody after the petition for the ninety (90) day review hearing has been filed, it will be the ultimate decision of the court as to whether or not continuation in placement is in the best interest of the child.
- s)** All services offered and provided to the family during the effective period of the SS-FC-4 and the results of such services must be documented in the case record.

The parent or guardian who voluntarily places a child into foster care must assume the following responsibilities for their child:

- a)** Explaining the placement plan to the child as well as the reasons for the placement.

- b)** Providing as much of the financial responsibility for the child as possible.
- c)** Informing the worker of their whereabouts and any significant changes in their circumstances.
- d)** Working toward a permanent plan for the child's care.
- e)** Visitation through arrangements made with the child's worker.

The following rights are retained by the parent:

- a)** The right to consent to marriage.
- b)** The right to consent to enlistment in the armed forces.
- c)** The right to consent to adoption of the child.
- d)** The right to represent the child in legal actions.
- e)** The right to reasonable visitation with the child unless specifically restricted by a court order.
- f)** The right to determine the child's religious affiliation until the child is able to make the determination.
- g)** The right to consent to elective surgery.
- h)** The right to guardianship of the child's estate unless vested elsewhere.

While the following rights are surrendered by the parent or guardian who voluntarily places a child into foster care, the child's worker should consult and/or inform the parent about:

- a)** The right to select the foster home or facility in which the child will be placed. The parents' wishes may be considered in the Department's placement decision.
- b)** The right to remove the child directly from the foster home or facility where he is placed. The parent has the right to request that his child be returned to him at any time but must allow time for the child to be removed by the Department.
- c)** The right to visit the child when the parent chooses. The time and frequency of visits must be arranged through the child's worker to suit the convenience of all parties involved.
- d)** The right to take the child away from the foster home or facility without prior permission from the Department.
- e)** The right to interfere with the authority to care for the child who has been delegated to the foster home or facility. The parent has the right to make a complaint about the child's care to the child's worker.
- f)** The right to consent to trips for routine social, educational, or medical services.

- g) The right to consent to travel for educational or cultural purposes or to take a vacation with the foster parents or with other residents of a group home or residential facility.
- h) The right to consent to routine medical care such as immunizations, EPSDT screenings and routine medical examinations.
- i) The right to consent to major medical care in an emergency situation.

1.10.1 Voluntary Placement (SS FC-4) Child Abuse/Neglect or Juvenile Proceeding

In general, the purpose of a voluntary placement agreement is to provide a temporary placement for a child whose parent(s) are unable to care for the child for a limited period of time. As the name implies, voluntary placement agreements are expected to be short-term, temporary placement arrangements.

The purpose of Child Protective Services and one of the primary purposes of Youth Services is to protect vulnerable children from harm. By their very nature voluntary placement agreements provide limited protection to vulnerable children. These agreements can be terminated at any time by the parent. The parent can request the immediate return of their child whether or not the parent is able to provide for the care of the child.

Because of the limited protections offered by a VPA the Department has prohibited their use in cases where abuse and/or neglect is/was present that poses concern for the child's safety. In addition, the Department **strongly discourages** the use of voluntary placement agreements in juvenile proceedings. If it is determined by the Department a child is unsafe in their home and removal is the only option for assuring the safety of the child and the child's family, then the preferred method for a transfer of custody is the initiation of the appropriate court proceeding.

Occasionally a parent may be involved with CPS and/or Youth Services, but the children have safely remained in the home or were returned to the parent after CPS/Youth Services and court intervention. A VPA may be appropriate in these **limited** situations if the parent's inability to care for the child is not due to abuse and/or neglect or safety concerns. For example, a pregnant single mother whose children were removed from her home due to physical abuse has regained custody but has **no** resources to care for her children while giving birth and the subsequent hospital stay. A VPA may be appropriate in this situation. The worker should refer to the list of circumstances (listed above) under which a VPA would normally be accepted. The decision to use a VPA in these situations should involve careful deliberation and consideration of the circumstances given the limited protection offered by a VPA.

Whenever a worker is considering the use of a voluntary placement agreement in a juvenile proceeding or in abuse or neglect cases the worker must make the following evaluations and must take the following actions:

- a) A VPA must never be used as a substitute for the filing of a petition in a case of child abuse or neglect. If the Prosecuting Attorney will not file a petition then the worker must use the Dispute Resolution procedures contained in [§49-4-501](#).
- b) All requests for a VPA in abuse or neglect cases or in a juvenile proceeding must be reviewed by and approved by a supervisor. The supervisor must consult with the Regional Program Manager or his/her designee for approval and signature. **Under no circumstances may a VPA be used in situations where a child is unsafe due to abuse and/or neglect.**
- c) All Voluntary Placement Agreements must be executed according to the provisions described in Section 1.10 above. It is of vital importance that the VPA be reviewed by the court as described in Section 1.10.
- d) At the time the voluntary placement expires, or at any time the parent requests a return of custody then the worker must assess the suitability of the return according to Section 1.10.

1.10.2 Voluntary Placement Medley (SS-FC-4A)

The SS-FC-4A, Voluntary Placement Agreement - Medley, is designed to serve as the contract between the Department and the parents of the intellectually disabled and/or developmentally delayed child who is to be placed in foster care. It accommodates those individuals identified as Medley class members and those determined to be At-Risk of becoming Medley class members. Children placed through the SS-FC-4A are considered to be in foster care and the same regulations that apply to children placed into foster care via the SS-FC-4 also apply to these children.

Voluntary placements for children that are intellectually or developmentally delayed may be used in circumstances where the parent is unable to adequately or appropriately care for the child.

1.11 Voluntary Relinquishment (SS-FC-47 and SS-FC-47A)

Voluntary relinquishment is the voluntary termination of the rights of a parent to a child. A child fourteen (14) years of age or older, or otherwise of an age of discretion as determined by the court, may object to the termination of his parent's parental rights.

Parents may request that their parental rights be terminated through a voluntary relinquishment under a number of circumstances such as:

- a) The parents of an intellectually or developmentally delayed child cannot manage the child's needs.
- b) A single parent wishes not to raise her child after birth.

- c)** The parents are not able to physically, mentally or emotionally care for their child.

The worker must consider the following issues before granting a voluntary relinquishment:

- a)** Documentation of prior services
- b)** Parents' understanding of their decision and the appeal process
- c)** The permanency plan for the child
- d)** Efforts made to maintain the child in the home
- e)** Any legal barriers that may be in place
- f)** The special needs of the child
- g)** Child's relationship with parents, siblings, significant others
- h)** What resources are readily available to achieve the child's permanent plan
- i)** What placement resources need to be developed to achieve the permanent plan for the child
- j)** The child's agreement to the plan if over age fourteen (14)

The worker must do the following when accepting a voluntary relinquishment:

- a)** If a parent wants to relinquish a healthy child under the age of eight (8) and there is no protective service case open for the family and there are no siblings of the child already in foster care, the worker must refer the parent to a licensed adoption agency. If there are siblings in foster care, the child's worker must amend the original petition and include this sibling. Under this circumstance, the Department should not take a voluntary relinquishment of the child in questions. In addition, the Department should not accept the voluntary relinquishment of a child that does not have one of the following special needs:
 - 1.** The child is age eight (8) or older,
 - 2.** The child is a member of a sibling group that is to be placed together,
 - 3.** The child is a member of a racial or ethnic minority and over the age of eight (8),
 - 4.** The child has an emotional, physical or mental disability.
- b)** The worker must document reasons why the relinquishment is being requested, the counseling and services provided prior to and following the acceptance of the relinquishment, and the parent's understanding of the action being taken.
- c)** The Permanency Placement Review Team comprised of the adoption worker and supervisor, Homefinding Specialist and supervisor, child's worker, etc.

must evaluate the request for voluntary relinquishment to determine the appropriateness for such action and make placement recommendations.

- d) The Regional Director or his designee must approve the relinquishment.
- e) The agreement must be notarized and three (3) originals are required. One is given to the parents, one is kept in the child's record, and one becomes part of the court record at the time of the adoption of the child.
- f) The child's worker must document in FACTS on the contact screen, in Document Tracking, and save the SS-FC-47/A in the client's file cabinet.
- g) A parent has a right to revoke a voluntary relinquishment within a period of seventy-two (72) hours after the agreement was signed. A relinquishment should not be accepted until seventy-two (72) hours after the birth of an infant as defined by [§48-22-303](#).
- h) If the parent is under eighteen (18) years of age, a Guardian Ad Litem should be appointed to represent the interests of the consenting minor's parent and the consent must be reviewed and approved by the circuit court. If the parent is not competent to make this decision due to a physical or mental disability, the relinquishment must be approved by the circuit court.

1.12 Court Ordered Custody

Whenever a child enters foster care, the child's worker must meet certain requirements regarding the child, his caretakers, and the court. The processes pertaining to the transfer of a child's legal custody from the parent to the Department are restricted to the following:

- a) A child may enter foster care as the result of a court order granting the Department temporary custody as defined under [§49-4-602](#).
- b) In certain circumstances, a child may be taken into emergency custody by child protective services staff as defined by [§49-4-303](#) or by law enforcement officers as defined by [§49-4-301](#).
- c) A child may be placed in foster care if the youth is a status offender, is charged with delinquency, or is adjudicated delinquent for conduct that would not be considered criminal if committed by an adult as defined by [§49-4-701](#).
- d) A child may enter foster care as a result of delinquent behavior which requires that he be placed in the least restrictive environment available where possible in order to avoid placement in a correctional facility.

1.13 Emergency Placement

State statute, [§49-4-303](#), authorizes Child Protective Services Workers to take a child into custody absent a court order in certain limited circumstances. According to the statute:

- a) The child must be in an emergency situation which constitutes imminent danger;
- b) A worker must have personally witnessed that the child is in imminent danger; and,
- c) The worker must have probable cause to believe that the child will suffer additional child abuse or neglect or be removed from the county before a petition can be filed and temporary custody can be ordered.

Child Protective Services Social Workers may also take a child into custody absent a court order when a child is abandoned and all reasonable efforts to make inquiries and arrangements with neighbors, relatives, and friends have been exhausted and the Department has explored the possibility of placing a worker in the home to care for the child until the parent returns.

Natural disasters may create abandonment circumstances. If a child or children should appear to be abandoned due to a natural disaster, emergency or accident the worker will assume emergency custody of the child/children and follow the steps of filing a ratification. Once the ratification is granted, placement can be sought.

- When the emergency custody is granted then the worker will initiate placement of the child in emergency family care, foster/adopt care or emergency shelter care.
- If placement with family members, foster care or emergency shelter is not possible during a natural disaster or emergency situation, the child/children will be taken to an established disaster relief site by the worker.
- Workers will provide supervision to the unaccompanied children at the disaster relief site as needed.
- The worker will see that the children's basic needs are met during the disaster or emergency situation to the best of their ability.

When a request for emergency custody is ratified, the worker can retain custody of the child until the end of the next two judicial days unless a petition requesting temporary custody pending a hearing has been filed and custody of the child has been transferred to the department by court order.

- If the child's parents or family members are located before the end of the two judicial days, the child may be returned to the family at that time.
- If the family cannot be located, the worker will file the petition requesting temporary custody.

- If the family is located after the DHHR has requested and received custody of the child/children, the worker can return the child/children to the parent or family members and then request that the petition requesting custody be dismissed at the first court hearing.

Under certain circumstances a worker may determine that the implementation of an out-of-home safety plan requires the immediate and involuntary removal of a child from the home. State statute, [§49-4-602](#), provides the worker the opportunity to file a petition requesting an immediate transfer of custody until a hearing can be held when:

- a) There exists imminent danger to the physical well-being of the child; and
- b) There are no reasonably available alternatives to the removal of the child.

Law enforcement may take custody of a child believed to be abused or neglected without a court order if one of the following conditions occurs:

- a) The child is abandoned; or
- b) The child requires emergency medical treatment by a physician and the child's parent or guardian refuses to permit such treatment or is unavailable to consent.

(See Child Protective Services Policy for guidelines detailing the policy and procedures for emergency placement.)

When the Department takes emergency custody of a child or receives custody of a child from law enforcement, the child's worker will enter the custody information on the custody status screen in FACTS. The child's worker will also document removal information including the type of removal and reasonable efforts to prevent removal on the placement child removal screen in FACTS.

1.14 Temporary Custody

1.14.1. Child Protective Services

In Child Protective Services cases, temporary custody is sought when a child is in present danger and there are no family network safety resources available, and/or the parents/caregivers are unwilling to permit the worker to deploy a protection plan. In addition, when a child is determined to be unsafe and an in-home safety plan will not sufficiently protect the child, the Department must arrange an out-of-home safety plan. An out-of-home safety plan must include foster care placement and court jurisdiction.

(See Child Protective Services Policy for specific guidelines on court ordered custody.)

1.14.2. Youth Services

In juvenile cases the court may order a youth who is an alleged status offender into the temporary custody of the Department. The court may also place a juvenile in the temporary custody of the Department in lieu of placing the youth in a detention facility following a preliminary hearing.

When temporary custody has been granted, the worker must do the following:

- a)** Provide services to the youth and his family that are designed to develop skills and supports within families and to resolve problems related to the juveniles or conflicts within their families in accordance with [§49-4-712](#);
- b)** Petition the court for a valid court order, if necessary, to enforce compliance with a service plan or to restrain actions that interfere with or defeat a service plan; or
- c)** Petition the court for a valid order to place a juvenile out of home in a non-secure or staff-secure setting and/or place a juvenile in the custody of the Department.
- d)** The worker must make every effort to place a youth in community-based facilities which are the least restrictive alternatives appropriate to meet the needs and safety of the juvenile and the community.

(See Youth Services Policy for specific guidelines on court ordered custody.)

The following rights and responsibilities are retained by the parent when the Department has temporary custody of a child:

- a)** The right to consent to marriage.
- b)** The right to consent to enlistment in the armed forces.
- c)** The right to consent to adoption of the child.
- d)** The right to represent the child in legal actions.
- e)** The right to reasonable visitation with the child unless specifically restricted by court order.
- f)** The right to determine the child's religious affiliation until the child is able to determine this.
- g)** The right to consent to elective surgery.

h) The right to guardianship of the child's estate unless vested elsewhere.

i) The responsibility to provide for the child's financial support.

The Department has the following rights and responsibilities for a child in the temporary custody of the Department:

a) The right to determine the child's place of residence. (For youth who come into the custody of the Department via juvenile proceedings, the court has the ultimate authority in determining placement.)

b) The right to consent to trips for routine social, educational, or medical services.

c) The right to consent to travel for educational or cultural purposes or to take a vacation with the foster parents or with other residents of a group home or residential facility, as long as the trip is within the state. Any travel out-of-state must be approved by the child's parent/guardian's or by the court, if parental rights have not been terminated.

d) The right to consent to routine medical care such as immunizations, EPSDT Health Check screenings, and routine medical examinations.

e) The right to consent to major medical care in an emergency situation.

1.15 Permanent Custody/Guardianship

Permanent guardianship of a child applies when a parent's rights to a child have been terminated by the court or through a voluntary relinquishment. If both parents' rights have been terminated, then the child is considered a state ward. If the state ward's permanency plan is adoption, both parents' rights must be terminated either by a voluntary relinquishment or court order.

If the termination of parental rights is via a court order, the court order shall specify all the parental rights to the child including the right to consent to adoption, marriage, visitation, etc., have been transferred to the Department. Any obligation the parents had to financially support their child prior to termination must be addressed by the courts.

When a circuit court terminates parental rights either through an involuntary termination or a voluntary relinquishment, it must ordinarily require the terminated parent to continue to pay child support for the child pursuant to the Guidelines for Child Support Awards. If the court finds that it is not in the best interest of the child to order the parent to pay support pursuant to the Guidelines, the court may disregard the Guidelines, but must make specific findings on the record regarding such reasoning. The court also reiterated prior rulings that held obligation of

support is owed to a child by both parents until such time as the child is placed in the permanent legal custody of another guardian/parent/obligor, such as in adoption.

The age of the child should be considered in terminating a parent's rights. If a child is fourteen (14) years of age or older or otherwise an age of discretion, his parents' rights should not be terminated without his approval. The child should be involved in evaluating the agency's interest and concerns for his future when developing his permanency plan. Whether a child is of an age of discretion is determined by the court.

In accordance with the Adoption and Safe Families Act, a petition must be filed or joined by the state as defined in [§49-4-607](#) to terminate the parental rights of a child who has been in the custody of the Department for fifteen (15) of the most recent twenty-two (22) months. In addition, a petition must be filed to terminate the parental rights of a child if:

- a)** The child has been abandoned;
- b)** The court has determined that the parent has committed murder or voluntary manslaughter of another of his or her children;
- c)** The court has determined that the parent has attempted or conspired to commit such murder or voluntary manslaughter or has been an accessory before or after the fact of either crime;
- d)** The court has determined that the parent has committed unlawful or malicious wounding resulting in serious bodily injury to the child or to another of his or her children; or
- e)** The parental rights of the parent to a sibling have been terminated involuntarily.

The Department may determine not to seek termination of parental rights:

- a)** At the option of the Department the child has been placed with a relative;
- b)** The Department has documented in the child's case plan that there exists a compelling reason that filing a petition would not be in the best interest of the child; or
- c)** The Department has not provided, when reasonable efforts to return a child to the family are required, the services to the child's family the Department deems necessary for the safe return of the child to the home.

The local offices will annually report to the court the current status of all children the Department has been granted permanent guardianship of who have not been adopted. The report, in letter form, is to be directed to the circuit court through the prosecuting attorney's office. The child's name, birth date, legal status, and placement status are to be reported. Any changes from the reporting for the previous year are also to be noted in the letter to the court.

1.16 Goals for Children in Foster Care

Entering foster care is a traumatic event for any child, no matter what circumstances lead to the removal from their caretakers. The Department strives to provide the best care possible for every child who is in the custody of the state. The Department works to meet the following goals for each child in foster care:

- Protection by a family of his or her own, and be provided readily available services and support through care of an adoptive family or by plan, a continuing foster family;
- Nurturing by foster parents who have been selected to meet his or her individual needs, and who are provided services and support, including specialized education, so that the child can grow to reach his or her potential;
- A safe foster home free of violence, abuse, neglect, and danger;
- The ability to communicate with the assigned social worker or case worker overseeing the child's case and have calls made to the social worker or case worker returned within a reasonable period of time;
- Permission to remain enrolled in the school the child attended before being placed in foster care, if at all possible;
- Participation in school extracurricular activities, community events, and religious practices;
- Communication with the biological parents. Communication is necessary if the child placed in foster care receives any immunizations and if any additional immunizations are needed, if the child will be transitioning back into a home with his or her biological parents;
- A bank or savings account established in accordance with state laws and federal regulations;
- Identification and other permanent documents, including a birth certificate, social security card, and health records by the age of sixteen (16), to the extent allowed by federal and state law;
- The use of appropriate communication measures to maintain contact with siblings if the child placed in foster care is separated from his or her siblings; and
- Meaningful participation in a transition plan for those transitioning out of foster care.

Section 2

INTAKE

2.1 Placement Standards/Regulations

2.1.1 Child Assessment Prior to Placement

The individual child's needs must be assessed prior to placement, if possible, so that an appropriate living situation can be chosen. The child assessment form (SS-FC-119A) for voluntary placement and youth services children or the family assessment for child protective services must include the following:

- a)** The presenting problem necessitating the removal of the child;
- b)** A summary of services that have previously or are currently being provided to address the problem;
- c)** Current educational information;
- d)** Current medical information;
- e)** A history of separation, loss, and maltreatment;
- f)** The child's physical, emotional, behavioral, and developmental characteristics; and
- g)** The problems that are to be addressed in the case plan.

The child's worker will document the necessary information on the child assessment screen in FACTS for voluntary placement and youth services cases or on the family assessment screen for children who come into foster care through child protective services. Education information will be documented on the child's employment/education screen. Immunization and health information will be documented on the child's medical screens. The child's characteristics will be documented on the child's client characteristics screen in FACTS.

2.1.2 Child's Placement Needs

When it becomes necessary to place a child into foster care, the selection of the placement resource (relative home, foster/adoptive home, group home, residential facility, or institution) will depend on the individual child and his situation. The following issues must be considered when making a placement decision:

- a)** The child's age;
- b)** The child's readiness to accept and participate in life in a different living situation;
- c)** The child's wishes, if appropriate;
- d)** The child's ability to perform the necessary daily living activities of grooming, eating, communication, etc.;
- e)** The family's dynamics and the relationship between the child and his family and community;

- f) The child's psychological and emotional characteristics and development;
- g) The child's medical needs (foster children with respiratory issues/illnesses **cannot** be placed with foster/adoptive parents who smoke);
- h) Child's capacity to attend community schools and his ability to live in a community setting;
- i) The placement that is the least restrictive (most family-like) setting to meet the child's needs;
- j) The placement that is closest in proximity to the family to facilitate frequent visitation;
- k) The placement that is in closest proximity to the child's school, if applicable;
- l) The goal of the placement and identification of specific actions to be taken to correct the conditions that made the placement necessary;
- m) Anticipated length of the placement; and
- n) The permanency plan and the concurrent permanency plan for the child.

The child's worker will document the child's placement needs in the placement recommendation screen, the enter/exit placement screen, the placement safety evaluation screen, the placement plan and permanency plan screens, and the placement evaluation screen in FACTS.

2.1.3 Kinship/Relative Placement

The child's worker must, according to federal law, identify and review the child's relatives as possible placement resources before a child is placed into a non-relative foster/adoptive home or group/residential facility. Any person related to the child by blood or marriage, including cousins and in-laws, should be considered for kinship/relative care. A person the child considers a relative, such as a godparent or close family friend, may also be considered as a placement resource. **Please see Section 2.4.2 Relative/Kinship and Relative Foster/Adopt Placements for a detailed description of the Relative/Kinship placement process.**

2.1.4 Sibling Placements

State statute, [§49-4-111](#) requires the Department to place siblings together when placing a child in foster care that also has siblings in care. Siblings are defined by [§49-1-204](#) as children who have at least one biological parent in common or who have been legally adopted by the same parents or parent. Workers should consider what is in the best interest of the children. If children within the home consider themselves siblings, efforts should be made to place them together.

In all cases in which a child is to be placed, the worker must ask the child's caretakers, at the time of placement, if they have other children in foster care or other children for whom their rights have been terminated. If so, the worker must do the following:

- a) Notify the foster or adoptive parents of the sibling that this child is available for placement;
- b) Discuss with the foster or adoptive parents their interest in caring for this child;
- c) Refer the family to the Homefinding Unit, or ICPC if the family resides out of state, as soon as possible if the foster or adoptive parents agree to care for the child entering foster care; and
- d) Document in the child's case record in FACTS the results of all contacts made to place children with their siblings and the reasons why siblings are not placed together on the permanency plan screen.

In cases of imminent danger, it may not be possible to initially place a child with his or her siblings. Every effort must be made to reunite siblings who are in foster care unless such a placement would not be in the best interest of one of the children. In such a case, the child's worker must ask the court to approve the separate placement of the siblings and judicially determine, based on clear and convincing evidence that it is not in the child's best interest to be placed in the same foster or adoptive home as his siblings and for the court to therefore sanction the sibling separation.

2.1.5 Multi-Ethnic Placement Act

Enacted by Congress in 1994, the [Multiethnic Placement Act \(PL 103-382\)](#) as amended by the [Interethnic Adoption Provisions in 1996 \(PL 104-188\)](#) forbids the Department from delaying or denying a foster or adoptive placement on the basis of the race, color, ethnicity, or national origin of the prospective foster parent, adoptive parent or the child involved. Therefore, race cannot be considered as a basis for which placement decisions are made.

A child may be placed either with foster or adoptive parents of the same race, color, ethnicity, or national origin or with foster or adoptive parents

of a different race, color, ethnicity, or national origin depending on the prospective parent's ability to meet the child's needs as identified in the child assessment. A parent's wishes on the placement of his child with a family of the same race, color, ethnicity, or national origin cannot be a determining factor for placement. Likewise, placement of a child with a relative must be based on the ability of the relative to meet the child's needs and not based on the relative's similar race, color, ethnicity, or national origin.

2.1.6 Indian Child Welfare Act

The [Indian Child Welfare Act of 1978 \(P. L. 95-608\)](#) requires children of families that have American Indian ancestry to be referred to the tribe, in which ancestry is claimed for child welfare services.

If a child is placed in the custody of the Department and the child or his family is claiming American Indian heritage the worker must do the following:

- a)** If American Indian heritage is uncertain or the American Indian tribe is not known, the worker must review the record and discuss the child's background with the parents to try to discover the child's heritage.
- b)** If the child's background is still unknown, the child's worker must document this information in the child's record on the client information screens in FACTS and that Indian heritage is spurious and/or a tribe cannot be located that can determine if the child is a member of that tribe or eligible for membership in the tribe.
- c)** If a Tribe is identified the worker must refer the child to the tribe for membership determination or membership eligibility.
- d)** If several tribes are suspected contact must be made with each tribe. The child's worker must document that a tribe has been contacted to determine tribal membership.
- e)** If a tribe determines the child is not a member nor eligible for membership, the child's worker must document the response in the child's record.
- f)** If a tribe responds the child is eligible for membership, the child's worker must request application forms. The child's parents must be contacted and the membership in the tribe explained to them.
- g)** If the parent enrolls the child in the tribe's membership, the child's worker must refer the case to the tribe's tribal court if the tribe has exclusive jurisdiction over child welfare matters.

- h) The child's worker must contact the U. S. Department of Interiors Bureau for Indian Affairs to determine if the tribe has child welfare jurisdiction.

2.2 Placement Requirements

When the court grants the Department custody of a child and the child is placed in foster care, the worker must insure that the following placement requirements are met unless they are modified by court order:

- a) Visitation with the child shall be allowed on a regular basis at any reasonable time requested by the parents or legal guardian. Visitation can only be limited or denied if there is a likelihood of danger of physical violence to the child or another person, or if custody was obtained because of physical or sexual abuse, and it is determined that it is necessary to deny, limit, or supervise visitation to protect the child. Whenever visitation is denied or limited, the parents must be informed by the worker of the reasons why and the worker must document these reasons in FACTS on the visitation plan screen. **Visitation is never to be limited or denied due to the child's inability or lack of motivation to progress in a placement program's treatment process.**
- b) Children shall only be placed in those facilities which meet the Department's standards for adequate food, clothing, shelter, and supervision as defined by the Department's Homefinding Policy, Child Placing, or Group Residential Licensing regulations. In addition, children shall only be placed in a facility which has no more than the number of children for which it has been approved or licensed.
- c) Children must be placed with siblings whenever possible and in the best interest of the children.
- d) Each infant shall have a crib that meets federal standards for sleeping. At no time will infants share a bed with an adult; they must have their own crib. Foster parents will receive instruction on Safe Sleep during in-service training.
- e) The worker will maintain regular contact with the child and foster placement. The caseworker will contact the child at least once per calendar month or more frequently if needed (See Worker Contacts section for more information concerning worker contacts). Contact must be documented on the client contact screen in FACTS.
- f) When a parent or legal guardian wants to visit their child and cannot make reasonable arrangements to do so, the worker shall arrange the necessary transportation. Visitation must be documented on the family visitation log screen in FACTS.

- g) Phone calls between the parents or legal guardians and the child will be permitted daily at least five days a week at the option of the parent or child. There will be no charge to the parent or child when the child is placed outside the calling area of the parent. Telephone calls may be denied or limited when custody has been obtained because of physical or sexual abuse and denial or limitation of contact is necessary to protect the child. Whenever phone contact is denied or limited, the parents must be informed by the worker of the reasons why and the worker must document this in FACTS on the visitation plan screen. An itemized telephone bill must be presented to the worker for verifications of the expenses incurred in order for the foster parents or the placement facility to be reimbursed through a demand payment in FACTS.
- h) As stated in [WV Code §49-2-1002\(d\)](#).

The individualized program of rehabilitation required by the provisions of subsection (c) of this section shall, for any juvenile in out of home placement, include a plan to return the juvenile to his or her home setting and transition the juvenile into community services to continue his or her rehabilitation.

Planning for the transition shall begin upon the juvenile's entry into the residential facility. The transition process shall begin thirty days after admission to the residential facility and conclude no later than three months after admission.

The Department of Health and Human Resources staff shall, during its monthly site visits at contracted residential facilities, ensure that the individualized programs of rehabilitation include a plan for transition in accordance with this subsection.

If further time in residential placement is necessary and the most effective method of attaining the rehabilitation goals identified by the rehabilitation individualized plan created under subsection (c) of this section, then the department shall provide information to the multidisciplinary team to substantiate that further time in a residential facility is necessary. The court, in consultation with the multidisciplinary team, may order an extension of time in residential placement prior to the juvenile's transition to the community if the court finds by clear and convincing evidence that an extension is in the best interest of the child. If the court finds that the evidence does not support an extension, the court shall order that the transition to community services proceed.

This applies to all children and youth in foster care regardless of how they came into care.

2.3 Preparation of Child for Placement

When a child is to be placed in foster care, he will need the support from his parents and the worker to get through the trauma of the experience.

Before the child is placed the following should occur:

- a) The child's parents, if able, should explain to the child what has occurred in the family which necessitates his placement. The worker must explain the situation to the child if the parents are not able or are not available.
- b) The worker must share information about the proposed placement in order to prepare the child for adjustment to the new surroundings. Information should be given in a forthright and honest manner so that the child and family have a true picture of the placement.
- c) The worker should assure the child that he will see him frequently to talk about how the placement is working and to keep him informed of progress his parents are making.
- d) The child should be allowed to freely ask questions to eliminate or lessen any fears or doubts he may have about the placement.
- e) Pre-placement visits must be conducted, unless it is impossible or causes extreme hardship, in order for the child to feel he has a part in planning for his future and for him to become familiar with the foster family or facility in which he will be placed.
- f) After the pre-placement visit, the worker shall discuss the child's impressions of the visit with him and encourage the expression of any doubts or misgivings.
- g) It is important that his impressions, and especially his fears and misgivings be shared with the prospective family or facility prior to the actual placement.
- h) The child's worker will document the pre-placement or trial visit on the pre-placement/trial visit screen in FACTS.

2.4 Placement Types

2.4.1 Emergency Foster Family Care

For children taken into custody on an emergency basis, emergency shelter foster family care may be the most appropriate placement until a thorough assessment of the child can be completed. Placement in emergency shelter foster family care is limited to a thirty (30) day period. The placement of a child in an emergency shelter foster family may be extended for an additional thirty (30) days if necessary. Emergency shelter foster family care should not, under any circumstances, last for more than sixty (60) days. During this time the child's worker, as part of the Multidisciplinary Treatment Team, must be developing a plan for the child's placement and services to the family.

Emergency placements must be clearly identified as such in FACTS on the child's custody status screen and placement removal screen with

appropriate documentation that emergency custody was obtained following the procedures outlined in Child Protective Services Policy. Emergency shelter foster family care may be appropriate when one of the following conditions exist:

- a) The child is homeless.
- b) The child would suffer serious permanent physical or emotional harm if not placed immediately.
- c) There is no possibility of making temporary arrangements with relatives, neighbors, or friends.
- d) Adequate time is needed to fully assess the child's placement needs to make the most appropriate placement for the child.

2.4.2 Kinship/Relative Placement and Relative Foster/Adoptive Family

Relatives may not be approved as a placement resource until Department staff, or comparable agency staff in another state via ICPC, has assessed the relatives' ability to provide for the care and safety of the child. If Department staff, or comparable agency staff in another state via ICPC, finds that the relative can meet the certification requirements for becoming a foster/adoptive family, the relative may become certified as a foster/adoptive caretaker and receive boarding care each month. According to federal requirements, all relative caretakers who wish to become certified foster/adoptive parents must meet the same certification standards as non-related foster/adoptive parents, however, waivers for non-safety standards may be granted.

If the child's relatives cannot meet the certification requirements as determined by the Homefinding Unit, or comparable agency staff of another state via ICPC, or the child's relatives do not wish to become a certified foster/adoptive provider and receive monthly boarding care, the worker will report this finding to the court and ask for a reconsideration of the placement. If the court or the Multidisciplinary Treatment Team believes that this placement is in the best interest of the child, the child's worker will request that the court transfer legal custody of the child from the Department to the relative at disposition. The child's worker will inform the kinship/relative caretaker of the availability of TANF Child Only grants and assist the caretaker in filling out the necessary paperwork for the Division of Family Support. The child would also be eligible for Medicaid coverage through the TANF program to cover the child's medical needs.

****Note**** When placing a child with a relative/kinship family who does not wish to participate in the process to become a certified foster/adoptive provider, the child's worker is still required to complete a general safety and well-being check of the relative's home, and the Homefinder will follow up

with the completion of the Kinship/Relative Safety Screen form, a fingerprint based state and national criminal background check, and a child protective and adult protective services history check regarding the relative/kinship family.

When a child comes into foster care, placement preference is given to adult relatives over any non-relative caregivers. Placing a child who needs out of home care with a relative is the least restrictive alternative living arrangement since this placement often allows for more interaction with the child's own family and relatives and often results in a less traumatic separation. The child's caseworker must diligently search for relatives within the first thirty (30) days of the child's removal and must identify and provide notice to the following relatives of the child: all adult grandparents, all parents of a sibling of the child where such parent has legal custody of such sibling, and other adult relatives of the child (including any other adult relatives suggested by the parents). These placements are subject to exceptions due to family violence that:

- a)** Specifies that the child has been or is being removed from the custody of the parent or parents of the child;
- b)** Explains the options the relative has under Federal, State, and Local law or Tribal law to participate in the care and placement of the child, including any options that may be lost by failing to respond to the notice;
- c)** Describes the requirements to become a foster family home and the additional services and supports that are available for the children in such a home; and
- d)** If the State/Tribal agency has elected to operate a kinship guardianship assistance program (See Legal Guardianship Policy).

This placement may also occur with anyone that the child considers to be a relative. The worker shall consider the following issues when placement with a relative is being considered:

- a)** If the relative has a criminal history or a substantiated Child Protective Services or Adult Protective Services history.
- b)** Careful evaluation indicates the relative will be supportive of the goals of the placement.
- c)** It appears that the child may be more accepting of separation from his own parents if he were to be placed with a relative with whom he is more familiar.

- d)** The child has formed a positive relationship with the relative and is already familiar with the life style and expectations of the relative's family.
- e)** The child, through placement with a relative, is able to maintain some relationship with his family.
- f)** The child's parents are supportive of the planned placement with the relative and will cooperate in the process.
- g)** An evaluation of the relative's home indicates that it would not perpetuate the same negative family patterns necessitating the removal from the child's own home.
- h)** The geographic proximity of the relative's home allows for continued planned involvement with the child's parents.
- i)** The relatives have the physical, mental, and emotional ability to provide care for the child.

2.4.3 Foster/Adoptive Family Care

In some cases, especially when relative placement resources are non-existent, it may be appropriate to place a child in a non-relative foster/adoptive home. Family foster/adoptive care is a placement option in which services are provided by a person who has been certified to provide care in an out of home living situation. Family foster/adoptive care may be an appropriate placement for a child when:

- a)** No suitable relative or kinship placement is available or can be developed;
- b)** The child can profit by placement in a family setting and in a community where access is available to families, school, friends, and resources;
- c)** The family's situation indicates that the child will be able to return to his own home within a short period of time, or if reunification is not appropriate, that an adoptive family, legal guardian or other permanent placement for a child is being considered.
- d)** The child has been in residential care and placement with a family will ease the transition from residential care to the child's own home or other permanent placement.

2.4.4 Specialized Agency Foster/Adoptive Care

Specialized foster/adoptive care agencies must have a Child Placing License with the State of West Virginia. Specialized foster/adoptive care may be considered as a possible placement option for a child who:

- a) Has moderate to severe social, developmental, behavioral, educational, and/or emotional impairments such as sexual misconduct or drug or alcohol abuse; or
- b) A major physical disability; or
- c) A child is in need of more structure than a regular foster/adoptive home but can still benefit from an open environment where he can be cared for by specially trained foster/adoptive parents, has easy accessibility to caseworkers, and appropriate community resources are available.

2.4.5 Group Care

Group care provides the structure necessary for some children whose early experiences and relationships have been inadequate, distorted, or otherwise unproductive. Group care agencies must be licensed as Group Residential Facilities to provide all the necessary basic needs of a child on a twenty-four (24) hour a day, seven (7) day a week basis. Group care may be an appropriate placement option for an older child that has many of the following qualities:

- a) The child has a close relationship with his parent and cannot or will not accept, even temporarily, a surrogate parent/child relationship of another family setting.
- b) The child's parents would undermine a foster family placement because they cannot accept a surrogate parent for their child.
- c) The child has a lifestyle that has been so disorganized, whose impulsive behavior is so poorly controlled, or whose problems include behavior which is so deviant or destructive that he needs the structure, routine, and tolerance of group care living.
- d) The child who has had a series of placements or other life experiences which have resulted in a loss of trust in others and who needs a placement resource where he can regroup his emotional strength and begin to relate to peers and adults at his own pace.
- e) The child over age sixteen (16) whose permanency plan is emancipation.

2.4.6 Specialized Family Care Medley

Specialized family care is a comprehensive statewide placement and family support system designed to serve the needs of children and adults with mental and/or developmental delays. This placement option may be considered as a possible resource if the child has the following issues:

- a) The child is under the age of eighteen (18) years old and is in the custody of the Department;

- b) The child is at-risk of institutionalization because the family can no longer provide care for the individual (at-risk); and
- c) The child has been diagnosed as mentally and/or developmentally delays.

Please see Specialized Family Care Program Policy

2.4.7 Residential Treatment Facility

Care in a residential treatment center is provided through licensed Group Residential Facilities which furnish extensive professional assistance for a child who has problems in the areas of learning, social, or motor skills and provides on campus educational programs to deal with severe learning deficits and acting out behaviors. A residential treatment facility should be considered as a placement option if several of the following characteristics apply to the child:

- a) The child's emotional disturbance is so severe as to require comprehensive, intensive treatment and services (i.e., individual and/or group psychotherapy, special educational needs, vocational training, social and cultural enhancement, after-care services) and on-site supervision.
- b) The child has serious behavior deviations (i.e., severe aggression, chronic runaway, fire setting, sexual acting out, chronic truancy, drug usage, suicidal gestures, extreme temper tantrums, severe relationship problems, etc.)
- c) The child is depressed, has low frustration tolerance, personality disorders, psychosomatic illnesses, emotional development, mild or severe forms of eating disorders, impaired thought or affect disorders, or exhibiting other symptoms of serious emotional and/or thought dysfunction.
- d) The child is a danger to himself or others or is severely withdrawn.
- e) The child cannot function in a public-school setting because of his acting-out behavior and/or severe learning deficits.
- f) The child needs extensive professional help in areas of social skills, learning skills, and/or motor skills.
- g) The child exhibits pre-psychotic or psychotic symptoms that require a closed setting.

2.4.8 Psychiatric Residential Treatment Facility Care

Psychiatric Residential Treatment Facility care is the most restrictive type of care for children in foster care. A secure facility is used for treatment of children who have been clearly diagnosed as having a psychiatric,

emotional, or behavioral disorder that is so severe the child is a danger to himself or others. If possible, a voluntary commitment or placement should be utilized to lessen the trauma experienced by the child. When the child's behavior is so severe that it warrants involuntary commitment, the worker shall involve staff from the local behavioral health center and use the procedures outlined in [Chapter 27 of the West Virginia Code](#).

The child's mental health needs must be assessed in terms of the physical, emotional, and behavioral symptoms before a referral is made for evaluation or placement. The child should exhibit a combination of the following symptoms:

- a)** Physical symptoms of a child that may indicate a need for psychiatric or psychological evaluation include such signs as accident proneness, backaches, body pains, dizziness, excessive eating, fainting, fatigue, headaches, heart complaints, poor appetite, tremors or tics, excessive vomiting, etc.
- b)** Emotional symptoms of a child that may indicate a need for psychiatric or psychological evaluation include anxiety, crying too easily, depression, destructibility, excessive daydreaming, excitability, or feeling of rejection, fear, hypersensitivity, inability to make social contacts, insecurity, extreme nervous tension, restlessness, suicidal thoughts, temper outbursts, extreme unhappiness, unusual shyness, withdrawal, etc.
- c)** Behavioral symptoms of a child that may indicate a need for psychiatric or psychological evaluation include aggressive actions, bed wetting, bullying, compulsively repeating destructive acts, masturbation, exhibitionism, extreme disobedience, unreasonable fighting, nail biting, nightmares, and over-conformity or anti-social/delinquent behaviors.

A child may also be placed in a Psychiatric Residential Treatment Facility (PRTF) under conditions including:

- a)** At the request of the court in an effort to better understand the personality and behavior of the child.
- b)** Based on the recommendation of the child's doctor who may want to determine the basis of physical difficulties for which no physical cause can be found.
- c)** To determine mental capacity.
- d)** To determine a prognosis for treatment and to ascertain the conditions under which treatment can be provided most effectively.

2.4.9 Emergency Shelter Care Facility

For older children removed from their homes on an emergency basis, placement in an emergency shelter care facility may be an appropriate option. Shelter care is designed to meet the child's emergent need for food, housing, and supervision and to provide a thirty (30) day period for an organized effort to determine the best plan for the child's care. Placement in an emergency shelter care facility may be extended for an additional thirty (30) day period if necessary.

Emergency placements must be clearly identified as such in FACTS on the child's custody status screen and placement child removal screen with appropriate documentation that emergency custody was obtained following the procedures outlined in Child Protective Services Policy. Emergency shelter care may be appropriate when one of the following conditions exist:

- a) The child is homeless.
- b) The child would suffer serious permanent physical or emotional harm if not placed immediately.
- c) There is no possibility of making temporary arrangements with relatives, neighbors, or friends.
- d) Adequate time is needed to fully assess the child's placement needs to make the most appropriate placement for the child.

2.4.10 Out of State Placement/Interstate Compact on the Placement of Children

Interstate Compact for the Placement of Children (ICPC) is a legal agreement between West Virginia and other states as outlined in [§49-7-102](#) to regulate placement activities that occur between states. If a proposed placement is located outside the state of West Virginia, a referral through the Interstate Compact on the Placement of Children (ICPC) is required. Completed Interstate Compact on the Placement of Children referral packets must be forwarded, in triplicate, to the WV Interstate Compact on the Placement of Children office for all types of proposed out of state placements including parental placements, relative/kinship care placements, foster family care placements, specialized foster care placements, group care placements, residential care placements, and adoptive placements.

All out of state placements of children in the custody of the Department must be approved by the Interstate Compact Office of the receiving state prior to placement. Only the Compact Administrator in the receiving state is authorized to give approval for placement in their state. Any other approval source (i.e., court, probation officer, out of state facility) is not sufficient to meet the requirements specified in the state code.

West Virginia will treat the homestudy report from the receiving state, Indian Tribe or private agency under contract with the receiving state as meeting

homestudy requirements unless the child's worker determines within fourteen (14) days that placement with the potential provider in the receiving state is contrary to the welfare of the child based on the content of the homestudy. Staff must not impose restrictions on other states to contract the completion of homestudies from private agencies or qualified individuals as determined by the receiving state.

The custodial agency retains responsibility for the child placed out of state until the adoption is finalized, or the foster care placement is terminated. Courtesy supervision of the placement shall be requested by the child's worker through the Interstate Compact on the Placement of Children office within ten (10) days of the date of placement. Termination of services must have the concurrence of the Interstate Compact on the Placement of Children office in the receiving state.

Children should not be placed out of state unless one of the following conditions occurs:

- a) The child is being placed with a relative who lives out of state.
- b) The child is being placed with a family for adoption.
- c) The child has a treatment need for which no service exists or can be created in a reasonable period of time in West Virginia.
- d) The out of state placement is in closer proximity to the child's home than a comparable in-state program.
- e) The child's current foster family moves out of state and the child's permanency plan indicates continued placement with this foster family.

2.4.11 Transitional Living

In some instances, a youth may wish to practice living semi-independently prior to final discharge from the foster care system. Experiential learning opportunities are available for these youth through the Transitional Living Placement option in which foster care youth establish their own household in the community but are supplied with the following support, supervision and services:

- a) Ongoing social casework;
- b) Continued life skills instruction;
- c) Assistance with career planning and employment and job maintenance;
- d) Scheduled face to face contact between the youth and caseworker in addition to regular phone contact;
- e) Planned and unannounced home visits; and
- f) Medical and behavioral health services, when needed.

Transitional Living Placements may be provided to youth at the age of seventeen (17) years old up to the age of **twenty-three (23)** years old, but youth must meet certain criteria to be eligible for this type of placement. Youth must be 18 years old to receive independent living funds. Transitional Living Placements may be structured for youth who need extra support and supervision or they may be structured for youth who are capable to semi-independent living. Transitional Living Placements may be supervised and supported by the youth's caseworker or they may be supported and supervised by a private transitional living agency. The type of Transitional Living Placement will be dependent on the youth's abilities and needs.

Youth residing in a Transitional Living Placement, under a private agency, are normally youth who need extra supports and supervision, and are progressing through two levels of supervision and responsibility. Youth first entering this placement type are subject to a minimum of five (5) hours of supervision/services a week, from the Transitional Living Placement staff (Phase Two - Part One.) As the tasks and responsibilities are achieved, youth gain more autonomy and require less supervision (Phase Two - Part Two.) (These services are authorized through the ASO Process)

The youth's worker must determine the youth's eligibility for Transitional Living Placement based on the following criteria prior to referral for placement supervised by a private agency or prior to placement in a Transitional Living Placement setting directly supervised by the youth's worker.

1. The youth is at least seventeen (17) years old but not more than **twenty-three (23)** years of age;
2. The youth is demonstrating responsible behavior and can live independently;
3. The youth has completed their Life Skills Assessment;
4. The youth has basic living skills and can live independently;
5. The youth must be motivated to achieve goals, such as educational or employment; and
6. The youth is pursuing an educational, employment, or some goal for independence. The youth must have a plan for activities of forty (40) hours a week.

For youth who meet the Transitional Living Placement eligibility criteria, the youth's worker will consult with the supervisor and the Multidisciplinary Treatment Team, if the youth is under eighteen (18) years old or under the court's jurisdiction. The youth's worker will consult with anyone involved in the youth's life, including the youth's current service providers, juvenile

probation officer, and the youth's parents to present the youth's Transitional Living Plan and determine the best option for obtaining a Transitional Living Placement and necessary services.

2.5 Referral Process (Specific to Placement Type)

When referring a child for a specific placement, no matter the placement type, the child's worker must relay to the Homefinding Specialist, foster parent, or placement provider all information regarding the child's current situation including medical and mental health information (such as disclosure of communicable diseases such as HIV, AIDS or Hepatitis), education information, and information regarding the child's behavior, including a history of being a runaway and the most recent runaway episode.

Prior to referral the child's worker must document in FACTS on the client characteristics screen, placement plan screen, and the placement recommendation screen the child's characteristics identified that make the specific placement type appropriate. The child's worker must also document the appropriate information in FACTS on the provider recommendation screen and the placement safety evaluation screen.

2.5.1 Emergency Shelter Foster Family Care Referral Process

Because of the need for the child to be removed from his home on an emergency basis and placed in a safe environment, there is no formal referral process for placing a child in emergency shelter foster family care. Nevertheless, when a child must be placed in an emergency shelter foster family home, information about the child and his family must be gathered.

The child's worker must perform the following actions:

- a)** Consult with the supervisor and the Multidisciplinary Treatment Team, including the child's current service providers, child's parents, etc., to discuss the child's placement needs.
- b)** Complete the family's and child's assessment, if not already done.
- c)** Compile the following necessary information:
 - 1.** Uniform Case Plan for voluntary placement and youth services children or the Family Assessment for child protective services children.
 - 2.** Social summary of the child
 - 3.** School information
 - 4.** Psychological/psychiatric evaluation
 - 5.** Birth certificate

6. Social Security card
 7. Immunization records
 8. Medical information (including all information regarding communicable diseases/infections)
 9. Copy of the court order granting the Department custody
- d) If the above information is not available at the time of the referral, the child's worker will compile the information as soon as possible, but not longer than four (4) weeks.
- e) The child's worker must document the referral on the contact screen and placement recommendation screen in FACTS.

2.5.2 Kinship/Relative Placement & Relative Foster/Adoptive Family Referral Process

Because of the need for the child to be removed from his home often on an emergency basis and placed in a safe environment, there is no formal referral process for placing a child in a kinship/relative placement. Nevertheless, when a child must be placed with a relative, information about the child and his family must be gathered.

The child's worker must perform the following actions:

- a) Consult with the supervisor and the Multidisciplinary Treatment Team, if applicable, including the child's current service providers, child's parents, etc. to discuss the child's placement needs.
- b) Complete the family's and child's assessment, if not already done.
- c) According to the State Code, §49-4-114 (3) for purposes of any placement of a child for adoption by the department, the department shall first consider the suitability and willingness of any known grandparent or grandparents to adopt the child. Once any such grandparents who are interested in adopting the child have been identified, the department shall conduct a home study evaluation, including home visits and individual interviews by a licensed social worker. If the department determines, based on the home study evaluation, that the grandparents would be suitable foster/adoptive parents, it shall assure that the grandparents are offered the placement of the child prior to the consideration of any other prospective foster/adoptive parents.
- d) Once the child's worker determines that a kinship/relative placement is needed, the child's worker must assess the relative's home for general safety and well-being concerns prior to placing a child in the relative's home and/or making a referral for certification. The

child's worker will complete the Kinship/Relative Home Study Request form and submit such to the Regional Homefinding Unit within twenty-four (24) hours. A Homefinding Specialist will visit the kinship/relative home within five (5) calendar days of placing a child in the home. The Homefinding Specialist would then begin the Kinship/Relative Safety Screen form at this initial visit, and would thereafter have forty-five (45) days to complete the screen. The Homefinding Specialist will immediately make arrangements to obtain criminal background checks and [APS/CPS background checks](#) for the relative and all adult members of their household.

- e) The child's worker must document the referral on the placement recommendation screen and on the contact screen in FACTS.

***Note* When placing a child with a kinship/relative family who does not wish to participate in the process to become a certified foster/adoptive provider, the child's worker is still required to complete the Kinship/Relative Home Study Request form of the relative's home, and the Homefinder will follow up with the completion of the Kinship/Relative Safety Screen form, a fingerprint based state and national criminal background check, and a Child Protective and Adult Protective Services history regarding the kinship/relative family. For children who are removed on an emergency basis because of abuse or neglect the provisions in the Child Protective Services Policy legal requirements and processes must be followed. This policy is online in FACTS.**

2.5.3 Foster/Adoptive Family Care Referral Process

When a child must be placed in foster care and it is determined that a foster/adoptive placement is appropriate for the child, information about the child and his family must be shared with the Homefinding Unit.

The worker will do the following actions:

- a) Consult with the supervisor and the Multidisciplinary Treatment Team, including the child's current service providers, the child's parents, etc., to discuss the child's placement needs.
- b) Complete the family's and child's assessment, if not already done.
- c) Compile the necessary information as a referral packet to be forwarded to the Homefinding Unit for their determination on appropriate placement. The child's worker must provide information about the child and his family in a factual and forthright manner that accurately portrays the child's situation. The referral packet to be sent to the Homefinding Unit should include the following information:

1. Uniform Case Plan for voluntary placement and youth services children or the Family Assessment for child protective services children
 2. Social summary of the child
 3. School information
 4. Psychological/psychiatric evaluation
 5. Birth certificate
 6. Social Security card
 7. Immunization records
 8. Medical information (including information regarding any and all communicable diseases/infections)
 9. Copy of the court order granting the Department custody
- d)** If the above information is not available at the time of the referral, the child's worker will compile the information as soon as possible. This should not take longer than four (4) weeks.
- e)** The child's worker must document the referral on the document tracking and placement recommendations screens in FACTS.

2.5.4 Specialized Agency Foster/Adoptive Care Referral Process

If the Homefinding Unit does not have an available family that can meet the child's needs, the child's worker must undertake the following activities:

- a)** Consult with the supervisor and the Multidisciplinary Treatment Team, including the child's current service providers, juvenile probation officer, child's parents, etc., to discuss the child's placement needs.
- b)** Complete the family and child assessment, if not already done.
- c)** Compile the necessary information as a referral packet to be sent to the appropriate specialized foster care agency for their determination on appropriate placement. The child's worker must provide information about the child and his family in a factual and forthright manner that accurately portrays the child's situation. The referral packet to be sent to the specialized foster care agency should include the following information:
 1. Foster/Adoptive Family/Residential Referral FACTS form (SS-FC-8)
 2. Child, Youth and Family Case Plan or YS Youth Case Plan
 3. Social summary of the child

4. School information
5. Psychological/psychiatric evaluation
6. Birth certificate
7. Social Security card
8. Immunization records
9. Medical information (including information regarding all communicable diseases/infections)
10. Copy of the court order granting the Department custody

- d) If the above information is not available at the time of the referral, the child's worker will compile the information as soon as possible. This should not take longer than four (4) weeks.
- e) If the specialized foster/adoptive family care home is located outside the state of West Virginia, a referral through the Interstate Compact on the Placement of Children is required and the receiving state Interstate Compact on the Placement of Children office must give approval prior to placement.
- f) The Department is not to contact the specialized foster/adoptive family directly to request a placement. The specialized foster care agency's administrative office is to be contacted with the appropriate information for a referral. The specialized foster care agency will then determine if it has an appropriate foster/adoptive family that can best meet the needs of the child based on the referral packet.
- g) If the agency to which the child was referred decides to proceed further with the placement, the child's worker will participate in the intake interviews and pre-placement visits with the specialized foster care agency and the specialized foster/adoptive parents.
- h) The referral must be documented on the contact and placement recommendation screens in FACTS.

2.5.5 Group Care Referral Process

When a child is to be placed in a licensed group care facility the worker must undertake the following activities:

- a) Consult with the supervisor and the Multidisciplinary Treatment Team, including the child's current service providers, juvenile probation officer, child's parents, etc., to discuss the child's placement needs.
- b) Complete the family and child assessment if not already done.
- c) Complete the necessary information on the automated placement referral screen to be sent to appropriate group care facilities for their

determination on appropriate placement. The child's worker must provide information about the child and his family in a factual and forthright manner that accurately portrays the child's situation. The following information is mandatory for the automated referral in FACTS:

1. Child's full name
2. Parents' names
3. Permanent home address
4. Relationships: two parents and all siblings
5. Custody status
6. Removal
7. Date of birth
8. School information

The referral to be sent to the group care agency should include the following information:

1. Uniform Case Plan
 2. Social summary of the child
 3. Psychological/psychiatric evaluation
 4. Birth certificate
 5. Social Security card
 6. Immunization records
 7. Medical information (including any and all information regarding communicable diseases/infections)
 8. Copy of the court order granting the Department custody
 9. Permanency Plan/Concurrent Plan
 10. Placement Plan
 11. YBE - for Youth Service Cases
 12. Visitation Plan
- d)** If the above information is not available at the time of the referral and is not mandatory, the child's worker will compile the information as soon as possible. This should not take longer than four (4) weeks.
- e)** If the group care agency is located outside the state of West Virginia, a referral through the Interstate Compact on the Placement of Children is required and the receiving state Interstate Compact on the Placement

of Children office must give approval prior to placement. The automated referral process does not apply; however, the automated placement referral can be printed and used as part of the referral packet.

- f)** If the agency to which the child was referred decides to proceed further with the placement, the child's worker will participate in the intake interviews and pre-placement visits with the group care agency.
- g)** Prepare the child and his family for such interviews and visits. They should understand the purpose of the interviews, who will be present and why, what may be discussed, travel and visit time involved, anticipated expenses if applicable, the physical setting of the agency, and the nature of the agency's program.
- h)** If a child is entering a group care agency from a foster/adoptive family home, it may be advisable to involve the foster/adoptive parents in the intake and placement visits, especially if the goal for the child is to return to the foster/adoptive parent's home after discharge from the facility.

2.5.6 Specialized Family Care (Medley) Referral Process

When a child meets the criteria for the Specialized Family Care program, the child's worker must undertake the following activities:

- a)** Consult with the supervisor and the Multidisciplinary Treatment Team, including the child's current service providers, mental health provider, parents, etc., to discuss the child's placement needs.
- b)** The worker will develop a referral packet consisting of the following information:
 - 1.** A current social history
 - 2.** Current psychological
 - 3.** Medical summary, and
 - 4.** Educational plan.
- c)** This packet must then be sent to the Specialized Family Care Program Manager.
- d)** The Specialized Family Care Program Manager will review the information to determine if the child meets the at-risk eligibility requirement.
- e)** The child will then be assessed by a Family Based Care Specialist to determine if Specialized Family Care can meet the child's needs. This determination evaluates the child's current developmental status, current habilitation program, and community programs which can meet the child's needs.

- f) If the child is accepted into the program, a search will be conducted by the Specialized Family Care Program Manager to determine if a suitable home is available for the child.
- g) If the child is eligible for Medicaid Personal Care services, the local comprehensive mental health or community behavioral health agency must be notified to initiate the Nursing Plan of Care.
- h) If the child is not eligible for Personal Care Services, the child's community mental health case manager and the child's worker will arrange for reimbursement above the boarding care rate prior to placement. This reimbursement may be through the Title XIX Waiver program or through additional social service funds. The use of additional social service funds must be approved by the Foster Care Program Specialist prior to placement.
- i) The child's worker and his supervisor must concur with the placement plan developed by the Specialized Family Care Program.
- j) The child's worker will document the referral in FACTS on the contract and placement recommendation screens.

2.5.7 Residential Treatment Facility Referral Process

When a child is to be placed in a licensed residential facility the worker must undertake the following activities:

- a) Consult with the supervisor and the Multidisciplinary Treatment Team, including the child's current service providers, juvenile probation officer, parents, etc., to discuss the child's placement needs.
- b) Complete the family and child assessment if not already done.
- c) Complete the necessary information on the automated placement referral screen to be sent to appropriate residential facilities for their determination on appropriate placement. The child's worker must provide information about the child and his family in a factual and forthright manner that accurately portrays the child's situation. The following information is mandatory on the automated referral in FACTS:
 1. Child's full name
 2. Parents' names
 3. Permanent home address
 4. Relationships; two parents and all siblings
 5. Custody status
 6. Removal
 7. Date of birth

8. School information

The referral to be sent to the residential facility should include the following information:

- 1. Uniform Case Plan**
 - 2. Social summary of the child**
 - 3. Psychological/psychiatric evaluation**
 - 4. Birth certificate**
 - 5. Social Security card**
 - 6. Immunization records**
 - 7. Medical information (including any and all information regarding communicable diseases/infections)**
 - 8. Copy of the court order granting the Department custody**
 - 9. Permanency Plan/Concurrent Plan**
 - 10. Placement Plan**
 - 11. YBE- for Youth Service cases**
 - 12. Visitation Plan**
- d)** If the above information is not available at the time of the referral and is not mandatory, the child's worker will compile the information as soon as possible. This should not take longer than four (4) weeks.
- e)** If the residential facility is located outside the state of West Virginia, a referral through the Interstate Compact on the Placement of Children is required and the receiving state Interstate Compact on the Placement of Children office must give approval prior to placement. The automated referral process is not applicable for out of state referrals; however, the automated placement referral can be printed and used as part of the referral packet.
- f)** If the residential facility to which the child was referred decides to proceed further with the placement, the child's worker will participate in the intake interviews and pre-placement visits with the group care agency.
- g)** Prepare the child and his family for such interviews and visits. They should understand the purpose of the interviews, who will be present and why, what may be discussed, travel and visit time involved, anticipated expenses if applicable, the physical setting of the facility, and the nature of the facility's program.

If a child is entering a residential facility from a foster/adoptive family home, it may be advisable to involve the foster/adoptive parents in the intake and placement visits, especially if the goal for the child is to return to the foster/adoptive parent's home after discharge from the facility.

2.5.8 Psychiatric Residential Treatment Facility Referral Process

When placement is needed in a Psychiatric Residential Treatment Facility foster care setting, the worker shall secure written medical documentation that psychiatric residential treatment is the recommended placement. The worker shall secure all the appropriate approvals necessary for seeking this type of placement for a child including the following activities:

- a)** The worker shall contact the appropriate facilities that have adolescent units for treatment of mentally ill children. When consideration is being given to psychiatric hospitalization, all planning shall be done in consultation with the Multidisciplinary Treatment Team, including a representative of the local community mental health center.
- b)** If no in-state facility is available to meet the child's needs, the protocol for out-of-state placements must be followed.
- c)** First consideration shall be given to facilities that have a current contract with the Bureau for Children and Families and/or have been approved as a West Virginia Medicaid provider. If the facility is not a West Virginia Medicaid provider and the Bureau for Children and Families is being considered as a payment source, a formal contract must be prepared by the Bureau for Children and Families and signed by the Director before the placement occurs.
- d)** If the facility is an approved WV Medicaid provider the MCM-1 form (Physicians Certification for In-Patient Psychiatric Services) must be completed to insure Medicaid payment is made. All efforts should be made to explore insurance and other sources of payment prior to the request for payment by the Bureau for Children and Families for any type of inpatient hospitalization.
- e)** The worker shall explore eligibility for special educational services. When making a referral for Psychiatric Residential Treatment within the State of West Virginia the worker must utilize the following Automated Placement Referral process:
 - a.** Consult with the supervisor and the Multidisciplinary Treatment Team, including the child's current service providers, juvenile probation officer, parents, etc., to discuss the child's placement needs.
 - b.** Complete the family's and child assessment if not already done.

c. Complete the necessary information on the automated placement referral screen to be sent to appropriate psychiatric residential facility for their determination on appropriate placement. The child's worker must provide information about the child and his family in a factual and forthright manner that accurately portrays the child's situation. The following information is mandatory on the automated referral in FACTS:

1. Child's full name
2. Parents' names
3. Permanent home address
4. Relationships; two parents and all siblings
5. Custody status
6. Removal
7. Date of birth
8. School information

The referral to be sent to the psychiatric residential facility should include the following information:

1. Uniform Case Plan
2. Social summary of the child
3. Psychological/psychiatric evaluation
4. Birth certificate
5. Social Security card
6. Immunization records
7. Medical information (including any and all information regarding communicable diseases/infections)
8. Copy of the court order granting the Department custody
9. Permanency Plan/Concurrent Plan
10. Placement Plan
11. YBE - for Youth Service cases
12. Visitation Plan

f) If the above information is not available at the time of the referral and is not mandatory, the child's worker will compile the information as soon as possible. This should not take longer than four (4) weeks.

- g)** If the psychiatric residential facility is located outside the state of West Virginia, a referral through the Interstate Compact on the Placement of Children is required and the receiving state Interstate Compact on the Placement of Children office must give approval prior to placement. The automated referral process does not apply; however, the automated placement referral can be printed and used as part of the referral packet.
- h)** If the psychiatric residential facility to which the child was referred decides to proceed further with the placement, the child's worker will participate in the intake interviews and pre-placement visits with the group care agency.
- i)** Prepare the child and his family for such interviews and visits. They should understand the purpose of the interviews, who will be present and why, what may be discussed, travel and visit time involved, anticipated expenses if applicable, the physical setting of the agency, and the nature of the agency's program.
- j)** If a child is entering a psychiatric residential facility from a foster/adoptive family home, it may be advisable to involve the foster/adoptive parents in the intake and placement visits, especially if the goal for the child is to return to the foster/adoptive parent's home after discharge from the facility.

2.5.9 Emergency Shelter Care Facility Referral Process

Because of the need for the child to be removed from his home on an emergency basis and placed in a safe environment, there is no formal referral process for placing a child in an emergency shelter care facility. Nevertheless, when a child must be placed in foster care on an emergency basis and it is determined that emergency shelter care is an appropriate placement for the child, information about the child and his family must be compiled in a timely manner.

The worker must do the following:

- a)** Consult with the supervisor and the Multidisciplinary Treatment Team, including the child's current service providers, parents, juvenile probation officer if applicable, etc., to discuss the child's placement needs.
- b)** Complete the family and child assessment, if not already done.
- c)** Compile the following necessary information:
 - 1.** Uniform Case Plan
 - 2.** Social summary of the child
 - 3.** School information

4. Psychological/psychiatric evaluation
 5. Birth certificate
 6. Social Security card
 7. Immunization records
 8. Medical information (including any and all information regarding communicable diseases/infections)
 9. Copy of the court order granting the Department custody
- d) If the above information is not available at the time of the referral, the child's worker will compile the information as soon as possible, but not longer than four (4) weeks.
- e) The child's worker must document the referral in FACTS on the contact and placement recommendation screens.

Note: For those children who are removed on an emergency basis because of abuse or neglect the provisions in the Child Protective Services Policy legal requirements and processes must be followed. This policy is on line in FACTS.

2.5.10 Out of State Placement/Interstate Compact on Placement of Children Referral Process

A child may be referred for an out of state placement by the child's worker who, with the assistance of the Multidisciplinary Treatment Team, has determined that there are no resources available to meet the child's needs in West Virginia. In addition, the court may also order a child in the Department's custody into an out of state facility after it has been determined as a placement resource. When a child is to be placed out of state the child's worker must take the following actions:

- a) A Multidisciplinary Treatment Team meeting and a regional/county staffing must be held to review the placement plan for the child.
- b) All appropriate in-state options must be explored and determined that they are either not available or not accessible.
- c) An Interstate Compact Placement Request ([ICPC-100A](#)) is completed in FACTS, signed, and submitted, along with the referral packet information outlined below, in triplicate to the Interstate Compact Administrator in the Office of Social Services.
- d) A MCM-1 is completed and sent with any necessary attachments to the Bureau for Medical Services West Virginia Medicaid Prior Authorization Contractor.

- e) A referral packet is developed and sent to the Regional Program Manager and the Interstate Compact on the Placement of Children Administrator simultaneously. This packet must contain the following:
1. MCM-1 signed by a physician
 2. The Request for Approval of Out of State Placement form detailing the child's placement situation including the following:
 - a. Lack of appropriate placement within the state
 - b. Statement regarding the child's educational status, including if the child is eligible for or is currently receiving special education services
 3. Court order with findings in accordance with [§49-7-101 Article 3](#) for proposed placement of adjudicated delinquents in out of state residential care
 4. [ICPC-100A](#) Interstate Compact Placement Request
 5. Court order granting the Department custody and specifying the out of state facility, if applicable
 6. Psychological or other clinical evaluation done within the past six (6) months
 7. Sex offender assessment if appropriate
 8. Substance abuse assessment if appropriate
 9. Social/intervention history
 10. Documentation of Multidisciplinary Treatment Team attendance
 11. Documentation of Title IV-E eligibility (copy of the most current IV-E determination/review) if a medical card in the receiving state is being requested. A medical card in the receiving state may not be requested if the placement facility is funded by WV Medicaid.
- f) The referral packet is then reviewed by the Regional Program Manager. If the packet is incomplete, it will be returned to the child's worker for completion and re-submission. If an alternative plan appears feasible, the Regional Program Manager will work with the child's worker to pursue this plan.
- g) If the packet is complete and the placement is appropriate, then the Notification of Approval form is completed by the Regional Program Manager and submitted to the Interstate Compact on the Placement of

Children Administrator and the Out of State Program Specialist in the Office of Social Services for their approval.

- h)** Questions and concerns related to legal issues will be forwarded to the regional Attorney General for review and consultation.
- i)** The Commissioner will review the information and provide a decision on the out of state placement.
- j)** The Interstate Compact on the Placement of Children Administrator will send the pertinent material and [ICPC 100-A](#) to the receiving state. The child cannot be placed until approval is given by the receiving state Compact Administrator. When approval is received, the worker may arrange to place the child in the facility.
- k)** Staff will treat any homestudy report completed by the receiving state, Indian Tribe, or private agency under contract with the receiving state as meeting homestudy requirements unless the child's worker determines within fourteen (14) days that placement with the potential provider in the receiving state is contrary to the welfare of the child based on the content of the homestudy.
- l)** Interstate Compact approval is documented by the signature of the receiving state Compact Administrator on the [ICPC-100A](#) form.
- m)** The child's worker must document the referral in FACTS on the contact and placement recommendation screens.

2.5.11 Transitional Living Referral Process

When a youth is going to be placed under the supervision of a private agency for transitional living services the youth's worker must take the following actions:

- 1.** Complete the family's and youth's assessment, if not already done;
- 2.** Complete the youth's Transitional Living Plan, if not already done;
- 3.** Compile the necessary information as a referral packet to be sent to appropriate transitional living providers for their determination on appropriate placement. This information should include:
 - a.** Transitional Living Placement Referral form, if applicable
 - b.** Youth, Youth and Family Case Plan or YS Youth Case Plan
 - c.** Life Skills Assessment
 - d.** Social summary of the youth
 - e.** School information
 - f.** Psychological/psychiatric evaluation

- g. Original Birth Certificate
 - h. Social Security Card
 - i. Immunization records
 - j. Medical information
 - k. Placement history
 - l. Copy of the court order granting the Department custody
4. If the above information is not available at the time of the referral, the youth's worker will compile the information as soon as possible. This should not take longer than four (4) weeks.
 5. Schedule and participate in the intake interviews and pre-placement visits for the youth and his/her family with the prospective Transitional Living Placement agency.
 6. Transportation must be provided to the placement if necessary. Prepare the youth and his/her family for such interviews and visits. They should understand the purpose of the interviews, who will be present and why, what may be discussed, travel and visit time involved, anticipated expenses if applicable, the physical setting of the placement, and the nature of the agency's program.
 7. If a youth is entering a Transitional Living Placement from a family foster care home, it may be advisable to involve the foster parents in the intake and placement visits.
 8. If the agency accepts the youth for placement or if the placement is going to be supervised directly by the Department, the youth's worker shall arrange a date for the placement.

If a youth is going to be in a DHHR staff supervised Transitional Living Placement, the youth's worker must provide the following to the youth:

1. Original birth certificate
2. Social security card
3. Immunization records
4. Medical information
5. Psychological/psychiatric evaluation
6. School information
7. Placement history
8. Any other information deemed necessary to assist the youth in their transition and placement.

2.6 Placement

2.6.1. Diligent Search

Absent/Unknown Parent and Relative Search

WV Foster Care Policy and the [Fostering Connections to Success and Increasing Adoption Act of 2008](#) (federal legislation) require caseworkers to conduct a diligent search, particularly within the first thirty (30) days of a child entering custody. A successful diligent search will benefit the child by providing him with a potential placement with a kinship/relative or with possible lifelong significant connections. A diligent search is done in order to:

- Locate/contact non-custodial parents
- Establish placement options
- Preserve continuity of relationships and lifelong connections for children
- Ensure child safety, permanency, and well-being
- Locate/contact maternal and paternal relatives and “fictive” kin
- Place children in least-restrictive environment possible

The search for absent or unknown parents and relatives, both paternal and maternal, is vital because it is a way to preserve connections for children who have been removed from their immediate family. **An absent parent or a relative can also serve as a placement resource for the child** which could result in a permanent placement if the child does not return home.

Absent or unknown parents should always be named as respondents in child abuse and/or neglect cases, at the initial filing of the petition. The search for an absent or unknown parent must occur within the first thirty (30) days of the child entering placement, so the parent can be involved in the court process, MDT, case planning process, visitation plan, and any other aspect of the case.

The search for relatives must occur within the first thirty (30) days of the child entering placement to successfully implement concurrent planning and to adequately find the best placement for the child. This does not mean that workers should wait to identify appropriate relatives for placement or stop searching for appropriate relatives if none are found in the first thirty (30) days. A kinship/relative placement resource is defined as any person related to the child by blood or marriage, including cousins and in-laws, or a person the child considers a relative, such as a godparent or close family friend. When possible, appropriate relatives should be

identified and screened as soon as a child comes into care so the homestudy can be initiated.

a) Absent or Unknown Parents

The following steps must be taken to locate absent or unknown parents:

- 1.** If one of the child's parents is not known to the Department, the child's worker must initiate efforts immediately to locate the absent or unknown parent by obtaining information from the known parent or guardian of the child, by utilizing the SEARCH Screens in FACTS to search OSCAR Records, utilizing the court or MDT to obtain information from the known parent, obtaining information from known relatives of the child, obtaining information from the local Child Support Office or Family Support Office, or obtaining information from any other source available. The efforts to locate an absent or unknown parent must occur within thirty (30) days of the child entering placement and/or custody.
- 2.** Once the information has been obtained about an absent or unknown parent, the child's worker must attempt contact with the parent in person, by telephone, mail, fax, or any other means necessary to ensure that every effort has been made to involve them in their child's case.
- 3.** When an absent or unknown parent is contacted and has not been made a party of the court proceeding, the child's worker must contact the prosecutor to have the parent made a party to the court proceeding immediately. If there are any reasons to question the relationship between the parent and the child, the worker should request that a paternity or maternity test be completed on the child and parent.
- 4.** The child's worker must establish or modify a visitation plan in accordance with the Foster Care Policy, Visitation with Parents and Extended Family, for an absent or unknown parent, who has been contacted and made a part of the child's case, within fourteen (14) days of contacting the parent.
- 5.** The child's worker must document all efforts to contact an absent or unknown parent under the contacts screen in FACTS and maintain any written documentation, such as returned mail, in the paper file.
- 6.** There may be situations when it may not be in the best interest of the child to involve an absent or unknown parent with the child,

but this does not mean that they should not be involved in the court proceeding. The situation should be shared with the MDT, who will make a recommendation to the court as to how to proceed with the parent's involvement in the child's case.

b) Absent or Unknown Relatives

The following steps must be taken to locate absent or unknown relatives:

1. The child's worker will initiate efforts immediately to locate any relatives by obtaining information from the parent or guardian of the child, utilizing the court or MDT to obtain information from the parent, obtaining information from the child, obtaining information from the local Child Support Office or Family Support Office, or obtaining information from any other source available. The efforts to locate absent or unknown relatives must occur within thirty (30) days of the child entering placement and/or custody.
2. Once the information has been obtained about relatives, the child's worker must attempt contact with the relative in person, by telephone, mail, fax, or by any other means to determine if they would be a possible placement resource for the child.
3. The child's worker will follow-up to any face-to-face or telephone contact with the relative, in writing, by sending the [Relative Letter](#), requesting that they respond back to the worker within a time frame of two (2) weeks. This letter will provide the relative an opportunity to express an interest in becoming a placement resource for the child and/or to establish visitation with the child.
4. The [Relative Letter](#) must be saved to the child's record in FACTS, in the file cabinet, and a hard copy filed must be saved in the child's paper record.
5. The child's worker must document any response from the relative in FACTS under the client contact screen.
6. When a relative is contacted and indicates an interest in becoming a possible placement resource for the child, the child's worker must complete a general safety and well-being check of the relative's home using the Kinship/Relative Home Study Request form and then send such to the Regional Homefinding unit immediately. This form will be used as the referral. The Homefinder will then follow up with the completion of the Kinship/Relative Safety Screen form, a fingerprint based state

and national criminal background check, and a child protective and adult protective services history check regarding the relative/kinship family.

7. If a relative indicates an interest in visitation with the child and the visitation would assist in maintaining a connection for the child, then visitation must be established immediately. The child's worker must establish or modify a visitation plan in accordance with the Foster Care Policy, Visitation with Parents and Extended Family, for a relative, within fourteen (14) days of the relative indicating an interest in visitation.

c) Known Relatives

The following steps must be taken to involve the known relatives in the case:

1. If the child has known relatives or individuals who the child views as a relative, requesting placement, visitation, or involvement in the child's case, the child's worker must immediately initiate efforts to involve the relative in the case. The child's worker must follow the guidelines under the Foster Care Policy for Kinship/Relative Placement.

2.6.2. General Placement Activities

The child's worker must document in FACTS on the client's characteristics screen, the placement plan, and placement recommendation screens the child's characteristics identified that make the placement appropriate. The child's worker must also document the appropriate information in FACTS on the provider recommendation screen and the placement safety evaluation screen.

The child's worker must do the following:

- a) The child's worker shall arrange a date for the placement. The placement should occur in a timely manner following the intake or pre-placement visit. It is possible for the intake interview and pre-placement visit to occur on the same day as the placement. This is not appropriate in most situations and should only be utilized when absolutely necessary.
- b) The child's worker will participate in the actual placement and will provide transportation for the child and his family.
- c) The child's worker will furnish the provider with the SS-FC-6A, agreement to care for the child in the home. The provider must sign the form and be provided a copy as proof that the Department has approved the placement of this child

- d) The child's worker must enter the child's placement information into FACTS the **same day** as the child enters the placement. This will also generate a medical card for the child within a timely manner. In addition, this will also ensure that the child has an EPSDT Health Check screening completed within the 30-day time frame.
- e) If the child was in foster care prior to this placement, the child's medical card and a new SS-FC-40 is to be given to the provider in case medical services are required prior to the issuance of a card to the provider for the child. If the child was not in foster care prior to this placement or the child's medical card cannot be located, the child's worker will provide the SS-FC-40 and SS-FC-40A to the caretaker for the child's emergency medical needs.
- f) If one of the child's parents is not known to the Department, the child's worker will immediately initiate efforts to locate the absent or unknown parent as a possible placement resource for the child and to include that parent on all court documents.
- g) The child's worker shall assess the child's initial placement clothing needs and complete the wardrobe and personal item inventory, contained in the Journey Notebook, of the child's personal belongings. **(Refer to Assessment Section for more information)**
- h) The child's worker will notify the Office of Child Support Enforcement and the Office of Family Support of the child's placement in foster care, if appropriate.
- i) The placement must take into account the appropriateness of the current educational setting and the proximity to the school in which the child is enrolled at the time of placement, and that the State agency has coordinated with appropriate local educational agencies to ensure that the child remains in the school in which the child is enrolled at the time of placement, or if remaining in such school is not in the best interests of the child, assurances by the State agency and the local educational agencies to provide immediate and appropriate enrollment in a new school, with all of the educational records of the child provided to the school. The state agency is responsible for reasonable travel for the child to remain in the school in which the child is enrolled at the time of placement.

If the child is being placed outside his current school district, the worker must notify both schools of the child's new living arrangements in writing within three (3) business days of the placement and arrange to have the child's school records transferred to the new school.

- j)** The child's worker will obtain a copy of the child's birth certificate and social security card.
- To obtain birth certificates for a child/youth born in West Virginia, staff can utilize the Interstate Paternity Acknowledgment Certification and Transmission (IPACT). IPACT is a web-based computerized search that directly links to Vital Registration which allows staff to request birth, death and marriage records.
 - The memorandum concerning the IPACT instructions can be found on the DHHR intranet page, under Foster Care Resources. For further training on how to access IPACT to obtain birth certificates go to: <https://www.wvdhhr.org/ipact/>.
 - It is also beneficial for workers to be aware that only two social security cards can be issued in a year and ten social security cards in a lifetime. For instructions on how to obtain a social security card for foster children please visit: <https://www.ssa.gov/ssnumber/>
- k)** The child's worker will obtain current health information about the child, including but not limited to: current or previous medication, immunization records, allergies, and the name and address of any current medical providers.
- l)** The child's worker will disclose any information regarding the child's mental and physical health status as well as behavioral issues to the provider.
- m)** The child's worker will complete the Birth Parents Background Information merge form (SS-FC-12) and the Birth and Medical History of the Child merge form (SS-FC-12A) in FACTS within the first thirty days of the child's placement.
- n)** The child's worker will ensure that the provider purchase an appropriate life book for the child. Please see section 2.8 for further description of an appropriate life book.
- o)** The child's worker will document all placement contacts in FACTS on the visitation log screen including progress reports and case staffing as appropriate.
- p)** If adjustment problems are anticipated by the child's worker, these are to be discussed with the provider at the time of placement.
- q)** The child's worker will complete the child's assessment screen in FACTS. Education information will be documented on the child's employment/education screen. Immunization and health information

will be documented on the child's client demographic screens in FACTS.

- r) The child's worker will make sure that the child's [SAFEKIDS PIX](#) identification card has been provided to the foster/adoptive parent at placement or that the process to obtain the child's SAFEKIDS PIX identification card has been initiated.

2.6.3. Placement Activities Specific to Relative/Kinship Homes

While the Department is required to look for relatives as placement options, the worker must take specific actions if the Department is planning to petition the court for or take emergency custody of a child and place the child in the home of a relative.

- a) The child's worker must assess the relative's ability to provide a safe and stable living environment for the child. The child's worker will conduct a general safety and well-being check of the home using the Kinship/Relative Home Study Request form, make contact with local law enforcement to ensure that the relative is not known to them as being active in criminal activity, and conduct a FACTS record check of all adults in the home over the age of eighteen (18) years of age before leaving the child in the home. The child's worker will make a referral to the Regional Homefinding unit for a Homefinding Specialist to complete the certification process by providing them with the Kinship/Relative Home Study Request form within twenty-four (24) hours. The Homefinding Specialist will have five (5) calendar days to visit the relative's home and begin the Kinship/Relative Safety Screen with the relative/kinship provider. The entire screen must be completed within forty-five (45) days of the receipt of the referral. The relative must sign the Kinship/Relative Safety Screen form.
- b) In emergency placement situations it is strongly recommended that the child's worker collaborate and consult with local law enforcement to gather any and all information, including criminal history regarding the potential relative/kinship provider and members in the household, to assess and ensure the child's safety.
- c) The child's worker will provide the relatives with the SS-FC-6A, Foster Care Plan and Agreement to care for the child placed in the home, and SS-FC-6A Addendum, Benefit form. The relatives must sign these forms and the worker will provide the relative with copies as proof that the Department has approved the placement of this child. The original forms must be maintained in the kinship/relative provider record.
- d) The child's worker must explain the benefits that are available to the child or may become available to the child while the child is in the

custody of the Department and after the child leaves the custody of the Department. The child's worker must also explain how these benefits can be accessed by the kinship/relative family. ***Please refer to the SS-FC-6A Addendum, Benefits form.**

- e) The child's worker will direct the relative/kinship provider to apply for child only TANF and Medicaid through the local county DHHR office in which the relative resides.
- f) The child's worker must document the placement of the child with the relative in FACTS as a kinship/relative placement, once the Homefinding Specialist has opened the relative as a Kinship/Relative Provider.
- g) If the court gives the Department legal custody of a child and orders the child placed with a relative, the child's worker must place the child in the relative's home. The child's worker must still complete a general safety and well-being check of the home using the Kinship/Relative Home Study Request form and submit such to the Regional Homefinding Unit, and a Homefinding Specialist will then complete the Kinship/Relative Safety Screen on in-state kinship/relative homes and have the relative sign the form as indicated in step one. If the relative does not meet the standards of the Kinship/Relative Screen, the child's worker shall request that the court reconsider the kinship/relative home as a placement resource for the child. The kinship/relative provider is NOT eligible to receive any other payments for the child's care during the time period that they received TANF benefits for the child.
- h) If the child is placed in the kinship/relative home and the kinship/relative family wishes to become certified and receive boarding care, the child's worker will then inform the Homefinding Unit, or the Interstate Compact on the Placement of Children Administrator if the family lives out of state, of the placement and request an assessment of the relative. Under no circumstances shall boarding care be paid to a kinship/relative caretaker prior to the relative completing all the requirements necessary to become a foster family. For in-state studies, the assessment must take priority and should be completed within forty-five (45) days from the date of placement of the child in the relative's home.
- i) The Homefinding Specialist will make arrangements with the relative to obtain their fingerprints to complete a criminal background check. The relative should attend pre-service foster parent training if it is offered during the assessment period, unless a waiver was awarded. The homestudy may be approved prior to the training requirement being fulfilled as long as all other requirements have been met.

- j)** Once a copy of the CIB results has been received, the results will be entered by the Homefinding Specialist in FACTS. The Homefinding Specialist must retain a copy of the results in the provider record.
- k)** If the relatives cannot meet the certification requirements as determined by the Homefinding Unit, or comparable agency staff of another state via Interstate Compact on the Placement of Children, the worker will report this finding to the court. If the court and/or the Multidisciplinary Treatment Team believe that this placement is in the best interest of the child, the child's worker may request that the court transfer legal custody of the child from the Department to the relative at disposition. The family may apply for a TANF Child Only grant through the Office of Family Support. This would also provide the child with medical care. Prior to transfer of custody from the Department, all children in these placements will be considered eligible for all the services and protections of children who are in paid foster care placements.
- l)** If the relatives meet the certification requirements as determined by the Homefinding Unit, or comparable agency staff in another state via Interstate Compact on the Placement of Children, the Homefinding Specialist will enter the relatives in FACTS as a Foster Home within three (3) business days of approval of the family or the child's worker forwarding the other state's approved homestudy and family's signed [W-9](#).
- m)** The child's placement effective date will be entered in FACTS within one (1) business day of the placement. In addition, this will also ensure that the child has an EPSDT Health Check screening scheduled within the five (5) day time frame required by the Sanders Consent Decree.
- n)** If the child was in foster care prior to this placement, the child's medical card and a new SS-FC-40 are to be given to the kinship/relative family in case medical services are required prior to the issuance of a card to the kinship/relative family for the child. If the child was not in foster care prior to this placement or the child's medical card cannot be located, the child's worker will provide the SS-FC-40 and SS-FC-40A to the kinship/relative family for the child's emergency medical needs.
- o)** The child's worker will notify the Office of Child Support Enforcement and the Office of Family Support of the child's placement in foster care if appropriate.
- p)** The child's worker will follow General Placement Activities as listed in Section 2.6.2.

2.6.4. Placement Activities Specific to Kinship Homes with No Blood Relation to The Child.

In some instances, children may be placed in homes where the caretakers are not considered “specified relatives” in regard to receiving child only TANF reimbursement for care. This usually occurs when there is not a blood relationship between the child and the kinship provider or if the relationship is biological but distant, therefore ineligible for child only TANF benefits. In these situations, the Department may provide a State Paid Kinship Care Placement Payment until the kinship provider is approved as a certified foster/adoptive parent provider. The following guidelines must be followed for a provider to receive this payment:

- a) Kinship providers must first apply and cooperate with the application process for Child Only TANF benefits. Only those who have been denied will be eligible for State Paid Kinship Care Placement Reimbursement through this process.
- b) The payment is to be provided for forty-five (45) days, which is the allotted time given to complete the relative/kinship homestudy.
- c) A review will occur within sixty (60) days of placement if the kinship provider has not been approved as a foster/adoptive provider and every thirty (30) days following the initial sixty (60) day review until the home is approved.

Rates for this payment will be consistent with the amounts granted for Child Only TANF payments. The TANF chart is as follows:

		TANF Child Only Rates	Per Child Rate	Rounding Difference	Daily Rate
1	Child	\$262	\$262.00		\$8.61
2	Children	\$301	\$150.50		\$9.90
3	Children	\$340	\$113.33	0.01	\$11.18
4	Children	\$384	\$96.00		\$12.62
5	Children	\$420	\$84.00		\$13.81
6	Children	\$460	\$76.67	(0.02)	\$15.12
7	Children	\$497	\$71.00		\$16.34

8	Children	\$508	\$63.50		\$16.70
---	----------	-------	---------	--	---------

In order to complete the payment, the worker will do the following:

- a) Complete a demand payment in FACTS using “other approved” payment type with a notation in the comment section stating, “State Paid Kinship Care Placement Payment”. ***(Homefinding staff will be required to add State Paid Kinship/Relative to the services list in the Service/Admin screen in the provider record in order for the option of “other approved” to be enabled.)***
- b) The child’s worker will complete the demand payment by the third (3rd) working day of the month following the month the child came into placement. ***Example: If a child was placed in August, the child’s worker will make the payment for the month of August by the third (3rd) working day of September.***
- c) If the child is not placed in the kinship home for the entire month, workers will need to pro-rate the payment based on the daily rate as listed above.

Note: Once a Kinship/Relative Provider is approved as a Foster/Adoptive Provider, regular boarding care payments in the amount of \$600 per month will begin. Kin/Relative providers are NOT eligible to receive any other payments or back-payments during the time that they received state paid kinship care. Please see Foster Care Section Boarding Care Payments for more information.

2.6.5. Placement Activities Specific to Specialized Family Care (Medley)

The following must occur:

- a) The child’s worker will compile the following information:
 - 1. Child, Youth and Family Case Plan, or YS Youth Case Plan for voluntary placement and youth services children, or the Family Assessment for child protective services children
 - a. Birth certificate
 - b. Social Security card
 - c. Copy of the court order granting the Department custody
- b) Child’s worker will follow General Placement Activities as listed in Section 2.6.B

2.6.6. Placement Activities Specific to Out-of-State Placement (ICPC)

The following must occur:

- a) An Interstate Compact Report on Child's Placement Status ([ICPC-100B](#)) is completed in FACTS, signed and submitted, in triplicate, to the Interstate Compact Administrator in the Office of Social Services within ten (10) days of the date of placement to confirm placement and initiate supervision. The ICPC-100B is also used for notification that a prior approved resource will not be used for placement and subsequent compact termination.
- b) Child's worker will follow General Placement Activities as listed in Section 2.6.B

2.6.7. Placement Activities Specific to Transitional Living Placements

When a youth is placed in a Transitional Living Placement setting, such as in an apartment of their own¹, whether supervised by a private agency or by the youth's caseworker, placement must be made in accordance to the following guidelines to assure that the youth continues to receive foster care benefits:

- a) The youth's worker must have the youth complete a [W-9](#), so the youth can be set-up as a transitional living client in FACTS and placed with themselves in placement.
- b) Once a W-9 has been completed by the youth, the worker must complete a search of the open and closed provider records to determine if the youth has been opened as a transitional living client previously.
- c) If the youth has not been opened previously, the youth's worker must open the youth up as a transitional living client provider in FACTS, by completing the General tab in the provider record, then completing the Document Tracking of the W-9, then add services to the youth's provider Service Administrative Screen. Services normally utilized for youth in transitional living are: Educational Services, Transitional Living Services, Housing, and Clothing.
- d) If the youth has been opened previously as a transitional client, then the worker may need to reopen the provider record.
- e) Once the youth's worker obtains the youth's provider number, the youth can be placed in FACTS with themselves. The youth's placement effective date will be entered in FACTS the **same day** of the placement. This will also generate a medical card for the youth within a timely manner. In addition, this will also ensure that the youth has an [EPSDT Health Check](#) screening scheduled within the

¹ Youth who will be placed in their own apartment and will receive Independent Living funds must be 18 years of age.

five (5) day time frame required by the Sanders Consent Decree. If the youth was in foster care prior to this placement, the youth's medical card and SS-FC-40 and SS-FC-40A is to be given to the agency in case medical services are required prior to the issuance of a card to the facility for the youth.

- f) The youth's worker must submit the [W-9](#) to the local financial clerk, so they can complete and approve the Tax screen in the provider record and make sure that the information is entered in a timely manner.
- g) The youth's worker must document the youth's eligibility in the Youth Transitioning, Placement Plan and Placement Recommendation screens in FACTS, with approval for placement being sent to the worker's supervisor.
- h) Once the youth's placement is approved by the supervisor, the youth's worker must complete the Enter/Exit screen in FACTS, documenting the entry date for the youth.
- i) The youth's worker must complete the youth's address and telephone number in the Demographic screen in FACTS and make sure that the youth's address is correct.
- j) Once a plan has been developed for a youth to be moved into his/her own apartment under the supervision of a transitional living agency, the youth's worker must make an ASO referral for Chafee Pre-Placement Activities.
- k) All concrete items/services (start-up expenses), such as a deposit for an apartment, first month's rent, utility deposit, household items, furniture or other items for the apartment, must be paid for through a demand payment request. These requests are to be submitted to the youth's worker by the private transitional living agency, if they are providing the supervision. Original receipts must be submitted with a request for reimbursement.
- l) Once a request for these start-up expenses is received by the youth's worker, the worker will complete a demand payment request, utilizing payment type Independent Living Services and Supplies and document that it is for start-up expenses within three (3) working days of the request.
- m) Once a youth has moved into his/her own apartment, under the supervision of a transitional living agency, the youth's worker must make an ASO referral for Chafee Phase Two-Part One.
- n) The youth's worker will indicate in FACTS that emancipation is the youth's permanency plan on the Permanency Plan screen.
- o) Once the youth's provider record is complete, including the Tax screen, the worker should link all needed paid services on the youth's Service Log, as well as any unpaid services on the Services

screen in the Youth Transitioning section of the youth's FACTS case record.

- p) The youth's worker must assist the youth in locating and securing safe and affordable housing if the placement is being directly supervised by the Department.
- q) The youth's worker must assist the youth in developing a monthly productivity schedule and a monthly budget and approve the schedule and budget.

2.7 Journey Placement Notebook

The Journey Placement Notebook was developed to provide foster/adoptive parents with a mechanism to receive and maintain information about a child they care for. The notebooks are to be given to foster/adoptive parents when a child/youth enters foster care and is placed in a foster/adoptive home. There may be times when the child/youth's worker may not have all the information about a child at the time of placement; however, it is expected that it should be forthcoming as soon as the information is made available.

The notebook is divided into sections: The Cover/Introduction, the Out-of-Home Observation Report, the Reports and Documents section, the Forms section, and the Terms and Information Guide section. The child's worker must add the child specific information to the notebook, prior to providing it to the foster/adoptive parents. The Notebook also contains several forms that may be useful for foster/adoptive parents, such as medication record, provider list, appointment log, schools attended list, etc. Additional blank forms for the [Journey Placement Notebook](#) may be obtained from The West Virginia Department of Health and Human Resources, internet homepage.

The Child/Youth Journey Placement Notebook contains confidential information about a specific child. The information about this child is not to be shared with anyone other than the Multidisciplinary Treatment (MDT) Team members. The information in the notebook is not to be copied for any reason by the foster/adoptive parent(s) without permission from the child's DHHR worker.

The following steps must be taken when a child is placed in a foster/adoptive home:

- a) When a child enters foster care and is being placed into a foster/adoptive or kinship/relative home, the child's worker must provide the Journey Placement Notebook to the foster/adoptive parent(s).
- b) The child's worker must add all of the child specific documents to the Journey Placement Notebook, such as the child's case plan, medical information and forms, biological parents background information, educational information, MDT information, and child summary.

- c) The child's worker will explain the Journey Placement Notebook's purpose to the foster/adoptive parent(s). They will specifically explain how the Out-of-Home Observation Reports and Clothing and Personal Item Inventory List are to be utilized.
- d) The Journey Placement Notebook is to be kept in the foster/adoptive home. The foster/adoptive parent(s) should keep the Journey Placement Notebook in a secure place where other members of the family will not have access.
- e) The foster/adoptive parent(s) should bring the child's Journey Placement Notebook to each MDT meeting so that the child's worker can ensure the notebook contains current information. The child's workers will provide updated information to be placed in the notebook. The previous information will be put in the child's case record, if it is not already in the record.
- f) In a situation where the child is moved from a foster/adoptive home to another foster/adoptive home, the Journey Placement Notebook is to follow the child. If the child is moved from a foster/adoptive home to a group/residential foster care setting, the Journey Placement Notebook must be returned to the child's DHHR worker, unless the stay in the group/residential foster care setting will be short term and the child will be returning to the same foster/adoptive home. During the child's stay in a group/residential foster care setting, the child's DHHR worker will maintain the Journey Placement Notebook for the child, until they are placed into another foster/adoptive home. Then the Journey Placement Notebook will follow the child to the new foster/adoptive home.
- g) The Journey Placement Notebook is to be returned to the child's DHHR worker upon the child's exit from foster care, except when the child exits foster care to permanency of adoption or legal guardianship.
- h) Information contained within the Journey Placement Notebook may be provided to the child upon their exit from foster care upon their request.
- i) Educational and medical information contained within the Journey Placement Notebook must be provided to children who exit foster care at the age of eighteen (18) years or older.

The Zipper Binder may be re-used for future children entering care, if they are in good condition. You will need to request the materials that go inside of the binders from the Division of Children and Adult Services, Foster Care Specialist or print the forms by clicking on the following hyperlink: [Journey Placement Notebook Forms](#).

2.8 Life Book

Children in out-of-home placements often lose their connection with their life history. For young children in particular, memories may dissipate with time and the

recall of grandparents, other family members, family friends, pets, and other connections may fade. Community connections with a pastor, teacher, neighbor, or others may be forgotten when the child relocates away from his/her community. Stuffed animals, trinkets from carnivals, school awards, valentine cards, and other such typical childhood mementoes seldom accompany a child into foster care. For many people, family picture albums, scrap books, family movies and videos, birthday cards, yearbooks, trophies, and other types of mementoes are significant items that document history and experiences of life. Through these items, we maintain our identity, accomplishments, history, and a connectedness with our experiences.

Children in foster care should have a similar opportunity to stay connected with their identity. A Life Book is a scrapbook that contains photographs, drawings, anecdotal stories about the child, his/her family and friends, and other memorabilia. The child can participate in developing the Life Book and in dictating or writing his/her own contributions to the history. Life Books help document children and youth's personal histories as they go through the foster care and adoption process. They also serve as a way for workers and foster/adoptive parents to connect with and understand the child's history and experiences. The process of developing the Life Book communicates to the child that the adults in the child's world are interested in his or her history, experiences, culture, and family. It can serve as a tool to build new connections with the foster parent and the caseworker.

Upon a child's entry into foster care the provider will purchase a Life Book for the child. A portion of the child's initial clothing allowance may be used to purchase the Life Book. The worker, with the assistance of the care provider, will gather as much of the following items as possible for inclusion in the Life Book:

- a) Photographs**
- b) Drawings**
- c) Vital information about the child's biological family and pets**
- d) How the child was raised in terms of culture and religion**
- e) School information**
- f) Family memories**

The Life Book will follow the child through all foster care placements until he/she reaches permanency. It is the responsibility of the child's worker to ensure the Life Book is maintained and updated. Updates may be completed during Multidisciplinary Treatment Team meetings, family visits, and visits between the biological parents and the foster/adoptive family.

Section 3

ASSESSMENT

3.1 Introduction

All children entering foster care should be thoroughly assessed to understand the child's strengths and needs and to ensure the child's placement is appropriate to meet those needs. Thorough assessment of the child and his/her situation is vital in ensuring placement stability and timely permanency. Information gathered by the worker and/or various assessments will be used by the Multidisciplinary Treatment Team to develop a placement plan and compile the Child, Youth and Family Case Plan and/or YS Case Plan.

The worker should explore the following information:

- a)** The child's physical health
- b)** The child's developmental and/or educational level
- c)** The child's daily living activities
- d)** The presence of behavioral or emotional issues and recommended treatment
- e)** Strengths and weaknesses for the family and services needed
- f)** The attitudes and desires of the child about his future, if age appropriate
- g)** The social development of the child
- h)** The attitude and desires of the family about the child's future
- i)** The child's behavior, attitudes, and ability to relate

The child's worker will document information gathered through assessments on the following screen in FACTS:

- a)** Education information will be documented on the child's employment and education screen.
- b)** Immunization and health information will be documented on the child's medical screens.
- c)** The child's characteristics will be documented on the child's client characteristics screen.
- d)** The child's worker will document the child's placement needs in the provider recommendation screen, the enter/exit placement screen, the placement safety evaluation screen, and the placement evaluation screen.

3.2 Health Care

The Department has the continuing responsibility to develop and maintain the physical and emotional health of children in foster care. In current medical practice, health supervision of children is based on periodic visits for health appraisal and medical care which includes taking a thorough medical history of the child, careful physical examinations, medical treatment, routine immunizations, mental health counseling and treatment, and guidance for caretakers.

3.2.1 Early Periodic Screening Diagnosis and Treatment (EPSDT) HealthCheck Program

Enrollment and participation in the Early Periodic Screening Diagnosis and Treatment Program, known as [HealthCheck](#), is a requirement for every child in foster care. Evaluation of health status and provision of any needed medical treatment is a necessary component of foster care.

Through this program all children in foster care receive a comprehensive range of preventive and primary health services including vision testing, physical examinations, comprehensive health/medical history, dental screens, nutrition assessments, developmental and behavioral assessments, hearing screens, lead testing, immunizations, ear, nose & throat examinations, vital signs assessments, lab tests, and referrals.

An initial [HealthCheck](#) appointment is required at the time a child enters placement. Sanders Liaisons (aka HealthCheck Foster Care Liaisons) are Office of Maternal Child and Family Health employees who facilitate administrative case management activities that help fulfill the mission of Medicaid's EPSDT benefit. Specifically, HealthCheck Foster Care Liaisons provide the outreach (identifying, informing and assisting) necessary to establish regular health supervision plans for children in foster care (as defined by 45 CFR 1355.20). HealthCheck Foster Care Liaison responsibilities include:

1. Ensuring that foster children and their WVDHHR-approved caregivers are aware of the HealthCheck Program, appointment scheduling (per established periodicity), and the availability of transportation assistance.
2. For initially-placed children, initiating the CSHCN Screener© (a five item, parent-reported tool designed to reflect the federal Maternal and Child Health Bureau's consequences-based definition of children with special health care needs).
3. Determining a medical provider preference before scheduling initial HealthCheck screening appointments, ideally within seventy-two (72) hours of a child's placement.
4. Obtaining documentation of initial HealthCheck screening results and entering relevant information in FACTS.

5. Recording health surveillance indicators (height/weight and tobacco exposure) in an automated information system established by the OMCFH.
6. Notifying BCF Social Workers of assigned foster children who are due (per the current HealthCheck periodicity schedule) for periodic HealthCheck screening.
7. Obtaining documentation of periodic HealthCheck screening results and entering relevant information in FACTS.

It is imperative that workers enter children into all provider types quickly for the Health Check to be initiated timely.

HealthCheck Periodicity Schedule

The periodicity schedule for [HealthCheck](#) examinations is as follows:

- a) Infants from birth to age one (1) month are required to be seen by a HealthCheck physician every two (2) weeks.
- b) Infants from age one (1) month to six (6) months old are required to have a HealthCheck exam every two (2) months.
- c) Children from six (6) months old to eighteen (18) months old are required to be seen by a HealthCheck physician every three (3) months.
- d) Children age eighteen (18) months old to thirty-six (36) months old are required to have a HealthCheck exam every six (6) months.
- e) Children ages thirty-six (36) months through age twenty (20) are required to be seen by an HealthCheck physician every twelve (12) months.

3.2.2 High Risk Infants HealthCheck Periodicity Schedule

Children who score as high risk through the West Virginia Statewide Birth Scoring Project are scheduled for [HealthCheck](#) exams more frequently. After discharge from the hospital, preventive health examinations are recommended at two (2) to four (4) week intervals up to twenty-four (24) weeks. Ideally examinations should occur at:

- a) Birth
- b) Two (2) weeks
- c) Four (4) weeks
- d) Eight (8) weeks
- e) Twelve (12) weeks
- f) Sixteen (16) weeks
- g) Twenty-four (24) weeks

3.2.3 Birth to Three Programs

[West Virginia Birth to Three](#) must be considered for all children under the age of three who have been identified as experiencing or at risk of developing substantial developmental delays or atypical development patterns; or have been determined to fall under an at-risk category. **Children who have been placed in the custody of the Department, due to a substantiated report of maltreatment or due to being unsafe in their home, must be referred to the [Birth to Three Program](#).**

The [Birth to Three Program](#) will provide the child, foster parent(s), and biological parent(s) with services geared toward assisting the child to overcome any identified developmental delays. The child's MDT will determine how to provide the services, so the child's best interests are met. The child's MDT will designate the foster parent as the surrogate parent to make decisions for the Birth to Three services. Birth to Three services may be provided to the foster parent(s) and the biological parent(s) during the same time. Example: The foster parent may be receiving services to assist a toddler with walking. There may be a plan to send the child home soon, so the biological parent may also be involved in services during visitation, so they will know how to assist the child with walking.

The following steps must be taken when a child enters custody:

- a) Once a child who is under the age of three (3) enters custody, the worker must assure that the Initial Health Check Screen is completed within the 30-day time frame. ** Refer to EPSDT and Foster Care Section 3.2.1 for more details.
- b) The child's worker will gather all results of the initial Health Check Screen by contacting the foster parent, private providers, doctor, or any other individuals who may have the information prior to the child's initial thirty (30) day MDT.
- c) The child's worker will provide to the child's initial thirty (30) Day MDT the referral information concerning the [Birth to Three Program](#). The Birth to Three Program staff should be invited to attend the child's MDT.
- d) The child's worker will make a referral to the Birth to Three Program using the [Birth to Three Referral](#) form for Early Intervention Part C-Birth to Three services. Send the original to the local Birth to Three offices, file one copy in the case record, and provide the family with the third copy. The worker will save a copy of the referral to FACTS in the file cabinet. The worker must also include a copy of the results of the Health Check Screen, copy of the Initial Assessment and Safety First

Evaluation, and any other assessments that may assist in determining the child's need for services in the referral.

- e) The child's worker will document the referral information on the Service Log in FACTS.

If a child is qualified for services through the [Birth to Three Program](#), the child's worker will maintain contact with the Birth to Three Program staff to ensure that consistent services are provided. The child's worker will also attend the treatment team meetings held by the Birth to Three Program staff.

3.2.4 Dental Care

Routine dental care is provided to children in foster care through the EPSDT, [Health Check](#) program. All foster children are to be referred to a dentist by the time they are three (3) years of age for a yearly check-up and dental services as prescribed by the dentist. Medicaid will only cover dental check-ups once every six (6) months. Any request for dental care that is not routinely covered by Medicaid, such as braces, and require more frequent check-ups must have prior approval through the [Bureau for Medical Services](#) and be approved by the Regional Program Manager or the Child Welfare Consultant prior to the services being provided.

3.2.5 Immunizations

Every child shall be immunized against childhood diseases including whooping cough, mumps, tetanus, diphtheria, polio, measles, rubella, and any other vaccine recommended by the physician and by the [Bureau of Public Health](#). Immunizations can be obtained through the EPSDT Health Check program. In order for a health professional to administer an immunization to any child, they are required by law to ensure that the person accompanying the child is aware of the possible side effects of the vaccine and appropriate measures to take in the event of an adverse reaction. The person accompanying the child who receives an immunization must provide informed consent for the procedure and must sign the permanent record card at the time the vaccine is administered.

3.2.6 Eye Care

Routine eye care is provided to children in foster care through the EPSDT, [Health Check](#) program. All foster children are to be referred to an optometrist by the time they are five (5) years of age for a yearly check-up and eye care services as prescribed by the optometrist.

3.2.7 Children with Special Health Care Needs

Foster children are eligible to participate in the [Office of Maternal and Child Health's Children with Special Health Care Needs](#) (formerly Handicapped

Children's Services.) Referrals should be made through the EPSDT [Health Check](#) program or by the child's supervising physician.

3.2.8 Substance Abuse Services

Many youth enter foster care with substance abuse problems. For others this diagnosis is made after the youth is already in foster care. Whenever it is suspected that a child may have a problem with substance abuse, a referral shall be made to the Regional Child Specialist at the local Community Behavioral Health Center for an assessment. The results of this assessment must be incorporated into the child's treatment plan.

3.2.9 Mental Health Services

Most children in foster care will need mental health services. A referral shall be made to the Regional Child Specialist at the local Community Behavioral Health Center or through the staff of the specialized foster care or group/residential facility for an assessment. The results of the evaluation will then be used as the basis for the child's treatment plan and for arranging subsequent psychological or psychiatric services that may be needed.

3.2.10 Emergency Services

Provisions shall be made for the immediate services of a doctor or hospital for an ill foster child, for needed follow-up after an illness or accident, or whenever there is other evidence of medical need. Children in foster care who may need emergency medical services prior to the issuance of a medical card are to be given a copy of the form letter SS-FC-40A stating their name, birth date, social security number, date of placement, the name of the facility or foster parent where the child is residing, and the type of services being provided. The letter is time limited. This form is to be used only if the child does not yet possess a valid medical card. Children in foster care will be provided with an SS-FC-40 at the time of each placement. This form will indicate the child's name, Medicaid number, and the provider or foster/adoptive parent's names and is to be used by the provider or foster/adoptive parent to obtain the medical treatment necessary noted on the form. The child's foster/adoptive parents or the group/residential facility should notify the Department in the case of an emergency. If the child's worker, supervisor, or Community Services Manager is not available to provide emergency consent for medical care, the foster/adoptive parent or group/residential facility will utilize the child's medical card or SS-FC-40A to provide emergency medical services for the child. The foster/adoptive parent or the group/residential facility must notify the child's worker as soon as possible of the event.

3.3 Initial Clothing Assessment and Allowance

All children who first enter foster care are entitled to an adequate wardrobe and are eligible to receive an initial clothing allowance at the time of placement.

The child's worker shall assess the child's initial placement clothing needs and complete the [Placement Wardrobe and Personal Inventory](#) form of the child's personal belongings. If a child does not have an adequate wardrobe at the time of initial entry into the foster care system, items of clothing may be purchased by the foster/adoptive parents or the facility. In considering the purchase of clothing, the child's worker should be aware of the usable clothing the child already possesses. The initial clothing purchase is not intended to completely outfit the child but only supply the child with immediate clothing necessities.

This clothing payment is to only be made when a child initially enters foster care. The child's worker is not to issue another clothing payment for a child if the child moves from one placement to the next. The child's clothing brought from his home and purchased with the initial clothing payment must follow the child. A child's initial foster care placement clothing allowance may be up to \$300.00. However, children placed in Medicaid paid facilities, such as ICF/MRs (Potomac Center for example) and Psychiatric Residential Treatment Facilities, will need to have their clothing reassessed twice a year. Children and youth placed in these facilities often gain or lose weight on a continuous basis due to prescribed medications. Medicaid reimburses room, board and supervision but not clothing. Workers will need to assess the youth's clothes when initially placing them in these facilities and every six months or so thereafter.

The initial clothing allowance can be approached and completed through two (2) separate avenues. If the placement provider can expend the \$300 they may purchase the child's clothing using their own funds with the expectation of reimbursement from the Department. The placement provider must supply the purchase receipt(s) to the child's worker. The child's worker will then use the Initial Clothing Allowance Demand Payment type to generate a payment to the child's placement provider. The placement provider may purchase clothing from different vendors as long as the total clothing purchase **does not surpass the \$300 total limit.**

Many times, the placement provider may not possess available funds to purchase the child's initial clothing. In these situations the child's worker may issue a [BA-67](#) Clothing Voucher (not to exceed \$300) which will be accepted by any vendor who has agreed to this form of payment. The BA-67 is a form of demand payment which allows a voucher to be presented to the vendor in lieu of funds provided by the placement provider. In some instances, a placement provider may wish or need to purchase clothing from multiple vendors using the BA-67 voucher. If a placement provider wishes to split the \$300 clothing allowance between multiple vendors the worker can generate multiple [BA-67](#) vouchers to separate vendors as long as they do not exceed the **\$300 total** clothing allowance limit.

Both forms of payment for the initial clothing allowance require the worker to enter the “clothing assistance” service in the child’s service log screen in FACTS and they both also require a demand payment request.

3.4 Title IV-E Foster Care Eligibility/Reimbursability

Title IV-E of the Social Security Act is a federally funded program which provides fiscal support on behalf of individual children in foster care, or children who have gained permanency through legal guardianship who would have been eligible for AFDC benefits, as determined by the July 1996 standards for the program, had they remained in their own homes. A review of each child coming into foster care must be conducted by the Division of IV-E Finance to determine the child’s eligibility for Title IV-E funds. When a child is determined to be eligible and reimbursable for Title IV-E funds, the Department is reimbursed a percentage of the expenses incurred in providing room, board, and supervision to the foster child. In addition, the Department is also reimbursed for a percentage of the administrative costs of the foster care program and training costs for staff.

Eligibility for Title IV-E is established at the time a child enters the care and custody of the Department. The child’s worker will do the following actions within thirty (30) days of the child entering foster care:

- a) Document in FACTS the child and family specific information necessary to make a Title IV-E determination including:
 1. Who the child was living with during the month the initial petition was filed, or the voluntary placement agreement was signed;
 2. The date of the court order removing the child from the home;
 3. If the child has medical and/or dental insurance coverage; (Not a IV-E requirement)
 4. If the child was deprived of parental care or support by one or both parents such as absence, death, disability, or unemployment;
 5. The income and assets of each parent;
 6. Marital and employment information of each parent;
 7. The child’s legal history and educational status; and
 8. If the family is receiving any benefits such as social security, child support, black lung, etc. either directly or for the child.
- b) The child will automatically be assigned to the Division of IV-E Finance for a Title IV-E determination. The Division of IV-E Finance will contact the child’s worker to provide copies of the following information necessary for determination purposes:

1. The initial petition alleging child abuse and/or neglect resulting in a removal court order, if the child is in care because of child abuse and neglect;
2. The initial court order resulting in the physical removal of the child from the home, if the child is in care due to child abuse/neglect or youth services; or
3. The voluntary placement or relinquishment agreement if the child is placed into foster care by his parent.
4. A copy of the child's birth certificate and Social Security Card.

(Refer to the FACTS Desk Guide for more information about the Title IV-E determination process.)

3.5 Regional Clinical Reviews

The clinical review process is a coordinated effort designed to provide a comprehensive, objective, clinical review of designated youth.

The role of this review process is to identify what the youth's current treatment and permanency needs are and serve as a resource to the youth's individual Multidisciplinary Team (MDT) in guiding decision making.

3.5.1 Targeted Population

Youth that are targeted for this review process include youth currently in out-of-state residential treatment facilities or at risk of out-of-state placement. The youth to be referred to the Regional Clinical Review Process are:

1. Youth at risk of out-of-state placement.
2. If a quality Comprehensive Assessment & Planning System (CAPS) has been completed within the past six (6) months, or a youth has received an inpatient diagnostic within six (6) months by an individual meeting the Regional Clinical Review Team (RCRT) individual reviewer credentialing standards, and a youth is at risk of out-of-state placement, the DHHR worker will complete section one (1) of the Regional Clinical Review Tool and refer the youth to the Regional Clinical Coordinator (RCC) for Regional Clinical Review. The CAPS Assessment or Diagnostic Report will be utilized instead of having an individual reviewer complete section two (2). The Regional Clinical Review Team will complete section three (3).

3. If a quality CAPS or inpatient diagnostic (by an individual meeting IR credentialing standards) has not been completed within the past six (6) months, and the youth is at risk of out-of-state placement, the DHHR worker will follow the standardized Regional Clinical Review process.
4. Youth currently out-of-state for who discharge planning is required.
5. Youth identified for discharge within one hundred twenty (120) days, as well youth with twelve (12) month stays or longer in out-of-state placement. The RCC and regional designees will work together using the discharge criterion checklist to determine if the youth needs a Regional Clinical Review.
6. Youth in out-of-state placements for whom funding is being discontinued (youth's continued stay does not meet medical necessity).
7. Per request of youth's MDT at significant treatment junctures (applies to youth in out-of-state placement).
8. Youth sent out-of-state without regional clinical review (reviewed by a modified regional clinical review process).
9. As Regions reduce the number of youth in out-of-state placements it is the intention that they will begin reviewing those youth in out-of-state placement at six (6) month intervals.

3.5.2

Process

The responsibility of the Regional Clinical Coordinator is to complete the following activities of the regional clinical review process:

1. The Regional Clinical Coordinator (RCC) will receive the initial referral and screen for the purpose of determining eligibility. The referral source will be notified of eligibility for review within two (2) business days.
2. The RCC will send the clinical review packet, including section one (1) of the review tool to the DHHR worker for completion within ten (10) business days.
3. DHHR worker and RCC will work together to provide the ASO referral and completed packet (including section one (1), consent to release information and other necessary information) to the Individual Reviewer.
4. The RCC follows up with the Individual Reviewer during the time allotted for completing section two (2). The Individual Reviewer will complete section two (2) within ten (10) business days of receiving the designated referral information.

5. The RCC receives the youth's packet, including completed sections one (1) & two (2) at least two (2) business days prior to the scheduled youth's Clinical Review, unless specified as an emergency review.
6. The RCC schedules the regional clinical review.
7. The RCC makes the appropriate copies, facilitates the meeting, fills in the Child and Adolescent Strengths & Needs (CANS) Assessment score sheet per the Regional Clinical Review Team's scores, and enters the information on section three (3) of the Clinical Review Tool.
8. The RCC enters the information into the data base and provides the packet to the DHHR Worker, Supervisor, and the Regional Program Manager as a resource for the MDT.

3.5.3 Individual Reviewers

The role of the individual reviewer is to review, assess, and evaluate the youth's needs based on a clinical review of records and interviews with the youth and agency. The role of the individual reviewer is to make a determination of:

1. The youth's treatment and permanency needs.
2. The agency where the youth is placed has the program/services in place to meet the youth's needs.
3. The youth and family/legal guardian are involved in the treatment with their input being considered in the treatment and discharge planning process.
4. Discharge planning is occurring from the time of admission throughout the youth's treatment.
5. The identified discharge plan is based on the youth's need.

The individual reviewer is not taking the role of a licensing specialist or DHHR representative. They must report all instances of suspected abuse, neglect, or any other concerns about the agency the youth is placed with to the DHHR district office.

Individual Reviewers may not review youth in an agency where they are employed or in any instance where a conflict of interest may exist.

3.5.4 Responsibilities

The responsibilities of the Individual Reviewer are multi-faceted. The following are the specific activities involved in their review process:

1. The Individual Reviewer is contacted by the Regional Clinical Coordinator (RCC) and accepts the youth's case to review.
2. The Individual Reviewer is contacted by the youth's legal guardian, who gives him/her and the RCC section one (1) of the Clinical Review Tool and all available records to assist with the review (examples: consent, ASO referral, assessments, etc.).
3. The Individual Reviewer reviews section one (1) and all pertinent data to become familiar with the youth. Requesting additional information from the legal guardian may be required. The Individual Reviewer contacts the facility where the youth is currently placed and completes an interview with the youth's primary treatment provider, typically the therapist or case manager/social worker, and completes an interview with the youth.
4. The Individual Reviewer inputs all information into section two (2) of the Regional Clinical Review Tool.
5. The Individual Reviewer completes an initial CANS and any subsequent CANS modules on the youth.
6. The Individual Reviewer makes sure that sections one (1) and two (2) of the tool are completed and forwarded, along with the CANS and subsequent CANS modules, to the Regional Clinical Coordinator.
7. The Individual Reviewer attends the Regional Clinical Team Review to staff his/her case.
8. Following staffing the case, the Individual Reviewer gives all written/typed notes/information to the legal guardian.

3.6 Educational Stability

Child welfare agencies are required to assure educational stability for children in care. At the initial time of removal of the child from their home, the agency must make diligent efforts to maintain the child in the school that they are currently enrolled in unless it is not in the child's best interest. The child welfare agency must cooperate with the local education agency to assess what would be in the child's best interest for continuing to attend their current school. Workers need to understand that the guiding placement decision should be to keep children in their school of origin if it is at all possible. These type placements allow foster children to keep their routine to some extent, their friends, and their extra-curricular activities. When these things are factored in, foster youth would be able to keep consistency in than half of their life. Workers also need to evaluate the child's educational needs at every MDT. Consideration should be given to how they are doing, do they have an IEP, does it need updated, do they have other educational

needs, are they involved in any extra-curricular activities and are they having any difficulty.

As stated earlier, workers must assume remaining in the school of origin is in the child's best interest. However, there are occasions when this is not the case. When making a determination as to whether a child's best interest is to remain in their school of origin, workers should consider the following;

- Preferences of the child;
- Preference of the child's parent(s) or education decision maker(s);
- The child's attachment to the school, including meaningful relationships with staff and peers;
- Placement of the child's siblings(s);
- Influence of the school climate on the child, including safety;
- The availability and quality of the services in the school to meet the child's education and socio-emotional needs;
- History of school transfers and how they have impacted the child;
- How the length of the commute would impact the child, based on the child's developmental stage;
- Whether the child is a student with a disability under the [Individuals with Disabilities Education Act \(IDEA\)](#) who is receiving special education and related services or a student with a disability under Section 504 who is receiving special education or related aids and services and, if so, the availability of those required services in a school other than the school of origin; and
- Whether the child is an EL and is receiving language services, and, if so, the availability of those required services and in a school other than the school of origin, consistent with Title VI and the [Equal Educational Opportunities Act \(EEOA\)](#)

If the child can be maintained in the current school but is placed outside of that school's living district, the education agency must work with the child welfare agency to arrange transportation. If placement does not allow for the child to remain in their school due to it not being in the child's best interest, such as distance, travel time, safety concerns, etc., the social worker must immediately contact the attendance director to enroll the child into the new school in the placement's district. There should be no time lapse due to the transfer of schools, and the new school must accept the child immediately, even if previous records have not yet been obtained. The social worker will reassess educational stability at each subsequent placement during the child's time in care.

Federal funding is available to cover education related transportation costs for children in foster care. The social worker must work with the local education

agency and the foster parents, kinship/relative parents, or residential agency staff to develop a plan for transporting the child to and from their home school. The child may be eligible for assistance from the education agency to assist with transportation costs or other needs. This could include assistance funded by the [McKinney-Vento Act](#) or other available education funding. If the education agency does not cover the costs for transportation, the child welfare agency may do so using supplemental boarding care payments for foster or kinship/relative parents. The social worker must calculate the costs for transporting the child to and from school and reimburse the foster or kinship/relative parents each and every month in which transportation was provided. Payments for transportation to and from school are only utilized whenever the foster or kinship/relative parents are transporting or paying for transporting a child to and from a **home** school in order to assure educational stability. The exact amount of the transportation costs should be reimbursed to the foster or kinship/relative parents or if private automobile is utilized, the standard state rate per mile for travel reimbursement should be used to calculate the costs. If a child is enrolled in a school that is in the home district of the foster or kinship relative parent, it is expected that the child will utilize the same means of transportation for all students in the district and will not be eligible for transportation payments through supplemental boarding care. Group residential agencies will be reimbursed for their transportation costs in a different manner and are not eligible for a supplemental boarding care payment. The Fostering Connections to Success and Increasing Adoptions Act also requires that every school-age child in foster care and every school-age child receiving an adoption assistance or subsidized guardianship payment is enrolled as a full-time elementary or secondary school student or has completed secondary school.

Section 4

CASE PLAN

4.1 Multidisciplinary Treatment Teams

A Multidisciplinary Treatment Team (MDT) is a group of individuals, from different disciplines, who work together with the child(ren) and family to develop a service plan and coordinate services. An MDT becomes the central point for decision making during the life of a case. The Case Plan is developed by the MDT, therefore the child(ren) and family's participation is vital throughout the process. Any person or professional who may contribute to the team's efforts to assist the family and child(ren) must be notified and invited to participate in the MDT, **but extra attention must be placed on encouraging the child(ren) and family to participate in the MDT process.**

State Statute [§49-4-406](#), requires the Department to establish a multidisciplinary screening, advisory and planning system.

The purpose of the multidisciplinary system is to:

- a) assist courts in facilitating permanency planning following the initiation of judicial proceedings;
- b) recommend alternatives to the court, including types of services and types of placements, if any; and,
- c) assess, plan and implement a comprehensive, individualized service plan for children who are victims of abuse or neglect and their families involved in an abuse and neglect proceeding, or juveniles and their families involved in status offense or delinquency proceedings when, in a status offense proceeding, the court refers the juvenile for services, and when, in a delinquency proceeding, the court is considering placing the juvenile in the department's custody or placing the juvenile out of home at the department's expense. In any such status offense or delinquency case, the juvenile probation officer shall notify the local office of the Department of Health and Human Resources and the Division of Juvenile Services at least five working days before the court proceeding in order to allow the multidisciplinary treatment team to convene and develop a comprehensive individualized service plan for the child provided that such notice is not required in cases where the child is already in state custody or there exists exigent circumstances which justify taking the child immediately into custody without a judicial proceeding. In developing an individualized service plan for a child, the team shall utilize a uniform comprehensive assessment of the child. The department shall adopt a standard uniform comprehensive assessment instrument or protocol to be used by treatment teams.

The following steps should be followed when a child enters foster care:

- 1) A Multidisciplinary Treatment Team meeting should be established within thirty (30) days of the child entering foster care if one has not already been established. The Multidisciplinary Team shall assess, plan and implement a comprehensive, individualized service plan for children who are victims of abuse or neglect and their families. The Multidisciplinary Team shall obtain and utilize any assessments for the children or the adult respondents that it deems necessary to assist in the development of such a plan.
- 2) The membership of the team should include the child or family's case manager in the Department of Health and Human Resources, the adult respondent(s), the child's parent or parents, guardians, any co-petitioners, custodial relatives of the child, foster or pre-adoptive parents, any attorney representing an adult respondent or other member of the treatment team, the child's counsel or the guardian ad litem, the prosecuting attorney or his or her designee, a member

of a child advocacy center when the child has been processed through the child advocacy center program or programs or it is otherwise appropriate that a member of the child advocacy center participate, any court-appointed special advocate assigned to a case, any other person entitled to notice and the right to be heard, an appropriate school official, and any other person or agency representative who may assist in providing recommendations for the particular needs of the child and family, including domestic violence service providers. The child may participate in the multidisciplinary treatment team meetings if the child's participation is deemed appropriate by the Multidisciplinary Treatment Team. Unless otherwise ordered by the court, a party whose parental rights have been terminated and his or her attorney shall not be given notice of a multidisciplinary treatment team meeting and does not have the right to participate in any treatment team meeting.

- 3) School personnel must be invited to attend all MDT meetings. The caseworker will send the invitation to the principal and/or counselor of the school that the child is currently attending, most recently attended, and/or will be attending, which shall be decided on a case by case basis. Along with this invitation to the principal and/or counselor, the caseworker may request that other school personnel attend as needed, such as a teacher, secretary, or attendance director.
- 4) Adult services staff should be invited to the treatment team meetings for all children age seventeen years or older to plan for continued adult support if necessary. Homefinding staff should be invited to the treatment team meetings to assist the team with placement decisions. Adoption staff should be invited to the treatment team meetings when discussing adoption and permanency planning.
- 5) A team leader should be designated who is responsible for convening meetings, keeping and distributing records, and overseeing all service provision.
- 6) All participants must sign a confidentiality statement.
- 7) The Multidisciplinary Treatment Team must gather sufficient information to thoroughly and comprehensively assess the child's and family's social, emotional, environmental, physical, educational, and financial strengths and needs to determine an appropriate, comprehensive, individualized case plan for the child and his family. The assessments utilized are the Family Functioning Assessment and Service Plan for child abuse and neglect proceedings, the FFA and Family Service Plan for status offense and juvenile delinquency proceedings and any other health, mental health, developmental, educational or life skills assessments available or needed as determine by the Department or the MDT.

- 8)** If the child is in foster care due to Child Protective Services intervention, copies of the FFA, the Service Plan and all other necessary documents shall be shared with the treatment team participants in order to develop the Uniform Case Plan. If the child is in foster care due to status offenses or delinquency, copies of the FFA and Family Service Plan shall be shared with the treatment team.
- 9)** Copies of the family case plan and all other necessary documents shall be shared with the treatment team participants in order to develop the Uniform Case Plan.

Once the Uniform Case Plan has been developed, a copy of the plan shall be provided to the prosecuting attorney, the child's attorney, and all members of the Multidisciplinary Treatment Team.

- 10)** At least every ninety (90) days, the Multidisciplinary Treatment Team is to review and evaluate the progress of the child and family in meeting the goals identified in the Uniform Case Plan, the safety of the child in placement, the continuing necessity for and appropriateness of the placement, and the extent of compliance with the case plan. If the child is in foster care due to Child Protective Services intervention, the Child Protective Services Social Worker must complete the Family Case Plan Evaluation and Continuing Safety Evaluation, or if the child is in foster care due to status offenses or juvenile delinquency, the Youth Services Social Worker must complete the Family Services Plan Review, in order to assist the Multidisciplinary Treatment Team in making decisions concerning goal achievement and continuing necessity for placement. Following this review, a written report of the results is to be provided to the court. This will be the document used to review the case at the permanency placement review hearings and judicial review.
- 11)** The child's foster/adoptive parents will provide the out of home observation reports to the child's worker or the Multidisciplinary Treatment Team which will include a report on the progress of the child, any changes in the child's case, an evaluation of the services provided to the child and his family, the status of the child's health and education, and any other relevant information for each month the child has been in placement with the provider.
- 12)** Once the case plan has been developed, it must be filed with the court and a copy of the plan shall be provided to the prosecuting attorney, the child's attorney, and all members of the Multidisciplinary Treatment Team. The Multidisciplinary Treatment Team is to be used to review and evaluate the progress of the child and the family in implementing the provisions of the plan. This evaluation is to be completed by the Multidisciplinary Treatment Team at least every ninety (90) days. Following this review, a written report of the results is to be provided to the court. This will be the document used to review the case at the permanency placement review hearings and judicial review.

- 13) In addition to the development of Uniform Case Plan, the Multidisciplinary Treatment Team meetings should also be used to meet other necessary case review requirements such as the administrative review.
- 14) The Multidisciplinary Team, when discussing placement of the child, must first consider appropriate relatives. If no appropriate relatives are available, the Multidisciplinary Team may then consider foster care homes, facilities, or programs located within the state. The Multidisciplinary Team may only recommend placement in an out-of-state facility if it concludes, after considering the best interests and overall needs of the child, that there are no available and suitable in-state facilities which can satisfactorily meet the specific needs of the child. In any case in which the Multidisciplinary Team and the court decide to order the child placed in an out-of-state facility or program, it shall set forth in the order directing the placement the reasons why the child was not placed in an in-state facility or program.
- 15) The Multidisciplinary Team shall be afforded access to information in the possession of the Department of Health and Human Resources, Division of Juvenile Services, law enforcement agencies, and other state, county, and local agencies, and the agencies shall cooperate in the sharing of information, as may be provided in [sections three \(d\) and six, article five-D and section one, article seven, all of chapter forty-nine](#), and any other relevant provision of law. Any Multidisciplinary Team member who acquires confidential information shall not disclose such information except as permitted by the provisions of the Code or court rules.
- 16) If the Multidisciplinary Team cannot agree on a plan or if the court determines not to adopt the Team's recommendations, a hearing shall be held within ten (10) days of such determination, and prior to the entry of an order placing the child in the custody of the Department or in an out-of-home setting, to consider evidence from the Team as to its rationale for the proposed service plan. If after such hearing the court does not adopt the Team's recommended service plan, it shall make specific written findings as to why the team's recommended service plan was not adopted.
- 17) In the event DHHR is notified by a provider that an emergency MDT meeting is required, the DHHR will have 72 hours to convene this MDT.
- 18) The MDT should determine the appropriateness of court attendance of youth in foster care age 12 and over.

4.2 Interdisciplinary Team (IDT) (Only for Children Placed in Specialized Family Care Medley)

The Interdisciplinary Team is similar to the Multidisciplinary Treatment Team in scope and makeup. This team is for children who are receiving case management

services through a behavioral health agency. The child may also be receiving Title XIX Waiver or Medicaid Personal Care programs. It is responsible for identifying and developing the delivery of services in the community for the child with developmental disabilities.

The Interdisciplinary Team is designated to determine the services the MR/DD waiver needs and/or wants based upon assessments and professional evaluations. This determination is the basis for the Individual Service Plan including the type and the amount of each service. The units of behavioral health services are to be based upon documented need. The QMRP is responsible for developing training programs for each goal and objective of the Individual Service Plan and to recommend activities and settings which optimize attainment of these goals and objectives. All programs must be agreed upon by the members of the Interdisciplinary Team prior to implementation.

It is, therefore, necessary for the child's worker to coordinate the efforts of the Interdisciplinary Team and the Multidisciplinary Treatment Team. The Interdisciplinary Team may serve as the Multidisciplinary Treatment Team and vice versa as long as all the necessary participants for both the Multidisciplinary Treatment Team and the Interdisciplinary Team are present at the meeting.

All necessary Interdisciplinary Team members need to attend the Interdisciplinary Team meetings held every six (6) months. The minimum composition of the Interdisciplinary Team includes:

- The individual;
- The individual's guardian/legal representative (the child's caseworker);
- The individual's licensed psychologist;
- The individual's specialized foster care worker;
- The individual's service coordinator (behavioral health case manager responsible for coordinating services with the provider);
- Medley advocate if the individual is a Medley class member;
- QMRP (responsible to develop and monitor specific instructional programs);
and
- The Family Based Care Specialist.

In addition, the following people should also attend the Interdisciplinary Team meetings:

- The child's foster/adoptive parent (Specialized Family Care provider);
- The child's Guardian Ad Litem;

- The child's CASA, if one has been assigned;
- The child's parents;
- Other members of the child's Multidisciplinary Treatment Team as necessary.

The following must occur:

- The child's worker must attend all Interdisciplinary Team meetings.
- The child's worker is responsible for providing the team with the legal/custodial situation of the child, advocating for the child to achieve his permanency plan, and informing the team of services and treatments available through foster care.

4.3 General Case Planning

Regardless of the way that a child enters foster care (i.e. CPS, Youth Services, voluntary placement), a Case Plan must be developed and documented in FACTS within sixty (60) days of the date the child entered care. In child abuse and neglect proceedings the plan is also filed with the court within thirty (30) days of the entry of an order granting an improvement period (Family Case Plan [§49-4-408](#)) and/or five (5) days prior to a dispositional hearing (Child's Case plan [§49-4-604](#)).

The Uniform Case Plan contains the information necessary to fulfill the state requirements in child abuse and neglect proceedings for a Child's Case Plan ([§49-4-604](#)) and a Family Case Plan ([§49-4-408](#)), as well as the federal requirements for case planning.

Assessment and case planning should be continuous throughout the life of a case. The Case Plan is developed jointly with the parents to ensure that all their needs and any strengths are being addressed through the plan. Throughout the casework process and the court proceedings, the plan may change, and modifications should be made in FACTS as indicated and distributed to all members of the MDT.

The case plan requires the following information:

- A description of the type of home or facility where the child is to be placed;
- A discussion of the safety and appropriateness of the placement;
- A discussion of if the placement is the least restrictive (most family-like) available;
- A discussion of if the placement is in the closest proximity to the parent's home;

- A discussion of if the child is placed a substantial distance from the home of the parents or in a different state, why the placement is in the best interest of the child;
- A description of how the child will receive safe and proper care in this placement;
- A description of the child's educational plan, whether he/she has remained in the same school he/she was attending at time of removal and how educational stability will be achieved.
- A description of the services that are to be provided to the parents, child, and foster parents in order to improve the conditions in the parents' home to facilitate the return of the child to his home or to secure a permanent placement for the child;
- A discussion of the services which will be provided to the child while in foster care in order to address the specific needs of the child;
- A discussion of the appropriateness of the services that have been provided to the child;
- A listing of the child's siblings and their locations and the date of the court order sanctioning separation, if applicable;
- A description of the parent's ability to contribute to the cost of placement;
- The recommended visitation plan;
- Documentation of the efforts to ensure that the child is returned home within the approximate time lines set out in the plan;
- Documentation of the concurrent efforts to achieve permanency should the services designed to achieve reunification be deemed unsuccessful;
- If return home is not the permanency plan for the child, then the case plan must state why reunification is not appropriate and specify in detail the alternative placement for the child including approximate time lines for when such placement is expected to become a permanent placement;
- In the case of a child whose permanency plan is adoption or placement in another permanent home, documentation of the steps being taken to find a permanent living arrangement including child specific recruitment efforts;
- A written description of the programs and services which will help children age fourteen (14) and older prepare for the transition from foster care to independence;
- Documentation of an age appropriate plan for the child that educates him/her about family planning, pregnancy prevention, sexually transmitted

infections, and other issues related to healthy sexual development. If a child self-identifies as being sexually active, the case plan will contain documentation of supportive counseling to work with him/her on issues of abstinence and healthy sexual development. This will be done in conjunction with the child's MDT in all cases and including the biological parents if parental rights are intact; and

- Documentation of the child's health and education background and progress including all medical appointments, counseling, IEPs, school conferences, etc.

The case plan for each child, where appropriate for a child fourteen (14) years of age or over, must include a written description of the programs and services which will help the child prepare for the transition from foster care to successful adulthood. With respect to a child who has attained fourteen (14) years of age, any revision or addition to the plan must be developed in consultation with the child and, at the option of the child, with up to two (2) members of the case planning team who are chosen by the child and who are not a foster parent of, or caseworker for, the child. The case worker may reject an individual selected by the child to be a member of the case planning team at any time if the worker has good cause to believe that the individual would not act in the best interests of the child. One individual selected by the child to be a member of the child's case planning team may be designated to be the child's advisor and as necessary, advocate, with respect to the application of the reasonable and prudent parent standard to the child.

4.3.1 Case Planning Specific to Youth Services

When a child enters foster care through Youth Services the Case Plan will be developed by completing the Uniform Case Plan. This information is documented in FACTS on the case plan screens under the youth's name (child focus).

In completing the Uniform Case Plan the worker must address all of the information required in the items above. This information is required to fulfill the federal requirements for case planning.

A copy of the case plan must be filed in the FACTS file cabinet. A copy may also be printed for use by the MDT and to be filed with the court as appropriate. A copy of the case plan must be provided to all members of the MDT including the child's biological parents, foster parents, service providers, and so forth. Throughout the casework process and the court proceedings, the plan may change, and modifications should be made in FACTS as indicated and distributed to all members of the MDT.

4.3.2 Case Planning Specific to Voluntary Placement

When a child enters foster care through a voluntary placement the Case Plan will be developed by completing the Uniform Case Plan

In completing the Uniform Case Plan the worker must address all the information required in the items above. This information is required to fulfill federal requirements for case planning.

4.3.3 Case Planning Specific to Child Protective Services

The Uniform Case Plan contains the information necessary to fulfill the state requirements in child abuse and neglect proceedings for a Child's Case Plan ([§49-4-604](#)) and a Family Case Plan ([§49-4-408](#)) as well as the federal requirements for case planning.

The Uniform Case Plan serves as the Case Plan which is to be used with the Multidisciplinary Treatment Team in assessing, planning, and implementing a comprehensive, individualized services plan for YS and CPS cases under the requirements of [§49-4-405](#).

For CPS cases, various screens have been developed in FACTS to capture all of the required information necessary for the plan such as screens associated with Case Plans, Removal, Placement, Client Information, and Court. These screens should be completed in FACTS as part of the Family Assessment and Treatment Planning and foster care policy requirements.

The Uniform Case Plan is a DDE report in FACTS. When the DDE report Uniform Case Plan is accessed it is printed into Microsoft Word. In all cases this Plan will be populated by pulling information from the screens described above. A copy of the report must be filed within the FACTS file cabinet. A paper copy must also be printed to be used with the MDT and filed with the Court. A copy of the Uniform Case Plan must be provided to all members of the MDT including the child's biological parents, foster parents, service providers and so forth.

Throughout the casework process and the court proceedings the plan may change, and modifications should be made in FACTS as indicated and distributed to all members of the MDT.

4.3.4 Individualized Program Plan (IPP) Case Planning Specific to Medley

All children who are covered under the Title XIX Waiver program or are receiving services through Medicaid's Personal Care program are required to have an Individual Program Plan. The Individual Program Plan is the key document for accessing services through the MR/DD waiver program. This document details the array of services needed by the child and those currently being provided to the child, as well as the long-range service needs and the plan for meeting these needs.

The child's worker is responsible for assuring that the Individualized Program Plan is coordinated with the Child, Youth and Family Case Plan developed for the child as part of the foster care program.

4.3.5 Right to Be Heard

The child's worker, in accordance with the [Social Security Act \(475\(5\)\(G\)\)](#), must provide substitute caretakers with notice and the right to be heard in court hearings.

The State/Tribe provides the foster parents of a child and any pre-adoptive parent or relative providing care for the child with timely notice of and a right to be heard in any proceeding to be held with respect to the child during the time the child is in the care of such foster parent, pre-adoptive parent, or relative caregiver. Notice of and a right to be heard does not require the State/Tribe to make the caregiver a party to the proceeding.

4.3.6 Regardless of how a family comes to the attention to the Department², the DHHR has identified youth considered appropriate to begin the wraparound process as having³:

- Youth, ages 12 to 17 (up to the youth's 17th birthday) with a diagnosis of a severe emotional or behavioral disturbance that impedes his or her daily functioning (according to a standardized diagnostic criteria) currently in out-of-state residential placement and cannot return successfully without extra support, linkage and services provided by wrap-around;
- Youth, ages 12 to 17 (up to the youth's 17th birthday) with a diagnosis of a severe emotional or behavioral disturbance that impedes his or her daily functioning (according to a standardized diagnostic criteria) currently in in-state residential placement and cannot be reunified successfully without extra support, linkage and services provided by wrap-around;
- Youth, ages 12 to 17 (up to the youth's 17th birthday) with a diagnosis of a severe emotional or behavioral disturbance that impedes his or her daily functioning (according to a standardized diagnostic criteria) at risk of out-of-state residential placement and utilization of wrap-around can safely prevent the placement;
- Youth, ages 12 to 17 (up to the age of the youth's 17th birthday) with a diagnosis of a severe emotional or behavioral disturbance that impedes his or her daily functioning (according to a standardized diagnostic criteria) at risk of in-state level 1, 2,3 or PRTF residential

² Families may be identified in CPS, YS, or Adoption

³ The guidelines provided are aligned with the federal requirements for the title IV-E waiver program

placement and they can be safely served at home by utilizing wrap-around;

After a family has been identified as potentially appropriate for wraparound, the worker should then initiate the referral process. Please refer to Safe at Home, WV wrap around policy.

4.4 Permanency Planning

As part of the Uniform Case Plan, the Multidisciplinary Treatment Team is required to develop a permanent plan for the child, which includes the specific actions required for the child to achieve his plan, time lines for these actions, services necessary, agencies/providers responsible for providing these services, etc.

There are several common denominators that help determine when a child's permanency plan is most likely to occur and under what conditions. These include the following:

- Extended stays in out of home care can have negative and lasting developmental effects on child development;
- Multiple placements increase the likelihood of having a negative impact on the ability of the child to achieve his permanency plan;
- Children placed close to their own family and communities are more likely to have parent visitation and to return home;
- Parents who visit regularly are more likely to be reunited with their children; and
- Children who remain in foster care longer than twelve (12) to eighteen (18) months are less likely to return home.

As defined by the federal government, there are four (4) primary permanency options available for children in foster care. These include:

- Reunification;
- Adoption;
- Legal Guardianship; and
- Placement with a fit and willing relative (transfer of legal and physical custody with no subsidy to a kinship/relative)

4.4.1 Reunification

For all children under sixteen (16) who enter care through juvenile proceedings, children who are placed in foster care through voluntary placement agreements, and those children who have been in foster care due to child abuse or neglect proceedings for less than fifteen (15) months whose parents have not committed aggravated circumstances, reunification should be considered the primary permanency plan.

In order to facilitate reunification efforts, the Multidisciplinary Treatment Team must identify and/or develop specific and individualized services to help the family address the issues that brought the child into foster care. These services should be:

- a)** Defined through a strengths-based, comprehensive family assessment;
- b)** Focused on the strengths and resources within the family and community;
- c)** Addressed in an open and inclusive forum with the family;
- d)** Goal-oriented and focused on building skills;
- e)** Focused on strengthening the family's problem-solving abilities;
- f)** Appropriate and timely to meet the child's needs;
- g)** Concentrated on identifying family supports; and
- h)** Provided in a culturally competent manner.

Such services may include, but are not limited to:

- a)** Family support groups;
- b)** Individual, group, or family counseling;
- c)** Parenting education;
- d)** Mental health services;
- e)** Substance abuse treatment services;
- f)** Assistance to address domestic violence;
- g)** Structured visitation;
- h)** Career training/job placement services;
- i)** Homemaking/chore services; and/or
- j)** Family focused therapy.

Facilitating frequent and structured visits between the child and his parents is the most critical element to successful reunification. The child's foster/adoptive

parents should be utilized as resources and mentors for the child's biological parents.

For reunification efforts to be productive, services and activities should be a collaborative effort between the biological parents, foster/adoptive parents, the child's worker, and the other members of the Multidisciplinary Treatment Team. The child's worker should fully disclose the rights, responsibilities, expectations, options, and consequences of the reunification plan to the child's biological family as well as the entire Multidisciplinary Treatment Team. For any child who has reunification as his identified permanency plan, the child's worker, as well as the entire Multidisciplinary Treatment Team, must develop a concurrent permanency plan for the child. Depending on the child's situation and needs, the concurrent permanency plan could be adoption, legal guardianship, or placement with a fit and willing relative.

The child's worker has specific responsibilities when reunifying families. These include:

- a)** Assess the parent's and child's progress in resolving the initial problems necessitating placement and identify a tentative return date with the parents.
- b)** Negotiate a new written service agreement, based on the requirements of the case plan, with the parents and child containing tasks necessary for the smooth transition to return the child.
- c)** Assist the family in obtaining the necessary resources to establish and maintain the child in an acceptable standard.
- d)** Prepare the child, parents, foster/adoptive family, or other caretaker for return of the child.
- e)** Develop a worker and family visitation schedule in order to aid both child and biological parents in the process of reintegrating the family.
- f)** Provide follow-up services to the biological parents and child in order that the progress made by the family during separation is continued.
- g)** Identify community supports needed to aid family reintegration. The worker must assist parents in seeing that these supports are in place and coordinated within the context of the treatment plan.
- h)** Continue any specialized treatment services needed to maintain family stability and prevent reoccurrence of the behaviors which resulted in the original placement.
- i)** If it is determined that the family demonstrates an adequate level of stability, then termination of services can be considered. This determination would include the following conditions:

1. The family is engaging in those behaviors which were defined as desirable in the treatment plan.
2. There is evidence that the family has methods that support their capacity to cope adequately with life stresses, problems, and complexities.
3. The family is capable of establishing a warm, give and take relationship with each other and expresses recognition for the individuality of all family members.
4. There is evidence that the family can tolerate a high enough level of discomfort, if necessary, to allow the family members to strengthen their relationships with each other.
5. The child's safety is protected by the family and its support system.
6. The family can use its energies to concentrate on meeting its needs.
7. The worker will meet with the Multidisciplinary Treatment Team to assess the family's progress in meeting the goals of the Uniform Case Plan.
8. The worker will plan with the family a projected date for case closure, submit necessary reports to the court with the recommendation to terminate the Department's responsibility, and return legal custody to the biological parents.
9. The worker will continue to provide after care services, if necessary, for up to six (6) months of return of the child.

It is vital to always remember that children should not be separated from their families longer than necessary. Once safety can be re-established within the home, the child/children should be returned to that home and reunified with their parents/guardians. Legal and physical custody of the child/children should be discussed with the Multi-Disciplinary Team (MDT) and the Courts.

4.4.2 Kinship Care

Placement with a fit and willing relative, in and of itself, does not necessarily provide a child in foster care with permanency. Every child in the custody of the Department deserves to have a home that gives the child a sense of security and belonging while also providing the caretaker with the tools and resources necessary to meet those child's individual needs. Kinship care can provide a child with permanency as well as providing the relative with the financial, medical, and legal assistance necessary to raise the child to maturity through three (3) separate avenues.

a) Adoption by Kinship/Relative

The relative foster/adoptive parent may elect to adopt the child placed in his home. This option allows the relative caretaker to become the legal parent of the child

and receive all the benefits of legal custody. The relative may also receive a monthly maintenance adoption subsidy for the child that has been adopted to assist the caretaker in covering the additional expense of caring for the child. A medical card that covers the child's physical and mental health care needs is also available to the relative caretaker that adopts the child. In addition, a subsidy is available that covers two-thousand dollars (\$2,000.00) of the legal expenses incurred by the relative in adopting the child.

For more information about the adoption process, please see the Adoption Policy Section of the Social Services Manual.

b) Legal Guardianship and Kinship/Relative

The relative foster/adoptive parent may elect to become the legal guardian of the child placed in his home. This option allows the relative caretaker to become the legal custodian of the child and receive all the benefits of legal custody. The relative may also receive a monthly maintenance legal guardianship subsidy for the child to assist the caretaker in covering the additional expenses of raising the child. A medical card that covers the child's physical and mental health care needs is also available to the relative caretaker that enters into a legal guardianship agreement for the child. In addition, a subsidy is available that covers two thousand dollars (\$2,000.00) of the legal expenses incurred by the relative to cover attorney fees for the legal guardianship proceedings.

For more information about the legal guardianship process, please see the legal guardianship section of the Social Services Manual.

c) Transfer of Custody to Kinship/Relative Family

If a relative is unwilling or does not meet the requirements to become a foster/adoptive parent or legal guardian, the Department may elect to ask the court to transfer legal custody of the child to the relative currently providing care for the child at the dispositional hearing. This option does not provide the relative caretaker with any financial or medical support for the child. The relative may elect to receive TANF benefits for the child which also provides a medical card to cover the physical and mental health for the child. This option may only be utilized under the following conditions:

- Reunification has been ruled out as a possible permanency option for the child;
- The child's worker has explained all the benefits of adoption and legal guardianship to the relative foster/adoptive parent who decides not to pursue these options; or
- The relative caretaker cannot meet the requirements necessary to become foster/adoptive parent or legal guardian; and

- The Multidisciplinary Treatment Team and the Court determine that this placement is in the best interest of the child and the relative is able to provide an appropriate and safe permanent home for the child.
- The child's worker will request that the court transfer custody of the child to the relative caretaker at the dispositional hearing.

4.4.3 Legal Guardianship

Legal guardianship is the permanent transfer of legal responsibility for a child in state custody to a relative or person other than his or her parents. Unless specified otherwise by the court, a grant of custody of a child to the Department by the court is sufficient for the Department to transfer legal guardianship. The Department may consent to the transfer of legal guardianship when certain conditions are met.

Legal guardianship should be considered for a child when the following conditions have been met:

- The permanency goals of reunification and adoption have been ruled out by the Multidisciplinary Treatment Team for the child and the reasons are documented in the case record.
- The child has resided with the prospective non-relative guardian for at least six (6) months immediately prior to establishing legal guardianship. In order for the child to be IV-E reimbursable, the child must be in the home six (6) months prior to the completion of the legal guardianship.
- The child must be at least twelve (12) years old if he or she is in the home of an unrelated caretaker. There is no age limit when the caretaker is related to the child.
- The best interest determination must be documented in the child's case plan.
- The child must have a strong attachment to the prospective legal guardian and the guardian must have a strong commitment to the child.
- The child, if twelve (12) years of age or older, must consent to the legal guardianship arrangement.

For a child who does not meet these eligibility requirements for legal guardianship, the child's worker will work with the Multidisciplinary Treatment Team to develop an appropriate alternative permanent living arrangement to be included in the child's case plan.

For a child who meets the criteria for legal guardianship, the child's worker must assess the appropriateness of the case for this permanency plan. A child may be considered for legal guardianship even though it is not the permanency goal for all children in a sibling group.

Please see Legal Guardianship Policy for further information on the legal guardianship process.

4.4.4 Adoption

Adoption is a way of providing security for, and meeting the developmental needs of, a child by legally transferring ongoing parental responsibility for the child from the birth parents to adoptive parents. Section [§49-4-114](#) gives the Department the responsibility to provide child welfare services and to accept guardianship of children and consent to their adoption. In order for the Department to have the right to place a child for adoption and later give formal consent to his adoption, the Department must obtain legal guardianship of the child. This may occur through the termination of parental rights to the child either through a voluntary relinquishment or through a court order. The parental rights shall not be terminated if a child fourteen (14) years of age or older, or otherwise of an age of discretion as determined by the court, objects to such termination.

- a)** The decision to pursue adoption as a permanency option should be made by the Multidisciplinary Treatment Team, which should include the child's worker, the supervisor, the private agency staff if any, the child, the child's foster/adoptive parents, the regional adoption specialist and/or supervisor, and the Guardian Ad Litem.
- b)** Within the Uniform Case Plan, filed with the court prior to disposition, the child's worker must recommend adoption as the permanency plan for the child and detail the steps necessary to achieve permanency.
- c)** Request an updated homestudy from the Homefinding Specialist or Child Placing Agency if one has not been done within the past year or initiate the Interstate Compact on the Placement of Children process if the prospective adoptive parent lives in another state. (If the home is a specialized agency foster/adoptive home, the study and annual updates will need to be requested from the specialized agency)
- d)** The Multidisciplinary Treatment Team should also act as the permanent placement review committee to monitor the implementation of the permanency plan for the child and report on the progress and developments in the case every three (3) months until the child's permanent placement is achieved.
- e)** If an order of sibling separation has not been previously entered and the Uniform Case Plan includes placement of a child in a placement separate from his or her siblings, the worker must secure a court order which finds that it is in the best interest of the child not to be placed in the same home as his or her sibling. The order must be documented on

the Hearings Outcome, details screens, and document tracking in FACTS.

- f) If not already completed, the child's worker must complete the Birth Parents Background Information form (SS-FC-12) and the Birth and Medical History of the Child form (SS-FC-12A) in FACTS.
- g) The child's worker must obtain a certified copy of the birth parents birth certificates and death certificate if applicable.
- h) The child's worker must follow the specific steps outlined in adoption policy.

4.4.5 Other Planned Permanency Options

In addition to the four (4) federally sanctioned permanency options, the court may sanction another permanency option to meet an individual child's needs. After considering and ruling out reunification, adoption, legal guardianship, and kinship/relative care as viable permanency options for the child, the child's worker, with the assistance of the Multidisciplinary Treatment Team, may conclude that the most appropriate permanency plan for the child is placement in another planned permanent living arrangement.

a) Emancipation

For children who are over sixteen (16) years old, emancipation may become the permanency plan for those youth who are not able to return home or live with relatives and cannot or do not wish to be adopted or placed with a legal guardian.

- The decision to pursue emancipation as a permanency option should be made by the Multidisciplinary Treatment Team, which should include the child's worker, the supervisor, the private agency staff if any, the child, the biological parents if appropriate, and the Guardian Ad Litem.
- Within the Uniform Case Plan filed with the court prior to disposition, the child's worker must recommend emancipation as the permanency plan for the child and detail the steps necessary to achieve permanency.
- The child's worker must document to the court the compelling reasons emancipation is in the best interest of the child.
- If an order of sibling separation has not been previously entered and the Uniform Case Plan includes placement of a child separate from his or her siblings, the worker must secure a court order which finds that it is in the best interest of the child not to be placed in the same home as his or her sibling. The order must be documented on the Hearings Outcome, details and document tracking screens in FACTS.

b) Continued Foster Care

For a child age sixteen (16) or older for which reunification, adoption, legal guardianship, and kinship care have been ruled out, continued foster care may be an appropriate plan. This permanency option is only appropriate when a parent and child have a significant bond, but the parent is unable to care for the child because of an emotional or physical disability and the child's foster parents have committed to raising him, by signed agreement, to the age of majority and to facilitate visitation with the disabled parent.

The following must occur:

- The decision to pursue continued foster care as a permanency option should be made by the Multidisciplinary Treatment Team, which should include the child's worker, the supervisor, the private agency staff if any, the child, the biological parents, and the Guardian Ad Litem.
- Within the Uniform Case Plan filed with the court prior to disposition, the child's worker must recommend continued foster care as the permanency plan for the child and detail the steps necessary to achieve permanency.
- The child's worker must document to the court the compelling reasons continuation in foster care is in the best interest of the child and show the reasons why reunification, adoption, legal guardianship and kinship care have been ruled out as permanency options for the child.
- Initiate the Interstate Compact on the Placement of Children process if the foster parent lives in another state.
- If an order of sibling separation has not been previously entered and the Uniform Plan includes placement of a child separate from his or her siblings, the worker must secure a court order which finds that it is in the best interest of the child not to be placed in the same home as his or her sibling. The order must be documented on the Hearings Outcome screen, details screen and document tracking in FACTS.
- The foster/adoptive parents must agree to the following in writing: that they will provide care for the child until the child exits foster care, specific requirements for visitation with the child's parents, and specific responsibilities towards the child and Department as indicated in policy. All of these must be outlined in the Uniformed Case Plan
- The Department must assure that foster children whose permanency goals are continued foster care receive the same rights and protections provided to any child in the foster care system. This includes a six-month review of the child's case plan, an annual judicial review, life skills instruction, medical and mental health coverage, educational planning, etc.

- All children in foster care must continue to participate in judicial reviews once every twelve (12) months.

4.5 Concurrent Planning

Concurrent planning supports intensifying and expediting efforts to achieve permanence for a child within one (1) year - a time frame that reflects a child's sense of the passage of time. Concurrent planning safeguards opportunities for secure childhood attachments by safely building a stronger bond between the child and birth parent through reunification efforts, and by supporting the tie between the child and the caretaker through relative care, adoption, or legal guardianship when appropriate.

Effective use of concurrent planning allows the child to have an alternative permanency option that is being worked on at the same time as efforts are made to achieve the primary permanency plan for the child. All children whose permanency plan is reunification must have a concurrent permanency plan. For other children, concurrent planning should be utilized in an effort to expedite the achievement of permanency for these children. Concurrent planning has several practices that are designed to make cases move quickly through the foster care system until permanency is achieved. Some of these primary objectives include the following:

- Everyone involved in the child's life must attend the Multidisciplinary Treatment Team meetings where the child's case will be discussed in a forthright, honest manner.
- The services identified for the child's parents as part of the Uniform Case Plan must be appropriate, intensive, and directly address the reasons the child was removed from the home.
- Full disclosure of information to birth families early in the planning process regarding the importance of their regular involvement in planning for the return of the child, their rights and responsibilities, and the legal consequences of inaction by the child's parents or continued inappropriate behavior must be stated to the child's parents in a manner that they understand.
- The child should be placed in the most family-like placement appropriate to meet the child's needs. If possible, the child should be placed in a foster/adoptive home that is willing to help facilitate reunification with the child's family while also be willing to become a permanent placement for the child if reunification efforts do not work.
- Frequent visitation with birth parents is vital as long as the child's safety can be assured.

- Aggressive search for absent or non-custodial parents and addressing all paternity issues such as blood tests, child support, etc., within the first three (3) months of placement.
- Search for appropriate relatives who might have an interest in caring for the child within the first thirty (30) days of placement.
- The use of an assessment of the birth family's strengths, needs, and current/past problems that assist the child's worker in determining the risk of foster care drift and the need to place the child with a foster/adoptive family who will actively engage in supporting family reunification efforts, and also commit to serve as a permanent home for the child if reunification is not possible.
- Conduct frequent and substantive case reviews that carefully assess the efficacy of services being provided to assist the family to achieve the case plan goals and modify the case plan as required.
- The ability to mobilize a reluctant family by confronting birth parent's ambivalence and indecision; not allowing the crisis to paralyze case planning and decision-making.
- A respect for the sense of time of young children because separations and relationship disruptions in the early months and years of life interfere with the younger child's initial capacity to learn how to trust and form secure attachments with adults.

4.6 Aftercare Planning

WV Code [§49-4-409](#) provides requirements for after-care planning as it relates to children who are placed outside of the home. These plans are specific to what information is documented and should be specific to the child's individualized needs and the resources available in the child's community.

After-care plans shall contain a:

- Detailed description of the education, counseling, and treatment the youth received while in out-of-home placement, and;
- Proposal of how the educational, counseling, and treatment needs can be obtained in the community, and;
- Description of any problems the child has, the source of those problems, and a proposal of how those problems may be addressed upon discharge.

Often these plans may come in the form of a “discharge plan” which residential providers are required to provide to the worker, the youth, and the youth’s family. When the worker utilizes this as the after-care plan, the worker will still be responsible for ensuring it is specific to the child and contains the required elements as described above. The worker will also be responsible for ensuring that it is finalized sixty (60) days prior to the youth’s discharge and that all the required parties receive the plan within ten (10) days of its completion.

Whether the worker may utilize a residential discharge plan or not, the worker will need to document the required information in a court summary for MDT review and court review and upload the document to the FACTS filing cabinet. If the plan is accepted the worker will document the appropriate service to update the Child and Family Services case plan to incorporate the services and educational components of the plan.

The worker must ensure the MDT, the court, and the following individuals, if not active MDT members, receive a copy of the court summary, service plan, and address information for all recipients.

- The child’s parent, guardian, or custodian, and;
- The probation officer (if applicable) or the community mental health provider, and;
- The prosecuting attorney, and;
- The principle of the school in which the child will attend.

Each recipient of the plan will have twenty-one (21) days to submit written comments and feedback to the plan if they disagree with any portion of the plan. Any party who submits feedback must ensure all other parties receive the written feedback as well.

The worker will contact each individual or entity listed on the plan as providing a service, formal or informal, to ensure they can provide the required service. The court will schedule a hearing to determine whether the plan will be adopted or not. The court will appoint either the probation officer (If applicable) or the community mental health provider as supervisors of the plan.

When a probation officer is involved (if applicable) in the case and the department worker is ordered to be the supervisor of the plan, the worker must contact their Regional Program Manager to report the incident to their Regional Attorney for review.

Section 5

Case Management

5.1 Visitation

5.1.1 Visitation with Parents and Extended Family

Visitation arrangements must be agreed upon as soon as possible after placement and documented in FACTS on the visitation plan screen. These arrangements must be made in agreement of the biological family, the foster/adoptive family and the child's worker. Any restrictions on visitation arrangements by the worker or the court will be noted in the Uniform Case Plan. All visits will be coordinated through consultation with the child's worker.

The biological family is to be given a copy of the visitation agreement and a copy is given to the foster/adoptive parents. This agreement must include the visitation schedule, the visitation site, and time, date, and transportation arrangements. If the child's parents or other family members who are to visit with the child do not have transportation, the child's worker must assist the family in finding transportation to assure the visitation takes place.

The child's worker is responsible for ensuring that the visitation plan is followed. The child's foster/adoptive parent should provide routine transportation for visitation, if possible. If transportation is a hardship for the foster/adoptive parent, the child's worker will provide the transportation to enable the visit to occur.

5.1.2 Sibling Visitation

State Statute, [§49-4-111](#) requires the Department to place siblings together when placing a child in foster care that also has siblings in care. Siblings are defined by [§49-1-204](#) as children who have at least one biological parent in common or who have been legally adopted by the same parents or parent. Workers should consider what is in the best interest of the children. If children within the home consider themselves siblings, efforts should be made to place them together.

If the child's case plan includes placement of a child in a placement separate from his or her siblings, the worker must secure a court order which finds that it is in the child's best interest not to be placed in the same home as his or her siblings. This order must be documented on the Hearings Outcome screen, Details screen and in document tracking in FACTS. In some circumstances, children in foster care may need to be placed separately from their siblings who are also in care. This may occur when one sibling is a danger to his or her sibling or when a large sibling

group is being removed from their home and a placement resource to allow all the children to be placed together is not readily available.

When siblings are placed separately, the Multidisciplinary Treatment Team must develop a visitation plan to maintain the sibling relationship. This plan must be contained in the Uniform Case Plan.

The child's worker is responsible for ensuring that the visitation plan is followed. The child's worker will provide a copy of the visitation plan to the child's foster/adoptive parent. The child's foster/adoptive parent should provide routine transportation for visitation, if possible. If transportation is a hardship for the foster/adoptive parent, the child's worker will provide the transportation to enable the visit to occur. The child's worker is responsible for documentation of the visitation plan in FACTS on the visitation plan screen.

5.2 Caseworker Contact

5.2.1 Contact with Child in Foster Care or Introduction

Regular contact between the child who is in foster care and the child's worker allows the child to have ample opportunity to express concerns, fears, problems with the placement, or other special issues. These meetings also provide the child's worker with an opportunity to discuss the child's case plan and services being provided, and to directly assess the child's progress.

The child's worker is required to maintain contact with the child either by telephone or face to face to assure that the placement is meeting the child's needs. The child's worker will provide an opportunity for the child to have time alone with them during each visit to address any concerns or issues related to the child's needs or placement. (If the child is physically, emotionally, or developmentally unable to communicate, the worker may fulfill this requirement by discussing the child's progress with the caretaker.) The child's worker is required to have a minimum number of face to face visits with the child and caretaker in the home where the child is placed. (See below for minimum contact required)

[The Child and Family Services Improvement Act of 2006- P.L. 109-288](#) made a change to the Title IV-B Act. Under the new requirements of IV-B, states are now required to report on caseworker visits with children in foster care. Specifically, the requirement is for a child in a foster care setting to have a face to face visit at least once a month, by the case worker, with a majority of the visits occurring in the child's foster care residence. During the visit the case worker is to focus on issues related to case planning and service delivery.

The US Department of Health and Human Services, [45 CFR 1355.20](#), defines foster care as “twenty-four (24) hour substitute care for children placed away from their parents or guardians and for whom the state agency has placement and care responsibility. This includes, but is not limited to, placements in foster family homes of relatives, group homes, emergency shelters, residential facilities, child care institutions, and pre-adoptive homes. A child is in foster care in accordance with this definition regardless of whether the foster care facility is licensed, and payments are made by the state or local agency for the care of the child, whether adoption subsidy payments are being made prior to the finalization of an adoption, or whether there is federal matching of any payments that are made”. The federal guidelines also require visitation to occur monthly with children who are in their biological homes on a “trial home visit” when the Department retains care and control of that child or legal custody of the child.

The caseworker will be defined as the worker who is responsible for the handling of the child’s case and will therefore be the worker who is assigned to the case in FACTS. In cases where a specialized foster care agency is providing foster care services to the child, they will assist the Department in meeting the caseworker visit requirements. Therefore, the child’s specialized foster care agency worker, who is responsible for handling the child’s case plan within the specialized foster care agency, will be responsible for making visits to the home.

In some situations, the caseworker visitation requirements will be more stringent than the federal requirements, since the child’s needs will be of a higher degree and require more contact. These requirements are standards set forth under the Council for Accreditation (COA), with which the State of West Virginia has indicated that they will comply.

5.2.2 Visitation/Contact Requirements

a) In-State Placements

- 1) Face to face visits/contacts are to occur within seventy-two (72) hours of placement to assess the child’s adjustment to the placement.
- 2) Face to face visits/contacts are to occur at least once during a calendar month.

Exception: If the child is placed in a therapeutic foster home, which would be when a child is placed with a specialized foster care agency or placed in a specialized foster family home (Medley), the face to face visits/contacts are to occur **twice** during a calendar month.

- 3) If the child is placed with a specialized foster care agency, the child's Department case worker must make telephone contact with the child at least once during a calendar month.
- 4) The child's Department case worker is responsible for making a face to face visit/contact with the child in a specialized foster care placement once every three (3) months.

5.2.3 Out of State Placements

- a) Telephone or face to face visits/contacts are to occur within seventy-two (72) hours of placement to assess the child's adjustment to the placement.
- b) Telephone contacts are to occur at least once during a calendar month.
- c) Face to face visits/contacts are to occur at least once during a calendar month.

5.2.4 Are Visits/Contacts Ever Required More Often?

- a) There are situations and circumstances that may require special attention or more frequent contacts. During the following times, the child's worker should increase the visits/contacts with the child to facilitate the use of the corrective environment and relationships within the home/facility:
 1. When the child experiences separation or loss, is in need of medical care or hospitalization, has other disturbing experiences, or has social or school problems.
 2. When there is going to be a transfer of the child's worker.
 3. When there are new or additional problems in the child's biological family.
 4. When a child has severe problems of maladjustment and difficult behavior.

5.2.5 Who is Responsible for the Visits/Contacts?

- a) If the child is placed in a Department foster/adoptive home, kinship/relative home, group/residential foster care setting, shelter, CED (Medley) home, transitional living placement, or in a trial home visit placement setting, the child's Department case worker is responsible for making the visits/contacts with the child.
- b) If the child is placed in a foster/adoptive home under a Specialized Foster Care Agency, the child's Specialized Agency worker is responsible for making the visits/contacts with the child.

In addition to a) and b) above: The child's Department case worker is responsible for making a face to face visit/contact with the child in the foster care placement once every three (3) months.

5.2.6 What is Considered a Foster Care Setting?

- a) A foster care setting could be an out of home placement, such as a foster/adoptive home, kinship/relative homes, group residential home or shelter, or it could also be a placement where children are placed with their biological parent or relative on a "trial home visit".
- b) Foster care settings also include those placements out of state, such as psychiatric treatment facilities, pre-adoptive homes, or residential facilities.

5.2.7 Where are the Visits/Contacts to Occur?

- a) The **majority** of the required monthly visits/contacts are to occur in the child's foster care placement or residence.
- b) In addition to the required monthly visits/contacts occurring in the foster care placement, the child's worker should take other opportunities to meet with the child. These meetings may occur at case reviews and hearings, Multidisciplinary Treatment Team meetings, other treatment team meetings, child & parent visits, etc. **(Visits should not disrupt the child's school day, so they should not occur at the child's school and a child should not miss school for a visit with a worker).**

5.2.8 Who is Involved in the Visit/Contact?

- a) The child must be involved in the visit. (If the child is physically, emotionally, or developmentally unable to communicate, the worker may fulfill this requirement by discussing the child's progress with the caretaker.)
- b) The child should be involved in the telephone contacts, but if they are unable to do so as indicated above, the worker may fulfill this requirement by discussing the child's progress with the caretaker.
- c) The child's substitute caretaker/parent should always be involved in the visit whenever possible but must be involved when the visit occurs in the foster care placement or residence.

5.2.9 What is the Purpose of the Visits/Contacts?

- a) Visits/contacts are to provide an opportunity for the child's worker to observe the child in the foster care placement or residence.
- b) To provide an opportunity for the child to express any concerns or needs to the worker about their foster care experience or placement.

- c) The worker is required to assess the child's safety and well-being during visits/contacts.
- d) The child's worker is also required to focus on issues related to case planning and service delivery.

5.2.10 What Visits/Contacts are Required with the Foster Care Agency?

- a) If the child is placed with a foster care agency, the child's Department worker will have contact with specialized agency staff at least once a month to assure that visits/contacts are occurring with the child and provider, to address any placement issues, and to address any case planning or service delivery concerns.

5.2.11 Are Visits/Contacts Required with the Child's Parents/Guardians?

- a) The child's Department worker must have contact with the child's parents once during a calendar month.

5.2.12 How and When are the Visits/Contacts to be Documented?

- a) The child's Department worker must document all contacts with the child, provider, and agency staff in FACTS, in the CONTACTS SCREEN, within **five (5) working days** of the contact being made. The contact must contain the child's name and date of visit/contact. From the **Type/Location** pick list, select **Face to Face with Child in Placement**, and then select from the **Purpose** pick list, some type of case planning or service delivery reason for the visit. Some values for what may be chosen in FACTS as the purpose for the visit are: **Case Plan/Review, Education, Evaluation, Medical/Dental, Placement Assessment, Referral for Service, Service Delivery, Treatment Plan Review** and **Treatment Planning**.

5.3 Case Staffing

When children are placed in foster/adoptive family care, case staffings should be utilized to communicate the child's and family's progress on issues that do not require a full-blown Multidisciplinary Treatment Team meeting but do require consultation between the child's worker, supervisor, biological family, foster family, agency staff, and/or others who may provide positive support and/or information.

At a minimum, staffings should be held at the end of the child's first thirty (30) days of placement and prior to discharge. The child's worker will be expected to attend and to transport the child's family when necessary and appropriate.

5.4 Transaction Date Requirements

Transaction dates must occur the **same day** of a child's entry into or exit from placement. This is to ensure that a provider does not receive an extra monthly payment that the Department must redeem and to ensure that a provider is not underpaid, resulting in a demand payment for the unpaid amount. Any change in placement (enter dates or exit dates) must be entered within three working days.

For children returning home on trial return to caretaker, the placement must be end dated when they return home. Removals will remain open. When the court returns legal and physical custody to the parents the worker must end date the removal the **same day**.

Financial penalties will occur if the entry and exit of placement and removal transaction dates are entered later than 30 days beyond the actual date of entry or exit to avoid an error. To be in compliance with the AFCARS requirements and to avoid penalties, there can be no more than an overall 10% error rate in transaction dates for the entire agency per federal fiscal year. This includes all placement types; kinship/relative, traditional and specialized foster homes, residential treatment facility, shelter, and psychiatric facility.

5.5 Termination of Parental Rights (TPR)

Permanent guardianship of a child applies when a parent's rights to a child have been terminated by the court or through a voluntary relinquishment. If both parents' rights have been terminated the child is considered a state ward. If the state ward's permanency plan is adoption both parents' rights have terminated either by a voluntary relinquishment or court order. In cases where a child's parent is deceased, a certified death certificate must be obtained and presented to the court for purposes of termination. The death certificate should be documented in FACTS and placed in the child's paper file.

If the termination of parental rights is via a court order, the court order shall specify all the parental rights and responsibilities to the child including the right to consent to adoption, marriage, visitation, etc., have been transferred to the Department. When a circuit court terminates parental rights either through an involuntary termination or a voluntary relinquishment, it must ordinarily require the terminated parent to continue to pay child support for the child pursuant to the Guidelines for Child Support Awards. If the court finds that it is not in the best interest of the child to order the parent to pay support pursuant to the Guidelines, the court may disregard the Guidelines, but must make specific findings on the record regarding such reasoning. The court also reiterated prior rulings that held obligation of support is owed to a child by both parents until the child is placed in the permanent legal custody of another guardian/parent/obligor, such as in adoption.

The age of the child should be considered in terminating a parent's rights. If a child is fourteen (14) years of age or older or otherwise an age of discretion, his parents'

rights should not be terminated without his approval. The child should be involved in evaluating the agency's interest and concerns for his future when developing his permanency plan. Whether a child is of an age of discretion is determined by the court.

In accordance with the Adoption and Safe Families Act, a petition must be filed or joined by the state as defined in [§49-4-605](#) to terminate the parental rights of a child who has been in the custody of the Department for fifteen (15) of the most recent twenty-two (22) months. **In addition, a petition must be filed to terminate the parental rights of a child if:**

- a) The child has been abandoned;
- b) The court has determined that the parent has committed murder or voluntary manslaughter of another of his or her children;
- c) The court has determined that the parent has attempted or conspired to commit such murder or voluntary manslaughter or has been an accessory before or after the fact of either crime;
- d) The court has determined that the parent has committed unlawful or malicious wounding resulting in serious bodily injury to the child or to another of his or her children;
- e) The parental rights of the parent to a sibling have been terminated involuntarily; or
- f) If a parent voluntarily fails to have contact or attempt to have contact with the child for a period of 18 consecutive months: Provided, that failure to have, or attempt to have, contact due to being incarcerated, being in a medical or drug treatment or recovery facility, or being on active military duty shall not be considered voluntary behavior.

The Department may determine not to seek termination of parental rights:

- a) At the option of the Department if the child has been placed with a relative; or
- b) The Department has documented in the child's case plan that there exists a compelling reason that filing a petition would not be in the best interest of the child; or
- c) The Department has not provided, when reasonable efforts to return a child to the family are required, the services to the child's family the Department deems necessary for the safe return of the child to the home.

When the court terminates parental rights and commits the child to the guardianship of the Department, the child's worker will do the following:

- a) Initiate the permanency placement review process to review the child's case every three (3) months.

- b) If the child's permanency goal is adoption, the child must be referred to the Adoption Resource Network within thirty (30) days; and
- c) Develop a post-termination placement plan which is to be submitted to the court and the Multidisciplinary Treatment Team.

The local office will annually report to the court the current status of all children the Department has been granted permanent guardianship of who have not been adopted. The report, in letter form, is to be directed to the circuit court through the prosecuting attorney's office. The child's name, birth date, legal status, and placement status are to be reported. Any changes from the reporting for the previous year are also to be noted in the letter to the court.

5.6 Medicaid and Medical Insurance

5.6.1 Medicaid for Children in Foster Care

All children in foster care are eligible for the [Medicaid](#) program. The Department will issue a Medical Card for each child in foster care placement monthly.

Children in foster care who may need medical services prior to the issuance of a medical card are to be given a copy of the form letter SS-FC-40A stating their name, birth date, social security number, date of placement, the name of the facility or foster/adoptive parent where the child is residing, and the type of services being provided. The letter is time limited. This form is to be used only if the child does not yet possess a valid medical card. Children in foster care will be provided with an SS-FC-40 at the time of each placement. This form will indicate the child's name, Medicaid number, and the provider or foster/adoptive parent's names and is to be used by the provider or foster/adoptive parent to obtain the medical treatment necessary noted on the form.

Children who have been adopted from the Department may continue to receive a medical card as well as an adoption subsidy. Occasionally, the adoption will disrupt, and the child/children will return to DHHR custody. With placement the FACTS system will automatically generate a medical card and the child will receive both the medical card generated from the child entering custody and the medical card generated from the final adoption. In order to prevent medical card duplication, the worker must check the "no medical card" box located on the Enter/Exit Screen in the child's record in FACTS.

The Department will pay for any necessary medical or dental costs in accordance with Medicaid policy. Unusual or extraordinary non-emergency

medical or dental costs shall be paid for by the Department only upon prior approval of the Regional Program Manager or Child Welfare Consultant.

5.6.2 Extended Medicaid Eligibility

Most children up to the age of twenty-one (21), who come into the custody of the Department and are placed in foster care, may be eligible for Extended Medicaid coverage upon discharge from a foster care placement. Children in the following placement types may be eligible for Extended Medicaid coverage: DHHR foster/adoptive homes, therapeutic foster/adoptive homes, specialized family care (Medley), group residential, psychiatric hospitals, psychiatric treatment facilities, medical hospitals, trial adoptive homes, transitional living, emergency shelter care, family emergency shelter care, and schools for children with special needs (such as Romney School).

A child's eligibility for Extended Medicaid coverage is initially determined by placement in one of the above-mentioned settings and how they are discharged from care. They are eligible for Extended Medicaid coverage from the date of placement for a continuous period of twelve (12) months, whether they remain in placement. Eligibility will be re-determined during the child's one-year anniversary month, which is the child's initial placement month. For a child to be eligible for another twelve (12) month episode, they must be in a foster care placement and in the custody of the Department.

For children who come back into the care and custody of the Department during a Extended Medicaid Eligibility episode, a new eligibility episode will not start. The original eligibility episode will continue until the child's anniversary month and then be re-determined for another twelve (12) month period.

Children who are discharged from foster care permanently will be eligible for Extended Medicaid coverage, unless the exit reason chosen is "death" or "runaway". Children who are discharged from foster care on a temporary basis will only be eligible for Extended Medicaid coverage if the exit reason is "trial return to caretaker/parents of removal".

NOTE: A child who is living out of state is not eligible for Extended Medicaid coverage.

- a) When a child is being discharged from a foster care placement the following must occur:
 1. Worker will contact the child's parent and enter the parent's address in FACTS at discharge, the worker will document where the child will be residing in FACTS under the client demographic address screens. The worker must document that this is the permanent home address. When the worker does not know a

child's permanent address, the child will not be eligible for Extended Medicaid.

2. The worker will then exit the child from placement, after making sure the child's address has been updated in FACTS.
3. At the time the child is being discharged from placement, the worker will discuss with the parent/child/guardian all Medicaid options available to them including the Extended Medicaid coverage. The Extended Medicaid coverage will automatically continue, but the parent/child/guardian has the option of declining the continued coverage.
4. The worker will provide the Notification of Extended Medicaid Eligibility coverage letter in duplicate to the parent/child/guardian when the child has been exited out of placement for their signatures. One signed copy of this letter must be maintained in the child's record to indicate that the parent/child/guardian has been given the option of accepting or declining the Extended Medicaid coverage. The second signed copy of the letter must be given to the parent/child/guardian for their records. This letter will be a standard form which indicates that the Extended Medicaid coverage is a free service offered to children exiting out of foster care. It will explain that the parent/child/guardian is responsible for notifying the DHHR of changes such as address changes, death, receiving SSI, or incarceration in a juvenile or adult facility which could affect their receiving the Extended Medicaid coverage. The letter will also explain that this offer to continue to receive the coverage, if refused at this time, cannot be requested at a later date.
5. If the parent/child/guardian does not accept the Extended Medicaid coverage, the worker will document this by clicking on the check box in FACTS under the medical insurance screen that they have "declined the Extended Medicaid coverage"
6. The case may be closed if there is no need for services after discharge and the child will only receive the Extended Medicaid coverage. Due to the child remaining eligible for Medicaid, the Department is responsible for providing records management of the case.
7. If a child comes back into the care and custody of the Department during an eligibility episode and the worker places the child in an approved foster care setting, then the original Extended Medicaid coverage episode will continue until the child's anniversary month and then be re-determined for another twelve (12) month period.

b) Notifications

If the child is no longer in custody and the Extended Medicaid coverage will be ending, the Department will automatically send the parent/child/guardian a letter of notification prior to the eligibility end date. This letter will inform the parent/child/guardian of the termination of the Extended Medicaid coverage and of their right to a fair hearing and/or a pre-hearing conference with a Child Protective Services, Foster Care or Youth Services Supervisor, if they feel the coverage was terminated prematurely or for unjust reasons. It will also provide a statement about other services that the Department provides which the family may be eligible for and explain that they will need to contact the local county office to apply for any benefits, including medical coverage.

c) Hearings Process

1. When a parent/child/guardian feels that the Extended Medicaid coverage was terminated prematurely or for unjust reasons, the parent/child/guardian has a right to a fair hearing, with a State Hearing Officer, and/or a pre-hearing conference, with a Child Protective Services, Foster Care or Youth Services Supervisor, in accordance with [Common Chapters 700](#). The parent/child/guardian will be sent written notification of their right to a fair hearing and/or pre-hearing conference automatically through FACTS, prior to termination of the Extended Medicaid coverage. This notification letter shall contain the following: the reason for service termination, date of termination, right to a hearing and/or pre-hearing conference, length of time client has to request a hearing and/or conference, right to legal representation and where to locate legal representation, right to bring witnesses to a hearing and/or conference, right to assistance in preparation for a hearing, right to assistance for transportation to the hearing, and that the hearing shall only be conducted on issues set forth in the written notice.
2. The parent/child/guardian will request a hearing or pre-hearing conference within ninety (90) days from the effective date of the termination of the service. This request is to be made in writing, using the hearing request form included in the notification letter. Any verbal requests for a hearing will be transcribed by the Department worker receiving the request and shall include the reasons for such request ascertained by the worker.
3. If the parent/child/guardian has not requested a hearing but requested a pre-hearing conference and they do not reach a solution in the pre-hearing conference, the supervisor will inform

the parent/child/guardian of their right to a fair hearing and assist them in completing the necessary form.

4. Once a parent/child/guardian requests a hearing, the hearing will be held within ninety (90) days from a request being received and a decision will be issued. If the parent/child/guardian has requested a pre-hearing conference, the supervisor conducting the conference shall notify the State Hearings Office, who will take the pre-hearing conference into account when scheduling the hearing date.
5. Continuations of a hearing may occur if the State Hearings Officer requests additional information or evidence to make a proper decision.
6. The parent/child/guardian may withdraw their request for a hearing by submitting a signed statement requesting such withdrawal. If the request is received verbally, the worker will confirm the withdrawal in writing to the parent/child/guardian, file a copy in the record and forward a copy to the State Hearings Officer. A withdrawal shall not prevent the parent/child/guardian from reinstating a hearing request within the applicable time limits.
7. If the parent/child/guardian fails to appear at a scheduled hearing without notifying the Department in advance, any proposed action shall be taken, and a letter shall be sent to the parent/child/guardian offering to schedule another hearing if they reply within ten (10) days. This letter will advise the parent/child/guardian that if they fail to establish good cause in writing within the said time, their hearing will be considered abandoned.
8. The parent/child/guardian will be notified of the hearing decision in some situations at the close of the hearing. They will also receive a written report of the hearing and a decision.
9. The parent/child/guardian will be advised that they may bring a petition in the Circuit Court of Kanawha County within a reasonable period of time from receipt of the hearing decision. If the parent/child/guardian feels that an alleged violation of their Civil Rights has occurred, they may file a complaint with the [Secretary of the United States Department of Health and Human Service.](#)

d) Records Management

1. If the case is being closed, the worker will inform the parent/child/guardian of the length of time the child will be eligible for the Extended Medicaid coverage and provide them with an address and/or telephone number of the local DHHR office and the Worker of the Day or Reception Social Worker, who they can contact if they have changes such as, address changes, death, receiving SSI or incarceration in a juvenile or adult facility to their case.
2. If the case is remaining open, the worker will inform the parent/child/guardian of the length of time the child will be eligible for the Extended Medicaid coverage.
3. On closed cases, it will be the responsibility of the local DHHR office to process changes such as, address changes, death, receiving SSI or incarceration in a juvenile or adult facility in FACTS, which are submitted to the Worker of the Day or Reception Social Worker to their office by the family. If the parent/child/guardian requests termination of the Extended Medicaid coverage due to receiving SSI, client being incarcerated, or for other reasons, the worker will need to enter a decline date into the closed case in FACTS. The worker will search for case through Client Search to make an address change or to enter a decline date into FACTS to terminate the Extended Medicaid coverage. If the Extended Medicaid coverage needs to be terminated due to the death of the client, the worker will need to re-open the case to enter the date of death for the client in the Client Demographic Screen and then close the case again.
4. On open cases, it is the responsibility of the child's worker to process changes such as, address changes, death, receiving SSI or incarceration in a juvenile or adult facility in FACTS, which are submitted to their office by the family.

5.6.3 Medicaid Home and Community Based MR/DD Waiver (Medley)

a) Eligibility Requirements

1. Mental retardation and/or developmental disability requiring the Intermediate Care Facilities level of care;
2. Income is less than three (3) times the amount of monthly SSI and less than two-thousand dollars (\$2,000.00) in assets;
3. Care must be cost effective;

b) Services under the MR/DD waiver are designed to instruct, train, support and assist the child. These services include:

1. Service coordination activities designed to establish a life-long person centered, goal-oriented process for coordinating the range of services, instruction and assistance needed;
2. An annual medical evaluation; and
3. Day habilitation services - a program of skills, instruction and supervision designed to assist in achieving increased independence or maintaining skills of daily living such as:
 - a. QMRP services that include professional services provided directly to an individual and evaluations of an individual and/or current plan of intervention or instruction, documentation of an evaluation and/or development of a plan of intervention or instruction, training in the person-specific aspects and methods of a plan of intervention provided to the individual and/or primary care providers, and evaluation and monitoring of the effectiveness or instruction;
 - b. Pre-vocational services to assist an individual to acquire and maintain basic work and work-related skills;
 - c. Supported employment services to enable an individual to engage in work settings in which persons without disabilities are employed;
 - d. Residential habilitation support services delivered in a participant's residence and the community which provide instruction and assistance to enable the individual to acquire and maintain skills which will allow him to live, socialize, and recreate more independently;
 - e. Transportation to or from a Medicaid reimbursement service; and
 - f. Respite for an individual on a short-term basis due to the absence of or need for relief of the primary care provider.

5.6.4 Medicaid Personal Care Services (Medley)

Personal Care Services are medically-oriented activities or tasks ordered by a physician, to be implemented according to a Nursing Plan of Care which is developed and supervised by a registered nurse. These services which are provided within the recipient's residence enable people to meet their physical needs and be treated by their physicians as outpatients, rather

than on an inpatient or institutional basis. Services include those activities related to personal hygiene, dressing, feeding, nutrition, environmental support functions, and health-related tasks.

a) Services must be:

1. Prescribed by a physician in accordance with a written Plan of Care;
2. Necessary to the long-term maintenance of the recipient's health and safety;
3. Provided within the recipient's place of residence;
4. Provided pursuant to a Plan of Care developed and periodically monitored by a registered nurse; and
5. Rendered by an individual who is a specialized family care provider or respite provider through the Medicaid Personal Care program.

b) Eligibility Requirements

A pre-admission screening assessment tool, the PAS-95 is used to certify an individual's medical need for in-home personal care level of services. This medical assessment must be signed and dated by a physician, thus becoming the physician's order and certification for personal care level of services for the individual. The PAS-95 must be completed upon application and at least annually thereafter. In addition, a standardized personal care nursing assessment must be completed at least once every six (6) months.

Upon request for Personal Care Services a registered nurse must review the pre-admission assessment information to determine that it is current within sixty (60) days of the physician signature and that the medical and physical care needs of the applicant do in fact meet the medical needs criteria as delineated by Medicaid for in-home personal care services.

When requesting approval of personal care services for a child, feeding, toileting and assistance in ambulation or other activity appropriate to the developmental and chronological age of the child are considered normal parenting duties and therefore are not reimbursable as Personal Care Services.

c) The following services done by a registered nurse are covered by the Personal Care Services program:

1. The initial, six (6) month, and annual recertification assessments which must include face-to-face, hands on activity, and direct observation of the individual who is being assessed.

2. Development and modification of the nursing care plans which must consider any in-home support from family or community support which is available to address care needs. Plans must be modified as necessary to account for progress, decline, or other changes in the client's condition.
 3. Supervision and monitoring of the implementation of the nursing care plan by non-licensed staff. The nurse assesses the quality and appropriateness of care and activity by non-licensed direct care staff and assures that it is provided according to the care plan. The nurse must also assure that environmental support activity does not exceed one-third of the total care activity allotted by the care plan.
- d) The following hands-on, medically-oriented activities and supportive tasks described in the nursing care plan are implemented by qualified and trained staff. These include activities and tasks which enable individuals with physical and/or mental disability to carry out activities of daily living and to assist with environmental support tasks such as:
1. Grooming,
 2. Bathing,
 3. Toileting,
 4. Dressing,
 5. Laundry (incontinent),
 6. Repositioning/transfer,
 7. Medical equipment,
 8. Assistance with self-administration of medications,
 9. Meal preparation
 10. Feeding,
 11. Special Dietary Needs,
 12. Housecleaning,
 13. Laundry/Ironing/Mending
 14. Bed changing/making,
 15. Dishwashing,
 16. Grocery shopping,
 17. Bill paying, and
 18. Essential errands such as obtaining medication.

5.7 Consents

There are various times when parental consent or consent by the child's guardian is required before certain activities can be undertaken. These include the following:

5.7.1 Surgery/Anesthesia/Emergency Medical Treatment

When a child in foster care requires surgery, anesthesia, or emergency medical treatment, the child's worker must obtain a valid consent for the procedure, as indicated:

- a) For children who are in the temporary custody of the Department, every effort should be made to locate the child's parent or guardian and obtain their written consent for the necessary surgery, anesthesia, or emergency medical treatment. However, if the worker cannot locate the parent(s) at any emergency numbers listed after being notified of an emergency situation requiring written consent for surgery, anesthesia, or any emergency medical treatment, then that worker must contact the Regional Director or his designee to sign the consent for the procedure due to the emergency circumstance. The child's worker must document the situation in the child's case record.
- b) For children who are in the permanent guardianship of the Department, the Regional Director will sign the consent for surgery, anesthesia, or emergency medical treatment. The procedure must be documented in the child's record.
- c) End of life decisions can be very difficult to make, particularly when the child is unable to communicate their wishes. Examples might include placement of an artificial feeding device, placement on/removal from a ventilator, etc. In these instances, an ethics consult may be necessary. Many times, the health care facility providing treatment will have an internal Ethics Committee to assist with these decisions. If parental rights are still intact for the biological parent, they continue to be the decision maker. If the child is a state ward, the Regional Director is the decision maker. Prospective adoptive parents may be consulted for their input.

5.7.2 Out of State Travel

When a child needs to travel out of state, the following must be done:

- a) If the Department has been granted guardianship with a termination of parental rights, the foster parent or caretaker will notify the DHHR worker or supervisor of their plans to travel out of state for more than the day. If an overnight stay is needed, notification must include the nature of the trip, the duration, and location.

- b) If the Department has temporary legal custody of the child, the child's parents must be notified of the out of state travel. The MDT may decide if the out of state travel is appropriate and give consent. If the child's parents cannot be located, the Department must have the consent of the MDT for out of state travel.

5.7.3 Routine Medical Care

Most court orders and the SS-FC-4 that transfer custody to the Department contain language that transfers the right to consent for routine medical care to the Department. While the Department has the authority to consent to routine medical care, every effort should be made to keep the child's parents informed of the child's health. Foster/adoptive parents and group care providers are provided with the responsibility to consent and obtain authorization for medical care for a child, through the Medical Care Authorization for Child in Foster Care Form (SS-FC-40). It is necessary that the SS-FC-40 be given to each provider upon the child's placement.

5.7.4 Communicable Diseases

When special testing for communicable diseases of a child in custody is being considered, the requirements of State Code [§16-3C-2](#), [§16-3C-3](#), and [§16-3C-4](#) must be followed. Utilization of all test results will be limited to only those who are caretakers of the child. Anyone releasing medical information improperly shall be subject to the penalties prescribed by [§16-3C-5](#).

Testing cannot be used as a screening device. Consent for testing will not be approved for a child in custody unless the worker has reason to suspect the child has been exposed to a communicable disease. If the worker has reason to suspect that a child in temporary custody or permanent guardianship of the Department has been exposed to a communicable disease, the worker will document this information in FACTS, citing specific reasons for their suspicions. This documentation shall be maintained in the strictest confidence. The worker will then get written consent from the parents of the child or, if the child is in state guardianship, by the Regional Director. Caretakers must be notified of the child's condition and be prepared for any additional medical attention the child may need.

5.7.5 Marriage

The following steps must be taken before consent for marriage can be considered or granted:

- a) Marriage of a minor child in foster care should not be considered except in very rare cases and may only be considered at the consent of the Multidisciplinary Treatment Team.
- b) The Department cannot consent to the marriage of a minor child for children who are in the temporary custody of the Department. The child's parents must consent to the marriage of a minor child. If a parent cannot be located, the child could request the circuit court to appoint a guardian for the child who can then consent to the marriage.
- c) The Regional Director may consent to the marriage of a minor child who is in the permanent guardianship of the Department.

5.7.6 Entry into the Armed Services

The following steps must be taken before consent for entry in the armed services can be considered or granted:

- a) The Department cannot consent to the entry of a minor child into the armed services for children who are in the temporary custody of the Department. The child's parents must consent to the enlistment of a minor child into the armed services. If a parent cannot be located, the child could request the circuit court to appoint a guardian for the child who can then consent to the enlistment.
- b) The Regional Director may consent to the entry of a minor child into the armed services for a child who is in the permanent guardianship of the Department.

5.7.7 Driver's License/Junior Operator's License

The Department will consider consenting for a Junior Operator's License or Driver's License for foster children between the ages of sixteen (16) and eighteen (18). In order for this consent to be given, the following must be completed:

- a) There must be a general agreement on allowing the child to get a Junior Operator's or Driver's License between the child's worker, the foster/adoptive parents or facility in which the child is placed, and the child's parents if the child is in the temporary custody of the Department.
- b) The child's foster/adoptive parents or the facility must also be willing to provide a vehicle that is registered with the state Division of Motor Vehicles and has appropriate liability insurance.
- c) When the above conditions are met, the Regional Director may sign the consent for the Junior Operator's License or Driver's License.

5.7.8 Tobacco Usage by Minors

West Virginia Code [§16-9A-2](#) states “No person, firm or corporation shall sell, give or furnish, or cause to be sold, given or furnished to any person under eighteen (18) years, tobacco products in any form.” Section [§16-9A-3](#) states that possession or consumption of tobacco products is illegal for persons under the age of eighteen (18).

Although tobacco usage may be habit prior to the time a youth enters the Department’s custody, this practice is often difficult to control. All employees of the Department, licensed facilities, or contracted agencies must abide by this code.

5.7.9 Forensic Interviews

Many of our foster children are referred to local or district, Child Advocacy Centers, for a forensic interview. Due to the sensitivity of the information that is often disclosed during forensic interviews, the information is highly confidential. Therefore, a worker or supervisor must sign the consent for forensic interviews to be conducted as the child is in the legal custody of the Department. A worker or supervisor should be present for all forensic interviews conducted on any foster child.

5.8 Transportation Payment and Car Safety

5.8.1 Car Safety

Every child should be buckled in a child safety seat, a booster seat, or with a lap/shoulder belt. According to West Virginia Code [§17C-15-46](#) and National Highway Traffic Safety Administration, the use of different safety features depends on the age and size of the child being transported. The child’s worker must inform the child’s foster/adoptive parents or the staff of the foster care agency of the proper procedures for transporting a foster child safely.

a) The following rules apply when transporting a foster child:

- 1.** The safest place for any child twelve (12) years old and under is in the backseat.
- 2.** Infants up to twenty (20) pounds and up to one (1) year old should ride in a rear-facing child seat. The child seat must be in the back seat and face the rear of the car, van, or truck. Babies riding in a vehicle must never face front. In a crash or sudden stop, the baby’s neck can be hurt badly. Infants in car seats must never ride in the front seat of a vehicle with air bags. In a crash, the air bag can hit the car seat and hurt or kill the baby. Never hold a baby or allow a baby to be held when riding in a vehicle. In a crash or sudden stop, the child could be hurt badly or killed.

3. Children over twenty (20) pounds and at least one (1) year old should ride in a car seat that faces the front of the car, van, or truck. It is best to keep children in the forward facing car seat for as long as they fit comfortably in it.
4. Older children up to the age of eight (8) years old should ride in a booster seat that meets the [Federal Vehicle Safety Standards](#) . If a child is under the age of eight (8) years old and at least four (4) foot, nine (9) inches tall, they may be secured in the vehicle with the vehicle's safety belt system. A vehicle safety belt must fit low and snug on the child's hips. The safety belt must not cross the child's face or neck. Never put the shoulder belt behind the child's back or under their arm.

5.8.2 Transportation Payment

Foster/adoptive parents and Relative/Kinship providers may be reimbursed for the costs of transporting foster children to visits with the biological family or pre-adoptive visits with the potential adoptive family. The rate of reimbursement shall be based on the guidelines for payment of transportation of the Non-Emergency Medical Transportation program. Receipts or invoices are required before this payment can be issued. The receipts or invoices must be kept in the foster/adoptive parent provider paper record and documented in FACTS in document tracking.

Foster/adoptive parents and Kinship/Relative providers may also be reimbursed for the costs of transporting foster children to medical appointments using the Non-Emergency Medical Transportation (NEMT) program through the Office of Family Support. Applications for NEMT must be made at the local Department office. The child's worker will assist the foster/adoptive parent in applying for and use of this service. This payment is made through the Office of Family Support, not through FACTS.

To facilitate visitation between children in foster care and their families, child protective services and youth services families may be reimbursed for the costs of the visitation. Payment can also be made to a vendor to provide transportation for the parent to participate in services/treatment, office visits, Multidisciplinary Treatment Team meetings, reviews, and court hearings. Receipts or invoices are required before this payment can be issued. The receipts or invoices must be kept in the parent's paper record and documented in FACTS in document tracking.

5.9 Boarding Care Payments

5.9.1 General Boarding Care

Boarding care payments on behalf of the child are intended to pay for the ordinary basic maintenance and child care needs of the child placed in foster/adoptive family care. Foster care maintenance payments may be made only on behalf of a child who is (1) in the foster family home of an individual, whether the payments are made to the individual or to a private child placing agency or (2) in a residential child care and treatment facility whether the payments are made to such facility or to a private child placing agency, which payments shall be limited to include only those items which are included in the term “foster care maintenance payments”.

The term “foster care maintenance payments” means payments to cover the cost of (and the cost of providing) food, clothing, shelter, daily supervision, school supplies, a child’s personal incidentals, liability insurance with respect to a child, reasonable travel to the child’s home for visitation, and reasonable travel for the child to remain in the school in which the child is enrolled at the time of placement. In the case of group residential facility care, such term shall include the reasonable costs of administration and operation of such institution as are necessarily required to provide the items described in the preceding sentence. In cases where a child placed in a foster family home or group residential facility is the parent of a son or daughter who is in the same home or group residential facility, and payments are being made with respect to such child, the foster care maintenance payments made with respect to such child shall also include such amounts as may be necessary to cover the cost of the items-defined as foster care maintenance.

Boarding care is paid for the first day’s care, but not for the day the child leaves placement. Payment is to be discontinued during the child’s absence from the foster/adoptive home due to hospitalization, planned home visits or for other reasons if longer than fourteen (14) days. Generally, if the child is away less than fourteen (14) days and the plan is to return the child to the same foster/adoptive family, boarding care should not be discontinued.

The current boarding care rate for a foster/adoptive family is six-hundred dollars (\$600.00) per month per child. Children in Region IV who were under the Region IV Foster Care Pilot Project will continue to receive the Pilot boarding care rate until they permanently exit that placement.

There will be no adjustments to the Region IV rates with two exceptions. The rates will continue to be adjusted according to the age of the child. The rates will also be adjusted when siblings who are placed together are separated. The rates will not be changed if the siblings are reunited in the same placement.

5.9.2 Boarding Care Payment Specific to Emergency Shelter Family Care

For each full month that a youth is in DHHR custody and provider's care, DHHR will pay the current monthly rate. BCF per diem is for basic supervision, room and board, social services, personal incidentals, transportation, and replacement clothing.

For each day a child is in DHHR custody and Provider's care for a partial month, DHHR will pay the current BCF per diem, excluding the date of discharge.

Provider will receive the current BCF per diem during temporary absences of youth due to:

1. Hospitalization for a period not to exceed two (2) consecutive days, when the plan is to return the youth to provider's care;
2. Visits not to exceed two (2) consecutive days in accordance with the youth's individual visitation plan;
3. Elopements not to exceed one (1) day of absence when the plan is to return the youth to provider's care;
4. Any special circumstance not covered in items 1-3 should be directed to the Division of Grants and Contracts for consideration as an exception.

5.9.3 Boarding Care Payment Specific to Specialized Foster/Adoptive Care

The current boarding care rate for a specialized foster/adoptive family is at least six-hundred dollars (\$600.00) per month per child, but the rate is determined by the Specialized Agency. The Specialized Agency is paid a \$50.00 dollar per day per child per diem rate. Children in Region IV who were under the Region IV Foster Care Pilot Project will continue to receive the Pilot boarding care rate until they permanently exit that placement.

There will be no adjustments to the Region IV rates with two exceptions. The rates will continue to be adjusted according to the age of the child. The rates will also be adjusted when siblings who are placed together are separated. The rates will not be changed if the siblings are reunited in the same placement.

5.9.4 Boarding Care Payment Specific to Group Care, Residential Treatment Facilities and Emergency Shelter Care Facilities

Rates for these placement types are set at the state level. These rates are considered all-inclusive except for medical expenses and initial placement clothing when the child enters foster care. All other expenses including transportation, clothing, food, shelter, personal needs, supervision, etc. are included. No other payments are to be paid.

5.9.5 Boarding Care Payment Specific to Specialized Family Care Medley

Rates for specialized family care are set at the state level. These rates are considered all-inclusive except for medical and placement clothing. All other expenses including transportation, clothing, food, shelter, personal needs, supervision, etc. are included. No other payments are to be paid to any specialized family care agency or specialized family care family.

The current boarding care rate for a specialized family care is six hundred dollars (\$600.00) per month per child. However, children who meet the eligibility criteria for Specialized Family Care are usually eligible for Title XIX waiver or personal care. Specialized Family care providers are eligible to bill for Medicaid providing those services directly.

The Bureau for Children and Families currently has an agreement with West Virginia University – Centers for Excellence in Disability (WVU-CED) to provide home finding services for Specialized Family Care homes.

5.9.6 Boarding Care Payment Specific to Psychiatric Residential Treatment Facilities

Rates for Psychiatric Residential Treatment Facility facilities are set at the state level and paid through the Medicaid Program.

5.10 Child Care

Child care services are available for children in state's custody when the foster/adoptive or kinship/relative providers are employed or participating in an educational program. Child care will only be provided to the family's foster children, not the biological or adopted children unless the family meets the income eligibility requirements of the child care program. All child care arrangements must be coordinated through the Child Care Resource and Referral (R & R) agency that covers the county in which the foster/adoptive or kinship/relative provider resides. The R & R staff will request the child's worker forward an official copy of the child's birth certificate to them immediately. In addition, kinship/relative caretakers must supply the R & R worker with a copy of the signed (by both the placement worker and kinship/relative provider) Kinship/Relative Safety Screen and the Child Placement Agreement (SS-FC-6A).

In the event the child was born out of state; the worker can complete a demand payment to cover boarding care costs for up to 90 days until the official copy of the birth certificate can be retrieved. This process should be rectified as quickly as possible.

5.11 Respite Care

The purpose of respite care is to make available to foster/adoptive parents an opportunity to have time away from caretaking responsibilities. All foster/adoptive parents have fourteen (14) days of respite care available each year. The time may

be taken all at once or scattered throughout the year. The foster/adoptive family must find a certified respite provider or another certified foster/adoptive family who is registered to provide respite services by ASO or day care provider to care for the child while the foster/adoptive parent is on respite. The amount paid to the respite provider is the same rate as that paid for boarding care to the foster/adoptive family.

5.12 Financial Responsibilities

The child's worker will be responsible for arranging for payments of benefits that are due to the child to be directed to the Department to cover expenses incurred in providing care. The child's worker will also be responsible for coordination of payments to providers and other vendors. These responsibilities include completing any forms necessary and advising parties of any changes in the child's financial circumstances.

When legal custody of a child is transferred to the Department either through court order or voluntary placement, the child's parents will retain responsibility for the child's support. All parents of children in foster care are expected to contribute to the cost of the child's care.

a) The following steps must be taken when a child enters custody:

- 1.** The worker will discuss with the parents all financial resources available to meet the child's needs (i.e., Social Security, SSI, Veterans Benefits, endowments, trust funds, assets, etc.) If benefits are being paid by one of the above, the worker will contact the appropriate office to initiate having the representative payee changed from the parent to the Department. The information obtained on financial resources will be documented in FACTS.
- 2.** The worker will enter all information on parents, including absent or unknown parents into FACTS correctly and complete all necessary screens, including the Relationship Screens. FACTS will generate a referral to the Child Support Enforcement Division, ten (10) days after a placement has been entered, for the possible assessment of fees to contribute to the cost of the child's care as defined in [§49-4-801](#), and explain this process to the parents.
 - a.** If the court at the initial hearing believes that it has adequate financial information from a financial disclosure statement or from testimony to determine child support, then the court should apply the income shares child support formula and include the amount in the official standard form order appropriate to the proceedings.
 - b.** If the court does not have adequate financial information at the initial hearing then the court should order that the parent or, in two parent

households, each parent complete a Financial Statement for Child Support (SCA-DR-100) and submit the form to the child's worker. The child's worker will submit the financial form to the Child Support Enforcement Division. If the court issues an order for the form to be completed, the order should include a date by which the form is to be submitted to the child's worker.

- c. The court should also order that the parent(s) pay to the Child Support Enforcement Division either a minimum of \$50 per child monthly or, if the parents are living separately, \$50 monthly per parent per child; or a higher monthly amount per child as the court deems appropriate.
 - d. When the court decides at the hearing based on the income-shares formula, then the worker should, whenever a report is made to the court or a hearing is held, report on whether or not the parents(s) are complying with the order.
 - e. Once an obligation for child support is established for a child in foster care, the child support payments will not be stopped upon the termination of the parental rights, unless the court issues and order terminating the child support. Any arrearages will continue to be collected post-termination of parental rights.
3. The child's worker shall apply for any unearned benefits the child may be eligible for including Social Security, Black Lung, Veteran's or Railroad Retirement. These benefits shall be accepted by the Department and applied toward the cost of providing boarding care and other expenses for the eligible child.
4. A child's monthly income is considered a resource towards the cost of foster care. The benefits and contributions received by the Department for a child each month are deposited monthly in the child's centralized account. The Department is reimbursed monthly from that account for boarding care and other related child care expenses incurred by the child. Boarding care reimbursements, including those incurred to provide emergency shelter care are to be met first before any other expenses are encumbered or incurred.
5. If a child in foster care has special items or services that can be met by using the child's account, the child's worker may deduct the amount for the items or services from the child's account. The items that can be reimbursed using the child's account include: placement wardrobe, school books/fees, tutoring/summer school, camp fees, respite care, post high school education, life books, prescription drugs not covered by Medicaid, dance or music lessons, etc.

6. As a result of monthly deposit and reimbursement practices, favorable interest is earned for each child. When the child's income plus accrued interests is less than the boarding care rate the income plus interest are used to reimburse the Department. Any amounts received monthly in excess of the costs of care for the child remains in the child's account as savings.
7. The child's savings are not to be used to reimburse the Department for any part of monthly boarding care rate or special needs items paid for in previous months. However, any lump sum payments received for the period the child was in care shall be used for reimbursement, but only for the amount of the boarding care rate in effect for the month covered by the reimbursement period. The entire amount of the payment will not be used unless the monthly boarding care payments exceed the amount of the lump sum benefit.
8. Close attention should be paid to children's accounts where benefits received include SSI. For these children, it is important for the child's worker to keep track of their savings and develop plans for purchasing items that the child needs, wants, or will benefit from in order to keep the child's assets from exceeding the SSI limit of \$2,000. If a child's assets are in excess of the SSI limit, the child will become ineligible for SSI and his benefits will end.
9. SSI back payments must be dispersed below \$2,000 to prevent termination of SSI. One method of allocation of a child's resources is the establishment of an inaccessible trust fund. If the child's SSI is terminated because the resources exceed the allowable limit, the money in the principle of the account may not be used to reimburse any current boarding care expenses. Interest accrued on the account may be used, however.
10. When children leave foster care, savings are given to the child or parents, as appropriate. When the child leaves care or when the child attains his eighteenth (18th) birthday, all money that has accrued for him is to be disbursed. Disbursement will vary depending on the nature of the benefits and the child's circumstances.

5.13 Education

Every child in foster care must be afforded educational opportunities commensurate with the child's abilities. All children in placement are expected to attend school on a regular basis. All children in foster care are expected to attend high school through graduation rather than quitting school and/or completing their General Equivalency Degree (GED). Educational issues will be discussed during

the MDT meetings and will be included in the child's case plan.

5.13.1 Alternative School Placements

All foster children are expected to use the public education system to meet their educational needs. The Department will not approve placing a child in a non-accredited school or educational program. Alternative school placements such as church affiliated schools, private schools, or home schooling, will only be considered if they are recommended by an Individualized Education Plan, the Multidisciplinary Treatment Team has agreed to the plan and there is appropriate documentation that a private school or home schooling is in the child's best interest. The child's worker must seek approval from the Foster Care Program Specialist before an arrangement to transfer the child to a church affiliated school or private school can be made or home schooling can be approved.

If approved the child's worker will issue a demand payment in FACTS directly to the educational facility using the educational per diem demand payment type for the actual educational costs of a child placed in family foster/adoptive care setting seeking tuition for a private or church affiliated school. If a child is declared to need special education services before he leaves the state, the Board of Education is to reimburse the provider for the cost of the child's education. Receipts or invoices are required before this payment can be issued.

5.13.2 Special Education Services

- a)** When a child in foster care is in need of special education services, the child's worker will work with the child's parents, foster/adoptive parents, or agency caseworker to request the necessary services.
- b)** The Department of Education is required by law to develop an Individual Education Plan (IEP) for all children who need special education services. This plan must be approved by the child's parent, legal guardian, or surrogate parent. If the Department does not have guardianship of the child with a termination of all parental rights, the child's parents have the right and responsibility to approve this plan.
- c)** When parents are unavailable or unable to participate, foster/adoptive parents may act as surrogate parents if they are willing to serve as educational advocates for the child and attend training as outlined in the Surrogate Parent Training manual developed by the Department of Education. If foster/adoptive parents do not wish to serve in this capacity, a trained surrogate parent will be assigned by the Department of Education.
- d)** According to [P.L. 105-17](#), (section 615) an employee of a public agency or private child care center which is involved in the education or care of

a child may not serve as a surrogate parent and therefore cannot sign an Individual Education Plan.

- e) If a foster child is in permanent guardianship, the foster/adoptive parents should be involved in the special education planning.

5.13.3 Continuing Education

A child in the care of the Department who has graduated from high school and has the interest and ability to pursue further education either in college or vocational school should be strongly encouraged to pursue their educational goals. The Department may support youth who are continuing their education up to age **twenty-three (23)** through the foster care program. Youth over the age of eighteen (18) must voluntarily elect to remain in foster care by signing the SS-FC-18 in order to be eligible for continued foster care services.

Generally, out of state schools and private institutions will not be approved. Only in those cases where it can be demonstrated that an out of state or private program is less costly than a comparable in-state program may the situation be approved. This approval must be given by the Foster Care Program Specialist. All avenues of financial aid shall be pursued prior to determining the amount the Department will pay for a youth attending a post-secondary education or training program. The child, foster/adoptive parents, and the child's parents, if appropriate, should take the responsibility for the exploration of financial assistance.

School tuition and fees are to be paid directly to the school by the child's worker. The school must be set up as a provider and must forward an invoice for the complete amount of all required tuition, fees, room, board, books, etc. The child's worker will issue a demand payment in FACTS using the Post-Secondary Education payment type directly to the educational facility.

With the assistance of the financial aid officer of the school, the child's worker and the youth should determine what his expenses are likely to be including transportation, books, personal expenses, clothing, and any other required needs. This amount will be paid directly to the youth on a monthly basis as a personal allowance. This payment should not be over **\$100.00** per month unless the child's worker has prior written approval of the Regional Program Manager or Child Welfare Consultant. The child's worker will need to set up a provider in FACTS in the child's name. The provider category will be Transitional Living Client and the provider type will be Transitional Living Client. Once the provider has been set up, the child's worker will enter the child into placement with this TL provider. This process will ensure that the child continues to receive his medical card and that the personal allowances can be made monthly. The child's worker will issue a

demand payment directly to the child for his personal expenses using the Post-Secondary Education payment type in FACTS.

5.14 Clothing

5.14.1 School Clothing Allowance

All school-aged children placed in **family foster/adoptive care** are eligible for an annual school clothing allowance each year. Children from the age of four (4) to age eighteen (18), or twenty-one (21) if the child is continuing his educational goal, are entitled to the annual school clothing allowance. School clothing checks are mailed directly to the Department's foster/adoptive parents. School clothing checks are mailed to the specialized foster/adoptive care agencies for disbursement to their foster/adoptive parents. There is no administrative fee included in these allowances and all funds are to go directly to purchase clothing for the foster child. Using the school clothing allowance for anything other than to purchase clothing for the child it was issued for is grounds for a corrective action plan. Workers will need to issue a demand payment for the clothing allowance for youth in Transitional Living, by utilizing the payment type School Clothing Allowance.

5.14.2 Supplemental/Replacement Clothing

It is the foster/adoptive parents or facility's responsibility to maintain appropriate clothing for the child during the time of placement and to ensure that the child has an adequate wardrobe available at the time of discharge. The foster/adoptive parents or the facility in which the child is placed must supplement the child's wardrobe with appropriate clothing or replace necessary clothing items. The foster/adoptive parents or facility's boarding care payment includes the cost of clothing for the child placed in their care. It is intended that through the use of the monthly clothing allowance provided each month as part of the child's boarding care payment, the foster/adoptive parent or the facility will be able to adequately clothe the child. Approximately fifteen percent (15%) of the monthly boarding care payments should be utilized for the child's clothing needs and other personal items.

The child's worker will update the [Placement Wardrobe and Personal Inventory](#) form of the child's personal belongings and evaluate the care and adequacy of the child's clothing provided by the foster/adoptive parent or the facility. The child's worker will observe the fit, quality, condition, cleanliness, attractiveness, and appropriateness of the clothing as well as the number of clothes available to the child. If the child does not have an adequate wardrobe, the child's worker must inform the foster/adoptive parent or the facility about the need for the foster/adoptive parent or facility to purchase clothing for the child.

All clothing and other personal items purchased for the child must follow the child when he is removed from a placement. It is the child's worker's responsibility to maintain an updated inventory of all the child's clothing and other personal items to ensure that the child's personal belongings remain with him. If for some reason the child does not take all of his clothing and/or personal belongings at the time of discharge, it shall be the joint responsibility of the child's worker and the foster/adoptive family or facility to make arrangements for returning the clothing and/or personal belongings to the child within ten (10) working days. During that period of time the provider is responsible for safeguarding the child's personal belongings insuring its availability to the child. Under no circumstances is it permissible for a foster/adoptive family or facility to keep a child's clothing or personal items when the child is discharged. Not returning a child's belongings to the child when he is discharged is grounds for a corrective action plan.

5.15 Serious Illness or Death of a Foster Child

5.15.1. Serious Illness

In the case of a serious physical injury of a foster child, the child's worker should obtain assurance that medical treatment has been sought or direct that it be initiated. The child's worker should immediately notify the child's parents if the child is in the temporary custody of the Department.

5.15.2. Death

The following steps must be taken in the case of a death of a foster child:

- a)** The child's parents, if there is no termination of parental rights, are to be notified immediately and must be involved in plans for the funeral and burial. Insofar as possible, their wishes should be met.
- b)** The child's worker must notify their supervisor and the Regional Director as soon as possible.
- c)** The Regional Director will then notify the Director of the Division of Children and Adult Services and the Commissioner of the Bureau for Children and Families. The circumstances surrounding the child's death shall be forwarded to the Director and Commissioner within three (3) working days.
- d)** All cases of severe injury or death of a child shall be reported to the Prosecuting Attorney's Office for investigation by the Multidisciplinary Team as required by [§49-4-402](#).

- e) In some circumstances the child's worker will need to complete a critical incident report. (See Child Protective Services Policy for more specific details.)
- f) If the child is in state guardianship, the child's worker will plan the funeral with the foster/adoptive parents or group care facility. While parental rights may be terminated, the child may have maintained a relationship with some relatives and friends. These individuals should be notified as soon as possible so they may attend the funeral if they wish.

5.15.3. Autopsy

Should a child in foster care die of unknown causes, the Department should request that an autopsy be performed. When an autopsy is needed, the Regional Director has authority to consent to the procedure. However, every effort should be made to involve the child's parents, if there is no termination of parental rights, in giving consent where appropriate.

5.15.4. Burial Expenses

If a child in foster care dies and there are no resources available to meet the need for funeral home services, a cemetery plot, and burial or cremation services, the child's worker may issue a demand payment in FACTS for up to \$1,800.00. Receipts or invoices are required before this payment can be issued. The receipts or invoices must be kept in the child's paper record and documented in FACTS in document tracking.

5.15.5. Estate of Foster Children

Should a foster child die, the child's estate will revert to the biological heirs. While parental rights may be severed by the court when the Department is given permanent custody, legal rights vested in biological heirs are not severed.

5.16 Court Costs/Legal Advertising

Payment for class II legal advertisements must include an invoice with the dates of publication. Other miscellaneous court costs that may occur such as service fees, costs of reproducing legal documents, out-of-state birth certificates, etc., may also be paid through demand payment in FACTS. Receipts or invoices are required before this payment can be issued. The receipts or invoices must be kept in the parent's paper record and documented in FACTS in document tracking.

5.17 Cause of Action Lawsuit and Insurance Claim Settlements

There may be times when a child in foster care suffers injury to his or her person or property and requires intervention on the part of the Department as the child's legal guardian. The Department may have to determine whether to file a cause of action lawsuit or preserve the matter for the child. The Department may also have to determine whether a claim should be settled or preserved. Children in the custody of the Department should have an attorney or legal guardian appointed to represent their best interest and should be utilized when possible to assist with these issues. The court of jurisdiction for the child's case should also be made aware of the cause of action lawsuit or claim and should be a part of the process. If it is determined that a child, who is in foster care, has a cause of action lawsuit or is the subject of an insurance claim, it is the Department's responsibility to make sure the cause of action lawsuit or claim is preserved or settled. If the cause of action lawsuit or claim is preserved until the child reaches the age of eighteen (18) years old, he/she will be responsible for handling the matter on their own.

The following steps must be taken when a cause of action lawsuit or claim needs to be filed for a foster child:

- a)** The child's worker will notify the guardian ad litem or attorney and the court of jurisdiction for the child's case of the child's possible cause of action lawsuit or claim to determine if the child's guardian or attorney can assist or if a new attorney or guardian ad litem must be appointed to assist with the cause of action lawsuit or the settlement of the claim. This may involve the child's worker requesting the scheduling of a status hearing. The child's worker will also need to inform the child's MDT of the child's possible cause of action lawsuit or claim.
- b)** If the child is in the temporary custody of the Department, the child's worker will involve the child's biological parents/guardian in all decisions concerning the cause of action lawsuit or claim. The parent/guardians may choose to preserve the cause of action lawsuit or claim, if reunification will occur soon.
- c)** If the child is in the permanent custody of the Department, the child's worker will either assure that the cause of action lawsuit or claim is preserved until the child turns eighteen (18) years old or whether immediate action such as filing a cause of action lawsuit or settling the claim is required and in the best interest of the child. Any decision regarding filing, preserving, or settling a cause of action lawsuit or claim should be made in conjunction with input from the child's MDT.
- d)** If a determination is made to proceed with a settlement of the claim and a guardian ad litem has been named to represent the child, the child's worker will provide any documentation necessary for the filing of the claim to the guardian ad litem.
- e)** The guardian ad litem will file the claim on behalf of the child.

- f) The guardian ad litem will determine, with the input from the child's MDT if necessary, what documentation will be released to an insurance company to settle the claim, except for mental health records. Mental health records will not be released unless the child's worker, guardian ad litem, and parents/guardian (if the child is in temporary custody) have consulted with the Regional Attorney as to the nature of the request and the appropriateness of releasing the mental health records.
- g) The guardian ad litem will determine, with the input from the child's MDT if necessary, if the claim can be settled out of court or if a court hearing is required.
- h) The guardian ad litem will determine the amount of the settlement, with the input from the child's MDT if necessary. The DHHR, as legal guardian or custodian of the child, has final authority to consent to the settlement on the child's behalf.
- i) Once a claim has been settled, the child's worker will establish a child's **protected account**. The settlement will be transferred into this account and used towards the child's future needs such as, clothing expenses, educational expenses, medical expenses (not covered by Medicaid), or computer. A court settlement may specify what the settlement money is to be utilized towards.
- j) The child's worker will document the resolution of the settlement and any court specification concerning the money in the FACTS record.
- k) The statute of limitations for filing a cause of action lawsuit for children under the age of eighteen (18) years is held in abeyance until they turn eighteen (18) years old. If the child's worker, after a supervisory consult and the MDT's input, determines that the cause of action lawsuit will be preserved for the child until they turn eighteen (18) years of age, the worker must instruct the child when he/she reaches the age of majority that he/she has generally up to two (2) years to file a cause of action lawsuit in a personal injury case. In any event, the worker should further state to the child that he/she should consult an attorney to be sure of the statute of limitations. Most cause of action lawsuits and claims against insurance companies are as a result of personal injury sustained during a motor vehicle accident. The worker must further instruct the child that if they fail to file a cause of action lawsuit before the time period expires under the statute of limitations, he/she will likely be barred from filing a cause of action lawsuit and recovering any damages or settling a claim from the insurance company. However, the worker should strongly encourage the child to seek an attorney about their legal rights given their circumstances.

5.17.1 State Board of Risk and Insurance Management (BRIM)

The Department of Health and Human Resources and the State Board of Risk and Insurance Management (BRIM) have developed an agreement to provide general

liability and property insurance protection for all approved foster homes in West Virginia. This insurance protects the Department including its employees and the foster/adoptive parents for negligent acts of the foster child that causes injury or damage to persons other than the foster/adoptive parent. AIG National Union Fire is the insurance company that covers the Department for these liabilities.

This insurance protects the foster parent for property damage caused by the foster child to the foster parents' own property. Losses will be adjusted on an actual cash value basis (replacement cost less physical depreciation.) Each loss will be subject to a two thousand five hundred-dollar (\$2,500.00) deductible with the foster/adoptive parent responsible for the first three hundred dollars (\$300.00) of the loss.

Foster parents should immediately contact BRIM regarding information on the process to report an incident and determine eligibility. Visit <https://brim.wv.gov> to obtain contact information and instructions on how to file a claim.

5.18 SAFEKIDS PIX Identification Card Program

When children enter the foster care system they do not always have an updated photo of the child. This program will provide an identification card for every foster child who enters the system between the ages of two (2) through fifteen (15) years old. The identification card will follow the child throughout their stay in the foster care system and would be utilized as a way to track a child who may become missing.

The following steps must be taken when a child enters custody:

- a)** When a child enters foster care the child's worker will initiate the process of obtaining the SAFEKIDS PIX identification card by informing the foster/adoptive parents of the requirement to have the identification card made and providing all of the necessary paperwork for the foster/adoptive parents to obtain the card such as:
 1. original birth certificate
 2. social security card
 3. Department's letter of authorization
 4. Driver's License/Photo ID Application (obtain at DMV)
- b)** The child's worker will be responsible for follow-up with the foster/adoptive parents, to ensure that the identification card was obtained for the child and to obtain the original birth certificate and social security card back if they are needed.

- c) The child's worker will transfer the SAFEKIDS PIX ID card to a new foster/adoptive parent when a child is moved to a new placement.
- d) The child's worker is responsible for informing the foster/adoptive parents on the renewal process of the ID card when necessary, which is every two years.

5.19 Trafficked Children and Youth

Human trafficking is a form of modern day slavery where traffickers use force, fraud, or coercion to lure or entice their victims into debt bondage, sexual servitude, commercial sex acts, or forced labor. Traffickers often target the vulnerable and those who are susceptible for other reasons. Abused and/or neglected children and youth who become involved with the child welfare system and are placed in foster care or group homes, are at a much greater risk of becoming victims of human trafficking. Youth who are runaways, homeless, and involved with the juvenile justice system but not necessarily the child welfare system, are also at a higher risk. However, children who seemingly have no vulnerabilities can also become victims of human trafficking. Any child or youth who are trafficked victims, regardless of their status or living situation, are considered abused and neglected children and are eligible to receive services as defined in [WV House Bill 2318](#). There are however, different circumstances that may lead to a child or youth becoming a victim of human trafficking.

Children and youth involved in the child welfare system are at a greater risk due to placement instability and challenges achieving permanency, the lack of healthy relationships and bonding with appropriate adults, isolation from their biological family and community friends, as well as emotional vulnerability and psychological trauma due to their current situations or their history of abuse and/or neglect. Traffickers intentionally seek out these children and youth due to their vulnerabilities and many youths perceive no difference between their unstable living situations and being trafficked. Statistical data indicates that between 50 and over 90 percent of all child sex trafficking victims were or are involved with child welfare services.

Children involved in the child welfare system may also been trafficked by their own parents. An example of this would be: A thirteen year old youth is living with her father, who is a drug addict and has no job and no income. He owes his drug dealer three hundred dollars and has no way of paying him. The drug dealer informs the father of the youth, that he will consider the debt settled if he allows him to have sex with his daughter. The father agrees. The father then sees this situation as an opportunity to get his drugs for free and begins to advertise his daughter for sex in exchange for drugs. This child is an abused and neglected child in two ways. She is abused and neglected by her father, and she is abused and neglected as a victim of trafficking. This child would become involved with the child welfare system, as

a petition would be filed against her father and she would be removed from the home.

Yet, not all children and youth who are victims of trafficking are part of or enter the child welfare system. There are incidents where the child/youth became a victim of trafficking at no fault of the parent. Here is an example: A seventeen-year-old female living in Connecticut, has a twenty-three-year-old boyfriend she met while working at the local mall, and has been dating him for two months. He asks her to take a trip to Martinsburg, WV with him. The female youth reluctantly goes along. When she arrives, she is placed in a hotel room where she is told by her boyfriend that she will be having sex with men for money or he will harm her family. The female youth is given illegal substances to keep her compliant and is forced to engage in commercial sex activities along with several other minor youths. Five nights after their arrival, there is a raid on the hotel due to reported prostitution activity. The female youth is arrested for prostitution. Upon interviewing the youth, it is determined that she is a victim of sex trafficking. Law enforcement officers contact centralized intake to notify the Department as required by WV Code §61-14-7. The CPS worker may need to file a ratification to place the child in foster care to provide a safe place or to receive a medical card for immediate medical services, while awaiting the arrival of her parents. The parents have taken all the appropriate measures to locate her and there is no history of abuse or neglect with this family. Under these circumstances, the CPS worker would simply allow the ratification to expire and return the youth to her parents and a petition would not be filed against the parents. This youth, by law, is an abused and neglected child as she is now a victim of trafficking and is eligible to receive services. Under these circumstances or similar circumstance no charges will be filed for prostitution. Chapter §61-14-8 of the WV State Code, provides immunity for minor victims of sex trafficking for the offense of prostitution.

Commercial sex exploitation is only one form of human trafficking. Another form is labor trafficking. Here is an example of labor trafficking not related to the abuse of a parent or guardian: Three teenagers answer a local ad in the paper regarding a summer job selling magazines. The teens are taken across state lines where they are told if they want to receive shelter and food, and eventually return home, they must go door to door in specific neighborhoods to sell magazines and they must meet a certain quota every day or have food withheld from them. These youths eventually escape and can call law enforcement and are returned home. These youths, by law, are abused and neglected children due to being victims of trafficking and are eligible for services.

Another example of forced labor relating to a parent or guardian is as follows: A twelve-year-old child from Canada is adopted by his aunt and uncle in West Virginia, after the death of his parents. Shortly after he is adopted, they begin

forcing him to clean, cook, and take care of their small biological children. The child is forced to sleep in the attic on a cot with no blankets and food is often withheld from him until he does his assigned chores. He often works in the home for 16 to 18 hours a day and gets very little sleep. This child may or may not go to school. He begins to act out and eventually steals a car and locates a law enforcement officer. This child is an abused and neglect child in two ways. He is abused and neglected by his adoptive parents and he is abused and neglected as a trafficking victim. This child would become involved with the child welfare system, as a petition would be filed against his adoptive parents and he would be removed from the home. Under these circumstances, or similar circumstances, no juvenile petition should be filed for the truancy or theft of the car.

Victims of all forms of human trafficking have unique needs and can sometimes be difficult to identify. Often, they do not identify as victims for a variety of reasons. Female youth may not identify as a sex trafficking victim because they believe that their trafficker loves them and there may be in an intimate relationship with the trafficker. Another reason youth may not identify as a trafficked victim is due to threats from the trafficker to the victim or the victim's family if they turn their traffickers in to authorities. Some may not identify due to shame and guilt and feel they deserve the abuse. Over time the sexual, physical, emotional, and/or psychological abuse and trauma they endure may result in the youth beginning to view their life as a trafficking victim as normal, therefore making it less likely for them to identify as a victim. There may also be mistrust with authorities due to previous juvenile delinquency charges resulting in a reluctance to disclose any information due to fear of being punished.

Identifying victims and assessing their needs is vital to effective services and treatment. Their immediate needs should be assessed first. Immediate needs would include their safety, any medical treatment they may need for physical or sexual trauma, as well as food and shelter. Other needs of trafficking victims may include, but are not limited to, mental health needs, legal services, education services, and possibly life skills for teens. The ongoing needs of trafficking victims are just as important as their immediate needs. Many victims have deeply rooted psychological trauma that will require months, if not years of treatment and management.

The Child Welfare Information Gateway, along with the collaboration with other agencies, has provided specific signs to look for in aiding to identify potential sex trafficking victims:

- A history of physical, emotional, or sexual abuse;
- Signs of current physical abuse and/or sexual abuse;
- History of running away or current runaway status;

- The sudden onset of expensive property, such as cell phones, jewelry, clothing or tattoo markings;
- The sudden withdrawal or lack of interest in activities previously interesting in;
- And gang activity.

The Child Welfare Information Gateway has also provided specific signs to look for in aiding to identify potential labor trafficking victims:

- The lack of freedom to come and go;
- The lack of payment or very little pay;
- Excessive or unusual work hours;
- No breaks at work, including lunch;
- Excessive amount of debt that cannot be paid off;
- Recruitment based on false promises related to the conditions of the work;
- Heightened security measures at work or place of residence;
- Unable to communicate their whereabouts and lacking a sense of time.

Trafficked victims who are involved with the child welfare system may have been removed from their home or it may be necessary for the child/youth to be removed, due to their parent's involvement in trafficking their child. It is imperative to assess the child/youth's needs and begin appropriate services as quickly as possible. For youth in care who have run away from their home or placement, the Away from Supervision [screening tool](#) will need to be completed with the youth, upon their return, by the child welfare worker, facility worker, or foster parent to determine possible trafficking victimization of the youth while they were runaway status. For any child/youth that run away from home or placement while in state's custody, the worker must immediately notify law enforcement but no later than 24 hours after the child runs away or is reported to the worker by parents or placement staff that the child is missing.

Trafficking victims, who have had no previous involvement with the child welfare system, are now eligible for services provided by the child welfare agency. This will allow the victim and their family to receive the appropriate services to address the victim's needs. It is vital to understand and remember that all children/youth who are trafficking victims are considered abused and neglected children by law, and they are entitled to receive services for the treatment of their victimization. Therefore, it is important to distinguish the difference in circumstances of how a child/youth becomes a victim of trafficking. The worker must take the necessary steps to ensure the situations where parents are found **not** to be abusive or neglectful in their child/youth's trafficking victimization, are not entered as maltreaters in the abuse and neglect referral entered in FACTS or while completing

the assessment. In these cases where the parents are **not** the maltreater, the individual(s) accused or charged with trafficking the victim(s) is entered in FACTS as the maltreater. If the parents are found to be the traffickers, they will be entered as the alleged maltreater in FACTS. If placement of the victim is necessary, then a petition will be filed against the trafficking perpetrator, regardless of the relationship to the victim(s). Law enforcement must be notified within 24 hours of receiving any human trafficking referral or if the worker suspects that any form of trafficking is occurring or has occurred during any stage of an assessment or case.

It is also important to understand that multiple referrals may stem from one trafficking incident. If the trafficker is a nonparent or non-caregiver, then a referral will be entered on the trafficker, listing all victims for the trafficking incident, which could include only one victim or multiple victims in the same referral. If the trafficker has children, a separate referral will be entered for the trafficker and his/her household only if there are allegations of abuse and/or neglect involving his own children. If the parents are found to be abusive or neglectful during the trafficking incident, then a separate referral will be entered listing the parents as maltreaters. Again, there may be multiple referrals for one trafficking incident, depending on the circumstances surrounding the trafficker and victims involved. ***Please see Sections 3.31 and 4.50 in CPS policy for further instructions on the referral and assessment processes.**

5.20 Runaway, Missing or Abducted Children

When a child is missing, abducted, or is on runaway status, it is vital that information is reported quickly to law enforcement agencies, to ensure the child's safe return. The Department requires foster care providers to provide notification to the Department immediately when a child runs away, is missing, or is abducted. When notified that a child is missing, abducted, or is on runaway status, the Department worker is required to provide notification to law enforcement **immediately**, and in no case later than 24 hours after receiving information on missing or abducted children, for entry into the National Crime Information Center (NCIC) database of the Federal Bureau of Investigation. The Department worker is also to notify The National Center for Missing and Exploited Children (NCMEC) within the first 24 hours as well. As required by, [Public Law 113-183, Preventing Sex Trafficking and Strengthening Families Act](#).

The child's worker must take the following steps to ensure that the child is located safely and quickly:

- The child's worker must contact law enforcement immediately, but no later than 24 hours, to report the child is missing, abducted or has run away. They may need to file a runaway petition or missing person's report if one has not been filed by the provider.

- The child's worker will provide law enforcement with any information needed to locate the child. The child's updated custody photo, SafeKids Pix ID card, family photos, or school pictures should be utilized to assist in the identification of the child.
- The child's worker will cooperate with law enforcement completely to locate the child.
- The worker then must contact the National Center for Missing and Exploited Children (NCMEC) also within 24. The worker should have the following information ready and available to report to NCMEC:
 1. Child's full name
 2. Child's date of birth, gender, height, weight
 3. Date child went missing
 4. City and state from where the child went missing
 5. Guardian information, including agency name and telephone number
 6. Law enforcement information including agency name, telephone and police report number
- Additional information requested by NCMEC if available:
 1. Physical descriptive information (e.g. hair and eye color, clothing worn)
 2. Any risk or endangerment to the child
 3. Circumstances surrounding the incident
 4. Description of any person who may be with the child
 5. A recent photograph of the child
- The worker can report the missing child one of two ways:
 1. The worker can report online by filling out the online form designed specifically for agency legal guardian, social service representatives, case workers, CPS employees, etc., located at: <http://cmfc.missingkids.org/ReportHere>. Make certain that all information is read and answered precisely.
 2. The worker can also report by calling **1-800-THE-LOST(1-800-843-5678)**. If it is an urgent matter, please call the above number instead of filling out the form and make certain that law enforcement has been contacted prior to notifying NCMEC in emergency situations such as suspected child abductions. ***Additional resources can be located at, <http://cmfc.missingkids.org/Resources>.**

- The child's worker must notify the child's biological parents, if parental rights have not been terminated, immediately about the child's situation.
- The child's worker must notify their immediate supervisor and Community Services Manager when a child is missing or abducted, immediately.
- The child's worker must notify the court, guardian ad litem, or attorney for the child when a child is missing, abducted, or on runaway status.
- Workers should consult with their immediate supervisor and Community Services Manager to consider additional options in locating missing children while maintaining the child and family's foster care status confidential.

Once the child has been located, if they are returned to the foster parents or facility from which they ran, that provider will complete the Away from Supervision/Run-away event survey form. However, if they are placed with new foster parents or residential provider, the worker will complete the Away from Supervision/Runaway Event Survey with the following information:

- 1) Determining the primary factors that contributed to the child's running away or otherwise being absent from care, and to the extent possible and appropriate, responding to those factors in current and subsequent placements;
- 2) Determining the child's experiences while absent from care, including screening the child to determine if the child is a possible sex trafficking victim; and
- 3) Reporting such related information as required by the Secretary.
- 4) Based on the child's experiences while away from supervision, schedule appropriate evaluations or exams.

If a child or youth has been away from supervision of the agency for more than 180 days, and cannot be located, the DHHR must seek a modification of disposition order releasing the DHHR of care, custody and control. **If the child has had termination of parental rights, the DHHR cannot be released from its responsibility and must actively seek the whereabouts of the missing child or youth.**

If the child or youth is eventually located, the DHHR will complete the [Away from Supervision Event Survey](#) to determine if the child is safe, been a victim of trafficking, or is need of immediate services. The DHHR will notify the court of the child's return, provide appropriate services, scan into the FACTS file cabinet, and forward the screening tool to the Office of Children and Adult Services, 350 Capital St. Charleston, WV.

5.21 Photograph on File

Every child that comes into custody will have their photograph stored in the FACTS computer system. This will be used as a way to identify children should they ever

go missing, run away, or be abducted. The child's worker will complete the following steps to ensure that the child has a photograph stored in their case in FACTS:

- a)** Once a child comes into custody, the child's worker will take a picture of the child at the first visit they complete with the child. The child's worker is required to visit with the child face to face in the child's place of placement within seventy-two (72) hours of the child being placed. If a picture cannot be obtained at that time, the child's worker must return to the placement to take the child's picture no later than ten (10) days after the child coming into custody. The picture needs to be of the child facing forward so that their face is easily recognizable.
- b)** The child's worker is to only use a Department issued digital camera, Department issued cellular phone, Department issued tablet, or other Department issued device to capture the picture. The worker is not permitted to use a personal camera or a personal cellular phone. Should the worker use a personal camera or personal cellular phone, the worker must be aware that those devices are subject to be subpoenaed in court as evidence in the case and the Department will not be responsible for replacing such items. Using personal devices is also a breach of confidentiality for the child and/or parents and the worker may be held responsible for such.
- c)** Upon returning to the office, the child's worker must upload the picture from the camera to a Department issued computer. The worker is not permitted to upload the picture to a personal computer or any other device that does not belong to the Department. Should the worker upload the picture to a personal computer or other device, that computer or device may be subject to be subpoenaed as evidence in the case and the Department will not be responsible for replacing such items. Using personal devices is also a breach of confidentiality for the child and/or parents and the worker may be held responsible for such.
- d)** The child's worker is to enter a contact in FACTS for this visit and must reference that a picture was taken and that the picture can be found in the case file cabinet.
- e)** The child's worker must then upload the picture into the case file cabinet in FACTS. The worker is to document in the Description section the date that the picture was captured, not the date that the file was uploaded.
- f)** The child's worker must capture a new photograph of the child every year during the child's birthday month once the child has been in custody for more than twelve (12) months. This will ensure that there is always an updated picture of the child on file.

If the child's worker can obtain a recent picture of the child from the foster care provider, such as a school picture or the image from the SafeKids ID Card, the worker can then scan that image into a Department issued computer and import into the file cabinet in the same manner as mentioned above.

5.22 Prudent Parenting

Any child who comes into care under a [Chapter 49 abuse and neglect](#) proceeding is entitled to participate in age-appropriate activities for the child's emotional well-being and development of valuable life-coping skills. The Bureau for Children and Families (BCF) shall make efforts to normalize the lives of children in their custody and to empower a caregiver to approve or disapprove a child's participation in activities based on the caregiver's own assessment using a reasonable and prudent parent standard, without prior approval of Child and Family Services. BCF shall allow a caregiver to make important decisions, similar to the decisions that a parent is entitled to make, regarding the child's participation in activities. BCF will verify that private agencies providing out-of-home placement under contract with BCF, promote and protect the ability of a child to participate in age-appropriate activities. A caregiver is not liable for harm caused to a child in an out-of-home placement if the child participates in an activity approved by the caregiver, provided that the caregiver has acted in accordance with a reasonable and prudent parent standard.

A caregiver shall use a reasonable and prudent parent standard in determining whether to permit a child to participate in an activity. "Reasonable and prudent parent" standard means the standard characterized by careful and sensible parental decisions that maintain the child's health, safety, and best interests. When making such decisions, a caregiver shall consider:

- The child's age, maturity, and developmental level to maintain the overall health and safety of the child;
- Potential risk factors and the appropriateness of the activity;
- The best interest of the child based on the caregiver's knowledge of the child;
- The importance of encouraging the child's emotional and developmental growth;
- The importance of providing the child with the most family-like living experience possible; and
- The behavioral history of the child and the child's ability to safely participate in the proposed activity.

In applying the reasonable and prudent parent standard, foster parents are required to take reasonable steps to determine the appropriateness of the activity

in consideration of the child's age, maturity, and developmental level. It is recognized that there are many ways to determine whether an activity is appropriate for a foster child in your care. Therefore, the following examples of "reasonable steps" that a foster parent may take in making this determination are provided as a guide to assist in the decision-making process:

- have adequate information about the foster child in your care;
- take into account the type of activity and consider the foster child's mental and physical health, as well as behavioral propensities;
- consider where the activity will be held, with whom the foster child will be going, and when they will return.

Foster parents and residential providers will also need to take into account the reasonable, foreseeable risks of an activity and what safety factors and direct supervision may be involved in the activity in order to prevent potential harm to the foster child. (i.e., hunting, paint ball, archery or similar activities that may pose a higher risk). Caregivers shall ensure that the child has the safety equipment and any necessary permissions and training necessary to safely engage in each activity the child participates in.

When children are placed in a group home or residential treatment setting, the provider will incorporate normalcy activities into the program. The activities will be in-line with the reasonable and prudent parent standard and will help children with skills essential for positive development.

5.22.1 Social Media

It is the policy of the DHHR/BCF to encourage normalcy in the lives of foster/adoptive children. As such, it is acceptable to post photos of a foster/adoptive child(ren) in family or group setting (school, sports, sleepovers, parties, etc.) on social media. However, in any social media posting, (photographic or print) foster/adoptive parents are prohibited from releasing any information regarding: the fact that the children are in a foster/adoptive circumstance, the foster adoptive child(ren)'s previous custodians, geographic or demographic information that could jeopardize the foster child(ren)'s safety, or any other information that would breach the confidentiality provisions of West Virginia Code Section [§49-5-101](#). These prohibitions continue even after any placement has ended. Furthermore, for the safety of the children, it is strongly advised that all such postings be made on private settings, to be seen by the foster/adoptive parent's friend groups only and not posted publicly.

5.23 Youth Transitioning (Youth age 14 and up)

The Department has the responsibility to help youth, in their care, develop into self-sufficient adults. In addition, all agencies and individuals who provide substitute parental care for youth, in their care, are charged with helping to ensure that their social, emotional, and intellectual development is achieved to each youth(s) highest potential.

The Department should ensure that all adults entrusted with the care of the state(s) youth demonstrate appropriate social behavior; respond properly to stressful situations; and promote good physical, emotional, and intellectual well-being. It is through the observation of positive adult behavior and through interaction with positive adult role models that youth develop and demonstrate positive attributes.

For all youth, in out of home care, at age 14 or older, the youth(s) caseworker is responsible for the following actions:

- a) Assessing each youth(s) potential for eventual independence;
- b) Developing an appropriate learning/transition plan for securing and providing necessary services to assist each youth to achieve independence;
- c) Continuous reviewing and modifying of the learning/transition plan until the youth achieves his permanency goal; and
- d) Developing an age appropriate plan, within the learning/transition plan, for each youth that educates him/her about family planning, which includes information on pregnancy prevention, sexually transmitted infections, and other issues related to healthy sexual development; and
- e) If the youth self-identifies as being sexually active, the worker will develop a plan, within the learning/transition plan, of supportive counseling to work with him/her on issues of abstinence and healthy sexual development. This will be done in conjunction with the youth's MDT in all cases and including the biological parents if parental rights are intact.

5.24 Life Skills Assessment/Learning Plan (Youth age 14 and older)

The Life Skills Assessment is a comprehensive assessment, designed to engage young people in their transition to adulthood, as they move from childhood into their teenage years. The assessment assists in determining life skills domains, deemed critical by youth and caregivers to assist youth transitioning to adulthood successfully. Some youth have special needs and challenges and additional assessment supplements are available to help these youth identify critical life skill needs.

Youth in foster care are required to complete a life skills assessment at the age of 14 or as soon as the youth enters foster care, if they are greater than 14 years old. A new life skills assessment is required to be completed by youth in foster care annually.

The youth's worker will do the following upon a youth's 14th birthday or upon a youth entering care at the age of 14 or older:

1. Assures that each youth in a foster care placement completes the Life Skills Assessment and any needed Supplemental Assessments, no later than 30 days following his or her 14th birthday or within 30 days of entering foster care if the youth has already reached the age of 14 or older. The Life Skills Assessment may be provided in the following ways:
 - a) Agency staff of foster care placement settings must provide the assessment to youth in their program within 30 days of the youth's 14th birthday. The results must be submitted to the youth(s) worker. The youth's worker must provide or ensure that the Department(s) foster/adoptive parents provide the Life Skills Assessment no later than 30 days following the youth(s) 14th birthday or entrance into care if the youth is already age 14. If the assessment is provided by the youth(s) foster/adoptive parents, the results must be submitted to the youth(s) worker.
 - b) The youth's worker must ensure that the foster care agency staff or foster/adoptive parents provide the Life Skills Assessment to youth placed in their care within 30 days following the youth(s) 14th birthday or entrance into care if the youth is already age 14. The results must be submitted to the youth(s) worker.
2. The youth's worker must ensure that the foster care agency staff or foster/adoptive parents perform the annual re-assessment of the Life Skills Assessment until the youth is discharged from foster care.
3. The results of the assessment must be filed in the youth(s) case record and documentation of such is to be placed in FACTS on the youth transitioning screen and document tracking.
4. The youth(s) worker, in collaboration with the youth(s) foster/adoptive parents or the foster care agency staff, must develop a personalized transition plan for each youth no later than 60 days following the youth(s) 14th birthday or entrance into foster care if the youth is already age 14 or older. The plan must specify the individual needs of each youth and the strategies planned for assuring his full developmental potential is achieved. The youth(s) learning/transition plan must be documented on the Youth Transitioning Screen in FACTS.
5. The youth(s) worker must assure that a Learning/Transition Plan is developed based on the Life Skills Assessment for the youth. The youth's worker will utilize the Life Skills Guidebook to develop the Learning/Transition Plan.
6. The youth(s) worker must ensure that the Learning/Transition Plan includes any life skills instruction based on the Life Skills Curriculum.

7. The Youth's Learning/Transition Plan, which will include the youth's Life Skills Assessments, Learning Plan, Life Skills Instruction/Curriculum, as well as Transitional Services provided, must be incorporated into the Youth's Case Plan and a copy provided to the youth.
8. The youth(s) worker must ensure that each Youth(s) Case Plan is reviewed on a quarterly basis and that the plan is modified as needed to ensure the youth is progressing toward permanency and meeting the learning/transitioning plan.

5.24.1 Life Skills Domains and Curriculum (Youth 14 yrs old and up)

Foster/adoptive parents and foster care agency staff must use the Life Skills Curriculum as the formal instruction for each youth in care. This instruction must begin at the earliest possible age in which a youth appears ready, but in no case later than 60 days following the youth(s) 14th birthday. This instruction must be continuously and rigorously provided until the youth successfully completes each skill area needing improvement demonstrating they have achieved their highest potential.

The Life Skills Curriculum, for each youth, will be dependent upon the youth's needs. The learning topics may range from daily living skills to decision making and judgment skills.

The life skill curriculum will be selected by the youth to address each of the domains identified in the youth's life skills assessment. Life skill curriculum must be available and easily accessible to the youth and must be provided to the youth in a manner that is not overwhelming to the youth. If the youth has several domains, which need to be addressed, then the youth may choose one or two domains to focus on at one time. Within those domains, the youth should only choose one to three skill areas to work on at one time. At no time should a youth be addressing more than two domains and one to three skill areas, within each of those domains.

A variety of life skill curriculum resources are available for use by youth to address each domain. Many life skill curriculum resources are available through the internet and are free of charge. Other life skill curriculum may be provided through utilizing community resources or by the youth receiving the instruction from a mentor, provider, foster parent or worker. Some life skill curriculum may be purchased and provided to the youth and worker.

5.25 Transition Plan (Youth age 14 and up)

A Transition Plan is a guide that the youth and the youth's worker will use to determine the needed elements for the development of the life skill curriculum and the youth's transition to adulthood. An individual transition plan may be based on

selected learning goals and related expectations as the youth transitions to adulthood. The youth must develop their own Transition Plan.

The transition plan is used to document all activities that need completed for the youth to reach self-sufficiency. This includes the selected learning goals and activities the youth's worker and/or provider will use during life skill learning sessions and as the youth transitions to adulthood. The learning/transition plan should indicate whether the life skill instruction was provided in a group setting or on a one-on-one basis.

A youth's Transition/Learning Plan must be personalized for the youth, developed by the youth and contain specific information to assist the youth in their transition to adulthood.

Transition planning is a vital part of the youth's case plan. The plan should be developed as soon as the youth completes a life skill assessment but must be completed when the youth turns 16 years old. The plan must be specific for the youth and contain information that will assist the youth in their successful transition to adulthood.

The youth's worker and youth will update or revise the Transition/Learning Plan at least 90 days, prior to the youth turning 18 years old. The plan must be personalized by the youth and must contain as much detailed information as the youth decides to incorporate into the plan. The plan must contain the following specific information:

1. Housing options and services
2. Education plans and services
3. Employment plans
4. Health insurance options
5. Local opportunities for mentoring
6. Information concerning consumer credit report checks
7. Continuing support services
8. Health care directives and how to complete an "advance directive" when requested, (See Section 5.28.1 and 5.28.2 below, for further direction on advance directives)
9. Any services that will be paid for using Chafee funds
10. Any other information that the youth deems important

The youth's worker must incorporate the Transition/Learning plan into the "Uniform Child or Family Case Plan" for CPS or Youth Services Family or Child Case Plan for Youth Services.

5.25.1 Consumer Credit Report (Youth 14 yrs old and up)

During transition planning for older youth, States must ensure that a consumer credit report is completed for each youth age 16 or older, who is in foster care, annually. The consumer credit report must be provided to the youth without cost. The State must also assure that the youth is provided assistance in interpreting the report and resolving any inaccuracies found.

Since credit reporting agencies do not knowingly maintain credit files on minor children, if a file is found, it must be interpreted, and all issues resolved prior to the youth leaving care.

1. The youth's worker must request a consumer credit report from all three credit reporting agencies on all youth in foster care, annually, beginning when a youth turns 16 years old or enters foster care after the age of 16. The consumer credit report request must be submitted within 60 days of the youth turning 16 years old or entering foster care, if the youth is already 16 years of age. The following steps should be taken to obtain a youth's consumer credit report first from TransUnion:
2. The youth's worker will request a consumer credit report through the credit reporting agency [Trans Union's Child ID Theft](#) process via the internet.
3. Once the consumer credit report check has been completed by [Trans Union](#), the worker will get either an e-mail indicating that there is no record for the youth or requesting additional information, which may indicate that a record has been found.
4. If there is no record on the youth, the worker will document in the youth's transition plan and in FACTS that the credit report check has been completed. The worker should utilize Document Tracking in FACTS to show that the request has been made.
5. The worker must provide the youth with information on consumer credit report checks and explain that the State is completing consumer credit report checks annually on them. The worker will explain that this is being done to protect their identity. If the youth needs additional information about consumer credit report or identity theft, the worker can make a referral to a credit counseling agency for the youth.
6. If the credit reporting agency identifies a record for a youth, the issues must be resolved. The youth must be involved in the credit resolution process and educated on identity theft and how to resolve issues on consumer credit reports.
7. The worker will assist the youth in resolving any identity theft issues or consumer credit report issues. The youth's attorney, Guardian ad Litem, or the DHHR Regional Attorney should assist in any resolution issues.
8. The youth's worker will submit a letter to the youth's attorney or Guardian ad Litem concerning the youth consumer credit report, if there

are issues that need resolved. The letter should be scanned into the FACTS file cabinet and Document Tracked in FACTS.

9. Any consumer credit report issues or identity theft issues must be documented in the youth's transition plan, as well as in FACTS. The report may be scanned and placed into the FACTS file cabinet or Document Tracking should be completed to indicate where the report has been placed.
- a) The following steps should be taken to obtain a youth's consumer credit report, the second report from Experian:
 - 1) The youth's worker will print the Client Information report from FACTS and redact everything except:
 - a. Client Name
 - b. Involvement Start Date
 - c. Social Security Number
 - d. Birth Date
 - e. Address(es)
 - f. Living Arrangement
 - g. The Court Number(s) and Stare Date(s)
 - 2) Additionally, the youth's worker should print the standard Consent to Release Information report from FACTs, using the following example:

I do hereby authorize **Experian National Consumer Assistance Center** to furnish the following information to the West Virginia Department of Health and Human Resources or any of its authorized representatives.

INFORMATION REQUESTED

- ___ 1. Social History/ Summary Intake
- ___ 2. Psychological Tests and Evaluations
- ___ 3. Psychiatric Evaluations
- ___ 4. Educational-Vocational Assessments
- ___ 5. Medical Exams – Records
- ___ 6. Other: **An Annual Credit Report as required by the Child and Family Services Improvement and Innovation Act (Public Law (P.L.) 112-34).**

- 3) The redacted report, together with the standard Consent to Release Information report from FACTS **and a copy of the Court Order** placing

the child in State's Custody (redacting confidential information other than the child's name and court number) should be mailed to: Experian National Consumer Assistance Center, PO Box 9701, Allen, Texas 75013.

- 4) Experian will process the request under the annual free credit report type and send the report to the requestor (agency) through regular mail.
- 5) The report will either be a "no record", or have information. For security purposes, the envelope will not indicate Experian. If there is a report, the account information will be truncated, the Social Security Number for the youth will not appear on the report and any variations of the Social Security Number, will be truncated. Please specify in the request the State or Federal agency address to which you want the no record or credit report sent.
- 6) There is no charge for this process.
- 7) The following steps should be taken to obtain a youth's consumer credit report, the third report from Equifax:
 - The youth's worker will use the same process as outlined in section 2) above, replacing Experian with Equifax and using this address: Equifax Disclosure Department, P.O. Box 740241, Atlanta, GA 30374

5.26 Case Management for Youth Transitioning (Youth 14 yrs old and up)

5.26.1 Services

Youth transitioning often need a variety of services to aid their transition to adulthood and self-sufficiency. Some of these services are "paid" services, such as ASO Services or services paid for through demand payments. Many times, youth transitioning from foster care receive services from individuals and community resources, which are "non-paid" services. Some of these services may be foster parents providing life skills training, HRDF (employment program) providing job skills training, tutoring provided by the educational facility, or mentoring by volunteer groups. Some youth may be receiving a service from one provider, that is "paid" and the same service, from a different provider that is "non-paid", such as Tutoring. Example: A youth could be receiving tutoring from their school for free and be receiving tutoring from a professional tutoring service that is paid.

When youth are receiving the same service, where one is paid, and one is non-paid, both must be entered into the FACTS screens in the appropriate area. **Services that are paid or non-paid but provided by a grantee of the state or a person who is receiving funds for the care of the youth such as a foster parent or**

residential provider will be documented in the NYTD Services area of the Youth Transitioning Tab. The youth's worker will provide the *NYTD Quarterly Services Report* to the provider of the service and transfer information from this report into the services screens. The report should also be uploaded into the FACTS file cabinet. Services that are non-paid and received from a community provider such as tutoring from the school will be captured in the services log area of FACTS.

Below is a list of Services for Youth Transitioning:

- a) Paid Transition Services Include:
 - 1. ASO Chafee Agency Transportation
 - 2. ASO Connection Visit
 - 3. ASO Tutoring
 - 4. Basic Home Management/Life Skills
 - 5. Education Funding
 - 6. Education Vocational
 - 7. Education/ Career Planning
 - 8. Educational Advocacy
 - 9. Educational Assessment
 - 10. Educational Services
 - 11. Educational Supplies
 - 12. Employment Services
 - 13. Family Planning
 - 14. Financial Services
 - 15. Housing – Rent
 - 16. Housing (Services)
 - 17. IL Subsidies (Supervised Independent Living)
 - 18. Medical Services
 - 19. Parent Education and Training
 - 20. Transportation (Routine)
 - 21. Tutoring
 - 22. Utilities
 - 23. Vocational Testing/Counseling

- b) Non-paid Transition Services Include:
 - 1. Academic Counseling
 - 2. Addiction Education
 - 3. Basic Home Management/Life Skills
 - 4. Career Planning
 - 5. Consumer Awareness
 - 6. Personal Identity Protection
 - 7. Education Funding
 - 8. Education Planning

9. Education Supplies
10. Education Vocational
11. Education Advocacy
12. Educational Assessment
13. Education Services
14. Employment Services
15. Family Planning
16. Financial Services'
17. High School Equivalency Preparation & Support
18. Health Education
19. Healthy Relationship Education
20. Homework & Study Skills Assistance
21. Housing Education
22. Literacy Education
23. Mentoring
24. Parent Education & Training
25. Tutoring
26. Vocational Testing/ Counseling
27. Youth Transitioning Transportation (YTT)

5.26.2 Youth Transition Service Definitions

Academic Counseling: Assisting youth in learning how to concentrate in class better, in discovering the reason for failing grades, the reason for not being able to study appropriately, the reason for not being able to concentrate in class and how to overcome these difficulties.

Addiction Education: Providing youth with information on programs and services to prevent substance use and abuse.

ASO Chafee Agency Transportation: This code may be utilized for providers' mileage encumbered when Child Protective Services Chafee Services have been implemented within the child/youth's home and the permanency plan is Independence and/or emancipation. If a provider is unable to deliver the identified service upon traveling to the home, this code may be billed up to three times within the ninety-two (92) day authorization period when the following conditions are met:

- a) The provider/agency has a policy and procedure regarding the expectations of the youth being served. The importance of keeping scheduled appointments, notifying the provider when an appointment needs to be cancelled and the means in which the DHHR will be notified if appointments are not kept are reviewed with the client(s).

- b) The provider/agency has a policy and procedure about notifying the Department regarding youth non-compliance with established scheduled appointments.
- c) There is documentation of the visit being scheduled within the case record.

Please note: the rate will be based upon the current State of West Virginia reimbursement rate.

ASO Connection Visit: These visits are face-to-face visits for the purposes of preserving the connections between children/youth who are in the custody of the DHHR and living in a foster family home, group home or who are college students living on campus with their siblings, relatives or former foster parents.

ASO Tutoring: Structured individualized or small group setting of three or less in which a child is taught or guided on an academic area to enhance skills to avoid failing a core educational requirement. Provider must have demonstrated competence in academics being tutored. A high school diploma is required to provide this service to elementary school age children and an Associate degree or higher for students in middle school or above. This service is time-limited, and the child's academic functioning level/ability must be considered. Tutoring is to build upon a targeted academic skill in which the student has a documented deficit. Tutoring is not to be used for regular homework completion.

Basic Home Management/Life Skills: Providing youth with instruction to assist them in the upkeep of their home and in daily living. These basic skills may include instruction in food preparation, laundry, housekeeping, living cooperatively, meal planning, grocery shopping, and basic maintenance and repairs to the home.

Career Planning: Assisting the youth in exploring career interests or options. Assistance may include using career resource libraries, interest inventories, job fairs, and other community resources to help the youth in this area.

Consumer Awareness: Assisting youth in developing skills in comparative shopping, researching best products and buys, product safety and satisfaction, consumer rights, and other community resources to help the youth in this area.

Educational Advocacy: Assisting the youth in obtaining the required services to complete their educational plan. Assistance may include: helping the youth maintain contact with school counselors, attendance counselors and social workers for needed services, assisting the youth in obtaining needed IEP services, assisting with problems with financial aid offices, billing offices, and enrollment offices, working with the school on any issue related to the youth's educational plan.

Educational Assessment: Providing an academic evaluation of the youth's academic achievements and areas needing improvements to determine the supports and services the youth may need to accomplish their educational plan/goals.

Educational/Career Planning: Assisting the youth in exploring educational and/or career interest or options. Assistance may include using career resource libraries, interest inventories, job/college fairs, other community resources to help the youth in this area.

Education Funding: Services provided to youth to assist them in obtaining a post-secondary educational goal, such as a college degree, or a program certification or licensure. Some of the assistance that may be provided for youth in the above programs is tuition and fees, room and board at schools, interim housing, and food.

Education Planning: Assisting the youth in exploring educational interests or options. Assistance may include using educational resource libraries, interest inventories, college fairs, other community resources to help the youth in this area.

Educational Services: Assisting the youth with post-secondary activities that will help them obtaining their educational goals. These activities may include assisting youth with test preparation (ACT, SAT), linking youth to colleges, providing youth an opportunity to attend college orientations/tours (HAT and Upward Bound Program), assisting youth in completing financial aid applications, assisting youth in enrolling and registering in an educational program, and other educational resources that will help the youth in this area.

Educational Supplies: Services provided to youth to assist them in obtaining a post-secondary educational goal, such as a college degree, or a program certification or licensure. Some of the assistance that may be provided for youth in the above programs is school clothing, books and supplies.

Educational Vocational: Providing the youth with vocational training programs that are designed to build a youth's skills for a specific trade, vocation, or career through classes or on-site training. Vocational training includes a youth's participation in vocational or trade programs and the certification of training in occupational classes for such skills as cosmetology, auto mechanics, building trades, nursing, computer science, and other current or emerging employment sectors. These programs may include a youth's participation in an **apprenticeship, internship, or summer employment program** and do not include summer or after-school jobs secured by the youth alone. Some of these programs may be paid, unpaid or partially paid.

Employment Services: Assisting the youth in applying for and retaining gainful employment. Assistance may be in the following area: job seeking and placement support, writing resumes, developing interview skills, understanding workplace ethics, providing work force supports, and other community resources to help the youth in this area.

Family Planning: Providing youth with information/training on abstinence and ways to prevent pregnancy or childbirth, such as sexual development, pregnancy prevention and Sexually Transmitted Infections (STI) Education. The information/training may also include prevention, and treatment sessions.

Financial Services: Assisting youth is the use of a bank, how to make deposits, setting up a checking account, writing checks, utilizing ATM cards, utilizing safe deposit boxes, making loan applications. Assisting youth in basic money management which may include budgeting, saving, paying debts, credit and investing. and providing youth with information on continuing support services. Youth may also be assisted in tax preparation as part of financial assistance.

HSE Preparation & Support: Providing assistance to youth in obtaining their **High School Equivalency (HSE)**. Such assistance may include providing them with guidance in applying for, enrolling in classes for, attending classes for and testing for their **HSE**.

Health Education: Providing the youth with information that increases their awareness favorably and influences their attitudes and knowledge relating to the improvement of health on a personal or community basis.

Healthy Relationship Education: Providing youth with the information on how to communicate with greater compassion and clarity. Assisting the youth in developing skills to promote positive family and community interactions.

Homework and Study Skills Assistance: Providing youth with instruction on how to obtain information from class better, take notes in class, study better, and how to take tests in order to obtain their high school diploma or GED. Support may include the assistance in homework, when it is needed. This may be provided by teachers, foster parents, social workers, parents, or other individuals.

Housing Education: Providing the youth with assistance, training and instructions on issues related to finding a place to live as well as keeping a place to live. The training/skills provided may include locating and maintaining housing, including filling out a rental application/agreement and acquiring a lease, handling security deposits and utilities, understanding practices for keeping a healthy and safe

home, understanding tenants' rights and responsibilities, and handling landlord complaints.

Housing-Rent: Assisting the youth in covering expenses for the first month's rent and deposit when the youth is moving into his/her own apartment. If utilities are included in the rent, then a payment for rent only should be utilized. **Must be considered as a part of the youth start-up funds and is limited to \$1100.00 dollars per youth total.**

IL Subsidies: Monthly payment to the youth to cover their personal living expenses.⁴

Independent Living Assessment: A formal assessment to evaluate the youth's life skills in preparation for transitioning to adulthood

Literacy Training: Providing youth with appropriate reading and writing skills, so they can obtain their high school diploma or HSE.

Medical Services: Assisting youth with **necessary** medical services, when all other available mechanisms for the youth to obtain these services have been exhausted. These services must be necessary for the youth to achieve independence. Some reasons for these services may be for a youth who needs glasses and is in an educational program and does not have any insurance to cover the expenses, or for a youth who is in an education program and may need an emergency prescription filled for a severe condition, but he does not have any insurance. No routine/maintenance medical payment can be used with this payment type. Not to be used for youth in foster care or those who have any other type of medical insurance. State Office Approval needed for this payment.

Mentoring: Mentoring is the provision of knowledge, encouragement and support by a person who has a greater knowledge than the youth. It entails informal communication, usually face-to-face, is done for a sustained period of time and is usually related to the youth's work, career or educational development.

Parent Education and Training: Providing youth with information on significant positive involvement, increased contact, healthy parent-child relationships. These could include teen parenting classes, child care skills, responsible fatherhood initiatives, or other community resources to help the youth in this area.

Parent Identity Protection: Assisting youth in developing skills that will protect them against fraud and scams, identity theft and what to do when they have been victimized.

⁴ Independent Living Subsidies can only be provided to youth 18 and older.

Transportation (Routine): Providing the youth with needed bus passes, mileage reimbursement, or other transportation resources, so they can get to and from school and/or work or to and from home/relative home.

Tutoring: Providing educational instruction either privately or in a group setting, for youth in their pursuit of their educational plan. Educational instruction may be provided by a peer, foster parent, teacher, social worker, family friend, or other individuals. Paid providers must meet the State's qualifications for paid providers. Please see ASO Tutoring.

Utilities: Assisting the youth in payment for needed services such as water, electric, natural gas, so they can live independently. Must be considered as a part of the youth start-up funds and is limited to \$1100.00 dollars per youth total.

Vocational Testing and Counseling: Providing youth with resources needed for admission requirements for vocational programs or for supportive services needed for a vocational program, such as vocational rehabilitative counseling or a testing fee for an LPN Program.

Youth Transitioning (YT) Transportation: Assisting youth in getting to needed appointments, by picking them up and taking them to the appointment.

5.27 Transitional Living (Youth 14 yrs. old and up)

In some instances, a youth may wish to practice living semi-independently prior to final discharge from the foster care system. Experiential learning opportunities are available for these youth through the Transitional Living Placement option in which foster care youth establish their own household in a transitional living facility but are supplied with the following support, supervision and services:

- a) Ongoing social casework;
- b) Continued life skills instruction;
- c) Assistance with career planning and employment and job maintenance;
- d) Scheduled face to face contact between the youth and caseworker in addition to regular phone contact;
- e) Planned and unannounced home visits; and
- f) Medical and behavioral health services, when needed.

Transitional Living Placements may be provided to youth at the age of 17 years old up to the age of 23 years old, but youth must meet certain criteria in order to be eligible for this type of placement.⁵ Transitional Living Placements may be

⁵ Independent living in the community is only available for youth ages 18 and older.

structured for youth who are in need of extra support and supervision or they may be structured for youth who are capable to semi-independent living. Transitional Living Placements may be supervised and supported by the youth's caseworker or they may be supported and supervised by a private transitional living agency. The type of Transitional Living Placement will be dependent on the youth's abilities and needs.

Youth residing in a Transitional Living Placement, under a private agency, are normally youth who need extra supports and supervision, and are progressing through two levels of supervision and responsibility. Youth first entering this placement type are subject to a minimum of five hours of supervision/services a week, from the Transitional Living Placement staff (Phase Two - Part One.) As the tasks and responsibilities are achieved, youth gain more autonomy and require less supervision (Phase Two - Part Two.) (These services are authorized through the ASO Process)

5.27.1 Transitional Living Placement Eligibility

The youth's worker must determine the youth's eligibility for Transitional Living Placement based on the following criteria prior to referral for placement supervised by a private agency or prior to placement in a Transitional Living Placement setting directly supervised by the youth's worker.

- a) The youth is at least 17 years old⁶ but not more than 23 years of age.
- b) The youth is demonstrating responsible behavior and capable of living independently.
- c) The youth has completed their life skills assessment.
- d) The youth has basic living skills and can live independently.
- e) The youth must be motivated to achieve goals, such as educational or employment.
- f) The youth is pursuing an educational, employment or some goal for independence. The youth must have a plan for activities of 40 hours a week.

For youth who meet the Transitional Living Placement eligibility criteria, the youth's worker will consult with the supervisor and the Multidisciplinary Treatment Team, if the youth is under 18 years old or under the court's jurisdiction. The youth's worker will consult with anyone involved in the youth's life, including the youth's current service providers, juvenile probation officer, youth's parents to present the youth's Transitional Living Plan and determine the best option for obtaining a Transitional Living Placement and necessary services.

⁶ Youth living in their own apartment receiving independent living subsidy must be 18 years old.

When a youth is going to be placed under the supervision of a private agency for transitional living services the youth's worker must take the following actions:

5.27.2 Referral Process

- a) Complete the family and youth assessment, if not already done.
- b) Complete the youth's transitional living plan, if not already done.
- c) Compile the necessary information as a referral packet to be sent to appropriate Transitional Living providers for their determination on appropriate placement. This information should include:
 - 1. Transitional Living Placement Referral form, if applicable
 - 2. Youth, Youth and Family Case Plan or YS Youth Case Plan
 - 3. Life Skills Assessment
 - 4. Social Summary of the Youth
 - 5. School Information
 - 6. Psychological/psychiatric Evaluation
 - 7. Original Birth Certificate
 - 8. Social Security Card⁷
 - 9. Immunization Records
 - 10. Medical Information
 - 11. Placement History
 - 12. Copy of the Court Order Granting the Department Custody
- d) If the above information is not available at the time of the referral, the youth's worker will compile the information as soon as possible. This should not take longer than four weeks.
- e) Schedule and participate in the intake interviews and pre-placement visits for the youth and his family with the prospective Transitional Living Placement agency.
- f) Transportation must be provided to the placement if necessary. Prepare the youth and his family for such interviews and visits. They should understand the purpose of the interviews, who will be present and why, what may be discussed, travel and visit time involved, anticipated expenses if applicable, the physical setting of the placement, and the nature of the agency's program.
- g) If a youth is entering a Transitional Living Placement from a family foster care home, it may be advisable to involve the foster parents in the intake and placement visits.
- h) If the agency accepts the youth for placement or if the placement is going to be supervised directly by the Department, the youth's worker shall arrange a date for the placement

⁷ There is a lifetime maximum of ten social security cards per person. The youth's worker should educate youth on maintaining control and whereabouts of important documents.

- i) If a youth is going to be in a DHHR staff supervised Transitional Living Placement, the youth's worker must provide the following to the youth:
1. Original Birth Certificate
 2. Social Security Card
 3. Immunization Records
 4. Medical Information
 5. Psychological/psychiatric Evaluation
 6. School Information
 7. Placement History
 8. Any other information deemed necessary to assist the youth in their transition and placement

5.27.3 Placement (Youth 14 yrs. old and up)

When a youth is placed in a Transitional Living Placement setting, such as in an apartment of their own⁸, whether supervised by a private agency or by the youth's caseworker, placement must be made in accordance to the following guidelines, to assure that the youth continues to receive foster care benefits:

- a) The youth's worker must have the youth complete a [W-9](#), so the youth can be set-up as a transitional living client in FACTS and placed with themselves in placement.
- b) Once a W-9 has been completed by the youth, the worker must complete a search of the open and closed provider records to determine if the youth has been opened as a transitional living client previously.
- c) If the youth has not been opened previously, the youth's worker must open the youth up as a transitional living client provider in FACTS, by completing the General tab in the provider record, then completing the Document Tracking of the W-9, then add services to the youth's provider Service Administrative Screen. Services normally utilized for youth in transitional living are: Educational Services, Transitional Living Services, Housing, and Clothing.
- d) If the youth has been opened previously as a transitional client, then the worker may need to reopen the provider record.
- e) Once the youth's worker obtains the youth's provider number, the youth can be placed in FACTS with themselves. The youth's placement effective date will be entered in FACTS the **same day** of the placement. This will also generate a medical card for the youth within a timely manner. In addition, this will also ensure that the youth has an EPSDT Health Check screening scheduled within the five-day time frame required by the Sanders Consent Decree. If the youth was in foster care prior to this

⁸ Youth must be 18 or older to be placed in an apartment of their own and receive independent living subsidy.

placement, the youth's medical card and SS-FC-40 and SS-FC-40A is to be given to the agency in case medical services are required prior to the issuance of a card to the facility for the youth.

- f) The youth's worker must submit the W-9 to the local financial clerk, so they can complete and approve the Tax screen in the provider record and make sure that the information is entered in a timely manner.
- g) The youth's worker must document the youth's eligibility in the Youth Transitioning, Placement Plan and Placement Recommendation screens in FACTS, with approval for placement being sent to the worker's supervisor.
- h) Once the youth's placement is approved by the supervisor, the youth's worker must complete the Enter/Exit screen in FACTS, documenting the entry date for the youth.
- i) The youth's worker must complete the youth's address and telephone number in the Demographic screen in FACTS and make sure that the youth's address is correct.
- j) Once a plan has been developed for a youth to be moved into his/her own apartment under the supervision of a transitional living agency, the youth's worker must make an ASO referral for Chafee Pre-Placement Activities.
- k) All concrete items/services (start-up expenses), such as a deposit for an apartment, first month's rent, utility deposit, household items, furniture or other items for the apartment, must be paid for through a demand payment request. These requests are to be submitted to the youth's worker by the private transitional living agency, if they are providing the supervision. Original receipts must be submitted with a request for reimbursement.
- l) Once a request for these start-up expenses is received by the youth's worker, the worker will complete a demand payment request, utilizing payment type **Independent Living Services and Supplies** and document that it is for start-up expenses within three working days of the request.
- m) Once a youth has moved into his/her own apartment, under the supervision of a transitional living agency, the youth's worker must make an ASO referral for Chafee Phase Two-Part One.
- n) The youth's worker will indicate in FACTS that emancipation is the youth's permanency plan on the Permanency Plan screen.
- o) Once the youth's provider record is complete, **including the Tax screen**, the worker should link all needed paid services on the youth's Service Log, as well as any unpaid services on the Services screen in the Youth Transitioning section of the youth's FACTS case record.
- p) The youth's worker must assist the youth in locating and securing safe and affordable housing if the placement is being directly supervised by the Department.

- q) The youth's worker must assist the youth in developing a monthly productivity schedule and a monthly budget and approve the schedule and budget.

5.27.4 Case Management of Transition Living Placements (Youth 14 yrs. old and up)

Once a youth has been placed in a Transitional Living Placement, it is the responsibility of the youth's worker to assure that the youth continues to work towards the goal of "semi-independence" and continues to work on his or her transition plan to be successful in becoming self-sufficient.

The youth's worker must maintain adequate contact with the youth and Transitional Living agency, if applicable, to assure that the youth is continuing in his/her educational or job training programs or to assure that his/her needs are being met.

The youth's worker must continue to assist the youth in developing a monthly productivity schedule and a monthly budget and approve the schedule and budget. Youth are required to have at least forty (40) hours of productivity hours each week, in order to receive a transitional living subsidy/personal allowance. Youth in school full time are considered to have forty (40) hours of productivity hours a week. If a Transitional Living agency is working with the youth, their staff may fulfill this responsibility.

Youth are required to submit their monthly productivity hours to the worker, along with their budget, if they are not enrolled in school full time.

Youth may have roommates, but they must be approved by the youth's worker and must contribute to the household's finances by at least fifty percent (50%) (if there are two in the house).

For youth who have completed an educational and/or employment goal and now need housing assistance, subsidy/housing services are available for up to six (6) months to assist the youth in becoming stable in their new job or in obtaining a job and home, if the youth is no older than the age of **twenty-three (23)**.

Youth are responsible for signing leases for any housing. The youth's worker should assist the youth in understanding that the lease is a contract and that it should not be entered unless the youth can and will fulfill the obligation of the lease.

The youth's worker should assist the youth in obtaining safe and affordable housing. All avenues for rent assisted housing should be explored for the youth prior to the youth obtaining housing. The apartment should be checked for safety concerns, by the worker prior to the youth accepting a lease also.

The youth's worker should make unannounced visits to the youth to check the youth's living conditions.

Youth who are in a Transitional Living Placement may be at a higher risk of becoming a victim of human trafficking due to their independent living situation. It is imperative that these youth are properly educated on how to keep themselves

safe. It is the responsibility of the youth's worker to thoroughly educate the youth on their personal safety.

Social media can be a dangerous instrument for vulnerable youth. The youth's worker must educate the youth on the appropriate use of all forms of social media and the dangers that can accompany these sites. The youth should be encouraged to keep their social media accounts private and encouraged not to release identifying information such as addresses to their home/placement or workplace, phone numbers, or a timeline of their daily schedule. The youth's worker should also educate the youth on the appropriate safety precautions to be taken when leaving work, school/classes, and social events with peers, etc. Traffickers will often lure teens into trafficking by promising them prosperity and unlimited financial potential. This is not realistic, and youth must be educated on these types of dangerous scams and the likely hazardous consequences that go along with these forms of luring and enticement.

Educating youth is vital to their safety and decreasing their risk of becoming a victim of human trafficking. If the worker discovers that a youth is missing or is runaway status, they must follow the steps provided in **Section 5.20, Runaway, Missing or Abducted Children**. This includes notifying law enforcement authorities immediately but no later than 24 hours after the child's disappearance and completing the [screening tool](#) with the youth upon their return to care.

If a youth is not being compliant with his/her Learning/Transition Plan, then he/she will be removed from the Transitional Living Placement and could be discharged from the program, if he/she are over the age of eighteen (18) and the court has dismissed jurisdiction. Some reasons for being non-compliant could be not participating in their educational or employment programs, having other individuals live off of their subsidy, living in an unsafe home/apartment, or participating in criminal activities.

5.27.5 Transitional Living Subsidy Placement Payments

- a)** The youth will submit his/her monthly budget which accurately reflects the youth's expenditures. The Transitional Living Agency worker or the youth's worker should assist the youth in developing the budget and must sign the request thereby certifying the actual expenditures.
- b)** The transitional living subsidy/personal allowance will not exceed \$900.00 a month for youth living in his/her own apartment or \$200.00 a month for youth living in a dormitory at college.
- c)** The youth's weekly planner signed by the youth and the transitional living agency worker or DHHR worker, which certifies that the youth earned the amount of the subsidy/personal allowance requested, must accompany the subsidy request.

- d) If the youth does not maintain a weekly schedule which documents forty (40) hours of productive activity, the subsidy must be pro-rated at \$4.06 per hour for the total documented hours of productive time completed by the youth. The DHHR worker or the transitional living agency staff will adjust the subsidy request for the youth, if needed.
- e) Upon receipt of the subsidy/personal allowance request, the youth's DHHR worker must examine the request and determine that it is proper and correct before signing approval.
- f) If approved, the youth's worker must enter a demand payment request within three working days of receipt of the request. The demand payment request and budget should be imported into the youth's case FACTS File Cabinet. The approval must be placed in Document Tracking in FACTS.
- g) If denied, the request must be returned to the transitional Living agency or youth with a written reason for the denial. The denial must be entered into FACTS through Document Tracking.

5.27.6 Pre-Placement Activities/Start-Up Money Payments (Non-ASO Service)

The youth's worker must ensure that each youth participating in a Transitional Living Placement through a transitional living agency has access to funds necessary for establishing a household. Youth in Transitional Living Placement are eligible for up to \$1,100.00 dollars if residing in a scattered site-based apartment and \$400.00 dollars in start-up money if residing in a training site-based apartment or dormitory at college.

Appropriate expenditures with start-up money include deposits for rent and utilities; purchasing furniture, bed linens, kitchen appliances, dishes and pots and pans; and an initial supply of food. These payments are made at the state office level.

Youth participating in a Transitional Living Placement, where DHHR staff is directly providing the supervision and services, must have access to money for establishing a household. The amount and uses of these funds are the same as described above. These payments must be made as demand payments directly to **vendors on behalf of the youth**. Vendors include: landlords, utility companies, and retail stores. The youth's worker will initiate this demand payment by utilizing the **Independent Living Services and Supplies** payment type.

5.27.7 Provider Payments for Supervision and Services (ASO Prior Authorization Required)

Each Transitional Living agency may provide pre-placement services to a youth within thirty (30) days immediately preceding a youth's physical move to a Transitional Living Placement. And to the extent no other resource is available (e.g., Medicaid case management, basic living skills, transportation grants, volunteers, etc.), the Division of Children and Adult Services may reimburse for pre-placement activities at a rate of \$28.25 per unit for up to a total of sixty (60) units, within the thirty (30) days. (One unit equals an hour) Documentation required

with the invoice for pre-placement activities must include a description of the activity, date, time, place of the activity, and a copy of the completed Transitional Living Admission form.

Each agency providing a Transitional Living Placement with subsidy to a youth may invoice the Department for reimbursement for the services described in the Transitional Living Placement with subsidy section. The reimbursement rate for Supervision and Services is \$28.25 per unit for up to sixty (60) units in a ninety (90) day period in Phase Two-Part One. (One unit equals an hour) The reimbursement rate for Supervision and Services is \$28.25 per unit for up to twenty-four (24) units in a ninety (90) day period in Phase Two-Part Two. **These payments are made at the state office level and require an ASO referral prior to the services being provided.**

5.27.8 Policy Waivers for Youth Transitioning Services

A policy waiver request is an attempt to exempt one (1) or more policy rules, which may be related to a client's eligibility to participate in the DHHR's Transitional Living Placement service, for a youth to continue in a Transitional Living Placement when they are not compliant or have been unable to be compliant with the guidelines, to provide additional funding beyond the program limits, or other situations deemed appropriate for a waiver by the youth's worker. If a worker requests to waive a policy rule, the worker must demonstrate that the rule creates a significant barrier to the youth's move towards independence, the youth will be more successful if the waiver is granted, and that it is in the youth's best interest to waive the rule. The youth's worker will request the waiver through the Department Regional Program Manager, for that Region, or the Department's State Program Manager over the Chafee Foster Care Independence Program. The waiver will be documented in the youth's FACTS record, under Contacts and on the youth's learning/transition plan.

5.28 Chafee National Youth in Transition Database (NYTD)

The Chafee National Youth in Transition Database (NYTD) is a Federal initiative which requires States to collect and report data to the Administration for Children and Families (ACF) on (1) youth who are receiving independent living services and (2) on the outcomes of certain youth who are in foster care or who have exited foster care. This initiative has led to multiple additions and changes within the Independent Living section of the West Virginia Families and Children Tracking System (FACTS) as well as within the Foster Care Policy for Youth Transitioning.

5.28.1 A Brief History of NYTD

Each year thousands of young people are discharged from state foster care systems because they reach the age at which they are no longer eligible for out-of-home placement. During the early 1980's, research

and anecdotal evidence indicated that many young people who emancipated from foster care experienced numerous difficulties in their attempts to achieve self-sufficiency, including homelessness, unemployment, victimization, and dependence on public assistance.

In response to this problem, a law was passed in 1986 which provided funding to make independent living services available to youth in foster care between the ages of **eighteen (18) and twenty-one (23)**. Several improvements were made to the law by the [Foster Care Independence Act of 1999](#). This law established the [Foster Care Program for Successful Transition to Adulthood](#). The Foster Care Independence Act provides states with greater funding and flexibility to carry out programs to assist youth in making the transition from foster care to self-sufficiency.

As part of the Foster Care Independence Act of 1999, the Administration for Children and Families (ACF) is required to develop and implement a data collection system to (1) track the independent living services states provide to youth, and (2) develop outcome measures that may be used to assess state performance in operating their independent living programs. The data collection system is called the National Youth in Transition Database (NYTD).

(From [National Child Welfare Resource Center for Youth Development](#) (NCWRCYD) captured April 29, 2009)

With the implementation of NYTD, independent living services, assessments, and tracking will expand its population base. While the independent living assessment and learning/transition plan remains mandatory for youth ages fourteen (14) and up who are in the care and custody of DHHR, FACTS screens will be accessible for all youth in this age range, regardless of foster care status.

Each year many youth in West Virginia are discharged from foster care at the age of majority, due to numerous reasons. For West Virginia to maintain contact with youth who have exited from foster care to determine if the youth needs any transitioning services or to follow-up on outcomes for the youth, the State must take measures to ensure future contact.

5.28.2 NYTD Essential Documentation Requirements

After a federal review in 2016, the Department has made changes to improve and increase compliance with the NYTD requirements. Good documentation of certain aspects of the case and youth's activities are crucial for the Department to meet compliance and to ensure the best

possible outcomes for youth are possible. Specifically, the youth's worker needs to take the following steps:

1. Ensure that the youth's original birth certificate and social security card are obtained and scanned into the FACTS file cabinet.
2. Determine the gender and race of the youth from the birth certificate and enter this information into the demographic area of FACTS.
3. Thoroughly investigate and document tribal affiliation claims made by the youth.
4. Regularly – each year – update the education screens for youth in the case.
5. Complete all areas of the youth transitioning tab in FACTS as outlined in other sections of this policy.
6. Thoroughly document the services provided by grantees of the state, foster parents, youth's worker and residential providers in the NYTD Services Screen utilizing the *NYTD Quarterly Services Report* for providers and case contacts for services provided by the youth's worker. Only providers who are paid will be documented in the NYTD Services Screen of the Youth Transitioning tab. Services performed by churches and community groups will be documented in the service log as informal providers.
7. Ensure any education provided to the youth by the youth's worker is documented with case contacts and the appropriate entry into the NYTD Services screen.
8. Assist the MODIFY with CED NYTD Survey Specialists in contacting youth for the NYTD survey/questionnaire.
9. Please use the youth transitioning FACTS desk guide as a reference for documentation.

5.28.3 NYTD Survey Specialists

West Virginia University Center for Excellence in Disabilities has two NYTD Survey Specialists who are employed specifically for the purposes of conducting the survey with the federally required co-hort. These specialists conduct the activities below. The youth's worker does not have to complete the survey but should keep the FACTS case documentation current with relevant placement information, collateral contact information, and permanent connections. The youth's worker should also provide assistance to the NYTD Survey Specialist with access to the youth who are in residential facilities.

5.28.4 Survey Guidelines

Under the NYTD requirements, certain youth in foster care must be surveyed during specific years for service and outcome data. The specific requirements of the survey process and the youth that will need to be surveyed are outlined below:

- a) All youth who fall into the “NYTD baseline population” must be surveyed, within forty-five (45) days following their seventeenth (17th) birthday, but not before that birthday. Workers will be notified if youth they are working with fall into the baseline population and require a survey to be completed.
- b) The assigned NYTD Survey Specialist must provide the survey or assure that the youth completes the survey by meeting with the youth and explaining the survey to the youth. The youth may complete the survey on his/her own. The worker may read the survey to the youth, answer any questions and document the youth’s responses or a private provider may assist the youth in completing the survey. **The responses on the survey must be the youth’s responses and not the worker’s or providers. The youth’s worker or provider may not change the youth’s responses, even if the worker or provider believes the youth’s responses may be incorrect. If the youth leaves the item blank, the worker must also leave the item blank.**
- c) If the assigned NYTD Survey Specialist is unable to meet with the youth in a timely manner to provide the survey, the worker may send the survey via e-mail or mail to the youth and provider with specific instructions on how to complete the survey and a time frame to return it. Follow-up telephone calls may be necessary to ensure that the youth and provider complete the survey accurately and return it timely. The NYTD Survey Specialist will also utilize social media, case record searches and other methods to find and survey the youth.
- d) The specialist must document if the youth participated or declined to participate on the survey. If the youth has exited care, is under the age of majority, and identified in the baseline population and the youth’s biological or adoptive parent declines the youth’s participation, then the worker must document this response as well. The worker must document if the youth is incapacitated, incarcerated, on runaway, or deceased also.
- e) The specialist should not choose “unable to locate” for youth age seventeen (17) in foster care. The specialist will reach out to the youth’s worker to locate and survey the youth.

- f) Once the survey is completed, the youth's specialist must document the survey responses on the Youth Transitioning NYTD Outcome Survey Screen in FACTS. The youth's worker must make sure that they document the youth's responses accurately. The paper survey document is kept by the MODIFY Program Assistant at the State Office.

5.29 Case Review

The purpose of a case review is to assess progress in the youth's foster care experience and to utilize the court, community representatives/third party reviewers, and the Multidisciplinary Treatment Team to determine the adequacy and appropriateness of the services provided to the youth and family. All youth in foster care are required to have a case review at least once every six months according to federal regulations. State law requires that a case plan review occur every 90 days. The Department employs a variety of review mechanisms to ensure it has met its goals i.e., family preservation, child protection, youth services, and compliance with state and federal laws and regulations. The case plan review, the administrative review, the court/judicial review and the Multidisciplinary Treatment Team meetings are used to fulfill these requirements.

During the case review process, the youth's learning/transition plan must be reviewed every 90 days, once a youth turns 14 years old or once a youth, who is older than 14 enters the care and custody of the State.

5.30 Transition to Adulthood/Discharge Planning

5.30.1 Discharge Planning for Youth at age 18

When youth placed in foster care reach the age of 18 they will exit foster care unless they agree to continue to receive foster care services through the Understanding of the Parties for Foster Care Services Agreement (SS-FC-18). A detailed description of the requirements and process regarding the SS-FC-18 can be found in Section G **Voluntary Foster Care Services Contract for Youth Over 18 (FC-18)**, below. The youth's worker should begin planning with the youth for his/her transition to adulthood and/or exit from care well before the youth's 18th birthday. Planning for the youth's transition to adulthood should include the following:

- a) Upon the youth's 17th birthday or if the youth has already turned 17 at the time the Department is granted custody, the youth's worker will convene an

MDT. The purpose of this MDT is to assess the youth, collect information and develop a transition plan for the youth's exit from the care and custody of the Department. The following areas must be discussed and assessed during the MDT meeting:

1. Youth's progress with the life skills curriculum and assessment;
2. Youth's education progress and goals (including information regarding the youth's Individualized Education Plan (IEP) and transition services provided by the IEP if appropriate);
3. The youth's preparedness for independence;
4. The youth's ability and/or desire to be employed.
5. The importance of designating someone to make health care treatment decisions on behalf of the youth if the youth is unable to do so and does not have or want a relative who would otherwise be designated under state law to make such decisions. Youth also must be given information about how to execute a health care "advance directive" document recognized under state law. If it is determined that a youth is mentally incapacitated and unable to make health care decisions, the worker must review and follow the Adult Service Policy Section, Health Care Surrogate Policy 2.2.3
6. If the youth chooses to "execute" an advance directive, they may be assisted by their worker or referred to the following website for assistance, <http://wvethics.org/advance-directives-forms-and-laws/>.

- b) After the discussion and assessment of the items listed above the MDT will gather and/or compose the following:
 1. Contact information for three or more close relatives or individuals with which the youth has long term connections or may rely on for social support or assistance when needed;
 2. Youth's contact information including possible mailing addresses, cell phone number and e-mail address;
 3. Personal Exchange Document Discharge List (PEDDL).
- c) Using the information discussed and collected the MDT should complete the youth's transition/learning plan.
- d) In addition to inviting individuals already involved in the MDT process, the worker should invite anyone to the MDT meeting who will be instrumental in developing and/or implementing the transition/learning plan (i.e. MODIFY worker).
- e) All male youths are required to register with the Selective Service within 30 days of their 18th birthday and no more than 29 days thereafter. This gives youths a 60-day registration period. Failure to do so may result in the ineligibility for opportunities important to the youth's future such as federal

student financial aid, most federal and some state employment, as well as job training under the Workforce Investment Act, security clearance for contractors, and the denial of US citizenship for immigrants. Failure to register may also result in legal action, as it is a felony punishable by fines and/or prison time. For complete information and guidance regarding registering for the United States Selective Service refer to the [Selective Service System website](#). Please note that female youth may also register with the selective service on a voluntary basis, but they are not required by law to do so.

- f) The worker will begin gathering original documentation on the Personal Exchange Document Discharge List (PEDDL) that will be released to the youth upon his /her exit from the care and custody of the Department. These items may include but are not limited to:
1. the youth's social security card⁹;
 2. certified original birth certificate;
 3. health records including immunization history;
 4. education records;
 5. life book;
 6. completely journey placement notebook;
 7. state photo ID;
 8. SSI applications (copy);
 9. verification of selective service registration;
 10. foster care verification letter documenting the youth's time in placement; and,
 11. any other information the youth may find helpful or important.
- g) If evaluation and assessment of the youth determines the youth may be in need of adult services assistance the youth's worker will collaborate with the appropriate adult services staff to complete a plan for the youth's discharge from foster care at age 18. For a detailed summary refer to section **Transfer to Adult Services/Guardianship**, below.
- h) The youth's worker will provide the youth and his/her caretaker with the transition/learning plan. The transition/learning plan should be documented in FACTS, within the Youth Transitioning section and an electronic copy added to the FACTS case File Cabinet.
- i) The youth's worker will arrange referrals for services included in the transition/learning plan and agreed upon by the youth and the MDT. The youth's worker may also assist the youth in filling out applications for

⁹ Please note there is a lifetime limit of ten social security cards. The youth's worker should emphasize the importance of maintaining control and whereabouts of important documents.

employment, college or any other activities that may require this skill (for example FAFSA for college and/or continuing education application, application for bank account, application for utilities or referral for employment through HRDF). These services should be documented in the NYTD Services Screen of the Youth Transitioning tab in FACTS.

- j) The youth's worker will evaluate the youth's eligibility for Mentoring and Oversight for Developing Independence with Foster Youth (MODIFY) and make an appropriate referral to MODIFY in a timely manner. The youth's worker must invite and include the MODIFY Specialist in MDT meetings when the youth turns 17 or if the Department is granted custody after the youth's 17th birthday. Referrals should be made at least six months prior to a youth graduating from high school, obtaining the HSE or aging out of foster care at 18 or older.
- k) The youth's worker must release all original documentation including health and education records (See #5 above for a detailed list) at no cost to the youth upon his/her exit from care and custody of the Department.
- l) The youth's worker must document all information gathered from steps above in the appropriate FACTS screens, including the Youth Transitioning area.

5.30.2 Discharge Planning for Youth 18 to 23

In October 2008, the federal government passed the [Fostering Connections to Success and Increasing Adoptions Act of 2008 \(PL 110-351\)](#). This Act requires States to assist youth, between the ages of 18 and 21, who are in foster care or receiving foster care services, through an FC-18, in developing his/her own transition plan from foster care. The following actions must be followed when youth between the age 18 and 23 are exiting foster care or services:

- a) Upon the youth's decision to exit foster care or services, a transition plan must be developed during the 60-day period prior to the youth exiting care. The youth's input/decisions are vital in the planning process.
- b) The youth's worker will utilize the Youth Transition/Learning Plan to document the transition plan. This discharge plan must specifically detail the youth's choices and options for housing, health insurance, education, mentoring opportunities, employment services, and other support services. The youth will be provided with a copy of the plan.

- c) The youth worker must explain the importance of designating someone to make health care treatment decisions on behalf of the youth if the youth is unable to do so and does not have or want a relative who would otherwise be designated under state law to make such decisions. Youth also must be given information about how to execute a health care “advance directive” document recognized under state law. If it is determined that a youth is mentally incapacitated and unable to make health care decisions, the worker must review and follow the Adult Service Policy Section, Health Care Surrogate Policy 2.2.3.
- d) If the youth chooses to “execute” an advance directive, they may be assisted by their worker or referred to the following website for assistance, <http://wvethics.org/advance-directives-forms-and-laws/>.
- e) As indicated above, the worker will begin gathering original documentation, on the Personal Exchange Document Discharge List (PEDDL), that will be released to the youth upon his/her exit from the care and custody of the Department. These items may include but are not limited to:
1. the youth’s social security card;
 2. certified original birth certificate;
 3. health records including immunization history;
 4. education records;
 5. life book;
 6. completed journey placement notebooks;
 7. state photo ID;
 8. SSI application (copy);
 9. verification of selective service registration;
 10. foster care verification letter documenting the youth’s time in placement; and,
 11. any information the youth may find helpful or important.
- f) As indicated above, if the youth has not been previously assessed by Adult Services and there is question as to the youth’s capacity to live independently, then the worker will provide for an evaluation and assessment of the youth to determine if the youth may be in need of adult services assistance. The youth’s worker will collaborate with the appropriate adult services staff to complete a plan for the youth’s discharge from foster care. For a detailed summary refer to section **Transfer to Adult Services/Guardianship**, below.
- g) The youth’s worker will arrange referrals for services included in the Youth Transition/Learning Plan and agreed upon by the youth. The youth’s worker

may also assist the youth in filling out applications for employment, college applications or any other activities that will assist the youth (for example FASFA for college and/or continuing education application, application for bank account, application for utilities or referral for employment through HRDF). These services must be documented in the NYTD Services area.

- h) The youth's worker will evaluate the youth's eligibility for MODIFY Services and make an appropriate referral to MODIFY in a timely manner. Referrals should be made at least six months prior to a youth graduating from high school, obtaining a High School Equivalency or aging out of foster care at 18 or older.
- i) If a youth requests that a MODIFY referral not be made on their behalf, the youth's worker will provide the youth with information on the MODIFY Program, which includes the toll-free number.
- j) The youth's worker must release all original documentation including health and education records (See #5 above for a detailed list) at no cost to the youth upon his/her exit from care and custody of the Department.

5.30.3 Permanent Connections

Research has shown more frequent, meaningful contact with youth in care leads to better outcomes, stability in placement and timely permanency. The new shift in policy and practice strongly emphasizes building strong, permanent relationships with youth as well as assisting youth in identifying and building other permanent connections. A youth who has permanent connections to other individuals or to community resources will be more successful in becoming self-sufficient and a vital part of the community.

Prior to discharge, youth should be able to identify several individuals and/or community resources that are permanent connections for them. These permanent connections must be documented in the youth's FACTS record under the Youth Transitioning screens, under Discharge Planning, Permanent Connections.

5.31 Transfer to Adult Services/Guardianship

As part of a youth's plan for permanency, it is critical to conduct ongoing evaluations of their potential for eventual self-support. The Life Skills Curriculum is one tool that can provide needed information about the youth's functional abilities in core life skill areas. This is to be utilized when a youth reaches the age of 14, as indicated:

- a) If the youth is not progressing through the life skills modules, a Special Needs Curriculum should be employed for those youth to learn life skills.
- b) If youth are still not progressing using the Special Needs material, a comprehensive psychological evaluation, including an assessment of their potential for adult independence, should be obtained by the youth's worker.
- c) If the determination is made, using these two evaluation tools, that self-sufficiency is an unlikely goal, at age 17; the youth's worker must contact the Adult Services staff in the local office to request that they attend all Multidisciplinary Treatment Team meetings, case staffings, and reviews for the youth.
- d) Once the youth has attained the age of 17 years, the youth's worker may make the Adult Service worker a secondary worker for the youth until the youth exits foster care if the Adult Service worker has an active part in the service plan. At this point, the youth's worker and the Adult Service worker should work together in planning for the youth's adulthood and eventual discharge from foster care. The youth's worker will continue to remain responsible for the youth until the youth exits foster care.
- e) If it has been determined that the youth meets the eligibility requirements and should continue in foster care after the youth's 18th birthday, the youth's worker will complete all the necessary requirements as described in the Foster Youth Over Age Eighteen section of the foster care policy.
- f) If it has been determined the youth does not have the capacity to make informed decisions regarding their future, due to severe developmental, mental health or physical disabilities, the youth may not sign a Voluntary Placement Agreement (SS-FC-18) which allows them to continue in foster care. The Voluntary Placement Agreement is a binding contract between the youth and the department which stipulates the conditions for continued foster care services. This requires the youth to have capacity to fully understand the consequences and terms of the agreement. In these situations, the youth's worker must collaborate with the Adult Service Worker to complete an appropriate plan for the youth's discharge from foster care at age 18.
- g) The youth's worker should refer to 5.29 Foster Care Youth turning 18 which asserts in rare circumstances it may be in the young adult's best interest for the Adult Guardian to sign an SS-FC-18 Voluntary Placement Agreement allowing them to continue receiving foster care services. The option of the Adult Guardian signing an SS-FC-18 should by no means be common practice or a

solution for failure to plan for a youth's transition in a timely manner. **This practice should only be used if all other Adult Services and community resource options have been exhausted and foster care services accessible through the Voluntary Placement Agreement (SS-FC-18) are required to ensure necessities are provided.** The exploration of these avenues should be documented in the appropriate case record(s) in FACTS. All Voluntary Placement Agreements (SS-FC-18) must be staffed and approved by the Adult Services Supervisor, Child Welfare Supervisor and the Community Services Manager of the district office allowing the child to receive continued Foster Care Services.

- h) h) If a foster youth has a disability, the youth's worker should complete an application for Adult Disabled Social Security Benefits or Supplemental Security Income prior to the youth's 18th birthday. This application should be submitted at least three months prior to the youth's 18th birthday, as indicated in the federal guidelines for [Supplemental Security Income \(SSI\)](#).
- i) The youth's worker will make referrals to all appropriate community resources that may need to provide services that will be necessary for the youth after he reaches adulthood. This will ensure that services, especially behavioral health services, will continue after the youth's 18th birthday.

5.32 Youth Over 18 Receiving SSI, SS or Other Benefits

At the time foster youth receiving Social Security, SSI or other benefits reach age 18, they automatically become payee for their own benefits unless they are deemed incompetent and unable to handle their own affairs, by the court, upon discharge from the foster care system. This young adult may have another person named as a Representative Payee, without being deemed incompetent. This can be accomplished with the assistance of a physician, who can submit a statement to have a Representative Payee established on behalf of the person.

If it has been determined by the court that the young adult is incompetent, or it is evident that they lack capacity to manage their finances a Conservator/Representative Payee may be named. The payee/conservator will be responsible to use the benefits towards the young adults housing/living expenses. If the young adult chooses to name a payee or has a conservator, then that payee/conservator will provide payment for the youth's housing/living expenses with the benefits. The Department may have housing options available for young adults who lack decision making capability and have no other housing available.

If a young adult chooses to continue to receive foster care services and remain in a foster care setting through an FC-18, then the Department must provide the young adult with information about their Social Security, SSI or other benefits. The young adult will be provided a copy of the FC-18, which will explain that their benefits should reimburse the Department for their housing/living expenses.

It is important for the payee/conservator to keep track of the young adult's savings and develop plans for purchasing items that the young adult needs, wants, or will benefit from in order to keep the young adult's assets from exceeding the SSI limit of \$2,000. If a young adult's assets are in excess of the SSI limit, the young adult will become ineligible for SSI and his/her benefits will end. A pre-need burial plan may be purchased for the young adult before he/she reaches age 18.

5.33 Voluntary Foster Care Services Contract for Youth Over Eighteen (18) (FC-18)

Many youth overestimate their readiness for independence. When their capacity to meet their needs in the community is revealed after they leave foster care placement, a youth may request to return to foster care. Former foster youth, ages eighteen (18) through twenty (20), who left care at age eighteen (18) or older may apply to return to a foster care living situation if circumstances support the need for them to return to care.

- a)** Foster care after age eighteen (18) applies to two (3) categories of young adults:
 - 1. Those youth who remain in care after age eighteen (18) and;
 - 2. Those youth who were former foster youth, left at the age of eighteen (18) or older, and request to return to foster care after age eighteen (18), through the age of twenty (20).
 - 3. Those youth whose parental rights have been terminated, were in foster care immediately prior to a DJS placement and left DJS at age 18 or older.¹⁰ DHHR must be notified of transitional plan and be notified of MDTs six months prior to discharge from DJS.
- b)** Since many foster youth have not completed their education by the time they reach their eighteenth (18th) birthday, they have an incentive to remain in foster care. Boarding care may be continued for foster youth from age eighteen (18) through age twenty (20) under the following conditions:

¹⁰ Youth who age out of DJS and sign an FC-18 are not eligible for the Independent Living Subsidy.

1. The young adult requests continued financial supports after receiving a clear explanation of his right to independence and responsibility for self-support at age eighteen (18); and
2. The young adult will continue his education (college, vocational, or training) and plans to continue his current enrollment or plans to enroll in a different school or training program within the next three (3) months.

When a former foster youth applies for foster care services, an assessment of the current circumstances shall be made. The individual may be eligible for other services from the Department or from another community resource that would be more appropriate to meet his/her needs. All other agency and community resources are to be explored before approving foster care services. Attempts to locate other agency and community resources must be documented in the youth's case record. The youth must sign a voluntary placement agreement (SS-FC-18).

The voluntary placement agreement (SS-FC-18) **must** be explained to the youth in detail as a "contract" between the youth and the Department. It does not place the youth back into "custody" of the state. The youth has certain responsibilities to working towards meeting his/her goals and objectives of their transition plan and working on becoming semi-independent and self-sufficient. The Department has responsibilities to provide the youth with assistance in meeting those goals and objectives. If a youth desires to remain in foster care after receiving an explanation of the situation, he/she must agree to sign a voluntary placement agreement (SS-FC-18).

In rare situations youth who are deemed incompetent may continue to receive foster care services under the voluntary placement agreement (SS-FC-18). Please refer to the section **Transfer to Adult Services/Guardianship** above for guidelines.

Boarding care must be discontinued for all youth the month upon their eighteenth (18th) birthday if they elect to assume their independence and/or they are not attending an educational program, or do not plan to continue or enroll.

5.33.1 IV-E Determination for Youth Under an FC-18

If a youth is IV-E eligible while in foster care they will remain IV-E eligible if they continue care past their 18th birthday as long as they sign an FC-18. If a IV-E eligible youth leaves care any time after their 18th birthday but returns within 180 days, they will remain IV-E eligible as long as they meet one of the eligibility requirements and sign an FC-18.

5.33.2 Status/Permanency Review Hearings for youth under an FC-18

Youth who remain in a foster care placement and meet the criteria for a "Transitioning Adult" as defined below, must have quarterly and annual reviews as indicated in Sections 6.2 and 6.3 of this policy.

Foster Care – Twenty-four (24) hour substitute care for children placed away from their parents or guardians and for whom the State agency has placement and care responsibility. This includes, but is not limited to, placements in foster family homes, foster homes of relatives, group homes, emergency shelters, residential facilities, child care institutions, and pre-adoptive homes.

Transitioning Adult - An individual with a transfer plan to move to an adult setting who meets one of the following conditions: (1) Is eighteen (18) years of age but under twenty-one (21) years of age, was in departmental custody upon reaching eighteen (18) years of age and committed an act of delinquency before reaching eighteen (18) years of age, remains under the jurisdiction of the juvenile court, and requires supervision and care to complete an education and or treatment program which was initiated prior to the eighteenth (18th) birthday. (2) Is eighteen (18) years of age but under twenty-one (21) years of age, was adjudicated abused, neglected, or in departmental custody upon reaching eighteen (18) years of age and enters into a contract with the department to continue in an educational, training, or treatment program which was initiated prior to the eighteenth birthday.

Not all youth eighteen (18) to twenty-one (21) years of age must continue to have quarterly and annual review hearings. The following youth are **not** required to have status/permanency hearings:

- a) Youth eighteen (18) to twenty-one (21) years of age who have achieved permanency (adoption, legal guardianship, etc.);
- b) Youth eighteen (18) to twenty-one (21) years of age who do not have an FC-18; and
- c) Youth eighteen (18) to twenty-one (21) years of age who have an FC-18 but are placed in an independent living situation.

5.34 Post-Secondary Educational Programs

A youth in the care of the Department who has graduated from high school or obtained his/her High School Equivalency and has the interest and ability to pursue further education either in college or vocational school should be strongly encouraged to pursue his/her educational goals. The Department may support youth who are continuing their education up to age **twenty-three (23)** through the foster care program. Youth over the age of eighteen (18) must voluntarily elect to remain in foster care by signing the voluntary placement agreement (SS-FC-18) in order to be eligible for continued foster care services.

Generally, out of state schools and private institutions are not recommended, due to the expense of the school and lack of State financial aid. In those cases where

it can be demonstrated that an out of state or private program is less costly than a comparable in-state program or when it can be demonstrated that it is in the youth's best interest to attend an out of state school or program, the situation will be evaluated by the Children and Adult Services (CAS) Management. In these situations, the Department will only provide partial payment for educational expenses, due to the limit on [Education and Training Funding Vouchers](#) (ETV) per youth, per year. If a youth chooses to attend an out of state college, the Department will only provide up to the allowable ETV funding per year, which is \$5000.00 dollars for educational expenses. No other funding can be provided for a youth to attend an out of state educational program. The youth must also follow the same rule as an in-state student (outlined below) and apply for all available financial aid. The following steps must be taken to assist a youth in the pursuit of post-secondary education:

- a) The youth's worker must make a referral for MODIFY Services, if the youth is going to pursue a post-secondary educational program.
- b) All avenues of financial aid, **including a workstudy program**, shall be pursued prior to determining the amount the Department will pay for a youth attending a post-secondary education or training program.
- c) The youth must complete a [FAFSA](#) prior to the deadline every year to obtain all possible financial aid. **The FAFSA deadline for West Virginia is indicated on the FAFSA website every year after October 1st.**
- d) The youth, foster/adoptive parents, the youth's parents if appropriate, and/or the group care facility should take the responsibility for the exploration of financial assistance.
- e) The youth's worker or the MODIFY Specialist must submit a letter to the school to verify the youth's custody status and may need to verify the youth's eligibility for the **Foster Care Tuition Waiver**. This must be done to ensure that the youth receives any available financial aid for foster care youth.
- f) It is not recommended that youth accept student loans as a part of their financial aid package. This can place them in jeopardy of losing Chafee funds. **If a youth does not have enough financial aid to cover all of their expenses, with the allowable ETV funds added, then the youth may need to accept a student loan. The total financial aid package, including ETV funds cannot exceed the cost of attendance.**
- g) School tuition and fees are to be paid directly to school by the youth's worker or the MODIFY Specialist. The school must be set up as a provider and must forward an invoice for the complete amount of all required tuition, fees, room, board, books, or other school items. MODIFY Specialists have specific contacts at the local schools and can handle this task efficiently.

- h) The education plan for the youth must be reviewed along with the financial arrangements and any adjustments necessary at the time of the quarterly Multidisciplinary Treatment Team meeting and permanency review. As long as the youth remains a student in good standing the educational plan may continue. **The educational information, including last grade completed, must be documented on the Education screen in FACTS.**
- i) Educational and Training Vouchers may continue through age **twenty-six (26) in certain circumstances**, every effort should be made to assist the youth to obtain other resources for the completion of his course of study in those situations where they will continue their education beyond age 26 years. **Youth cannot remain in a foster care setting past the age of twenty-three (23). Placements must be end-dated on a youth's 23rd birthday. Educational funding can continue until the youth reaches age 26 years if they have completed and are making satisfactory progress on their 25th birthday.**
- j) If the youth spends weekends, days off or holidays with foster/adoptive parents or at a group/residential agency, the youth's worker will make a referral for ASO Connection Visits for the foster family, if they request it.

5.34.1. Foster Care Tuition Waiver

Youth in foster care are eligible to receive tuition waivers for the purpose of attending a West Virginia public higher education institution. Within limitations of the governing boards, the waiver program is available to any youth who:

- a) Has been in foster care or residential care for at least one (1) year prior to the waiver application;
- b) Graduated from high school or passed the TASC (Test Assessing Secondary Completion) examination while in the legal custody of the Department of Health and Human Resources;
- c) Applies for the waiver within two (2) years of graduating from high school or passing the TASC;
- d) Has been accepted to a West Virginia public higher education institution; and
- e) Applies for other student financial aid, other than student loans, in compliance with federal financial aid rules, including the federal Pell Grant.

The waiver covers tuition and fees after other sources of financial aid dedicated solely to tuition and fees are exhausted. Each educational facility determines the amount that will be covered by the tuition waiver. The waiver does not cover room and board or the cost of books.

The youth may apply for the West Virginia Foster Youth Tuition Waiver at the financial aid office of the college or university where accepted. A letter

on Department letterhead signed by Department Management will be required as proof of foster/residential care placement one (1) year prior to the waiver application. The youth must continue to meet the academic progress standards established by the West Virginia higher educational institution they are attending in order to receive a waiver renewal.

5.35 MODIFY Program

5.35.1 Introduction

The Mentoring and Oversight for Developing Independence with Foster Youth (MODIFY) Program offers technical assistance to the Department, group residential facilities, specialized foster care agencies, youth, foster parents, and the community for independent living services and youth transitioning out of foster care. Chafee program staff provide direct services to youth who are likely to remain in foster care until they are eighteen (18) years old; are aging out of foster care at the age of eighteen (18) years or older; or who have already aged out at eighteen (18) years or older. MODIFY Program staff can either serve youth as a primary worker or as a secondary worker.

The MODIFY Program has the following purposes:

- To ensure that children who are likely to remain in foster care until eighteen (18) years of age are provided education, training, financial support, and other needed services; and
- To support and serve former foster care recipients between eighteen (18) and **twenty-three (23)** years of age to complement their own efforts toward self-sufficiency and to assure that program participants recognize and accept their personal responsibility for preparing to make the transition from adolescence to adulthood.

5.35.2 Independent Living Services and Supplies

Because of Congressional legislation that re-authorized the Independent Living Programs and re-titled the Chafee Foster Care Independence Program, states are now required to provide housing assistance and other services to youth who age out of foster care. A youth discharged from foster care after the age of eighteen (18) years is considered to have aged out. Those services are to be available to former foster care youth until their **23rd** birthday. Requests for this service from this population will be made to and managed by MODIFY staff.

The services may include:

- a. Referral/Linkage services

- a. Advocacy services
- b. Housing services
- c. Transportation services
- d. Clothing services
- e. Educational Services (ETV)

*There is a lifetime cap, per individual not attending a post-secondary educational program, involved in an employment program or involved in other activities which will assist in the youth's transition to adulthood, of \$3,000 for direct financial assistance for services.

*There is a cap of \$5,000 for ETV funding, per individual, per year.

5.35.3 Chafee Education and Training Vouchers (ETV)

As the result of congressional legislation that re-authorized the Independent Living Program, re-titled Chafee Foster Care Independence Program, funding is being made available to states to assist with the costs of higher education or vocational training for the following three (3) categories of youth as follows:

*A youth discharged from foster care after the age of eighteen (18) years is considered to have aged out of foster care.

Former foster care youth who meet the criteria below are eligible to receive educational assistance up to \$5,000 per calendar year, **for up to five years total**. The money may be used to cover the costs of attending college, or vocational training, including all expenses related to a course of study such as computers, special clothing, shoes or boots, books, housing, transportation, and other related educational expenses.

1. Youth adopted from foster care after the age of sixteen (16) years

The youth's adoption case worker must, when completing the Subsidy Agreement for a youth over the age of sixteen (16) years, specify the youth's right to this educational assistance to the degree that funds continue to be available at the time such assistance is needed. The adopted youth may apply for this assistance at any time prior to his/her **25th** birthday. The ETV funding will continue to be available until age **twenty-six (26)** for youth who are enrolled and making satisfactory progress in an educational or vocational program on his/her **25th** birthday. The MODIFY Program is responsible for enrolling the youth in the MODIFY Program and providing continued services to the youth, once a referral is received.

2. Youth who have aged out of foster care;

The youth's district case worker, when discharging a youth over the age of eighteen (18) years, must advise him/her of the right to this educational assistance and must provide him/her with the ETV brochure and a wallet card with the MODIFY toll-free number to call to request this educational assistance.

Youth who are in this category may apply for the ETV money at any time from their 18th up through the age of 25. The youth must get a successful semester in before their 25th birthday. This assistance may continue until age twenty-six (26) for youth who are enrolled and making satisfactory progress in an educational or vocational program on his/her 25th birthday.

Referrals for the ETV assistance are to be made directly to the MODIFY Program. The MODIFY Program staff will review and approve the request and develop an educational plan with the student.

3. Youth placed in legal guardianship after the age of 16 (years)

The youth's guardianship case worker, when developing the guardianship agreement, must specify the youth's right to this educational assistance to the degree that funding remains available at the time such assistance is needed. This funding is available to youth who have a finalized legal guardianship on or after the 16th birthday. A youth in legal guardianship may apply for the ETV assistance at any time prior to his/her 25th birthday. The ETV funding may continue until age twenty-six (26) for youth enrolled and making satisfactory progress on his/her 25th birthday. An application for ETV funds must include the youth's educational plan. The youth's guardianship caseworker should refer the youth to the MODIFY Program.

4. Eligibility for MODIFY Services

Chafee Community Support Services are available to youth, who are former foster care recipients and who age out of foster care on or after their 18th birthday or youth transitioning from foster care but choose to receive continued foster care services under an FC-18 or youth who remain in the custody and care of the State past their 18th birthday. These youth remain eligible for Chafee funded services until age twenty-three (23). ETV Funding can be extended to age twenty-six (26), in certain circumstances.

The youth must be able to live independently with some financial assistance, agreeable to, in an educational or employment program,

semi-motivated to accepting responsibilities, and agreeable to accepting MODIFY Services.

5. Referral Process for MODIFY Services

Referrals for the MODIFY should occur prior to the youth “aging out” of foster care or at least six (6) months prior to the youth graduating from high school or obtaining their High school Equivalency, to ensure a continuum of services and to ensure the youth is enrolled properly into a post-secondary educational program or transitioned out of care appropriately. Referrals can be made at any time after a youth ages out of foster care until they turn **twenty-three (23)** years old. The following should occur prior to a Referral for MODIFY being made:

- a. It should be determined if the youth is likely to remain in foster care until the age of eighteen (18) years or older or the youth has already aged out of foster care. This determination should occur within the youth’s MDT;
- b. The youth meets the eligibility requirements of being a former foster care recipient and aged out of foster care/or will age out or foster care;
- c. The youth meets the personal eligibility requirements above and is agreeable to accepting services;
- d. There is current demographic information available on the youth, so they can be contacted, and services can be provided to them;
- e. If the youth is planning on attending college or a post-secondary educational program and it is close the [FAFSA](#) deadline, for West Virginia, then the youth must be assisted in completing the FAFSA;
- f. The youth must have a discharge plan prior to exiting foster care developed by the MDT, which includes housing options for the youth. If there is no discharge plan, the worker must document the extenuating circumstances that prevented one from being developed.

6. Referral Process: To the MODIFY Program

All referrals must be made via secured methods to the MODIFY Program. The referral can be documented on the MODIFY Referral form or information may be provided to staff via the telephone. The referral form is located on the MODIFY website.

7. Educational Plans/Probationary Periods:

For youth planning a post-secondary education but not currently enrolled in a post-secondary educational program, the primary DHHR worker must make a referral to MODIFY six (6) months prior to the youth beginning the post-secondary educational program. If the primary DHHR worker is not given six (6) months-notice of the youth's desire to attend a post-secondary educational program, the primary DHHR worker must make a referral to MODIFY as soon as they become aware of the youth's intent to pursue a post-secondary education. Please note that if MODIFY does not have ample notice to the beginning of the youth's planned post-secondary educational program, MODIFY cannot guarantee the youth will be able to begin the program during the planned semester.

For youth who fail to meet the completion rate expectation, attendance expectation, and minimum GPA expectation as required by MODIFY, the WV Higher Educational Commission, or their educational institution for a semester/quarter, they must be placed on probation and an educational improvement plan will be developed by the youth and their MODIFY Specialist for the following semester/quarter. At the end of this improvement period, the plan will be evaluated by the youth and their MODIFY Specialist for compliance and a decision will be made by MODIFY as to whether the youth will continue with MODIFY or will be discharged from the program due to non-compliance and/or failure to meet minimum expectations

For youth who fail to successfully complete their improvement period and are discharged from MODIFY, these youths may reapply for services if they can provide proof that they successfully completed one full-time semester/quarter on their own and they will begin the next semester/quarter prior to their 23rd birthday. The youth may be required to comply with a new educational improvement plan as a condition of readmission to MODIFY. For youth who fail to meet minimum expectations and choose to leave MODIFY instead of complying with a probation period and educational improvement plan, these youths may reapply for MODIFY at a later date but before their 23rd birthday. However, these youth will be required as a condition of readmission to MODIFY to comply with a probationary period and an educational improvement plan. This educational improvement plan may be assessed for compliance more frequently such as weekly, bi-monthly, monthly, or at midterm. At any time the youth fails to show progress, the youth may be discharged from MODIFY for non-compliance.

For youth who fail to meet the requirements of their educational program for two (2) consecutive semesters/quarters, these youth will be suspended from Chafee ETV funding. Youth may reapply for Chafee ETV funding upon successful completion of one semester/quarter and prior to their 25th birthday. Youth who fail to meet minimum expectations after their 25th birthday will be discharged from MODIFY and may not reapply for Chafee ETV funding. All educational probation plans must be documented and provided to the youth. A copy must be placed in the youth's File Cabinet in FACTS.

8. Youth's Responsibilities

The youth must agree to abide by the rules and responsibilities outlined in the FC-18 agreement and/or on the MODIFY Program enrollment forms. The youth must maintain contact with their MODIFY Specialist or DHHR worker and provide the worker with access to the parent portal or sign a FERPA form or other consent forms needed to assist the youth with a successful transition to adulthood and/or a successful educational experience. Informational access may include but is not limited to the youth's grades, financial account summaries, financial aid award, academic transcripts, and/or school schedules.

Should a youth decide to leave an educational program, the youth is responsible for withdrawing appropriately from the educational program. If the youth fails to withdraw appropriately causing the educational facility to add additional charges to the youth's educational account or results in financial aid suspension causing additional expenses, the youth may be responsible for these expenses. If a youth chooses to accept unnecessary student loans, the youth may be forfeiting Chafee funding. If students choose to accept student loans in excess of the amount necessary to pay basic educational expenses such as tuition/fees and on campus room/board, they may be prevented from accessing Chafee funding should this amount go above the institution's cost of attendance. A youth should consult their MODIFY Specialist before accepting student loans to insure they have a clear understanding of the cost and benefits of this choice.

The youth is required to inform the MODIFY Specialist of any refunds that they receive from their financial aid awards and additional scholarships/grants during the school year. These refunds may affect a youth's transitional living subsidies or ETV funding.

Section 6

Case Review

6.1 Introduction

The purpose of a case review is to assess progress in the child's foster care experience and to utilize the court, community representatives/third party reviewers, and the Multidisciplinary Treatment Team to determine the adequacy and appropriateness of the services provided to the child and family to address the issues for which the child was removed from the home. All children in foster care are required to have a case review at least once every six (6) months according to Federal regulations. The Department employs a variety of review mechanisms to insure it has met its goals, i.e. family preservation, child protection, youth services, and compliance with state and federal laws and regulations. The case plan review, the administrative review, the court/judicial review, and the Multidisciplinary Treatment Team meetings are used to fulfill these requirements.

Case reviews always require that an independent third party review the progress that has been made in the Uniform Case Plan process. The independent third party may be, depending on the type of review, either a judge, a community representative, or other individual such as a Department employee not involved in the direct services to the child in care or his family. Foster/adoptive parents, pre-adoptive parents, and relative caretakers must be given notice of and an opportunity to be heard in all case reviews and hearings.

6.2 Quarterly Status Reviews

Each child in foster care must be reviewed by the court until the child achieves his permanency plan. Quarterly status reviews are held to determine the safety of the child, the continuing necessity for and appropriateness of the placement, the extent of compliance with the uniform child and family case plan, and the extent of progress which has been made toward alleviating or mitigating the causes necessitating placement in foster care, and to project a likely date by which the child may be returned to and safely maintained in the home or placed for adoption or legal guardianship.

To ensure that this statutory mandate is occurring, the social worker must:

- Contact the Prosecuting Attorney to ensure that the quarterly status review is scheduled and placed on the court's docket; and,
- Notify the MDT of the quarterly status review and insure that all notices have been received. This must be provided to the MDT at least 15 days prior to the review.

Convene the Multidisciplinary Treatment Team, which should include the child's biological parents, foster/adoptive parents or current caretaker, and the child if over the age of 12, to monitor the implementation of the court ordered permanency plan for the child. This team is charged with evaluating the progress toward achieving the child's permanency plan, to consider any necessary modifications of the Uniform Case Plan, and to obtain updated progress reports from all service providers.

The Multidisciplinary Treatment Team will prepare the uniform case plan progress report describing the efforts in implementing the permanency plan and any obstacles to achieving the permanency plan prior to each quarterly status review. This report is to be submitted to the court no later than ten (10) days prior to the permanency hearing.

Request that the court sign the uniform case plan progress report and enter it on the court record.

Request that the court schedule and place on the docket the succeeding quarterly status reviews unless the court has entered an order finding that the Department is not required to make reasonable efforts to preserve the family.

If the child has been in foster care for fifteen (15) of the last twenty-two (22) months, then the worker must either include a request for termination of parental rights or must include a description of the compelling reasons why termination is not being requested in the uniform case plan progress report.

Request that the court schedule a yearly permanency hearing if within the previous twelve (12) months a yearly permanency hearing was not conducted.

The child's worker must document the court hearing in FACTS on the court screens.

6.3 Yearly Permanency Hearings and Permanency Hearing Reviews

For each child or transitioning adult who continues to remain in foster care, the circuit court shall conduct a permanency hearing no later than twelve (12) months after the date the child or transitioning adult is considered to have entered foster care, and at least once every twelve (12) months thereafter until permanency is achieved. For purposes of permanency planning for transitioning adults, the circuit court shall make factual findings and conclusions of law as to whether the department made reasonable efforts to finalize a permanency plan to prepare a transitioning adult for emancipation or independence or another approved permanency option such as, but not limited to, adoption or legal guardianship pursuant to the [West Virginia Guardianship and Conservatorship Act](#).

If a child has been in the Department's physical custody for twelve (12) months

and the Department has not placed a child in an adoptive home, with a natural parent, legal guardianship (pursuant to the West Virginia Guardianship and Conservatorship Act in regard to transitioning adults), or with a fit and willing relative, within twelve (12) months of the child being placed in foster care the social worker must:

- a)** Contact the Prosecuting Attorney to ensure that a yearly permanency hearing is scheduled and on the court's docket within twelve (12) months of the child or transitioning adult being placed in the physical custody of the Department by either court ordered placement or voluntary agreement.
- b)** Notify the MDT of the yearly permanency hearing and ensure that all notices have been received. This must be provided to the MDT at least fifteen (15) days prior to the review.
- c)** Convene the Multidisciplinary Treatment Team, which should include the child's biological parents, foster/adoptive parents or current caretaker, and the child if over the age of twelve (12), to monitor the implementation of the court ordered permanency plan for the child. This team is charged with evaluating the progress toward achieving the child's permanency plan, to consider any necessary modifications of the Uniform Case Plan, and to obtain updated progress reports from all service providers.
 - 1.** The Multidisciplinary Treatment Team will prepare the uniform case plan progress report describing the efforts in implementing the permanency plan and any obstacles to achieving the permanency plan prior to each yearly permanency hearing. The report may also include a request that the court consider another disposition in the case such as termination of parental rights. This report is to be submitted to the court no later than ten (10) days prior to the permanency hearing.
 - 2.** During the hearing, the child's or transitioning adult's worker must request, through the MDT recommendations/report or the Prosecuting Attorney, that the court make a finding of whether or not the Department has made reasonable efforts to finalize the permanency plan for the child.
 - 3.** The Department is required to obtain a judicial determination that the Department made reasonable efforts to finalize a permanency plan every twelve (12) months for any child age eighteen (18) or older receiving title IV-E foster care maintenance payments who was removed due to a contrary to the welfare judicial determination (i.e., a court-ordered placement), but not to a youth removed from home via a voluntary placement agreement. The Department must make efforts to achieve any goals outlined in a youth's transition plan and/or case plan. Such efforts may include: case plans that are developed

jointly with the youth in foster care and include discussions which reflect the supervised settings, foster family homes, or child care institutions the youth believes are consistent with what the youth needs to gain independence, and reflect agreements made between the Department and the youth to obtain independent living skills and the benchmarks that indicate how both know when independence can be achieved; periodic reviews, which are held by the courts, involving the youth and focus on whether the youth is safe in his/her placement, whether continued foster care is appropriate, whether appropriate and meaningful independent living skill services are being developed and the progress made towards achieving independence on a projected date; or permanency hearings which are held under conditions that support active engagement of the youth in key decisions.

4. Request that the court schedule and place on the docket the succeeding permanent placement review, or if the Department is still required to provide reasonable efforts to reunify quarterly status reviews, within three (3) months and every three (3) months thereafter until the permanency plan is achieved.
5. The child's or transitioning adult's worker must document the court hearing in FACTS on the court screens; including whether or not a finding of reasonable efforts to finalize the permanency plan for the child was obtained.

When the circuit court terminates parental rights and commits the child to the guardianship of the Department, and the Department is no longer required to make reasonable efforts to reunify the child with their custodial parents, the child's worker will:

- a) If the child's permanency plan is adoption, the child must be referred to the Adoption Resource Network within thirty (30) days of termination of at least one parent's rights for inclusion on the state's adoption web page and for statewide child specific recruitment programs.
 1. Contact the Prosecuting Attorney to ensure that the permanency hearing is scheduled and placed on the court's docket within thirty (30) days of the court finding reasonable efforts to reunify the child with their custodial parent are not required.
 2. Notify the MDT and all persons entitled to notice and opportunity to be heard of the yearly permanency hearing and ensure that all notices have been received. This must be provided to the MDT at least fifteen (15) days prior to the review.

3. Convene the Multidisciplinary Treatment Team, which should include the child's biological parents, foster/adoptive parents or current caretaker, and the child if over the age of twelve (12), that shall serve as the permanent placement review committee to monitor the implementation of the court ordered permanency plan for the child. This team is charged with evaluating the progress toward achieving the child's permanency plan, to consider any necessary modifications of the Uniform Case Plan, and to obtain updated progress reports from all service providers.
4. Proceed with the treatment requirements to address the conditions that must change to achieve permanency identified in the child's case plan through the provision of services.
5. The Multidisciplinary Treatment Team will prepare the uniform case plan progress report describing the efforts in implementing the permanency plan and any obstacles to achieving the permanency plan prior to each yearly permanency hearing. The report may also include a request that the court consider another disposition in the case such as termination of parental rights. This report is to be submitted to the court no later than ten (10) days prior to the permanency hearing.
6. Request that the court sign the uniform case plan progress report and enter it on the court record.
7. Request that the court schedule and place on the docket the succeeding permanent placement review, or if the Department is still required to provide reasonable efforts to reunify quarterly status reviews, within three (3) months and every three (3) months thereafter until the permanency plan is achieved. *(A permanent placement review/quarterly status review will be conducted at least once every three (3) months until the child's permanent placement is achieved. The MDT will be required to attend and report on the progress and developments in the case.)*
8. If the permanency plan has not been achieved within eighteen (18) months of when the child entered foster care, the child's worker must present to the court the reasons for the delay in achieving the child's permanency plan and request that the court find on the record whether or not extraordinary reasons were sufficient to justify the delay in permanency.
9. The child's worker must document the court hearing in FACTS on the court screens, including whether a finding of reasonable efforts to finalize the permanency plan for the child was obtained.

NOTE: Whenever a child is removed from a pre-adoptive home, an adoptive home, or other permanent placement, the permanency review hearing must occur. The worker should promptly report the change in the child's circumstances to the MDT, court, Prosecuting Attorney, child's counsel and/or Guardian Ad Litem, and request that the court schedule a permanent placement review conference within two months of the child's removal.

6.4 Modification of Dispositional Order

WV Code [§49-4-718](#) allows for the modification of Dispositional Orders. This may be done upon motion of the child, child's parent or guardian or the Department alleging a change of circumstances that requires a different disposition. This can be a viable option when older children have not reached permanency, or their adoption has disrupted, and their parents have made changes to the conditions that resulted in the child being abused or neglected. Upon receiving the motion, the court shall conduct a hearing and may modify the dispositional order if the court finds by clear and convincing evidence a material change of circumstances and that such a modification is in the child's best interests. This may only be done provided that the child has not been adopted except in the case of a child being removed or relinquished from an adoptive home or other permanent placement after the case has been dismissed. Adequate and timely notice of any motion for modification shall be given to the child's counsel, counsel for the child's parent or custodian, the Department and any other person entitled to notice and the right to be heard. The circuit court of origin has exclusive jurisdiction over placement of the child, and such placement shall not be disrupted or delayed by any administrative process of the Department.

If a child has not been adopted, the child or Department may move the court to place the child with a parent or custodian whose rights have been terminated and/or restore such parent's or guardian's rights. The court may order such placement and/or restoration of rights if it finds by clear and convincing evidence a material change of circumstances and that such placement and/or restoration is in the child's best interests. WV Code requires the Department to provide prompt notice to the court if the child's placement disrupts. The Department must then convene the MDT to address the issues that led to the disruption.

If a child, child's parent/guardian, or the Department learns there has been a change in the circumstance that led to the child being removed from the home, and that it may be in the child's best interest for the dispositional order to be modified, the worker must then:

- 1) Immediately notify the court of origin**

- 2) Notify the MDT promptly about the situation and hold an MDT within thirty (30) days
- 3) Notify the prosecuting attorney to get the situation on the docket within sixty (60) days
- 4) Convene the MDT informing them of the recent changes in circumstance and the reasons that modification of the order would be in the child's best interest
- 5) Prepare a Family and Child Uniform Case Plan Progress Report
- 6) Follow casework procedures according to the ruling at the court hearing

Section 7

Case Closure

7.1 Discharge Planning

All discharges should be planned whenever possible.

Discharge planning will include the following:

- a) Supervisory approval of the discharge plan.
 1. Discussion with the child about the plan (where age permits) and whenever possible a pre-discharge visit to the new placement or home if the child is being reunified, adopted, or placed with a legal guardian.
 2. Follow up services for the child and family.
 3. Notification of the Homefinding Specialist within two (2) business days of the child's removal from the home.
 4. The child's worker must provide the child, if age eighteen (18) or over, or the child's caretaker, if under eighteen (18), with an official copy of the child's birth certificate and social security card as well as a copy of the child's medical and educational records at no cost.
 5. Documentation in FACTS of the child's discharge plan. The child's discharge plan should be documented within the Uniform Family Case Plan
 6. Documentation in FACTS of the child's discharge.

In the case of a placement disruption, the child's worker shall assess the situation to determine why the placement disrupted and which placement is in the best interest of the child. The worker will do the following actions when the child's placement disrupts:

- a) Conduct a Multidisciplinary Treatment Team meeting to discuss the situation surrounding the placement disruption;
 1. The treatment team will evaluate the situation to determine if the child should be placed in emergency shelter care while a thorough assessment of the child's needs is completed; and
 2. The Uniform Case Plan will be updated to include services necessary to prevent further placement disruptions.
 3. The child's worker must inform the Homefinding Specialist when a child is removed from the home within two (2) business days and document this removal in FACTS.

All placement changes and the reasons to move the child must be reported to the court, the child, if over age twelve (12), the child's attorney, the child's parents, if parental rights have not been terminated, and the parents' attorneys, if parental rights have not been terminated. The child's worker must do the following:

- a) If the move is planned, the child's worker must provide this notification forty-eight (48) hours prior to the placement change.
 1. If the placement change is an emergency, the child's worker must provide this notification within forty-eight (48) hours after the move.
 2. This notice is not required in a situation in which the child is in imminent danger in the child's current placement.

As required by [§49-4-608](#) of the State Code, if a child has more than three (3) separate placements within a one (1) year time frame from when the child entered care, the child's worker must prepare a report to the court. All placements except respite stays, hospitalization, and home visits less than fourteen (14) days are considered placements. When a child is scheduled to enter a third (3rd) placement setting during the year, the child's worker will do the following:

- a) Prepare a report describing the child's placement history for the year in question including the reasons for the various placements, and
 1. Contact the Prosecuting Attorney to request that the report be filed with the court and copies given to all appropriate parties to the case and their counsel. If parental rights have been terminated, then the report is not provided to the parents of the child or their counsel.
 2. After receiving the report, the court may hold a hearing to review the child's placement history to determine what efforts are necessary to provide the child with a stable placement.

According to [§49-4-111](#), when a child has been placed in a foster care arrangement for more than eighteen (18) consecutive months and the Department has determined that the placement is a fit and proper place for the child to reside,

the placement cannot be terminated unless such termination is in the best interest of the child and:

- a) The foster care arrangement is terminated because of allegations of abuse or neglect while the child resided in the home;
 - 1. The child is being reunified with his parents or family of origin;
 - 2. The child is being reunified with his sibling(s);
 - 3. The foster/adoptive parent(s) agree to the termination of the placement in writing using the SS-FC-6B;
 - 4. The foster care arrangement is terminated at the written request of a child who has attained the age of fourteen (14) documented on the SS-FC-6B; or
 - 5. The circuit court orders the termination of the placement upon finding that the Department has developed a more suitable placement for the child that is in accordance with the child's permanency plan.

7.2 Discharge Specific to Psychiatric Residential Treatment Facilities (PRTF's)

7.2.1 Emergency Discharge from PRTF's

In some cases, emergency discharges or exits from a Psychiatric Residential Treatment Facility that are not in accordance with the child's case plan, are unavoidable. The facility must provide the child's worker with at least seventy-two (72) hours' notice of discharge. Upon receipt of such notice, the worker will begin locating and developing an alternative placement that is appropriate for the child's current and immediate situation and needs.

There should not be any instance where a youth must be discharged immediately for his safety or the safety of others while the child is placed in a PRTF.

7.2.2 Discharge Planning Specific to PRTF's

Discharge planning is to begin during the intake and placement process when plans for and with the child and family are made and continued throughout placement at the time of staffing and reviews. After determining a tentative date for discharge, the Multidisciplinary Treatment Team will be responsible for developing and implementing the discharge plan within the projected time frame. This may involve preparing the family for reunification, preparing a foster or adoptive family for the placement, coordinating the youth's enrollment in the

appropriate educational program, keeping the group care agency informed of the plans, informing the youth of the plan, or helping the youth prepare for emancipation.

Termination of a placement in a PRTF may occur through the return of the child to his family or placement with siblings, through the transfer to another placement which may be required to meet the child's needs, or through the placement of the child in a foster/adoptive home. The change may be requested by the residential facility, when the child has completed the established program or if the agency feels that it is unable to continue with the care of the child or may be initiated by the child's worker when the Department or the Multidisciplinary Treatment Team has determined that the residential facility is unable to provide the care essential to the child's development and permanency.

Whenever a placement is terminated, there should be adequate preparation of the foster child, and involvement and preparation of the biological family when they are working with the agency towards reunification. This preparation must include the following:

- a) An explanation of reasons and circumstances for the intended move.
- b) Recognition and help for conflicting feelings about the change.
- c) Participation of the agency staff and biological parents when appropriate in planning steps for the child's removal.

7.3 Discharge Planning Specific to Out of State Placements (ICPC)

If the child is in an out of state placement, an Interstate Compact Report on Child's Placement Status ([ICPC-100B](#)) is completed in FACTS, signed, and submitted in triplicate to the Interstate Compact Administrator in the Office of Social Services to provide notification of the placement change/compact termination.

Section 8

Other

8.1 Family Moves

The child's biological family may move during the course of his/her tenure in foster care. The Department has a responsibility to the family to continue to provide services as long as the child is in care unless parental rights are terminated.

8.1.1 Moves Out of County

When the child's biological family moves from the county where the court order granting custody originated, the county where the petition originated will continue to provide services to the child. The county where the biological parents reside will be responsible for services to the parents.

The child's worker will do the following:

- a)** Notify the county where the parents are now residing and arrange for a transfer of the parent's case to the county where the parents reside.
- b)** The child's worker will hold a staffing with the parent's worker, the provider agency staff, the child's foster parents, if applicable, the child, the child's parents, juvenile probation officer, if one has been assigned, etc. to discuss the change in situation.
- c)** The child's worker will retain a copy of the transfer summary regarding the parent's current residence and the child's legal status.
- d)** The child's worker will work closely with the parent's worker to effect reunification. The parent's worker will now have the primary responsibility to facilitate these efforts particularly when the child is in custody as a result of an abuse/neglect petition.
- e)** The parent's worker will work with the child's worker on the Uniform Case Plan including detailed information on visitation and transportation arrangements.
- f)** Judicial reviews and permanency reviews will occur in the county of original jurisdiction. The child's worker will initiate the process for preparing for the judicial review in the eleventh (11th) month of the placement, and if necessary at all succeeding judicial reviews. The parent's worker will prepare a written summary of information regarding the parent's current situation for inclusion in the judicial review and quarterly permanency hearing. The parent and the parent's worker will attend all reviews and hearings until the parent's rights are terminated or the child is returned home.
- g)** The parent's worker will notify the child's worker immediately of any information that might affect the legal status of the child, the reunification efforts, or any other information that is pertinent to the child in placement.

8.1.2 Family Moves Out of State

If the parent moves out of state and the child remains in foster care, the worker will initiate the Interstate Compact procedures by notifying the Interstate Compact Administrator in Children and Adult Services that the family has moved to another state and request that the state initiate family reunification services. The worker will request a home visit and evaluation to determine if the child can be reunited with his family and when the reunification might occur. This study should include demographic information such as location of home, the surrounding neighborhood, proximity to school, resources available, family or support systems in the parent's area, recreation opportunities, employment of family members, adequate income, living space in the home, ability to care for the child, any safety concerns, how the family has complied with services, how family has rectified issues that led to petition being filed, etc.

In order to process a request for considering of placement of the child with the parent and/or other specified relative into the receiving state, the child's worker shall forward the following materials to the Interstate Compact Administrator:

- a)** A cover memo explaining the placement request and specifying the complete name, address, and telephone number of the proposed placement resources;
- b)** A current social summary outlining how and why the child came into the state's custody and identifying any special needs the child may have;
- c)** Court/custody order;
- d)** Psychological evaluation, if available;
- e)** Child's case plan; and
- f)** A statement explaining how the child's day to day financial needs and medical needs will be provided.

Upon receipt of written approval from the Interstate Compact office in the receiving state, the worker will work with the out of state worker to reunify the family if this is the child's permanency plan as defined by the Uniform Case Plan. The case plan will also include the problems which necessitate the removal of the child from the parents, tasks necessary to resolve these problems in a specified time frame and return the child to his parents. When the out of state worker has determined that the parents are now capable of re-assuming their parental roles through the successful completion of the reunification plan, the child's worker will recommend to the court that custody be returned to the parents.

The Department will retain legal custody of the child until the receiving state has provided written agreement from the Interstate Compact Office in the receiving state to terminate custody.

8.2 Agency Assignment/Transfer of Cases

The supervisor shall develop procedures to assure that every case open for foster care services shall have a case worker assigned at the time it is referred. Caseloads shall not be unassigned.

When the child's current worker is aware that a case transfer is to take place, that individual must inform all parties involved in the child's case of the change. If possible, the child's new worker shall be introduced in person to the family and child. The current worker will discuss the case plan for the family and child, the visitation schedule and any other pertinent information during a planned case staffing with the new worker assuming responsibility.

8.3 Case Record Maintenance

Case records are to be maintained in an orderly, detailed manner so as to accurately reflect the services provided, the effectiveness of those services in alleviating the defined needs of the family members, and the achievement of the stated case goals. All records, whether of families and children or of providers of services, shall be maintained in such a manner as to preserve the confidentiality of the information they contain. Information in records shall be kept updated.

Since most of the pertinent information about a child or a family is now kept in FACTS, this section of the case record must also be kept confidential and updated.

8.3.1 Requests for Viewing Records

Many people may request to review foster care records. Viewing records includes looking at information contained in FACTS as well as materials that are kept in the paper record.

8.3.2 Former Foster Children

Once a former foster child has turned eighteen (18) years of age, he/she may view his/her record if he/she has never been adopted. The record shall be purged of identifying information on any Child Protective Services referral before the record may be viewed.

8.3.3 Birth Parents

The parents of a child in foster care may request permission to view the information contained in their record. Section [§29B-1-3](#) permits individuals to have access to information about them kept by public agencies. Parents who wish to view their records shall have an appointment scheduled within five (5) days of their request. The record shall be purged of identifying information on any Child Protective Services referral before the record may be viewed.

8.3.4 Attorneys

Attorneys must have written permission from the individual parent or provider before they may view a family, foster/adoptive parent record. They must submit the request in writing, accompanied by verification of consent to view the records, and make an appointment to view the record. They shall give at least five (5) days' notice prior to the date they wish to make the appointment for reviewing the information. The record shall be purged of identifying information on any Child Protective Services referral before the record may be viewed.

8.3.5 Court

The court may subpoena the Department to release records for the courts review.

8.3.6 Sharing Information

The Department routinely shares information contained in client and provider records as part of providing case work practice such as with the Multidisciplinary Treatment Team, case staffings, and administrative or judicial reviews or hearings. The Department must share the information contained in the child's record only as allowed by this or other Department policy and in line with state and federal confidentiality law.

8.4 Record Retention/Retrieval

8.4.1 Foster Care Records

The paper portions of records of families and children who received foster care services shall be retained in the local office for two (2) years after closure. After two (2) years those records shall be sent to archives on the regular purging schedule. They are to be maintained in archives for twenty-five (25) years and then destroyed. Closed records shall be treated in the same manner as all requests for viewing a current record.

8.4.2 Adoptive Records

Closed adoptive records for both adoptive families and the children they adopted are maintained by the Division of Children and Adult Services in archives after closure. Adoptive records are kept for ninety-nine (99) years.

8.4.3 Record Retrieval

The local office must keep a schedule of records that are sent to archives and those purged. Information that is required to retrieve a record that has been sent to archives includes the client's name, the year of closure, the box number, and the accession number.
