BEHIND HAPPY FACES

A New Approach to Mental Health

Human Power Project
Mental Health Approach

Normalize Mental Health
Public Health Approach

- Not solely mental illness education
- Not solely suicide prevention

Why this works

- Everyone’s goal is to have positive mental health
- Students need a starting point
Corrigan & Wahl:

- But what is the stigma?
- Focusing on overall mental health opens students to talking about emotions early which can prevent more severe problems.
Awareness campaigns will always be important, but it’s time to give students the tools they need to address their mental health.

- Counseling centers are overwhelmed.

- 75% of students have their first episode with mental illness by age 24.

- Why you never really leave high school.

- Teach about coping mechanisms, brain development and how to help a friend.
WHAT WORDS DO YOU ASSOCIATE WITH MENTAL HEALTH?
CHOOSE THREE.
What are the three biggest causes of stress for students? Choose three.
HOW DO STUDENTS COPE WITH STRESSFUL SITUATIONS? CHOOSE THREE.

- Exercise: 54.73%
- Eating: 27.91%
- Shopping: 17.80%
- Listening to music: 11.43%
- Watching TV: 24.18%
- Not sleeping: 24.18%
- Drinking alcohol: 45.93%
- Writing: 10.77%
- Using drugs: 3.52%
- Talking to a friend: 0.22%
- Sex/hooking up: 3.30%
- None
- Other
What would you do if you saw a friend needed help? Choose three.

- Ignore them: 0.44%
- Talk to them: 93.41%
- Stay silent, don't know: 5.27%
- Talk to a MH professional: 28.13%
- Tell them to check in: 58.02%
- Talk to others about them: 28.13%
- Research it online: 8.79%
- Ask your parents: 16.04%
- Call her parents: 27.91%
- Talk to their friends: 46.59%
- Give them space; hope: 4.18%
- None: 0.22%
- Other: 6.59%
Lessons

- Lesson 1- Understanding Mental Health
- Lesson 2- Your Mental Health
- Lesson 3- Changing Ineffective Coping
- Lesson 4- Before The Breakdown
Lesson Structure

- Video
- PowerPoint
- Interactive Lessons
- Reinforcement
- Widely Scalable
Objectives:

• State a correct definition of mental health.

• Name the most common reasons people don’t seek help for their mental health.

• Identify personal barriers to seeking help, explore sources of those barriers and work on how to address them.
Contact with a peer who is experiencing a mental health disorder is the most effective way to lessen stigma.

Members need a safe way to express emotions and understand connection to each other.
Objectives:

- Classify mental health challenges into 5 categories.
- Identify where students are on the mental health spectrum.
- Begin connecting how mental health challenges impact where a person is on the mental health spectrum.
Students often struggle to describe their mental health.

A more expansive vocabulary allows them to determine what they are experiencing and how to balance their lives.
Mental Health Spectrum

Everyday Challenges
- Stress
- Lack of Sleep
- Low Self Esteem
- Poor Body Image

Environment
- Verbal Abuse
- Bullying
- Sexual Abuse

Significant Events
- Death
- Divorce
- Breakups
- Major Illness

Mental Health Disorders
- Depression
- Anxiety
- Bipolar Disorder
- Schizophrenia
- Eating Disorders

Developmental Disabilities
- Intellectual Disabilities
- Autism
- Asberger’s Syndrome
- ADHD

Balanced Life

Difficult to Balance

Need Help or Constant Assistance

Not Able to Balance
Objectives:

- State a definition of coping.
- Differentiate the difference between effective and ineffective coping.
- Demonstrate the steps to make coping mechanisms more effective.
THEORETICAL BASIS

• Presenting students with the steps of behavior change increases their ability to do something new.

• Provide the neurological explanation of behavior development to help students understand how habits form.
Objectives:

• Identify the warning signs of someone who may be experiencing a severe mental health breakdown.

• Demonstrate what actions are helpful to approach a friend, family member, or partner, who needs help.

• Differentiate the differences between what a friend can do and what can only be done by a mental health professional.
Theoretical Basis

- 67% of college students first report suicidal thoughts to a friend.

- Teaching members the basics of what to do when someone is experiencing a mental health challenge or is suicidal increases their ability to help.
