CHAPTER 514–COVERED SERVICES, LIMITATIONS, AND EXCLUSIONS, FOR NURSING FACILITY SERVICES

INTRODUCTION

The West Virginia Medicaid Program is administered pursuant to Title XIX of the Social Security Act and Chapter 9 of West Virginia Code. The Bureau for Medical Services (BMS) in the West Virginia Department of Health and Human Resources (DHHR) is the single State Agency responsible for administering the program. This program, therefore, must also function within federally defined parameters. Any service, procedure, item, or situation not discussed in the manual must be presumed non-covered.

Medicaid offers a comprehensive scope of medically necessary medical and mental health services. All covered and authorized services must be provided by enrolled providers practicing within the scope of their license, utilizing professionally accepted standards of care, and in accordance with all State and Federal requirements. Enrolled providers are subject to review of services provided to Medicaid members by BMS whether or not the services require prior authorization. All providers of services must maintain current, accurate, legible and complete documentation to justify medical necessity for service provided to each Medicaid member and made available to BMS or its designee upon request.

This chapter sets forth the BMS requirements for payment of services provided by nursing facilities to eligible West Virginia Medicaid resident.

514.1 DEFINITIONS

Definitions governing the provisions of all West Virginia Medicaid services will apply pursuant to Provider Manual Common Chapter 200, Acronyms and Definitions. The following definitions apply to the requirements for payment of nursing facility services described in this chapter.

Administrator - a person licensed by the West Virginia Nursing Home Administrators Licensing Board as a “Nursing Home Administrator” who is responsible and accountable for the day-to-day operations of the nursing facility.

Abuse - the willful infliction of injury, unreasonable confinement, intimidation, or punishment with resulting physical harm, pain or mental anguish.

Ancillary Service - a required service necessary to support the primary activities of the nursing facility to meet the resident’s needs. However, these services are not included in the per diem rate.

Capacity - the ability to comprehend and retain information which is material to a decision, especially as to the likely consequences; the person is able to use the information and weigh it
in the balance as part of the process of arriving at a decision and is able to communicate the
decision in an unambiguous manner.

**Case Mix Reimbursement System** - a payment system that measures the intensity of care and
services required for each resident. This translates into the amount of reimbursement given to
the facility for care provided to each resident.

**Care Area Assessment (CAAs)** - a problem-oriented framework for organizing MDS
information and additional clinically relevant information about an individual’s health problems or
functional status.

**Care Plan** - a document based on a comprehensive assessment prepared by the
interdisciplinary team. This is coordinated with the resident/representative and identifies
measurable objectives for attaining the highest level of physical, mental and psychosocial
functioning.

**Centers for Medicare and Medicaid Services (CMS)** - the Federal Agency which administers
the Health Care Programs within the United States Department of Health and Human Services
(USDHHS).

**Certificate of Need (CON)** - a process often associated with cost containment measures.
Additionally, the Legislative findings in the CON law declare the need for health services to be
provided in an orderly, economical manner that discourages unnecessary duplication. The CON
is to be submitted to the Health Care Authority.

**Change of Ownership** - any transaction that results in change of control over the capital assets
of a nursing facility including, but not limited to, a conditional sale, a sale, a lease or a transfer of
title or controlling stock. The two most common types of change of ownership are asset
purchase and stock transfer.

**Civil Money Penalty (CMP)** - a punitive fine imposed on a nursing facility when the nursing
facility has demonstrated deficient practices.

**Cost Average Point (CAP)** – a calculation used in the reimbursement methodology for
establishing rates in nursing facilities.

**Cost Report** - the instrument used in the reimbursement system for nursing facilities with semi-
annual rate adjustments. It is designed to treat all parties fairly and equitably, i.e., the resident,
taxpayer, agency and facility. In order to be equitable, complete and accurate cost data must be
maintained by each facility with cost reports accurately prepared and submitted on a timely
basis and in an approved format.

**Deficiency** - an entry on the federally mandated form provided by the State survey agency, the
Office of Health Facility Licensure and Certification (OHFLAC), which describes the specific
requirements of the regulations with which the nursing facility failed to comply, an explicit
statement that the requirement was not met, and the evidence to support the determination of noncompliance.

**Denial of Payment for New Admissions (DPNA)** - the denial of Medicaid payment for new admissions when the nursing facility no longer meets the standards of facility certification.

**Discharge** - the termination of a resident’s affiliation with the nursing facility, achieved through the permanent move of a resident to another facility or setting that operates independently from the nursing facility.

**Discharge Planning** - the organized process of identifying the approximate length of stay and the criteria for exit of a resident from the current service to an appropriate setting to meet the individual’s needs. Discharge planning begins upon the day of admission to the nursing facility and includes provision for appropriate follow-up services.

**Dually Certified Facility** - a facility which is certified to participate in both the Medicare and Medicaid programs.

**Facility Certification** - the official designation by BMS, based on recommendation from the Office of Health Facility Licensure and Certification (OHFLAC), that the nursing facility meets Medicaid standards and regulations.

**Governing Body** - the person or group of persons with the ultimate responsibility and authority for the operation of the nursing facility.

**Health Care Authority (HCA)** - an organization which administers programs that help contain the rising cost of health care and assure reasonable access to necessary health care services. HCA assures public access to the information compiled under the Rural Health Systems Program, the Planning Division, and Certificate of Need Program.

**Immediate Jeopardy (IJ)** - a situation in which the nursing facility’s noncompliance with one or more certification requirements has caused, or is likely to cause, serious injury, harm, impairment or death of a resident.

**Interdisciplinary Team (IDT)** - a group of professionals, paraprofessionals, non-professionals and the resident who possess the knowledge, skill, and expertise necessary to accurately identify the comprehensive array of services required to meet the resident’s needs and who design specialized programs responsive to the needs of the resident which are to be documented in the care plan.

**Licensed Nursing Home** - any institution, residence, place or any part or unit thereof, licensed in accordance with the requirements specified in W. Va. 16-5c et al, in which an accommodation of four or more beds is maintained for the purpose of providing accommodations and care for a period of more than twenty-four hours, to persons who are ill or otherwise incapacitated and in need of extensive, ongoing nursing care due to physical or mental impairment, or provides services for the rehabilitation of persons who are convalescing from illness or incapacitation.
Minimum Data Set (MDS) - a core set of screening, clinical, and functional status elements completed by an IDT of which the resident is the principal member. It also includes common definitions and coding categories that form the foundation of the comprehensive assessment for all residents of long-term care facilities certified to participate in Medicare and Medicaid.

Misappropriation of Property - the deliberate misplacement, exploitation, or wrongful misuse of a resident’s belongings or money.

Neglect - the failure to provide goods and services necessary to avoid physical harm, mental anguish, or mental illness.

Nursing Facility - defined as an institution (or a distinct part of an institution) which is primarily engaged in providing skilled nursing care and related services for residents who require medical or nursing care, rehabilitation services for the rehabilitation of injured, disabled, or sick persons, or on a regular basis, health-related care and services to individuals who because of their mental or physical condition require care and services (above the level of room and board) which can be made available to them only through institutional facilities, and is not primarily for the care and treatment of mental diseases and has in effect a transfer agreement (meeting the requirements of §1861(1)) with one or more hospitals having agreements in effect under §1866.

Patient Resource (or Resident Resource) Amount - the amount calculated by the WVDHHR which the resident must contribute to the cost of care every month by which the monthly Medicaid payment is reduced.

Personal Needs Allowance - the amount deducted from the member’s monthly income which allows for personal needs of the nursing facility member.

Pre-Admission Screen - the preliminary screen conducted on all persons seeking admission to a nursing facility in order to identify persons with major mental illness or developmental disability.

Representative - the spokesperson acting in the best interest of the resident. Representatives may be designated by the residents themselves, court appointed, or physician appointed, in accordance with state law.

Resident - any individual residing in a nursing facility (NF), skilled nursing facility (SNF), or dually certified skilled nursing facility/nursing facility (SNF/NF). For the purpose of Medicaid reimbursement only, the resident may be identified as a Member of the Medicaid program.

Resident Council - a group of residents residing in the nursing facility having the right to meet to express grievances in relation to the residents’ general well-being and to make recommendations concerning nursing facility policies and procedures.
**Substantial Compliance** - a level of compliance with the requirements of participation such that any identified deficiencies pose no greater risk to resident health or safety than the potential for causing minimal harm.

**514.2 PROVIDER PARTICIPATION REQUIREMENTS**

The governing body or designee of a nursing facility participating in the Medicaid Program must fully meet the standards established by the West Virginia Secretary of the Department of Health and Human Resources (WVDHHR); all applicable State and Federal laws governing the provision of these services as currently promulgated or amended in the future; and all regulations contained herein or issued as Medicaid Policy. The Federal standards take precedence over State requirements except where State requirements are more restrictive.

A nursing facility may be a freestanding entity qualifying and serving as a long-term-care provider or it may be a distinct part of a larger institution. If the distinct part is operating as another part of an institution, the distinct part must be an identifiable unit and meet all of the requirements for a nursing facility.

**514.2.1 State Licensure**

As a condition of participation as a nursing facility in the West Virginia Title XIX Medicaid Program, a free-standing nursing home or distinct part of a hospital must be currently licensed in accordance with the applicable State Code and Legislative Rule. The nursing home or hospital must meet and maintain the standards for licensure on a continuing basis. When required by the nursing home or hospital licensure rule, the nursing facility must be administered by a licensed nursing home administrator, who is legally responsible for establishing and implementing policies regarding the management and operations of the facility and who holds an approved, current license, as required by State law. The nursing facility must also meet all Federal and State standards for participation in the Title XIX Medicaid Program and remain in compliance with all other applicable Federal, State, and Local laws, rules, and regulations affecting the health and safety of all residents.

**514.2.2 Provider Enrollment**

The nursing home or hospital distinct part must submit a completed, signed and dated provider enrollment application and a nursing facility agreement in order to apply with the Bureau for Medical Services for approval to participate in the Title XIX Medicaid Program. Prior to approval as a provider, a Certificate of Need (CON) must be approved by HCA. The nursing home or hospital distinct part must meet Medicaid certification requirements. Upon approval of the application and the agreement by BMS, a provider number will be assigned by BMS’ fiscal agent. See Common Chapter 300, Provider Participation Requirements.

**514.2.3 Nursing Facility Provider Agreement**

A nursing facility provider agreement must be approved by BMS prior to eligibility for
reimbursement and annually thereafter. The nursing facility provider agreement will certify that
the nursing facility agrees to follow the Code of Federal Regulations, (42 CFR, Part 483, the
requirements for States and long term care facilities) and West Virginia Legislative Rule Title 64,
Series 13 (the Nursing Home Licensure Rule) as updated. Upon acceptance for participation as
a nursing facility in the Medicaid program, the administrator of the facility, under the delegated
authority of the facility’s governing body becomes responsible for ensuring the nursing facility
remains in compliance with the terms of the agreement and Medicaid rules and regulations. It is
the responsibility of each nursing facility’s administrator to stay apprised of any revisions to the
Medicaid Provider Manual. Payment to the nursing facility, for covered items and services it
furnishes on or after the approval date of the agreement, will require that the facility have a
record keeping capability sufficient for determining the cost of medically necessary services
furnished to any Medicaid resident. (See Appendix 1)

As a provider participating in the Medicaid program, the governing body/designee must agree to
admit and provide care and services equitably to all individuals, no matter the payment source
of the individual seeking care.

The agreement for participation in the Medicaid program by a governing body/designee is
limited by compliance with Federal and State laws, certification rules and regulations. OHFLAC
determines whether a prospective provider is in compliance with the nursing home
requirements. When the facility is in compliance, OHFLAC certifies and recommends that BMS
enter into an agreement with the facility. If the facility is determined not be to be in compliance,
OHFLAC recommends that BMS deny participation.

If OHFLAC recommends that BMS deny participation and BMS accepts that recommendation,
BMS will notify the facility in writing of the denial of participation in the Medicaid program, and
include, in the letter the appeal rights available under 42 CFR 431.153 and 42 CFR 498.3 (b).

514.2.4 Enforcement

BMS is required by Federal regulations to impose certain enforcement actions on nursing
facilities which are not in compliance with certification rules and regulations. Enforcement
action may include but is not limited to: termination of the provider agreement; temporary
management of the nursing facility by a designee appointed by the Department of Health and
Human Resources; denial of payment for new admissions; civil money penalty; state monitoring;
transfer of resident; transfer of resident with closure of a facility; and/or reduction of bed quota
without reduction of staff. (See 42 CFR 488 Subpart F and WV Legislative Rule 64CSR 13).
CMS is responsible for enforcement of dually certified facilities.

514.2.5 Ownership

Owners include any individual, organization, partner and all stockholders of organizations which
have a financial interest in the facility’s operations.

Nursing facilities that are in compliance with all applicable requirements may participate in the
Medicaid program and receive payments regardless of the ownership category, i.e., proprietary,
voluntary, non-profit, etc. The governing body/designee of each nursing facility must provide BMS and OHFLAC with full and complete information and documentation as to the identity of the owner(s) in the enrollment packet as follows:

- The name and address of each person with an ownership or five percent controlling interest in the facility or disclosing entity or in any subcontractor in which the disclosing entity has direct or indirect ownership;
- The name and address of each officer and director, when a nursing facility is organized as a corporation, must be declared and verified if it is organized as a for-profit entity;
- The name and address of each partner when a nursing facility is organized as a partnership.

Compensation will not be allowed for owners, operators, or their relatives who claim to provide some administrative or other function required to operate the facility, but who do not actually provide said services. Functions claimed to be provided by owners, operators, or their relatives which are merely a duplication of services that are already provided by other employees, or are functions which should reasonably be expected to be performed by other employees, are not reimbursable.

When owners, operators, or their relatives are on salary at a facility, the Medicaid program will reimburse the facility to the extent that said individuals salaries are not excessive (See 514.13.27 OWNERS) compared to other individuals who perform the same or similar functions but are not owners, operators or their relatives.

514.2.6 Change of Ownership

The following events constitute a change of ownership:

1. The removal, addition or substitution of a partner. (Stock Transfer)
2. Transfer of title and property to another party by as sole proprietor. (Asset Transfer)
3. The merger of a provider corporation into another corporation, or the consolidation of two or more corporations resulting in the creation of a new corporation. (Asset Transfer)
4. Leasing all or part of a provider facility. (Stock Transfer) See 42 CFR 489.18; 42 CFR 431.108; WV Code 31D-11-1101 et seq.; WV Code 47B-1-1 et seq.

When there is a change of ownership, the governing body must acquire a Certificate of Need or an exemption as required under West Virginia State law. Refer to WV Code 16-2D-01 et seq. and WV Legislative Rule 65CSR7 for direction on complying with Certificate of Need requirements in West Virginia. Note that Certificates of Need are nontransferable. The nursing facility may not bill Medicaid for any health service without first obtaining an approved Certificate of Need.

West Virginia Medicaid recognizes two types of changes in ownership, stock transfer and asset transfer.
A change in ownership of a nursing facility as a result of an asset transfer requires the execution of a new Provider Agreement, new enrollment application and assignment of a new provider number. Notification of the change is required to be submitted, in writing, to BMS 90 days prior to the effective date of the change of ownership.

A change of ownership as a result of a transfer of corporate stock or the merger of another corporation into the provider corporation does not constitute a change of ownership for a corporation. A stock transfer of a nursing facility without a change in administrative personnel of that facility does not require the execution of a new Provider Agreement; however, the enrollment packet must be updated to identify all interested parties for the exclusions list.

The governing body must comply with West Virginia law when changing ownership, merging corporations or transferring corporate stock. Partnerships are governed in West Virginia by the West Virginia Uniform Partnership Act. This act is codified at WV Code 47B-1-1 et seq.

Effect on the provider agreement of a change of ownership:

An agreement is subject to all applicable statutes and regulations and to the terms and conditions under which it was originally issued including, but not limited to, the following:

1. Any existing plan of correction.
2. Compliance with applicable health and safety standards.
3. Compliance with the ownership and financial interest disclosure requirements of part 420, subpart C of Title 42, Chapter IF of the Code of Federal Regulations and;
4. Compliance with Civil Rights requirements set forth in 45 CFR parts 80, 84, and 90 of the Code of Federal Regulations See 42 CFR 489.18 (d)

Enrollment of a new provider as a result from an asset transfer:

A new provider must enroll in Medicaid. Providers are required to submit a complete and accurate enrollment packet. A change of ownership requires that all parties involved shall collaborate to ensure that services are billed and paid to the correct owner using the correct provider number. The effective date of the new owner’s enrollment is determined when the enrollment application is approved by BMS. Providers are required to submit a complete and accurate enrollment packet and inform The Office of Facility Based and Residential Care unit within BMS and BMS’s fiscal agent’s Provider Enrollment Unit of the proposed date of the change in ownership to ensure a seamless transition. It is recommended that changes of ownership occur at the first of the month. Services rendered prior to the effective date of the change in ownership will not be payable through Medicaid. However, in cases of a change of ownership of a nursing facility that is dually certified for participation in both Medicare and Medicaid, BMS will follow Medicare policy regarding effective dates of the actual change of ownership.

A provider agreement shall not be approved if the owner fails to comply with 42 CFR 455.104 and 42 CFR 455.105, which requires the owner to provide information to the BMS fiscal agent on ownership interests and certain business transactions. See also 514.2.6 of this manual.
If a partnership purchases a dissociated partner’s interest in the partnership and the partnership is not winding up business, under WV Code 47B-7-1(d), the partnership “shall indemnify a dissociated partner whose interest is being purchased against all partnership liabilities, whether incurred before or after the dissociation, except liabilities incurred by an act of the dissociated partner under section two 47B-7-2, article seven of this chapter.” Whenever a partnership purchases a dissociated partner’s interest in the partnership, it shall send to the Office of Accountability and Management Reporting (OAMR) a copy of the indemnification agreement.

When there is a change of ownership, the provider shall supply the Office of Accountability and Management Reporting (OAMR) a copy of the executed contract or other agreement effecting the transfer between the buyer and seller, and shall also include with the transmittal a separate statement, signed by authorized representatives of both the buyer and seller, stating whether the prior owner or new owner retains the liability for any over/under payment related to cost reporting periods that have not been audited by the Department at the time of the transfer.

A provider may request a final audit, in writing prior to the change in ownership, resulting from an asset purchase. Requests should be submitted to the following address: WVDHHR Office of Accountability and Management Reporting; Attention: Division of Audit; 1 Davis Square, Suite 304, Charleston, WV 25301.

514.2.7 Bed Configuration

BED TRANSFER:
A licensed nursing facility or hospital based distinct part may not add any beds to its license without first obtaining certificate of need approval (CON) from the West Virginia Health Care Authority. If the transfer is authorized by the Health Care Authority, the governing body or designee of a licensed nursing home or hospital distinct part must submit a written request for Medicaid reimbursement on transferred beds to the Commissioner of the Bureau for Medical Services. The request that is to be submitted to the Commissioner must detail need for the additional transferred beds by indicating the overall census, using the past two most recent cost reporting periods, of the transferring from facility and transferring to facility. The overall census of the transferring to facility must be at 95% or greater on average for each cost reporting period and the Medicaid census must be at 85% or higher for each cost reporting period.

DUAL CERTIFICATION:
When the request is to gain dual certification on beds that are currently licensed however do not have Medicaid certification; the CON process is not needed. The facility asking for dual certification must submit a written request to the Commissioner of the Bureau for Medical Services and the request must show the need for the Medicaid certification on the current licensed beds in the facility. The need must be proven by indicating the overall census, using the most recent two cost reporting periods. The overall census must be at least 95% or greater on average for each cost reporting period and the Medicaid census must be at 85% or higher for each cost reporting period.
The Commissioner, in his or her discretion, shall determine whether to approve or deny the request of Medicaid reimbursement for the transfer or dual certification of currently licensed beds. In determining whether or not to approve the requests for dual certification or on transferred beds, the Commissioner shall take into consideration the fiscal impact of the request as well as the need for the transferred or dual certified beds as stated by the request.

**514.2.8 Non-Compliance of Nursing Facilities**

OHFLAC conducts surveys on all nursing facilities for compliance or noncompliance with the requirements for long term care nursing facilities. When OHFLAC completes a survey, CMS may follow up with a validation survey. A determination is final except in the case of a complaint or validation survey conducted by the CMS.

Under Federal guidelines, OHFLAC certifies the compliance or noncompliance of a non-State operated skilled nursing facility. OHFLAC also certifies compliance or noncompliance for a dually participating skilled nursing facility/nursing facility. If there is a disagreement between CMS and OHFLAC, CMS’s determination as to the facility's noncompliance is binding and takes precedence over a determination of compliance by OHFLAC (see 42 CFR 488.330 (a)).

A certification of compliance constitutes a determination that the facility is in substantial compliance and is eligible to participate in Medicaid as a Nursing Facility, or in Medicare as a Skilled Nursing Facility, or in Medicare and Medicaid as a dually participating facility.

A certification of noncompliance requires denial of participation for prospective providers and enforcement action for current providers in accordance with Federal guidelines. Enforcement action must include either termination of the Medicaid provider agreement or the application of alternative remedies instead of, or in addition to, termination procedures. In cases where either BMS or CMS is taking action, notice of noncompliance resulting in action will be sent in accordance with 42 CFR 488.402 (f).

Termination of a provider agreement with a nursing facility may result from, but not be limited to, any of the following:

1. Failure to comply with licensure and certification standards as identified by OHFLAC and CMS;
2. Failure to implement the corrective action plan accepted by OHFLAC and CMS for correction of non-compliance with license and certification standards; or
3. Failure to comply with all of the provisions of the provider agreement executed with BMS.
4. Exclusion Proceedings – See *Common Chapter 300, Provider Participation Requirements*.

When an agreement is terminated, Medicaid may continue reimbursement to the nursing facility for a period not to exceed 30 days from the date of termination. The 30 day continuation is only for Medicaid members admitted to the nursing facility prior to the date of termination of the provider agreement. It is the responsibility of the governing body or designee of the nursing
facility to provide a safe and orderly transfer and quality of care for all residents of the facility affected by the termination of the provider agreement.

The termination of participation in the Medicaid program does not immediately release the governing body or designee of a nursing facility from all of the nursing facility’s statutory and regulatory responsibilities of its agreement for participation. The nursing facility’s governing body or designee remains responsible for the repayment of any overpayment or debt related to the final program cost settlement as well as any other Federal and/or State statutory and/or regulatory mandates.

514.3 PROVIDER CERTIFICATION

OHFLAC and CMS will conduct periodic and timely evaluations of nursing facilities for the purpose of certifying nursing facilities for participation in the Medicaid program. Prior to entering into an agreement of participation in the Title XIX (Medicaid) Program with a nursing facility, BMS will obtain certification recommendations from OHFLAC to ensure the nursing facility is in compliance with both State and Federal statutes and regulations.

A nursing facility may be certified with correctable deficiencies if the deficiencies, as determined by OHFLAC, individually or in combination, do not jeopardize resident health, safety, quality of life and/or quality of care.

The governing body or designee of a nursing facility with deficiencies must submit to OHFLAC a written plan for correcting the deficiencies with credible evidence, when requested, per the written instructions from OHFLAC. This plan of correction may either be accepted with credible evidence of compliance; or one or more subsequent surveys may be necessary to verify compliance with applicable rules and regulations.

A CMP and/or DPNA may be imposed upon the nursing facility until compliance is demonstrated and an acceptable plan of correction is approved.

State remedies are found in 42 CFR 488.406 and include termination of the provider agreement, temporary management, denial of payment for all individuals when imposed by CMS, DPNA, CMP, State monitoring, transfer of residents, closure of the facility and transfer of residents, a directed plan of correction, a directed in-service training and many alternative remedies that have been approved by CMS in the State plan.

514.3.1 Denial of Payment for New Admission (DPNA)

A governing body or designee of a nursing facility that no longer meets standards of certification as determined by OHFLAC, in conjunction with CMS, may be denied Medicaid payment for new admissions. If the nursing facility’s deficiencies pose IJ to the resident’s health and safety, the provider agreement may be terminated and denial of payment for Medicaid members currently residing in the nursing facility may also be imposed. However, if a current resident of the NF who is under a DPNA gets transferred to the acute care hospital, they may be re-admitted to the original NF when re-admission is appropriate and reimbursement will resume.
514.3.2 Civil Money Penalty (CMP)

A governing body or designee of a nursing facility may have imposed upon it a CMP, when OHFLAC recommends and BMS agrees that one or more deficient practices are of such a nature that the potential for more than minimal harm to one or more residents exists or actual harm has occurred.

514.3.3 Temporary Management/Administrator

A temporary manager may be imposed by BMS, CMS or the court system any time a nursing facility is not in compliance with Federal and State regulations. However, when a nursing facility’s deficiencies constitute IJ and a decision is made to impose an alternative remedy to termination, the imposition of a temporary manager is required, in accordance with State code.

It is the temporary manager’s responsibility to oversee correction of the deficiencies and to assure the health and safety of the nursing facility’s resident while the corrections are being made. A temporary manager/administrator may also be imposed to oversee orderly closure of a nursing facility.

Any temporary manager, whether imposed by BMS, CMS or the court system, must be licensed by the West Virginia State Board of Nursing Home Administrators.

514.4 STANDARDS FOR NURSING FACILITIES

All providers participating as a nursing facility in the Title XIX, Medicaid Program must comply with Federal standards as published in the Code of Federal Regulations and as later amended; as well as State Laws and Program Regulations governing BMS.

Any nursing facility participating in both the Medicaid program and the Medicare program must comply with the higher standards of either program. Additional requirements may be found in Chapter 42 of the Code of Federal Regulations.

OHFLAC is responsible for conducting a periodic survey in each nursing facility to ascertain compliance with standards of participation in the Medicaid program. Based on OHFLAC’s recommendations, the authority to approve or terminate a nursing facility provider agreement rests with either the Secretary of the Federal Department of Health and Human Services (USDHHS) or the Secretary of the State Department of Health and Human Resources (WVDHHR) or his/her delegated representative.

Determinations made on behalf of either of these Secretaries/or his/her Representative are final with respect to compliance of nursing facility standards for participation in both programs. The determinations by OHFLAC are generally the basis for acceptance of an agreement of participation in the West Virginia Medicaid Title XIX Program; however, Federal and State laws may also impact the agreement for participation.
514.4.1 Employment Restrictions

Criminal Investigation Background Check (CIB) results which may place a member at risk of personal health and safety or have evidence of a history of Medicaid fraud or abuse must be considered by the nursing facility before placing an individual in a position to provide services to the member. At a minimum, a fingerprint-based State level criminal investigation background check must be conducted initially by the employer prior to hire and every three years thereafter throughout the remainder of the employment. If the prospective employee has lived out of state within the last five years, the agency must also conduct a federal background check utilizing fingerprints through the national crime information database (NCID). It is the responsibility of the employer to assure that the exclusion lists are checked monthly. The facility may employ an individual for a maximum of 60 days if a preliminary check is completed. The facility may choose to contract with a company that completes internet background checks use these results until the fingerprint results are received.

An individual cannot be considered to provide services nor can be employed by the nursing facility if ever convicted of:

- Abduction
- Any violent felony crime including but not limited to rape, sexual assault, homicide, felonious physical assault or felonious battery
- Child/adult abuse or neglect
- Crimes which involve the exploitation of a child or an incapacitated adult
- Felony domestic battery or domestic assault
- Felony arson
- Felony or misdemeanor crime against a child or incapacitated adult which causes harm
- Felony drug related offenses within the last 10 years from release of incarceration, if applicable or date of conviction if not incarcerated
- Felony DUI within the last 10 years from release of incarceration, if applicable or date of conviction if not incarcerated
- Hate crimes
- Kidnapping
- Murder/ or manslaughter
- Neglect or abuse by a caregiver
- Pornography crimes involving children or incapacitated adults including, but not limited to, use of minors or incapacitated adults in filming sexual explicit conduct, distribution and exhibition of material depicting minors or incapacitated adults in sexually explicit conduct or sending, distributing, exhibiting, possessing, displaying or transporting material by a parent, guardian or custodian, depicting a minor or incapacitated adult engaged in sexually explicit conduct.
- Purchase or sale of a child
- Sexual offenses including but not limited to incest, sexual abuse, or indecent exposure. Providers must check the list of excluded individuals/entities
Employment of an individual with one or more of the above listed convictions will result in recoupment of monies paid for services provided.

The following web addresses are provided to assist the governing body or designee to check applicants against the sex offender registries for West Virginia and contiguous states;

West Virginia’s state police offender registry is at www.statepolice.wv.gov
Ohio's sex offender registry is at www.drc.ohio.gov
Kentucky’s sex offender registry is at http://kspsor.state.ky.us/sor/html/SORSearch.htm
Virginia’s sex offender registry is at http://sex-offender.vsp.virginia.gov/sor/
Maryland’s sex offender registry is at www.dpscs.state.md.us
Pennsylvania’s sex offender registry is at http://www.pameganslaw.state.pa.us/

Current Federal requirements dictate that all States must check for exclusions. Check the fiscal agent's website at www.wvmmis.com for state updates. If aware of a recent conviction or change in status, appropriate action must be taken and BMS notified of the change as services cannot be reimbursed for any Medicaid covered services if the facility identified or becomes aware of a disqualifying conviction.

514.4.2 Staffing Requirements

In order to participate in the West Virginia Medicaid Title XIX Program, a nursing facility must have sufficient nursing staff (including licensed nurses and certified nurse aides) on a 24 hour basis to provide nursing and related services to attain or maintain the highest practicable physical, mental, and psychosocial well-being of each resident, as determined by resident assessments and individual plans of care. Federal and State requirements for sufficient nursing staff can be found at 42 CFR 483, 42 CFR 488, and WV Legislative Rule 64CSR13. Where there are differences between the specific Federal and State staffing requirements, the NF will be required to comply with the more restrictive requirements.

514.4.3 General Staffing Information

Only qualified staff shall provide services in a nursing facility. The nursing facility must employ staff sufficient in number and in qualifications as required to meet the needs of each resident pursuant to their care plans and to protect their health and safety.

- There must be on duty at all hours of each day sufficient staff in number and qualifications to carry out the policies, responsibilities, and programs of the facility. The nursing facility must employ and maintain sufficient staff on duty, awake and accessible.
The nursing facility administrator or designee assumes responsibility for the provision of services directly or through outside resources to meet the needs of each resident. The residents and their representatives or volunteers may not perform direct care services for individuals. At a minimum, the administrator or designee of the nursing facility is required to ensure the facility complies with WV Legislative Rule 64 CSR 13 for services to be provided in a licensed nursing home or an extended care unit of a licensed hospital.

The nursing facility must assure that all staff are properly licensed and competent to provide appropriate care.

514.4.4 General Administration

The governing body is responsible to ensure the nursing facility is administered in a manner that enables it to use its resources effectively and efficiently to attain or maintain the highest practicable physical, mental, and psychosocial well-being of each resident.

Policies must be documented as to the provision of services to residents in order to address quality of life, quality of care, resident rights and any other services within the scope of nursing facility services.

514.4.5 Governing Body and Management

The management of the nursing facility must identify an individual or individuals as the governing authority of the facility in accordance with 42 CFR 483.410 and WV Legislative Rule 64CSR13.

514.4.6 Physical Environment Requirements

In order to participate in the West Virginia Medicaid Title XIX Program nursing facilities must be equipped and maintained to provide a functional, sanitary and comfortable environment for all residents admitted for care.

The nursing facility must be in compliance with the 2005 Edition of the National Fire Protection Association (NFPA) of “NFPA 99 Standards for Health Care Facilities” as promulgated and mandatory references issued by CMS as currently published or modified in the future. Additionally, BMS requires adherence to the Guidelines for Design and Construction of Hospital and Health Care Facilities in establishing the Standard Appraised Value (SAV) for the capital component of the nursing facility rate.

BMS pays for an annual SAV inspection. If the first SAV inspection has been completed and the nursing facility requests an additional SAV inspection, the nursing facility is responsible for payment to the appraisal company approved by BMS, who completes the additional SAV inspection.

When the nursing facility has proposed changes to the physical plant, the governing body or designee of the nursing facility is responsible to notify BMS, in writing.
514.4.7 Administrative Policies

The governing body of a nursing facility must ensure the development of policies and procedures regarding all aspects of the operation of the facility, including policies and procedures regarding the provision of care and services to residents. These policies must be available to each resident and his/her representative.

All policies and procedures regarding the provision of care and services to residents must reflect current accepted standards and practices and must be reviewed and approved by the governing body or designee at least annually. All of these policies must be written or presented in a language/method of communication that can be understood by any individual admitted to the facility.

Additionally, all individuals residing within the facility must be informed in a language/method of communication which the individual or legal representative can understand regarding all rights and policies affecting their acceptance of services provided by the facility.

514.4.8 Emergency/Disaster Preparedness Procedure

The nursing facility's governing body or designee must have detailed written plans and procedures to meet all potential emergencies and disasters, such as fire, severe weather, and missing residents and must train all employees in emergency procedures when they begin to work in the facility, periodically review the procedures with existing staff, and carry out unannounced staff drills using those procedures.

The nursing facility’s emergency / disaster preparedness procedures must include at a minimum:

- How to shelter in place when indicated and how to care for residents when sheltering in place;
- How to evacuate all or part of the facility when indicated and how to care for residents in an emergency shelter when evacuation of the NF is indicated;
- Notification of the attending physician, EMS, law enforcement and other persons responsible for the residents;
- Arrangements for transportation;
- Arrangements for hospitalization;
- Arrangements for other appropriate services;
- Arrangements for emergency physician services, if the attending physician is not immediately available;
• Arrangements for securing the residents’ medical records and;

• Actions to be taken to locate a missing resident.

The nursing facility’s governing body or designee must ensure that staff rehearses and document, at least annually, actions to be taken in the event of a missing resident.

**514.4.9 Resident Rights**

The NF’s governing body or designee must:

• Establish a policy statement setting forth the rights of residents prohibiting the mistreatment, neglect, misappropriation of resident property or abuse of resident;

• Post the written resident rights policy for staff, resident, families or representatives and all interested parties to view; and

• Provide policies and procedures and ensure that each resident admitted to the facility is fully informed of his/her rights and responsibilities as a resident in the facility.

**514.4.10 Hospital Transfer Agreement**

Each nursing facility’s governing body or designee must show documentation of a written transfer agreement that must be in effect with one or more hospitals approved for participation under the Medicare and Medicaid programs in accordance with 42 CFR 483.75 (n). The agreement must include information necessary to provide quality care and continuation of services by either the hospital or the nursing facility.

The hospital transfer must include information regarding the resident and must include a copy of the Advanced Directives and the most current evaluations including a list of current medications and most recent PASRR Level II evaluation, if applicable.

**514.4.11 Services Provided by Outside Sources**

If a nursing facility does not provide a required service to meet the needs of one or more residents, the governing body or designee may enter into a written agreement / contract with an outside service, program, or resource to provide this service which is to be paid by the facility under the all-inclusive rate. The administrator or designee is responsible and accountable for assuring that outside sources meet the standards for quality of services and the timeliness of providing those services.

The administrator or designee must assure that the vendor and their staff is able to meet all mandatory educational, licensing, certification and criminal investigation background check requirements for the specific area of service(s) furnished and follow the policies and procedure of the nursing facility.
The agreement / contract must clearly state the responsibilities, functions, objectives, and the terms of the agreement and be signed and dated by both parties. See Section 514.8 – 514.8.9 for specific information regarding the all-inclusive rate.

514.5 QUALIFIED STAFF

514.5.1 Administrator

The day-to-day operations of each nursing facility must be directed by an individual identified as an administrator who is licensed by the West Virginia Nursing Home Administrators Licensing Board (WVNHALB). The WVNHALB may approve the director of nursing or another qualified individual to serve as the “Person in Charge” if a licensed nursing home administrator is not available. It is the responsibility of the Person in Charge to notify BMS directly of their designation as a temporary administrator.

In accordance with the Administrators licensure Rule 5.3.1.A. an administrator shall not administer or be the administrator of more than two nursing facilities at the same time, except that an administrator may oversee the operations of two nursing facilities which are within reasonable proximity (30 minutes or less), provided that such administrator is not administering more than a total combined one hundred twenty beds. The administrator of two facilities shall spend not less than an average of twenty hours per week at each nursing facility, and the administrator must employ the services of a full-time competent assistant at each nursing facility.

If an administrator oversees the operations of two NFs, the amount of time spent each week by the administrator at each of the two NF is to be documented. Documentation consists of weekly or monthly time cards, time sheets or work logs that are signed and maintained on file at the facility. Documentation must be made available immediately upon the request of BMS. If the documentation is not produced immediately, the records will be considered non-existent. “On-Call” time is not to be used in determining hours of service and will not be accepted.

According to 42 CFR 483.75 (d) (2)(i)(ii), the administrator is responsible for management of the facility.

514.5.2 Medical Director

The administrator shall designate, in writing, a physician (MD or Do) accountable to the governing body to serve as medical director to ensure that medical care provided to all resident is adequate and appropriate.

As a member of the resident care committee, the medical director is responsible and accountable for participating in the development, implementation, evaluation, and revision of resident care policies and procedures, to ensure that such procedures reflect current standards of practice for resident care and quality of life; and coordinating and evaluating medical care in the nursing facility.

DISCLAIMER: This manual does not address all the complexities of Medicaid policies and procedures, and must be supplemented with all State and Federal Laws and Regulations.
514.5.3 Physician Services

According to 42 CFR 483.40, a physician (MD or DO) must personally approve in writing, a recommendation that a person be admitted to a NF. Each resident’s care must be supervised by a physician at all times. The administrator or designee shall ensure that the medical care of each resident is supervised by a physician. Another physician must supervise the medical care of residents when their attending physician is unavailable.

The attending physician must review the resident’s total program of care, including medications and treatments, and examine the resident personally at each visit. The physician must write, sign and date progress notes at each visit and sign and date all physician orders. Any specialist who is called into the nursing facility must have a physician’s order for the service signed prior to the date of service. Standing orders are not allowed and routine screening services are not covered in relation to the specialist.

The resident must be seen within 72 hours following the admission to the nursing facility and at least every 30 days for the first 90 days after the admission and as the resident’s condition warrants. After the 90 day requirement been met, the physician must visit every 60 days or more often as the resident’s condition warrants.

After the initial visit, and completion of the visits required during the resident’s first 90 days in the nursing facility, at the option of the physician, required visits may alternate between personal visits by the physician and visits by a qualified physician extender (a physician’s assistant, an advance practice registered nurse or a clinical nurse specialist) who is licensed as such by the State of West Virginia, performing within their scope of practice, and is under the supervision of the physician following the above requirements. If the physician elects to alternate visits with a qualified physician extender, all requests for reimbursement from the Medicaid program must be submitted under the servicing provider’s number. Please refer to Chapter 519 Practitioner Services

The administrator or designee must provide or arrange for the provision of physician services 24 hours of every day.

514.5.4 Nursing Services

According to 42 CFR 483.30, the nursing facility must have sufficient nursing staff to provide nursing and related services to attain or maintain the highest practical physical, mental and psychosocial well-being of each resident, as determined by resident assessments and individual plans of care. The administrator and director of nursing at the nursing facility must follow licensure requirements to provide health services which assure that each resident receives treatments, medications, diets and other health services as prescribed and planned all hours of each day.

- The primary duties of certified nurse aides consist of direct resident care and services, as distinguished from the duties of paid feeding assistants and housekeeping, laundry and dietary functions.
Where residents are in a nursing facility located in a distinct part of a larger institution, each part of the institution must be separately staffed with adequate nursing personnel regardless of size.

24-hour health service requires that the number and type of personnel be sufficient to meet the total needs of the residents.

514.5.5 Director of Nursing (DON)

The administrator must designate, in writing, a registered nurse (RN), who is licensed by the West Virginia Board of Examiners for Registered Professional Nurses (RN Licensing Board), to serve as the Director of Nursing (DON) on a full-time basis. The DON must be on duty at least five days a week, eight consecutive hours a day. The administrator and DON are responsible for ensuring the nursing facility has sufficient direct care staff to deploy across all shifts and units to meet the assessed needs of resident on 24-hour basis.

514.5.6 Licensed Nurse

The administrator or designee is responsible for designating a licensed nurse to serve as a charge nurse on each shift. If an RN is not available in the facility, a licensed practical nurse (LPN) may serve in this capacity. All RNs and LPNs are required to follow the policies and procedures of the NF and work within the scope of their individual licenses.

A NF must have an RN on duty, in the facility, for at least eight consecutive hours, seven days a week. In NFs with fewer than sixty beds, the DON may serve to meet this requirement. During periods when there is not an RN on duty, there must be an RN on call.

514.5.7 Certified Nurse Aide (C.N.A)

The administrator or designee must receive registry verification from the West Virginia Nurse Aide Registry that a nurse aide has met training and/or competency evaluation requirements prior to hire into the nursing facility and retain these documents in the individual's personnel file.

514.5.8 Social Services

The administrator or designee is responsible for designating a qualified social worker suited by training or experience, in accordance with WV Legislative Rule 64CSR13 and 42 CFR 483.15(g)(1)(2)(3)(i)(ii), to provide or arrange for the provision of social services as needed by the resident to promote the resident highest physical, mental and psychosocial wellbeing. These services must be integrated with all other elements of the overall plan of care.

The social worker is an individual who is currently licensed by the West Virginia Board of Social Work Examiners as a licensed social worker, (LSW) at entry level or higher and has some background, knowledge or experience related to social service activity in order to perform this function. If the facility's governing body/ designee does not employ an individual qualified by training or experience, arrangements must be made through written agreement/contract with an...
outside resource (a person or agency) to provide direct medically-related social services as needed by the resident or to act as a consultant.

The chief function of the social worker is to help with problems which inhibit or prevent the resident's social adjustment and, because of this, affect his/her ability to benefit from their stay in the nursing facility.

Social service activity is not limited to the resident alone, but will usually include contact with the resident's family, close friends, and the coordination of services with other agencies, such as WVDHHR, Social Security Administration (SSA), Veteran's Administration (VA), Aging & Disability Resource Centers, community service organizations, etc. A good working knowledge of community resources is a valuable asset for the social worker.

The social worker is to provide indirect services to the resident through staff education both by participation in the nursing facility's in-service training program and through conferences with staff who are concerned with the resident's care. To carry out this function, the social worker will need to have a thorough knowledge of the nursing facility’s method of operation and its practices and policies.

Sales and marketing activities do not constitute medically-related social services.

**514.5.9 Activities Director**

In compliance with 42 CFR 483.15 (f) (1)(2)(i) (A)(B)(ii)(iii)(iv) the nursing facility administrator or designee must provide for an ongoing program of activities designated to meet, in accordance with the comprehensive assessment, the interests and the physical, mental, and psychosocial well-being of each resident.

The administrator or designee must designate a qualified professional who is a qualified Therapeutic Recreation Specialist or an Activities Professional, who is licensed or registered, by an accrediting body on or after October 1, 1990.

The Activities Director is responsible for developing programs which provide constructive supervision and services directed toward restoring and maintaining each resident at his/her best possible functional level including activities designed to encourage self-care and independence.

The Activities Director shall develop a plan for independent and group activities for each resident in accordance with his/her needs and interests. The plan is incorporated in the overall plan of care and is reviewed with the resident's participation at least quarterly and revised as needed and documented in the care plans and MDS.

The activities director shall provide opportunities for meaningful activities and social relationships. These may include holiday celebrations, parties, indoor and outdoor games, or personal hobbies. Educational or recreational activities sponsored by groups within the community should be encouraged and planned with these community groups or agencies.
514.5.10 Food and Dietary Director

In accordance with 42 CFR 483.35 and WV Legislative Rule 64CSR13, the administrator or designee must employ a qualified dietitian either full-time, part-time or on a consultant basis.

A qualified licensed dietitian is one who is registered by the Commission on Dietetic Registration and licensed by the West Virginia Board of Licensed Dietitians or is qualified by the West Virginia Board of Licensed Dietitians, and is licensed by that board to provide professional nutritional services in West Virginia.

Consultation will be based upon the resident needs and will occur at intervals of no less than every 30 days and for no less than 8 hours.

If a full-time qualified dietitian is not employed, the administrator or designee must, in accordance with WV Legislative Rule 64CSR13, utilize the services of a full-time qualified dietary manager who shall meet one of the following qualifications:

- A dietetic technician registered by the American Dietetic Association; or
- A certified dietary manager as certified by the Dietary Manager’s Association; or
- A graduate of an associate or baccalaureate degree program in foods and nutrition or food service management.

The dietary manager, under the direction of the dietitian, is responsible for the daily operation of the dietetic service. A nursing facility must employ sufficient support personnel competent to carry out the functions of the dietary service. The administrator or designee shall ensure the dietary manager utilizes the services of sufficient support personnel competent to carry out the functions of the dietary service.

The dietary manager must ensure the nutritional needs of all residents are met and that preferences are accommodated. Each resident must have a physician’s order for the specific type of diet he/she is to receive as set forth in the nursing facility’s dietary manual.

Rules regarding the frequency of meals, sanitary conditions and emergency supplies may be found at WV Legislative Rules 64CSR13 (Nursing Homes) and 64CSR17 (Food Establishments).

514.6 ELIGIBILITY REQUIREMENTS

Eligibility requirements for residents are as follows:

514.6.1 Application Procedure

An application for nursing facility benefits may be requested by the resident, the family/representative, the physician, or a health care facility. The steps involved in approval for payment of nursing facility services are:
• The financial application for nursing facility services is made to the local WV DHHR office.
• The medical eligibility determination is based on a physician’s assessment of the medical and physical needs of the individual. At the time of application the prospective resident should be informed of the option of receive home and community based long-term. The PAS assessment must have a physician signature dated not more than 60 days prior to admission to the nursing facility.

514.6.2 Pre-Admission Screening and Resident Review (PAS)

Pre-admission screening for medical necessity of nursing facility services is a two-step process. The first step (Level I) identifies the medical need for nursing facility services based on evaluation of identified deficits and screens for the possible presence of a major mental illness, mental retardation, and/or developmental disability. The second step (Level II) identifies if the individual needs specialized services for a major mental illness, mental retardation, and/or developmental disability.

514.6.3 Medical Eligibility Regarding the Pre-Admission Screening

To qualify medically for the nursing facility Medicaid benefit, an individual must need direct nursing care 24 hours a day, 7 days a week. BMS has designated a tool known as the Pre-Admission Screening form (PAS) (see appendix II) to be utilized for physician certification of the medical needs of individuals applying for the Medicaid benefit.

An individual must have a minimum of five deficits identified on the PAS. These deficits will be determined based on the review by BMS/designee in order to qualify for the Medicaid nursing facility benefit.

These deficits may be any of the following:

• #24: Decubitus – Stage 3 or 4
• #25: In the event of an emergency, the individual is c) mentally unable or d) physically unable to vacate a building. a) and b) are not considered deficits.
• #26: Functional abilities of the individual in the home.
  Eating: Level 2 or higher (physical assistance to get nourishment, not preparation)
  Bathing: Level 2 or higher (physical assistance or more)
  Grooming: Level 2 or higher (physical assistance or more)
  Dressing: Level 2 or higher (physical assistance or more)
  Continence: Level 3 or higher (must be incontinent)
  Orientation: Level 3 or higher (totally disoriented, comatose)
  Transfer: Level 3 or higher (one person or two persons assist in the home)
  Walking: Level 3 or higher (one person assist in the home)
  Wheeling: Level 3 or higher (must be Level 3 or 4 on walking in the home to use, Level 3 or 4 for wheeling in the home.) Do not count outside the home.
• #27: Individual has skilled needs in one these areas – (g) suctioning, (h) tracheostomy, (i) ventilator, (k) parenteral fluids, (l) sterile dressings, or (m) irrigations.
• #28: Individual is not capable of administering his/her own medications.

This assessment tool must be completed, signed and dated by a physician. The physician’s signature indicates “to the best of my knowledge, the patient’s medical and related needs are essentially as indicated”. It is then forwarded to the Bureau or their designee for medical necessity review. The assessment tool must be completed and reviewed for every individual residing in a nursing facility, regardless of the payment source for services.

PAS’ may be submitted to the Bureau’s Utilization Management Contractor electronically through a secure website. The faxing option will still be available and is entered into the direct data entry (DDE) by the UMC. When a PAS is submitted electronically, the physician has two options for providing attestation that the patient’s medical and related needs are accurate as indicated with their signature.

1. If the physician has the capability for electronic signature (an actual version of their signature, such as when one signs for a credit card or package, the signature is created electronically), not just a typed version of their name; OR,
2. #39 will be checked on the PAS which certifies Dr. Jane Doe has completed this PAS (his or her name will be typed out). Then the PAS MUST be printed off and the physician’s physical signature (such as the signature you see when one signs a letter) must be added. The signed page is attached to the electronic record and/or sent to the nursing facility accepting the resident.

On either option for signature, the date is automatically populated and that will be the date for the start of Medicaid reimbursement for services, if the individual meets financial eligibility for the nursing facility benefit. However, the PAS must be signed either electronically or physically by the physician in order for the PAS to be valid.

If an actual written signature either from the resident or responsible party cannot be obtained, verbal consent is necessary. The individuals obtaining verbal consent must sign/date along with the witness who also signs/dates. However, the entity completing the PAS MUST obtain an actual signature from the resident or responsible party on the hard copy of the PAS which will be the PAS on file with the nursing facility and available for review upon request.

Each nursing facility must have a signed, original pre-admission screening tool to qualify the individual for Medicaid benefits and to meet the Federal PASRR requirements. Should the receiving nursing facility fail to obtain an approved assessment with an original signature from the resident or responsible party prior to admission of a Medicaid eligible individual, the Medicaid program cannot pay for services rendered at the nursing facility for that individual. The individual cannot be charged for the cost of care during the non-covered period.

A Medicaid member, who had Medicare and reaches the 21st day of Medicare Coverage and will be converting to Medicare Part A coverage with Medicaid as the co-pay, does not need a new PAS as long as the facility has a current PAS that is no more than 60 days old. If the
individual has not been a member of Medicaid upon admission to the nursing facility, a new PAS will need to be completed before the Medicare benefit has ended and the Advanced Beneficiary Notice of Medicare Non-Coverage has been issued. This ensures proper placement if circumstances warrant long-term placement for the individual in the nursing facility after Medicaid becomes the primary payer.

A new medical assessment must be completed for Medicaid Medical Eligibility for the nursing facility resident for all of the following situations:

- Application for the Medicaid nursing facility benefit;
- Resident transfers from one nursing facility to another nursing facility, even if the transfer is within the same corporation;
- Resident returns to the same nursing facility from any healthcare setting other than an acute care hospital;
- Resident transfers to an acute care hospital, then to a hospital-based skilled nursing unit, and then returns to the original nursing facility;
- Resident converts from private pay or any other payer to Medicaid; or
- Expiration of the Current PAS due to time limitation.

514.6.4 Physician Certification

A physician who has knowledge of the individual must certify the need for nursing facility care. Medical eligibility for persons in need of nursing facility services is determined initially from the information supplied by the physician on the specified assessment tool. The information must be current as to the individual’s need for nursing facility care. With the physician’s signature and date, this is considered the certification for nursing facility services.

514.6.5 Medical Necessity (Level I)

All individuals admitted or requesting admission to a Medicaid certified nursing facility must be screened for the possible presence of a major mental illness, and/or an intellectual/developmental disability (MI/I/DD). This review is identified as the Level I evaluation. Any individual identified with the possible presence of mental health issues must be further evaluated.

514.6.6 Pre-Admission Screening and Resident Review (PASRR) (Level II)

If the Level I evaluation found the possible presence of MI and/or I/DD, further evaluation of the individual must be completed to obtain a definitive diagnosis and the need for specialized services for the mental health condition. This evaluation is identified as a Level II evaluation and must be completed by an individual identified by the BMS as an approved Level II
evaluator. All Level II evaluators are either licensed psychologists or Board certified psychiatrists.

It is the responsibility of the facility in which the PAS is completed, to arrange for the Level II evaluation. This evaluation must be completed, including a report of the mental health status and whether specialized services are needed, within (7 to 9) seven to nine days following the referral. The Level II must be completed prior to the individual's admission into a nursing facility. Upon completion of the evaluation, both the referring entity and the PASARR Level II evaluator must provide the complete mental health evaluation and the original Level I evaluation to the receiving nursing facility. Additionally, the results of the evaluation shall be sent to Psychological Consultants and Associates (PC&A) via mail to 202 Glass Drive, Cross Lanes, West Virginia 25313 or fax to (304) 776-7247 on the applicable forms.

42 CFR 483.106 (ii) states “In cases of transfer of a resident with MI or IDD from a nursing facility to a hospital or to another nursing facility, the transferring nursing facility is responsible for ensuring that copies of the resident’s most recent PASARR and resident assessment reports accompany the transferring resident”. This regulation applies to all residents of nursing facilities.

Repeat Level II evaluations are necessary when there is an acute exacerbation of the mental illness resulting in an inpatient admission to a psychiatric facility/psychiatric unit. The discharging facility must complete a new PAS, assuring that #31 on the PAS is completed accurately, in which a Level II will be triggered.

514.6.7 Specialized Services for I/DD

Specialized services for an individual identified as I/DD are a continuous program for an individual requiring aggressive, consistent implementation of a program of specialized and generic training, treatment, health and related services developed by an IDT that is directed towards:

- The acquisition of the behaviors necessary for the individual to function with as much self-determination and independence as possible; and
- The prevention or deceleration of regression or loss of their current optimal functional status.

These services are generally provided in an intermediate care facility for persons with I/DD or a related condition. If the resident is presently residing in a nursing facility when the Level II is completed and specialized services for I/DD is indicated, and the responsible party refuses this recommendation, this refusal must be documented in the resident’s record and readdressed with the responsible party on a continuing quarterly basis or until a Level II recommends otherwise.

514.6.8 Specialized Services for Mental Illness

Specialized services for an individual with an acute exacerbation of a major mental illness are the continuous and aggressive implementation of an individualized plan of cares that:
DISCLAIMER: This manual does not address all the complexities of Medicaid policies and procedures, and must be supplemented with all State and Federal Laws and Regulations.
It is the responsibility of the nursing facility to notify the local WV DHHR office when a Medicaid member is admitted to the facility and when a member discharges from the facility in order for the facility and member to receive the appropriate benefit.

### 514.6.11 Admission Policies

A nursing facility must not require a resident, a potential resident or his/her representative to waive rights to Medicaid benefits. A governing body or designee of a nursing facility must not charge, solicit, accept or receive any gifts, money, donations or other consideration as a precondition of admission, expedited admission or continued stay in the facility for any person eligible for Medicaid.

The WVDHHR has established a process of evaluation to determine eligibility for long term care services under the Medicaid Program. The evaluation is made on each member from information supplied by a physician, member or family/representative, health care facility and/or eligibility worker in the local Department of Health and Human Resources office. This determination for the Medicaid benefit for nursing facility is based on both medical and financial criteria. BMS or its designee is responsible for the medical necessity determination and the WV Bureau for Children and Families is responsible for the financial determination. The administrator or designee is responsible for verifying continued eligibility for residents.

Medical eligibility must be established prior to payment for services. Medicaid will not pay for any services prior to the resident qualifying for services both medically and financially.

The local WVDHHR office is responsible for notifying the individual/representative, the Bureau and the nursing facility of the date Medicaid eligibility begins.

### 514.6.12 Physician Recertification of Continued Stay

Recertification of the continuing need for nursing facility care must be documented in the resident’s medical record by the physician at 60days, 180days, then annually after the initial certification. The administrator/designee must obtain recertification documentation from the physician for each nursing facility resident for whom payment is requested under the Medicaid program.

### 514.7 MANDATORY SERVICES

The following are mandatory services and are included in the per diem rate

#### 514.7.1 In-Services Education Program

A written orientation program must be received by all new employees. The orientation program must be maintained at the facility. This program must include:

- A review of all policies for the nursing facility that pertain to the employee’s position;
- An ongoing, in-service education plan for the development and improvement of skills
of all personnel at the nursing facility;
- All State and Federal regulations, including WV Legislative Rule 64CSR13 (the Nursing Home Licensure Rule) which are relevant to the employees position.

The personnel files for each individual employed by the nursing facility must include written documentation indicating the dates the employee participated and completed the orientation program and any staff development in-service training conducted thereafter.

514.7.2 Pharmacy Services

An administrator or designee must assure that pharmaceutical services are provided as outlined in 42 CFR 483.60 to accurately and safely provide or obtain pharmaceutical services, which include the provision of routine and emergency medications and biologicals and consultation of a licensed pharmacist, in order to meet the needs of its residents.

The administrator or designee shall assure the development and implementation of written procedures based on policies approved by the governing body, including procedures that assure the accurate acquisition, receipt, dispensing and administration of all medications and biologicals.

The administrator or designee shall assure that pharmaceutical services are provided in accordance with this policy and all other applicable Federal, State and local laws and the rules of the West Virginia Board of Pharmacy. The administrator or designee must employ or obtain the services of a pharmacist who is licensed to practice in West Virginia and is currently registered as a consultant pharmacist with the West Virginia Board of Pharmacy.

The consultant pharmacist shall review the medication regimen of each resident once a month or more frequently based on the resident’s needs. The consultant pharmacist shall document the results of each resident’s medication regimen review in the resident’s medical record. The medication regimen review shall include substances that are regarded as herbal products or dietary supplements. The consultant pharmacist shall report any irregularities in the medication regimen to the attending physician and the director of nursing. The nursing facilities pharmacist consultant must be available to advise the nursing facility regarding Medicaid drug coverage and limitations.

Drugs and biologicals used in the nursing facility must be labeled in accordance with the requirements of Federal, State and local laws, rules and regulations. The labels must include the appropriate accessory and cautionary instructions with the expiration date when necessary and must conform to the physician order and must adhere to all applicable State Board of Pharmacy rules for labeling.

In accordance with State and Federal laws, the administrator or designee must store all drugs and biologicals in locked compartments under proper temperature controls and permit only authorized personnel to have access to the keys. The governing body or designee must provide separately locked, permanently affixed compartments for the storage of drugs subject to
abuse and controlled drugs as identified by Federal regulations. The nursing facility may also use single unit package drug distribution systems in which the quantity stored is minimal and a missing dose can be readily detected.

The administrator or designee must establish a policy to assure residents’ requests for obtaining prescription medications from sources other than the contracted pharmacy will be honored.

Prescription drugs are covered for residents of nursing facilities when prescribed by a qualified practitioner and furnished by a Medicaid participating pharmacy. The coverage rules and regulations may be found in Chapter 518 Pharmacy Services.

Residents are exempt from all co-pay requirements. Non-covered drugs are not reimbursed by Medicaid for residents of nursing facilities.

514.7.3 Rehabilitation Services

If specialized rehabilitative services such as, but not limited to, physical therapy, speech-language pathology, occupational therapy, respiratory therapy and psychological or psychiatric rehabilitative services, are required in the resident’s comprehensive plan of care, the administrator or designee must provide the required services directly or in accordance with 42 CFR 483.45 and §514. 8.2 of this manual. These services are covered services included in the reimbursement from Medicaid.

514.7.4 Minimum Data Set (MDS)

The Minimum Data Set (MDS), Version 3.0 with the RUGs III and the West Virginia-specific Section S are to be used by NFs to fulfill the federally mandated requirements for payment.

These forms may be found in the Resident Assessment Instrument (RAI) Manual as published and periodically updated by CMS; please refer to OHFLAC website for Section S instructions www.wvdhhr.org/ohflac specifications.

CMS requires that a comprehensive MDS assessment be completed on every resident admitted into a NF by day 14 of the admission and reassessed on at least a quarterly basis and annually thereafter. Reference should be made to the RAI manual for the complete Omnibus Budget Reconciliation Act (OBRA) assessment schedule.

514.7.5 MDS Submission Criteria for Reimbursement

BMS utilizes the MDS assessments to determine (through the West Virginia specific 29 – case mix grouper), the acuity level of each individual residing in the nursing facility. West Virginia has case mix classes 01-29, (when billed on the UB claim form or 837I format, the scores are depicted as AAA01-AAA29). The case mix workbook may be found online at www.dhhr.wv.gov/bms. The billing schedule is published annually, which may also be found on the BMS website at www.dhhr.wv.gov/bms, with the nursing facility billing deadline dates, as well as the MDS extraction date.
The nursing facilities must transmit all assessments that correspond with claims scheduled for payment in that month at least 36 hours in advance of this extraction. If MDS transmissions occur on or after the MDS extraction date, the MDS assessment will not be included until the following month’s extraction. Therefore, authorizations in the claims payment system will not be loaded manually if the transmissions occur on or after the extraction date.

When the MDS extraction is completed, this is given to the fiscal agent for BMS in order to create authorizations for nursing facility placement. Nursing facility providers may review their MDS authorization reports on the web portal to identify which MDS assessments were loaded from the extract received.

Authorizations are created for a three-month period of time and are based upon the ARD (i.e., if the MDS assessment has an ARD of 06/30/11, the authorization in the claims processing system will be created for 06/01/11 - 08/31/11). If a resident has two MDS assessments with ARD dates in the same month, the second assessment is to be used for billing, (i.e. assessment with ARD on 08/05/11 and a second assessment was completed with ARD 08/19/11, the second MDS submitted will be the assessment used by the facility for claim submission).

Please take note that, if a member’s MDS assessment is missed or submitted late, the default rate must be billed.

514.7.6 Care Area Assessments (CAAs)

Per Federal regulations, each triggered Care Area Assessments (CAAs) must be addressed further to facilitate design of the care plan, but it may or may not represent a condition that should be addressed in the care plan. The CAAs and the process for their completion are published and periodically updated by CMS and may be found in the RAI Version 3.0 User Manual.

514.7.7 Care Plan (CP)

A comprehensive care plan must be developed by the interdisciplinary care plan team at the nursing facility for each resident that includes measurable objectives and time-tables to meet a resident’s medical, nursing, mental and psychosocial needs that are identified in the comprehensive assessment as promulgated in 42 CFR 483.20(k).

514.8 SERVICES UNDER ALL-INCLUSIVE RATE

BMS will pay an all-inclusive per diem rate for nursing facility services. This rate represents payment for all medically necessary and medically appropriate services and items that are required to be provided by the nursing facility to achieve optimum quality care and quality of life for each resident.
514.8.1 Nursing Services

Covered services include general nursing and restorative nursing care such as, but not limited to, medication administration, treatments, assessment, care planning, and restorative programs. General nursing care consists of, but is not limited to, personal care services rendered by the nursing staff and assistance with activities of daily living rendered by any staff including hair and nail hygiene, bathing and routine foot care.

514.8.2 Therapy Services

Covered services include physical therapy, speech-language pathology, occupational therapy, respiratory therapy, psychological and psychiatric rehabilitative services. Services must be documented in the resident’s physician orders and be included in the plan of care.

Rehabilitative services, whether provided either directly or through qualified outside resources must be designed to preserve and improve abilities for independent function, to prevent progressive disabilities, and restore maximum function.

514.8.3 Non-Prescription Items

The nursing facility’s all-inclusive rate includes over-the-counter drugs. Additionally, all diabetic supplies including diabetic testing supplies and syringes/needles are covered in the facility’s all-inclusive rate.

514.8.4 Medical Supplies, Accessories and Equipment

Facilities may not charge a resident or the Medicaid program for routine personal hygiene items and services required to meet the needs of resident, as this cost is included in the all-inclusive rate. These include but are not limited to; hair hygiene supplies; comb; brush; bath soap; disinfecting soaps or specialized cleansing agents when indicated to treat special skin problems or to fight infection; razor; shaving cream; toothbrush; toothpaste; denture adhesive; denture cleaner; dental floss; moisturizing lotion; tissues; cotton balls; cotton swabs; deodorant; incontinence care and supplies; sanitary napkins and related supplies; towels; washcloths; hospital gowns; nail services including routine trimming, cleaning, filing, and care for ingrown or damaged nails; bathing and basic personal laundry.

Also included are nursing supplies including over the counter wound care items; sterile saline; pressure ulcer treatment supplies; dressings: bandages; tape and any other wound care supplies prescribed by the physician, syringes and needles; dietary supplements; salt and sugar substitutes; tube feedings and equipment needed to deliver the feeding; disposable incontinence supplies; supplies such as catheters; colostomy and ileostomy bags and any other incontinence supply items prescribed by a physician.

Medical supplies, accessories and equipment that the nursing facility is required to have available include, but are not limited to, hospital beds, standard wheelchairs, walkers,
gerichairs, crutches, canes, bedside commodes, traction equipment, blood pressure equipment, protective restraints, lifts, nebulizers, air mattresses, weight scales and gait belts.

514.8.5 Room and Board

Covered services include the resident’s room and basic room furnishings, including a bed of proper size, length, and height for each resident; a clean, well–maintained, comfortable mattress of the proper length for each resident; pillows; clean linens and bedding appropriate to the weather and climate; functional furniture appropriate to the resident’s needs; and individual closet space with clothes racks, hangers and shelves.

514.8.6 Laundry

Covered services include laundry services such as basic personal laundry.

514.8.7 Food and Dietary Services

Covered services include all nutritional meals, snacks, food supplements, tube feedings, supplies and equipment required for tube feedings, and food substitutes needed for special diets.

514.8.8 Activities Program

Covered services include the cost for the provision of an activities program for residents.

514.8.9 Social Services

Covered services include the provision of medically-related social services and coordination with other social service agencies in the resident’s community and the resident’s family.

514.8.10 Non-Emergency Transportation Services

Nursing facilities must provide non-emergency medical transportation (NEMT) which includes non-emergency ambulance transportation for all residents. If the nursing facility does not provide these services with a facility owned vehicle, the facility must contract with a transportation vendor that provides non-emergency van and non-emergency ambulance transportation. These contracted services for transportation are not billable to West Virginia Medicaid by the facility or transportation provider. Additionally any nursing facility that may be enrolled as a non-emergency transportation provider with WV Medicaid shall not bill for NEMT reimbursement for transportation provided to their residents. The nursing facility must cover the cost of these transportation services and may be counted as an allowable expense on the cost report, under nursing- purchased services.

However, the cost of all non-emergency medical transportation, provided by a vehicle owned by the nursing facility, is included in the all-inclusive Medicaid rate. Refer to section 514.13.19.
Upon transfer to another nursing facility, it is the responsibility of the receiving nursing facility to provide the transportation to their facility. This is because the sending facility is not reimbursed for the day of discharge and the receiving facility is reimbursed for the day of admission.

514.9 RESIDENT RIGHTS

As promulgated in 42 CFR 483.10, the resident has a right to a dignified existence, self-determination, and communication and access to persons and services inside and outside the facility.

514.9.1 Notice of Rights

A facility must protect and promote the rights of each resident, including each of the rights defined below. Written policies and procedures must be implemented to ensure that each resident or his/her representative is fully informed of his/her rights and responsibilities. Notification of resident rights must be provided periodically during the stay to the resident/representative.

The administrator or designee must encourage and assist the resident throughout the period of stay to exercise rights as a resident and a citizen including the right to vote, formulate advanced directives and meet and organize in resident/representative groups to voice grievances and recommend changes in policies and services to facility staff and/or other representatives of choice free from restraint, interference, coercion, discrimination or reprisal. The administrator or designee must assure each resident civil and religious liberties, privacy of telephone and written communications, provide services and care consistent with special needs and individual preference, and respond promptly to requests.

In the case of a resident adjudicated to be incompetent, the rights described in this provision shall be exercised by the individual’s guardian or committee, in accordance with the West Virginia Guardianship Act. If the resident has not been adjudged incompetent by the State, any legal surrogate designated in accordance with State Law may exercise the resident’s rights to the extent provided by State Law.

The administrator or designee must inform each resident and/or his/her representative both orally and in writing, in a language or method of communication that the resident understands of his/her rights and of all rules and regulations governing patient conduct and responsibilities. Such information must be provided prior to or at the time of admission, or in the case of residents already in the facility, upon the facility’s adoption or amendment of resident right’s policies. Written acknowledgment of the receipt of resident rights information must be maintained within the facility.

The administrator or designee will keep all personal and medical records private and refuse to allow access to these records without written authorization by the resident/representative unless State and/or Federal regulations regarding release of information supersedes. The resident or is/her representative will have access to all records pertaining to the resident including clinical
record. Upon receipt of a written request by the resident or his/her representative, the administrator or designee will provide within two working days copies of all records requested at a cost not to exceed the community standard for photocopies.

The resident has the right to receive adequate, appropriate health care and appropriate protection and support services with reasonable accommodation of individual need and preference including, but not limited to selection of personal physician. The resident or his/her representative has the right to be fully informed in a language that he/she can understand of his/her total health status. The resident or his/her representative has the right to refuse treatment, and to refuse to participate in experimental research.

The resident or his/her representative has the right to be present and participate in the formulation of a care plan as well as be consulted in advance about any changes in treatment or care. Self-medication by a resident must be allowed if individual capabilities are assessed and documented by professional staff.

Outside of the formal plan of care, the resident has the right to plan personal daily activities and participate in activities both inside and outside the facility.

Residents who are entitled to Medicaid benefits or become eligible for Medicaid benefits must be informed in writing of the items and services under the State Plan for which the resident may not be charged as well as the items for which the resident may be charged and the amount of the charges including an explanation of the resource amount. This information must also be provided to the resident annually during the resident’s stay in the nursing facility.

A resident of a nursing facility must be provided a room as homelike as possible according to individual tastes, desires and medical necessities. Personal furnishings including furniture must be allowed depending on space. A private storage space within the personal room for clothing and possessions must be provided. The administrator or designee must take reasonable precautions to protect and treat personal possessions with respect, as well as investigate incidents of loss, damage or misappropriation of property.

The facility must provide a written description of legal rights including:

- The manner of protection of personal funds;
- The names, addresses, and telephone numbers of all pertinent State advocacy groups;
- A statement that the resident may file a complaint with the State survey and certification agency concerning resident abuse, neglect, and/or misappropriation of funds or property in the facility;
- The name, specialty and way of contacting the physician responsible for the care of the resident; and
- The procedures for applying for and using Medicare and Medicaid benefits as a resident of a nursing facility.
514.9.2 Transfer and Discharge Policies

According to 42 CFR 483.12, transfer and discharge of an individual includes movement of a resident to a bed outside of the Medicaid-certified portion of the facility, whether that bed is in the same physical plant. Transfer and discharge does not refer to movement of a resident to a bed within the Medicaid-certified portion of the facility.

The administrator or designee must permit each resident to remain in the facility, and not be transferred or discharged from the facility unless one of the following conditions is met:

- The transfer or discharge is necessary for the resident’s welfare when the needs of the resident cannot be met in the facility; or
- The transfer or discharge is appropriate because the health of the resident has improved sufficiently that the individual no longer meets the medical criteria for nursing facility services; or
- The safety of individuals in the facility is endangered; or
- The health of individuals in the nursing facility would otherwise be endangered; or
- The resident has failed, after reasonable and appropriate notice, to pay for (or to have paid under Medicaid) a stay at the nursing facility, including but not limited to, the amount of money determined by the financial eligibility evaluation as co-payment for the provision of nursing facility services; or
- The facility ceases to operate; or
- The resident is identified by the State and/or Federal certification agency to be in immediate and serious danger.

Documentation must be recorded in the resident’s medical record by a physician of the specific reason requiring the transfer or discharge. Discharge documentation is required regardless of the reason for discharge.

Before the nursing facility transfers or discharges a resident, the administrator or designee must notify the resident and/or the responsible party verbally and in writing, in a language that is understandable to the parties, of the intent and reason for transfer or discharge. The same information must be recorded in the resident’s medical record and a copy of this written notice must be sent to the State Long-Term Care Ombudsman or his/her designee. Except in the case of immediate danger to the resident and/or others as documented, the notice of transfer or discharge must be provided at least 30 days prior to the anticipated move to ensure a safe and orderly discharge to a setting appropriate to the individual’s needs.
Waiver of this 30-day requirement may be appropriate if the safety of individuals in the facility would be endangered, the immediate transfer is required by the resident’s urgent medical needs, or a resident has not resided in the nursing facility for 30 days.

The written notice must include the following:

- The effective date of the transfer or discharge;
- Reason for the discharge;
- The location or person(s) to whom the resident is transferred or discharged;
- A statement that the resident has the right to appeal the action to the State Board of Review, during this time of appeal, the resident/member may choose to stay in the facility;
- The name, address and telephone number of the State long term care ombudsman;
- The mailing address and telephone number of the agency responsible for the protection and advocacy of developmentally disabled and mentally ill individuals.

It is the responsibility of the nursing facility to notify the local WVDHHR office when a Medicaid member is admitted to the facility and when a member discharges from the facility in order for the facility and member to receive the appropriate Medicaid benefit.

514.9.3 Bed Reservation

A nursing facility may receive Medicaid per diem reimbursement to reserve a resident’s bed (bed hold) during his/her temporary absence from the facility. This is paid at the facility’s established Medicaid base rate.

The facility’s occupancy must be 95% or greater as of midnight on the day immediately before the time that the resident leaves and there must be a current waiting list for admission to the nursing facility. The midnight census must be obtained daily and kept either in hard copy or electronic format and must contain, at a minimum, the names and ID numbers for each resident. A waiting list for admission must be maintained either in hard copy or electronic format by day and must contain, at a minimum, the names, addresses and contact numbers of the individuals on the waiting list and must be available immediately upon request by the Department.

A day of leave is defined as a continuous 24-hour period. At the time the resident leaves the facility, the primary payer for services must be Medicaid. Bed reservation days may be for acute care hospitalization or a therapeutic leave.

The resident whose bed is reserved is to be accepted by the facility immediately upon discharge from the hospital or return from therapeutic leave. Placement is to be in the same bed and living space occupied by the resident prior to the hospital or therapeutic leave of absence unless
the resident’s physical condition upon returning to the facility prohibits access to the bed previously occupied. If the nursing facility discharges a resident and return is not anticipated, as indicated on the MDS, the facility cannot charge BMS for a Medicaid bed hold.

When all hospital or therapeutic days have been used by a Medicaid resident, a facility may charge a resident to reserve a bed only when there are no vacancies and there is a current waiting list. Families that are willing and able are free to pay these charges, and the amount paid is not considered as a resource or income for Medicaid purposes.

Personal needs allowance may be used to reserve a bed only with the resident/member or responsible party's written consent. The resident's contribution to the cost of care (resource) may not be used to pay to reserve a bed. After a hospitalization or a leave of absence for which there was no bed-hold, a former resident has the right to be re-admitted to the first available bed in a semi-private room in the nursing home from which he or she came if the resident requires the services provided by the nursing home and has not been out of the facility for more than 30 days.

514.9.4 Medical Leave of Absence

The medical leave of absence is payable for a resident who is admitted to an acute care hospital for services that can only be provided on an inpatient basis, who is expected to return to the facility, and whose stay in the acute care facility is 24 hours or greater. The maximum number of medical leave of absence days which may be reimbursed for an individual for a medical leave of absence is 12 days in a calendar year (i.e. January 1 through December 31).

The resident’s medical record must contain the physician’s order, the date and time the resident is transferred to the hospital and the date and time the resident returns to the reserved bed in the nursing facility. The day of transfer from the nursing facility to the hospital is counted as Day one of the leave. If the Medicaid member returns to the nursing facility in less than 24 hours, this is not considered a leave day. If the resident expires in the hospital, is transferred to another facility or goes home, that day must be considered the day of discharge from the nursing facility.

514.9.5 Therapeutic Leave of Absence

For a therapeutic leave of absence, such as a home visit, to be eligible for payment, the medical record must contain a physician’s order for therapeutic leave and must be a part of the resident’s plan of care. The maximum number of therapeutic leave of absence days which may be reimbursed for an individual resident is 6 days in a calendar year (i.e. January 1 through December 31).

The medical record of the individual requesting therapeutic leave must contain a physician’s order, the date and time of the beginning of the therapeutic leave, and the date and time the resident returns to the reserved bed in the nursing facility. For therapeutic leave, the date the member leaves the nursing facility is counted as a leave day and the day the resident returns to the facility is not counted as a therapeutic leave day.
514.9.6 Resident Personal Funds

The resident has the right to manage his or her own financial affairs and the administrator or designee shall not require residents to deposit their personal funds with the nursing facility, in compliance with the Code of Federal Regulations. Upon written authorization of a resident, the administrator or designee shall hold, safeguard, manage and account for the personal funds of the resident deposited with the nursing facility as specified in the following sections.

514.9.7 Deposit of Funds

According to 42 CFR 483.10 (12)(3), an administrator or designee must deposit any resident’s personal funds in excess of $50.00 in an interest-bearing account (or accounts) that is separate from any of the nursing facility’s operating accounts and that credits all interest earned on a resident’s funds to that account. In pooled accounts, there must be a separate accounting for each resident’s share.

An administrator or designee must maintain a resident’s personal funds that do not exceed $50.00 in a non-interest bearing account, interest bearing account, or petty cash fund.

514.9.8 Accounting and Records

The administrator or designee must establish and maintain a system that assures a complete and separate accounting, according to generally accepted accounting principles, of each resident’s personal funds entrusted to the nursing facility. The system shall preclude any co-mingling of a resident’s personal funds with nursing facility funds or with the funds of any person other than another resident.

Each resident’s financial record shall be provided through quarterly statements and on request of the resident or his/her legal representative. For any transaction from a resident’s account, the administrator or designee shall provide the resident with a signed receipt and retain a copy of the receipt.

The administrator or designee shall administer the funds on behalf of the resident in the manner directed by the resident or in the case of the resident’s inability to make financial decisions, the legal representative.

514.9.9 Notice of Certain Balances

An administrator or designee shall notify each resident who receives Medicaid benefits or his/her legal representative when the amount in the resident’s personal funds account reaches within $200.00 of the Supplemental Security Income (SSI) limit for one person. Should the amount in the account, in addition to the value of the resident’s other non-exempt resources, reach the SSI resource limit for one person, it may result in the individual losing eligibility for Medicaid and SSI.
514.9.10 Conveyance Upon Discharge

Upon the death or discharge of a resident with personal funds deposited with the nursing facility, the administrator or designee shall comply with all applicable State and if appropriate, Federal statutory and regulatory provisions.

514.9.11 Allowable Resident Charges

Allowable resident charges, according to 42 CFR 483.10(C)(8), are charges by the facility to the resident/financial representative that are amenities/items/services above the “all inclusive rate” that are requested by the resident or responsible party. Additional charges must be explained to the resident/responsible party during the admission process. The following may be used as examples of allowable resident charges: telephone, television/radio, personal comfort items, smoking materials, cosmetic items, personal clothing, personal reading materials, flowers and plants, social events and entertainment offered outside the scope of an activities program, and special care services such as privately hired individuals. Commercial laundry/dry cleaning expenses for personal items of clothing will be the responsibility of the resident.

For a Medicaid resident desiring a private room, the administrator or designee may charge the difference between the facility’s actual charge for room and board of a semi-private room and the charge for room and board of a private room. For a Medicaid resident’s whose medical condition warrants an isolation/private room, the administrator or designee may not charge an additional fee.

Individuals may reserve a bed in a nursing facility as a contractual agreement to pay the nursing facility for a bed hold as long as the amount paid is not considered as a resource or income for Medicaid. However, the resident’s contribution of cost of care (resource) cannot be used for this purpose.

514.10 ANCILLARY SERVICES

The nursing facility must have formal arrangements for the provision of ancillary services which are necessary to support the primary activities of the nursing facility; however, they are not included in the per-diem rate.

514.10.1 Orthotics and Prosthetics

O & P devices/appliances that are prescribed by an enrolled practitioner to residents in a nursing facility are subject to service limitations and prior authorization requirements noted in Chapter 516 Orthotics and Prosthetics.
514.10.2 Dental Services

Generally, dental care is not a covered service and is not reimbursable as a fee for service. However, in accordance with Chapter 505 Dental and Oral Health, emergent dental care for adults is covered and defined as treatment for pain, infection, fractures, and trauma. Coverage is limited to the Least Expensive Professionally Acceptable Alternative Treatment (LEPAAT). Please refer to the local Department of Health and Human Resources (DHHR) office for further information.

514.10.3 Vision Care Services

Covered vision services may be found in Chapter 525 Vision Services. All covered services MUST be medically necessary and prescribed by an enrolled physician.

514.10.4 Podiatry Services

The Medicaid Program covers podiatry services, with certain limitations, furnished to a resident when referred by the attending physician.

Routine foot care is not a covered service, except for residents referred by the physician for the treatment of a metabolic disease (such as diabetes). Routine foot care includes, but is not limited to, the cutting or removal of corns or calluses, the trimming of nails, observation and cleaning of the feet, nail care not involving surgery, and other hygienic and maintenance care. Routine foot care is considered a part of the nursing services provided by facility staff.

The regulations detailed in Chapter 520 Podiatry Services for the Medicaid program apply to nursing facility residents.

514.10.5 Laboratory, X-Ray, and Other Diagnostic Services

Laboratory and x-ray services are covered as ancillary services when provided by a certified and participating hospital or laboratory upon the order of the attending physician as needed to diagnose or treat an illness, accident, or injury.

The resident's initial medical evaluation which is required within 48 hours after admission may include a chest x-ray and/or routine laboratory work in order to safeguard against the spread of disease and to ensure adequate medical care.

42 CFR 483.75 (j) (1) states: the facility must provide or obtain laboratory services to meet the needs of its residents. The facility is responsible for the quality and timeliness of the services.

A nursing facility that provides laboratory services must follow Clinical Laboratory Improvements Amendment (CLIA) regulations as applicable. Please refer to Chapter 529 Laboratory Services.
514.10.6  Emergency Ambulance Transportation Services

West Virginia Medicaid reimburses emergency transportation services rendered to members residing in nursing facilities when the services are medically necessary. Services must be rendered in the nearest hospital or facility that has the appropriate equipment and personnel and is documented in the nursing facility transfer agreement. Please refer to Chapter 524 Transportation Services for further emergency guidelines.

Use of an ambulance merely for the member or the nursing facility’s convenience is not covered nor is residence in a NF adequate justification for the utilization of transportation via ambulance. The following are not emergency transportation services and will not be reimbursed:

- Transport for services routinely available at the nursing facility;
- Transport for personal services;
- Transport for services that do not meet medical necessity guidelines;
- Transportation for services where the level of transportation does not meet the medical necessity requirements of the member;
- Transportation to any location that does not render covered medical, diagnostic or therapeutic services.

This list is not intended to be all inclusive.

514.10.7  Hospice/Nursing Facility Resident

West Virginia Medicaid maintains a separate program of Hospice Services for individuals who are residents of a nursing facility. If a member electing hospice care is a resident of a West Virginia Medicaid certified nursing facility, the administrator or designee may contract with a Medicare/Medicaid certified hospice agency to provide hospice services for eligible individuals who qualify medically for both the hospice benefit and Medicaid nursing facility benefits. Medicare certification of a nursing facility is not a requirement of this program. The hospice agency must enroll with the Medicaid agency to be a provider of this benefit in nursing facilities. The hospice agency staff must follow the nursing facilities policies and procedures.

The room and board component provided by the nursing facility shall include the provision of a living space, nutrition, and ancillary services normally provided for residents. Ancillary services may include, but are not limited to, the basic activities of daily living, social and activity programs, and laundry and housekeeping.

The hospice provider is responsible for specialized services covered by Medicare or Medicaid, including but not limited to, medications associated with the terminal illness and assistance with care planning. The hospice provider becomes an active participant in the interdisciplinary care plan team and the care plan must be immediately updated to reflect these changes. Emotional support for the member and the member’s family is also provided. The hospice must bill Medicare and Medicaid for all covered services, including nursing facility room and board. The
A significant change in status assessment (SCSA) is required to be performed when a terminally ill resident enrolls in a hospice program (Medicare Hospice or other structured hospice) and remains a resident at the nursing home. The assessment reference date (ARD) must be within 14 days from the effective date of the hospice election (which can be the same as or later than the date of the hospice election statement, but not earlier). A SCSA must be performed regardless of whether an assessment was recently conducted on the resident. This is to ensure a coordinated plan of care between the hospice and nursing home is in place.

A Medicare-certified hospice must conduct an assessment at the initiation of its services. This is an appropriate time for the nursing home to evaluate the MDS information to determine if it reflects the current condition of the resident, since the nursing home remains responsible for providing necessary care and services to assist the resident in achieving his/her highest practicable well-being at whatever stage of the disease the resident is experiencing.

A SCSA is required to be performed when a resident who is receiving hospice services decides to discontinue those services (known as revoking of hospice care). The ARD must be within 14 days from one of the following:

- The effective date of the hospice election revocation (which can be the same as or later than the date of the hospice election revocation statement, but not earlier);
- The expiration date of the certification of terminal illness; or
- The date of the physician’s or medical director’s order stating the resident is no longer terminally ill.

If a resident elects the hospice program, it is important that the two separate entities (nursing home and hospice program staff) coordinate their responsibilities and develop a care plan reflecting the interventions required by both entities. The nursing home and hospice plans of care should be reflective of the current status of the resident. In addition to coordinating plans of care between the nursing facility and the hospice provider, the two entities must also coordinate billing procedures for these members, which should include but is not limited to, the proration of patient resource amounts. When nursing facility residents are receiving hospice care, the nursing facility cannot bill Medicaid for the days that the member is receiving hospice services. The hospice provider is responsible for billing Medicaid. When a nursing facility resident is receiving hospice services for a partial month, the patient resource amount may need to be prorated. For example, a member is admitted to the nursing facility on January 1st and remains in the facility for the entire month and then on January 11th, the member elects hospice services in the nursing facility and continues to receive the hospice services through January 31st. The nursing facility would prorate the resource amount for the January claim for 10 days. The hospice claim would reflect a prorated resource amount for 21 days. If the nursing facility resident is receiving hospice services for the entire month, the full resource amount will be deducted from the payment made to the hospice provider for room and board.
514.10.8 Documentation Requirements for Hospice/Nursing Facility Authorization

For each individual who applies for hospice coverage in a nursing facility, election of services and physician certification documentation is required. Please refer to Chapter 509 Hospice Services. The hospice provider must submit to BMS or its designee for review of the following information:

- An agreement between the specific nursing facility and the hospice provider that each will provide its appropriate services to residents who qualify, and
- Documentation to support the medical necessity for each covered hospice service and the financial eligibility documentation for the specific individual regarding Medicare and Medicaid.

As with hospice services provided in other settings, those hospice services provided in nursing facilities apply only to the terminal condition or disease. For health needs not related to the terminal diagnosis, established West Virginia Medicaid policies and procedures are to be followed.

The authorization information must be submitted with the first claim for payment.

514.11 DOCUMENTATION AND RECORD RETENTION REQUIREMENTS

The administrator or designee must comply with the documentation and maintenance of records requirements described in Common Chapter 100, General Information; Common Chapter 300, Provider Participation Requirements, and Common Chapter 800, General Administration. In addition to the documentation requirements described in those chapters, the following requirements also apply to payment for nursing facility services.

514.11.1 Resident Record System

A resident record system must be maintained which assures that the record is available to professional and other staff directly involved with the resident as well as authorized representatives.

Resident records must be safeguarded against destruction, loss, or unauthorized use and must comply with all Health Information Portability and Accountability Act (HIPAA) regulations. Records must be retained for a minimum of five years following a resident's discharge. Representatives of the WVDHHR and USDHHS may have access to the resident records at any time without the consent of the resident or responsible party. A separate clinical record must be maintained for each resident at a location that is accessible to appropriate nursing facility staff with all entries recorded in accordance with current professional standards and practices.

514.11.2 Demographic Information

The clinical record must include at a minimum the following information:
• Name of resident (first, middle, last, and generation if applicable)
• Date and time of admission
• Social Security identification number
• Medicare identification number (where applicable)
• Medicaid identification number (where applicable) or any other payer identification number
• Marital status
• Date of birth
• Gender
• Home address
• Religion
• Name, address, and telephone number of referral agency (including institution from which admitted, where applicable)
• Attending physician
• Next of kin or other responsible person
• Admitting diagnosis
• Final diagnoses (or cause of death)
• Condition on discharge and disposition (where applicable)
• Inventory of personal effects.

514.11.3 Medical Information

For each resident, the clinical record must include at a minimum the following information all of which must be signed and dated:

• Physician’s certification reflecting the need for nursing facility services upon admission to the nursing facility.
• An overall plan of care based on a comprehensive assessment setting forth goals to be accomplished, prescribing an integrated program of individually designed activities, therapies and treatments necessary to achieve such goals, and indicating which professional service or individual is responsible for each element of care or service prescribed in the plan.
• Initial medical evaluation including medical history, physical examination, diagnoses, and estimation of restoration potential done on admission.
• Physician's orders including all medications, treatments, diets, therapies and special restorative /medical procedures.
• Medication and treatment administration records including all medications, treatments, and special procedures performed.
• Physician's progress reports noted for each visit or consultation describing the residents’ health status and/or significant changes in resident’s condition.
• Nursing note documentation must reflect the current conditions as well as changes in conditions of the resident. Monthly documentation which indicates observations, medication changes, progress, regress, any changes in conditions. Physician re-
certification must include documentation by the physician substantiating the resident's need for continued services in the nursing facility.

Hospital transfer information (where applicable).

Discharge summary completed by the physician prior to the resident's discharge for transmittal to the receiving institution at the time the resident is discharged, if applicable.

A record of the resident's major grievances, if any, and the disposition.

Laboratory, x-ray and other diagnostic reports.

A list of medications transferred to the resident or responsible party upon discharge, to include a medication disposition form signed and dated by the receiving individual and the discharging nurse.

Pre-Admission Screening (PAS) form.

514.12 PAYMENT AND BILLING PROCEDURES

Nursing facility providers must comply with the payment and billing procedures and requirements as noted below and found in Common Chapter 600, Reimbursement Methodologies.

514.12.1 Payment and Billing Procedures Non-Hospice

Nursing facilities must bill for services using either the UB04 paper form or the 837i electronic institutional format. The services may not be billed until the following month after which the services were provided.

Nursing facilities will use bill type 21X. The following are the revenue codes and the Health Insurance Prospective Payment System (HIPPS) codes that must be billed in order to receive appropriate payment for services provided:

- Revenue Code 0190 is the room and board (fixed portion of the rate);
- Revenue Code 0550 in skilled nursing (nursing portion of the rate) and must have HIPPS/RUGs Code attached;
  - HIPPS/RUGs Codes are AAA01-AAA29 to identify the West Virginia specific case mix class
  - HIPPS/RUGs Code AAA00 is to identify there is no MDS available;
- Revenue Code 0183 is the therapeutic bed hold leave of absence;
- Revenue Code 0185 is the hospital bed hold leave of absence and
- Revenue Code 0189 is the non-covered leave of absence.

514.12.2 Nursing Facility Billing Procedures for Hospice Patients

To be billed under Revenue Code 0658:
The West Virginia Medicaid Program will remit to the hospice provider, who is contracted to provide services in the nursing facility, 95% of the daily rate which would have been paid to the nursing facility for care of this member had they not elected hospice coverage. The hospice will reimburse the nursing facility for the cost of room and board, as identified in their contract. The amount of reimbursement will be based on the nursing facility base per diem rate with the Medicaid adjustment for the acuity of the beneficiary. The claim form for billing is the UB04 and cannot be billed electronically. Documentation identifying the specific case mix class of the individual must be attached.

514.12.3 Reimbursement Requirements

The West Virginia nursing facility reimbursement system is prospective with semi-annual rate adjustments. It is designed to treat all parties fairly and equitably, i.e., the resident, taxpayer, agency and facility. To meet these goals, complete and accurate cost data must be maintained by each facility with cost reports accurately prepared and submitted on a timely basis.

The basic principles and methodology for the system are described in this chapter. Detailed instructions and guidelines are published in the revised West Virginia Medicaid Long Term Care Users Guide to Reimbursement, which is hereby incorporated by reference into these regulations.

Federal and State law, the West Virginia State Plan and Medicaid regulations cover reimbursement principles in the following order. When Medicaid regulations are silent and Medicare cost principles and regulations are silent, then generally accepted accounting principles (GAAP) will be applied. None of these secondary applications will serve to reduce the Department's ability to apply "reasonable cost" limits under Medicaid.

514.13 COST REPORTING

All participating facilities are required to maintain cost data and submit cost reports according to the methods and procedures specified in this chapter and the Medicaid Reimbursement Guide for Long Term Care Nursing Facilities (see www.dhhr.wv.gov/bms), whichever is more restrictive.

514.13.1 Chart of Accounts

The Medicaid Chart of Accounts (MCOA) is mandated by the West Virginia Department of Health and Human Resources (WVDHHR) for nursing facility service providers who are required to complete the Financial and Statistical Report for Nursing Homes (Medicaid Cost Report) as part of their participation in the Medicaid program. The MCOA details the account number, account name, file/field specification (FIELD), page and line reference (MAP) and description of items applicable for each account. The FIELD column contains the file and field layout for submission of the Medicaid Cost Report.
It is not mandatory for providers to use the MCOA for internal reporting purposes; however the provider’s internal chart of accounts MUST contain a sufficient number of accounts to capture data in the level of detail necessary to correlate to the MCOA. Individual accounts must be used to report separate types of costs, even if the accounts aggregate to one cost report cost center.

The provider must submit a trial balance using the MCOA as part of the automated cost reporting process. This is accomplished in the cost reporting software by assigning the appropriate MCOA number to the provider’s internal account number. It is the provider’s responsibility to secure and maintain acceptable cost report software. The MCOA is maintained by Rate Setting Unit of the Office of Accountability and Management Reporting (OMAR) and is periodically updated. Cost reports must be submitted in accordance with the MCOA.

The Grouping Report (Trial Balance submitted with the cost report through which each provider internal account has been assigned to the appropriate MCOA number) must reflect the actual balance in each provider internal account for the semi-annual period reported, and the “Per Books” column must agree directly to the balance for each account in the provider’s general ledger for that six-months of activity. All adjustments are to be posted through the “Net Adjustments” column of the Grouping Report.

514.13.2 Financial and Statistical Report

Facility costs must be reported on the Financial and Statistical Report for Nursing Homes, which must be completed in accordance with generally accepted accounting principles (GAAP) and the accrual method of accounting. The reports must be submitted to WVDHHR Office of Accountability and Management Reporting; Attention: Division of Audit and Rate Setting, in the form of a hard copy and on a 3.5" 1.44 high density diskette or compact disc (CD).

The report must also be accompanied by the Medicaid grouping report trial balance that matches the costs on the report. These reports must be complete and accurate. Incomplete reports or reports containing inconsistent data will be rejected and returned to the facility for correction.

514.13.3 Cost Reporting and Filing Periods

Facility costs are reported semi-annually with the two reporting periods being January 1 through June 30 with a deadline of August 29, and July 1 through December 31 with a deadline of March 1 (February 29 on leap years). Cost reports must be filed with the Department within 60 days following the end of the reporting period.

514.13.4 Extension Requests

An extension of time for filing cost reports may be granted by DHHR for extenuating circumstances where requested and justified by the facility in writing by the close of business on the due date. Extension requests will be limited to a maximum of 15 calendar days. Requests
must be addressed to the WVDHHR Office of Accountability and Management Reporting; Attention: Director of Rate Setting, #1 Davis Square, Suite 304, Charleston, WV 25301.

514.13.5 Penalty – Delinquent Reporting

Failure to submit cost reports by the due date, where no extension has been granted to the facility or within the time constraints of an extension may result in penalties to that facility. If incomplete cost reports are not corrected and resubmitted within 10 calendar days, the facility may be subject to these penalty provisions at the discretion of the DHHR. See also Common Chapter 300, Provider Participation Requirements.

514.13.6 Correction of Errors

Errors in cost report data identified by the facility must be corrected and resubmitted to the Department. If submitted within 30 days after the original rate notification, those corrections will be considered for rate revision. The DHHR will make rate revisions resulting from computational errors in the rate determination process.

An instance where a rate is revised for correction of an error, whether identified by the facility or the DHHR for computational or other errors, shall not prohibit the DHHR from making additional rate revisions as needed upon subsequent discovery of additional errors.

514.13.7 Changes in Bed Size

A cost adjustment may be made during a rate period where there has been a change in the facility bed size if the change affects the appraisal value of the facility. In this instance, an appraisal of the facility will be completed after the bed size change has been certified. If the annual appraisal has been completed, the facility will be responsible for the cost of the additional appraisal.

514.13.8 Projected Rates

A projected rate will be established for new facilities with no previous operating experience. A change of location with the same ownership does not constitute a new facility. A projected rate will last no longer than 18 months from the opening date of the facility. The facility may choose to go off the projected rate at any time after a full 6 months of operating experience in a cost reporting period. Each facility on a projected rate must submit the calendar semi-annual cost reports during the projected rate period even if the first report is a partial report (less than six months).

514.13.9 Projected Rates – Change of Ownership

A projected rate may be established where there has been a change of ownership and control of the operating entity and the new owners have no previous management experience in the facility. When a stock purchase occurs a projected rate is not established. If a change of
ownership and control has occurred because there has been a complete purchase of assets, a projected rate is established.

At the end of the projected rate period, the audited cost report of the facility will be reconciled with the projected cost reimbursement using actual occupancy and tested for reasonableness against the cost standard established for the bed groups (0-90 beds and 91+ beds). Overpayment identified in the reconciliation process will be recovered by the Department in accordance with the provision of *Common Chapter 800, General Administration*.

A projected rate for a new facility or a facility with a recognized change of ownership and control will be established as follows:

a. Standard Services - The cost standard CAP (Cost Average Point) established for the bed group  
b. Mandated Services - The cost standard CAP established for the bed group  
c. Nursing Services - The average of the cost established for the bed group  
d. Cost of Capital - The Standard Appraised Value (SAV) methodology is applied to a new facility or the SAV established for the facility if a change of ownership occurs

Full disclosure of ownership is required on the cost report. Refer to page WV2 and WV 3 on the cost report for information requested.

**514.13.10 Maintenance of Records**

A desk review of the cost report will be done prior to rate setting and an on-site audit of facility records will be conducted periodically. Financial and statistical records must be maintained by the facility to support and verify the information submitted on the cost reports. Such records must be maintained for a minimum of five years from the ending date of the report. Upon request by the DHHR, all records will be made available within 10 working days. If not produced within that time frame, the records will be considered non-existent. The DHHR reserves the right to determine the site where the records are to be made available. Costs or census data reported that are found to be unsubstantiated or related to records requested but not produced will be disallowed.

**514.13.11 Census Data**

Providers shall include with the cost report a detail of census data and bed reservations billed to Medicaid for the cost reporting period.

Upon request for desk review or audit, source documentation for census as reported on the cost report must include at a minimum a midnight census (by payer class with bed reservations specifically identified) that agrees in aggregate to a monthly census (by payer class with bed reservations specifically identified), which agrees (or has an accompanying reconciliation) to each month as reported on the cost report, with bed reservations specifically identified.
514.13.12 Allowable Costs for Cost Centers

Reimbursement for nursing facility services is limited to those costs required to deliver care to residents. These are costs related to inpatient care, i.e., facility operating costs and the cost of direct services to residents, which are considered for reimbursement. Allowed costs are subject to the regulations prescribing the treatment of specific items in this manual.

The cost centers are standard services, mandated services, nursing services and capital. A cost standard is developed for each cost center which becomes the maximum allowable cost for reimbursement purposes. Allowable costs are determined by the following four methodologies: Standard Services, Mandated Services, Nursing Services, and Cost of Capital.

514.13.13 Standard Services

The cost standard for standard services is comprised of 4 departmental cost centers: Dietary, Laundry & Housekeeping, Medical Records and Administration. A separate cost standard is calculated for each of these cost centers by bed group based on bed size (0-90 beds and 91+ beds). Within each cost center, the per patient day (PPD) allowable costs are arrayed assuming 100% occupancy on a facility specific basis. Extremes are eliminated by including only those values falling within plus or minus one standard deviation; this is 90% occupancy level. The cost standard for standard services is the sum of the cost center CAP for Dietary, Laundry & Housekeeping, Medical Records and Administration. The cost standard then establishes the maximum allowable cost by bed group for Standard Services.

514.13.14 Mandated Services

The Mandated Services component is comprised of (4) four departmental cost centers: Activities, Maintenance, Utilities and Taxes & Insurance. A separate cost standard is calculated for each of these costs centers by bed group. Within each cost center the PPD allowable costs are arrayed from highest to lowest. The 90th percentile value of each cost center is then selected as the CAP. The Mandated Services cost standard is the sum of the cost center CAP for Activities, Maintenance, Utilities and Taxes & Insurance. The cost standard then establishes the maximum allowable cost by bed group for Mandated Services.

514.13.15 Nursing Services

The cost standard for Nursing Services is shown as the Resident Assessment calculation on the rate sheet. This calculation provides for professional staffing levels and supply costs that are recognized as representative of those necessary for delivery of the core level of resident needs. It incorporates all minimum Federal and State mandates for licensure and certification of nursing facilities.

The professional staffing hours on the Resident Assessment calculation serve as a benchmark and are held constant over time. A factor of 0.35 hours PPD is included in the LPN hours for 0-90 beds and 0.30 hours PPD for 91+ beds to account for restorative services. Additionally, 0.05 hours PPD is included in the standard Aides hours for restorative services.
The standard hours PPD, by bed group, for each of the professional levels of nursing staff are as follows:

<table>
<thead>
<tr>
<th>Staff</th>
<th>1-90 Beds</th>
<th>91+ Beds</th>
</tr>
</thead>
<tbody>
<tr>
<td>RN</td>
<td>0.20</td>
<td>0.20</td>
</tr>
<tr>
<td>LPN</td>
<td>0.85</td>
<td>0.80</td>
</tr>
<tr>
<td>Aides</td>
<td>1.85</td>
<td>1.85</td>
</tr>
<tr>
<td>Total Hours PPD</td>
<td>2.90</td>
<td>2.85</td>
</tr>
</tbody>
</table>

The cost standard for nursing wage rates uses total compensation and is calculated by bed group. Hourly wage rates, by professional level, are derived from the cost reports of each facility and arrayed from highest to lowest in each bed group. The 70th percentile value is then selected as the bed group CAP. The CAP is multiplied by the hour benchmark to yield the salary component of the Nursing Services cost standard. Nursing and restorative supply costs are summed for each facility and converted to a PPD cost. These PPD costs are then arrayed, by bed group, from highest to lowest, and the 70th percentile is selected as the Nursing Supplies CAP.

The Director of Nursing (DON) salary is selected at the 70th percentile, by bed group, as derived from the submitted cost reports. An additional factor is added for the DON by dividing the DON salary by each facility’s beds at 100% occupancy.

The cost standard for Nursing Services is derived as the sum of the above factors (RN, LPN, Aide, Supplies and DON). The CAP is then adjusted to a facility specific CAP based on the facility’s average Medicaid MDS score from the six month reporting period. The average Medicaid MDS score (including the Medicaid Hospice resident) is divided by 2.5 and then multiplied by the base constant to arrive at an adjusted Nursing Services CAP for each facility. The adjusted Nursing Services CAP cannot exceed 112% (MDS average of 2.8) or be less than 80% (MDS average of 2.0) of the base constant. The facility actual allowable PPD nursing costs are reimbursed up to the level of the nursing services CAP.

An add-on factor allows for monthly adjustments to this base nursing reimbursement during the rate period when the case mix score derived from the MDS, as determined at the time of monthly billing, indicates a higher level of need and care delivered to a specific resident. A base case mix score of 2.9 is established as a threshold. For residents with a monthly case mix score of 2.9 or less, there is no add-on factor. If the monthly case mix score exceeds 2.9, then an add-on factor is determined by dividing the excess of the case mix score over 2.9 by the threshold factor of 2.25. The resulting factor is then multiplied by the Nursing Rate to derive a PPD Nursing Services add-on.

**514.13.16 Cost of Capital**

Reimbursement for cost of capital is determined using an appraisal technique to establish a Standard Appraised Value (SAV). This value includes the necessary real property and equipment associated with the actual use of the property as a nursing facility. The Standard
Appraised Value (SAV) uses the cost approach to value modified by the Model Nursing Facility Standard. This valuation is the basis for capitalization to determine a PPD cost of capital. This allowance replaces leases, rental agreements, depreciation, mortgage interest and return on equity in the traditional approach to capital cost allowance.

A. Cost Approach to Value

The value of a property is derived by estimating the replacement or reproduction cost of the improvements, deducting from them the estimated accrued depreciation and adding the market value of the land (actually used if required for use as if vacant and available for development of such use). Established sources of cost information are used to supply costs to reproduce the structure. Construction indexes used are Marshall Valuation Services and Boeckle Building Valuation Manual.

B. Accrued Depreciation

Accrued depreciation in a cost approach is the difference between the value of a building or other improvement at a certain date and its cost of reproduction as of the same date. The method used to measure accrued depreciation is known as the “breakdown” method which involves an analysis of loss in value from the following sources:

1. Physical deterioration; curable and incurable
2. Functional obsolescence; curable and incurable
3. Economic obsolescence

The nursing facility appraisal method modifies the property value by deducting accrued depreciation. Those facilities meeting the appraisal criteria will receive their maximum standard appraisal value; those not meeting a standard will have their plant valuation reduced by the amount reflected in physical and functional depreciation. This includes both physical depreciation, curable and incurable, as well as functional obsolescence, curable and incurable. The summation of each component of the process results in a final Standard Appraised Value. This value will then be treated as a cost of providing patient care.

C. Model Nursing Facility Standard

The Model Nursing Facility Standard is a composite of current regulations and criteria derived from several sources which include “Minimum Requirements of Construction and Equipment for Hospital and Medical Facilities” - HHS Publication No. (HRS) 81-14500 and 64CSR13 (Nursing Home Licensure Rule).

These criteria form a living document drawn from Federal and State regulations and guidelines, as well as from accepted industry practice. They will be updated periodically to reflect changes which foster improved resident care or cost effective measures which do not compromise resident care.
The Model Nursing Facility Standard also sets an upper reasonable cost limit for constructing a nursing facility. This effectively discourages the creation of unnecessarily costly facilities. Currently, land is being appraised at its “highest and best” use. This occasionally results in land values in excess of the building and equipment appraisal.

D. Appraisal Technique

A complete appraisal of each new facility will be performed after certification and approval for Medicaid program participation by a qualified appraisal firm under contract with the Department. Updates of the initial appraisal will be performed annually and used in the October 1st rate setting period, in addition to the following April 1st rate setting period. Updates may be performed at any time during the annual period when there have been major changes to the bed size of the facility and such changes would affect the SAV for rate setting purposes. Initial and annual appraisals must include onsite inspections. Prior to rate setting, the updated appraisals will be indexed to June 30, as a common point valuation, based on the Consumer Price Index. All appraisals will include an on-site evaluation.

A copy of the facility appraisal report is furnished to the facility for its records.

514.13.17 Capitalized Assets

Assets that have a value equal to or greater than $3,000 with an estimated useful life of two years or more should be capitalized. The cost of the asset includes, but is not limited to, installation, delivery and acquisition costs. A repair of an asset that exceeds $3,000 per project and extends the useful life of the asset more than two years should be capitalized. The cost of the repair includes, but is not limited to labor and materials. Renovation type projects where small amounts of material at a time are purchased, over an extended period of time, should be capitalized to reflect the true nature of the project.

514.13.18 Working Capital Interest

Working Capital Interest (WCI) is limited to short term loans (term of one year or less) taken out to meet immediate needs of daily operations. To be allowable, there must be a genuine effort by the provider to repay these notes. If no evidence of repayment is apparent and these notes are merely renewed throughout the year, the Program will not consider these to be bona fide working capital notes and the interest incurred on them will not be allowed if no justification can be made for nonpayment of the note.

514.13.19 Vehicle Expenses

The cost of operating all licensed vehicles will be limited to the per mile rate approved by the West Virginia Travel Management Office. This limitation applies to vehicles owned by the facility, any costs related to reimbursement to employees for use of personal vehicles, rental vehicles, or any other vehicles. The per-mile rate is computed to include the following costs: rental or lease payments, fuel, interest, repairs, routine maintenance, inspections and licenses,
insurance and depreciation, therefore these costs are not separately allowed. Detailed mileage logs must be maintained to support the miles reported on the cost report. This will include beginning and ending odometer reading and purpose of travel. All travel must be authorized by administrator or designee. All travel must be included in the mileage log and be indicated for those miles directly related to resident services.

514.13.20 Allocated Costs

Hospital based nursing facilities and nursing facilities associated with assisted living facilities or other related parties that use allocated costs must maintain detailed documentation to support any costs allocated on the cost report (either allocated to the facility or allocated among individual cost centers) and the allocation calculation(s) must be made available upon request for desk review or audit.

All costs must show reasonableness and be comparable to other facilities in the industry.

514.13.21 Home Office Costs

Certain home office costs may be includable in the provider’s cost report and considered for reimbursement as part of the provider’s costs. Where the home office of the chain provides no services related to patient care, neither the costs nor the equity capital of the home office may be recognized in determining the allowable costs of the providers in the chain. The administrator or designee must prove the home office costs are related to patient care. The administrator or designee must maintain documentation to establish the benefit to patient care realized as a result of any home office costs included in the cost report, please reference section 514.13.12 for additional guidance. Management fees charged between related organizations are not allowable costs and such fees must be reported as non-allowable on the provider’s cost report. Any cost report received with related party management fees and home office costs will be rejected and returned to the facility for correction. Home office costs must be appropriately reported by individual line item on the home office schedules of the cost report, and should not be aggregated as management fees. Thus, allowable cost is limited to the lesser of (1) allowable costs properly allocated to the provider and (2) the price for comparable services, facilities, or supplies that could be purchased elsewhere, taking into account the benefits of effective purchasing that would accrue to each member provider because of aggregate purchasing on a chain wide basis. Home office costs must be reported at cost and net of any inter-company profit, and the home office must be disclosed as a related party on the cost report.

Home office costs that are not otherwise allowable costs when incurred directly by the provider cannot be allowable as home office costs to be allocated to providers. Costs related to nonmedical enterprises are not considered allowable home office costs. All allocated central office costs are considered administrative in nature and, therefore, must comply with regulations governing allowability at individual facility locations.
Starting with its total costs, including those costs paid on behalf of providers (or components in the chain), the home office must delete all costs which are not specifically allowable in accordance with this manual and as listed on pages WV20 A&B of the cost report.

Where the home office incurs costs for activities not related to patient care in the chain’s participating providers, the allocation basis used must provide for the appropriate allocation of costs such as rent, administrative salaries, organization costs, and other general overhead costs which are attributable to nonresident care activities, as well as to patient care activities. All activities and functions in the home office must bear their allocable share of home office overhead and general administrative costs.

The basis for allocation of allowed costs among long-term care facilities should be patient days. However, another basis may be considered appropriate and more accurate. The home office must make written request, with its justification, to the Department for approval of the change.

The written request must be received no later than 120 days after the beginning of the home office accounting period to which the change is to apply.

The Department’s approval of a home office request will be furnished to the home office in writing. Where the Medicare intermediary approves the home office request, the change must be applied to the accounting period for which the request was made, and to all subsequent home office accounting periods unless the intermediary approved a subsequent request for change by the home office. The effective date of the change will be the beginning of the accounting period for which the request was made.

514.13.22 Non-Reimbursed Prescription Costs

Prescription drugs are not allowable on the cost report and are not included in the per diem rate. See sections 514. 8.4 Pharmacy Services and 514. 10.2 Prescription Drugs and Chapter 518 Pharmacy Services for information regarding covered prescription drug services.

514.13.23 Transportation Services

The cost of emergency and non-emergency ambulance services is not allowed on the cost report. However, the cost of the transportation contract between the nursing facility and the NEMT provider and the transportation provided by a vehicle owned by the facility is included in the all-inclusive Medicaid rate and is allowable on the cost report.

514.13.24 Compensation

Allowable compensation is compensation that is reasonable for services that are necessary, related to patient care and pertinent to the operation of the facility. The services must actually be performed and paid in full less any withholding required by law. The hours worked must be documented as well as the compensation received. This information must be reported to all appropriate State and Federal authorities for income tax, Social Security and unemployment compensation purposes.
“Reasonable” means that the compensation must be comparable for the same services provided by facilities in the bed group. The method used to calculate "reasonable" will be as follows: The (90th) ninetieth percentile of the hourly wage of the employee classification for each bed group. No owners, operators and relatives will be included in the calculation. If the services are provided less than full time, the compensation must reflect this fact. Full time is considered approximately 1,040 hours per cost report period worked in resident related duties and includes documented vacation and sick time.

Compensation must include the total benefits paid for the services rendered, i.e., fees, salaries, wages, payroll taxes, fringe benefits and other increments paid to or for the benefit of those providing the services.

If bonuses are a part of an employee’s compensation a clearly established non-discriminatory bonus plan (covering owners and related parties of owners) must be set in writing to employees before the cost reporting period begins. Otherwise the bonus or bonus plan will not be considered allowable. The amount of the bonus must be accrued to the period earned.

514.13.25 Administrators

No owners, operators or relatives will be included in the calculation. Full time is considered at least 1,040 documented hours which include vacation and sick time, per cost reporting period for resident related duties. If the services are provided less than full time, the compensation must reflect this fact. The administrator cannot act as director of nursing.

The facility must be able to document, upon request for desk review or audit, that the compensation for the non-administrator position does not exceed the market rate for those services.

514.13.26 Owners

Administrators-Owners will be compensated for administrative duties performed. Where the costs of administrative services are allowed, additional services performed by the administrator who is also an owner are considered rendered primarily to protect their investment and are not allowed.

Owners that do not serve as administrators will be compensated for duties performed, excluding services rendered primarily to protect their investment. To be included on the cost report, the facility must be able to document that the services provided by the owner are not duplicated by other positions.

Compensation is not allowed for owners, operators or their relatives who claim to provide some administrative or other function required to operate the facility, but who do not actually provide said service. Where functions claimed to be provided by owners, operators or their relatives are merely a duplication of services already provided by other employees or are functions which should reasonably be expected to be performed by other employees, such services are not
reimbursable. For example: if a facility has a full-time administrator or other full-time or part-time staff position filled and compensated, the facility’s owner, operator or their relative claiming compensation for the same or similar functions are not allowed by the program.

Where owners, operators, or their relatives are on salary at a facility, the program will reimburse the facility to the extent that said individuals salaries are not excessive compared to other individuals who perform the same or similar functions and who are not owners, operators or their relatives. Owners include any individual or organization with any financial interest in the facility operation and any member of such individual’s family including the spouse’s family. Owners also include all partners and all stockholders of organizations which have a financial interest in the facility.

514.13.27 Non-Allowable Costs

Non-allowable costs are those costs which are not related to patient care or for which a separate charge is made. This includes, but is not limited to, bad debts, charity and courtesy allowances, Medicare Part B chargeable items, personal resident property that has been reported as lost or stolen, flowers and retirement gifts for employees. Refer to the West Virginia Medicaid Long Term Care Users Guide to Reimbursement and MCOA for other non-allowable costs. Other items not referred to in the Chart of Accounts may be specified in State or Federal regulations as non-allowable costs. All undocumented expenses shall be considered non-allowable.

514.13.28 Travel – Out of State

The cost of travel and associated expenses outside the State for conventions, meetings, trainings, assemblies, conferences or any related activities are non-allowable costs.

514.13.29 Automobiles – Central Office

Automobiles used by central/home office personnel are non-allowable.

514.13.30 Legal Fees

Legal fees on failed appeals against the DHHR are non-allowable.

514.13.31 Fines and Penalties

In an effort to contain costs, it is expected that providers will pay obligations on time as well as take advantage of any early payment discounts that are offered by vendors. Costs related to fines, penalties, late charges or any other cost increase imposed by vendors for not paying obligations in a timely manner are not allowed. Similarly, any financial penalties or cost increases resulting from violations of regulations or from non-fulfillment of stipulations are disallowed.
514.13.32  Damage Awards and Negotiated Settlements

Liability damages paid by the provider, either imposed by law or assumed by contract, which should reasonably have been covered by liability insurance, are not allowable. Any settlement negotiated by the provider or award resulting from a court or jury decision of damages paid by the provider in excess of the limits of the provider's policy, as well as the associated legal deductibles or legal costs is non-allowable.

514.13.33  Reorganization/Refinancing Costs

Organization and reorganization costs are the costs incurred in the creation or restructuring of an entity. These costs are considered to be non-allowable for cost reporting and reimbursement purposes.

514.13.34  Purchases From Related Companies or Organizations

All related companies or organizations involved in any business transactions with the facility must be identified on the cost report. Detailed data must be available in the facility records which describe the kind and extent of such business transactions. Cost for purchase of any items or services from related companies or organizations will be allowed at the actual cost of providing the service or the price of comparable services purchased elsewhere, whichever is less. The facility must maintain and make available, upon request for desk review or audit, detailed documentation that the related party purchase has been included in the cost report at the related party’s cost and any calculations to demonstrate that any inter-company profit that would have passed to the related party from the transaction has been eliminated in the cost report preparation.

514.13.35  Filing Reports – Requests for Assistance

Financial and statistical reports and questions regarding cost reporting are to be addressed to WVDHHR Office of Accountability and Management Reporting; Attention: Division of Audit and Rate Setting, #1 Davis Square, Suite 304, Charleston, WV 25301.

514.13.36  Rate Determination

Individual facility rates are established on a prospective basis, considering costs to be expected during the rate period. The rate is not subject to retrospective revision. This does not exclude corrections for errors of omissions of data or reconciliation of audit findings related to falsification or misreporting of costs or census. The basic vehicle for arriving at each facility’s rate is the uniform Financial and Statistical Report for Nursing Homes.

The reported costs are subject to desk review and then converted to cost per patient day. Rates will be issued for six month periods beginning April 1 and October 1 based on each facility’s reported costs and adjustments for the applicable reporting period.
514.13.37  Cost Adjustment

Reported facility costs are subject to review and analysis through document/desk review process. Adjustments are made to exclude non-allowable costs and by application of the agency’s established cost standards using the following methodologies: Standard Services, Mandated Services, and Nursing Services (described below).

514.13.38  Standard Services

Total reported allowable costs in the standard services area are compared against the total cost standard for these cost centers using the appropriate bed group for the facility. If the total reported allowable exceeds the total cost standard, then the facility rate is limited to the standard services CAP.

514.13.39  Mandated Services

Total reported allowable costs in the mandated services area are fully recognized for these cost centers, providing they do not exceed the 90th percentile of total reported costs by bed group.

514.13.40  Nursing Services

Allowable costs and reimbursement for nursing services will be determined on a facility by facility basis by the kind and amount of services needed and being delivered to the resident. The staffing required to deliver the care and the restorative and rehabilitative programs offered by the facility will be based on the application of a minimum staffing pattern and adjustments to reflect needs determined by the case mix characteristics.

Monthly billing information for services rendered to nursing facility residents will include data derived directly from the computerized assessment instrument for each resident, which may be used to determine case mix scores for each resident and composite score for the facility. These case mix scores will measure the relative intensity and service needs of the facility’s residents and will comprise the basis for determining allowable adjustments to per diem staffing and nursing costs required to deliver the kind and amount of services needed.

514.13.41  Cost of Capital

Capital costs will be determined on a facility-by-facility basis applying the Standard Appraisal Value (SAV) methodology.

A. Capitalization Rate

A capitalization rate is established to reflect the current SAV of the real property and specialized equipment. This overall rate includes an interest rate for land, building and equipment, an allowance for return on the equity investment in the land, building and equipment, and an appraisal factor used to index all facilities to the cost reporting period ending June 30.
The Band of Investment approach is used to blend the allowable cost of mortgage money (fixed income capital) and the allowable cost of equity money (venture or equity capital) which produces a rate which may be changed annually or semi-annually to reflect current money time values in the mortgage market. This band of investment sets a 75:25 debt service to equity ratio.

The yield of equity allowance (for proprietary facilities) is based on the average Medicare Trust Fund return on equity allowable during the cost reporting period.

The interest rate for the mortgage component will be based upon an average of the Prime Rate of interest as published by the Federal Reserve Board. A 10-year running average of the Prime Rates will be calculated by the Bureau, with an additional 3% added to the calculated interest rate average in order to establish, as needed, the allowable interest rate to be used for rate setting purposes. A floor and ceiling with a maximum of 12% and a minimum of 10%, respectively, will be used in the interest rate calculation.

B. Capital Allowance
All facilities per patient day capital allowance shall be determined by applying the capitalization rate for the mortgage and equity component to the valuation of the facility determined by the Standard Appraised Value (SAV) methodology. As facility valuations under SAV methodology are updated annually over a period of several months, all derived facility valuations will be standardized to June 30 of each year using the Consumer Price Index (CPI).

514.13.42 Minimum Occupancy Standard
Cost adjustments will be made by applying a minimum occupancy standard of 90% to all cost centers. Actual facility occupancy is used to determine allowable costs per patient day if equal to or greater than 90%. However, if the actual occupancy level is less than 90%, the per patient day, allowable cost will be adjusted to assume a 90% occupancy level.

514.13.43 Efficiency Incentive
An efficiency incentive will be allowed where the standard services area allowable costs are less than the total of the cost standard. Fifty percent of the difference between the total allowable cost and the total cost standard will be applied to the prospective rate for the standard services area. The total of the calculated efficiency incentive may not exceed $2.00 per patient day.

A facility qualifying for efficiency incentive shall not have any deficiencies related to standard services or substandard care, quality of life, and/or quality of care, during the reporting period. Statements of Deficiencies generated by OHFLAC for non-compliance found during licensure inspections and/or certification surveys are reviewed to determine compliance with licensure, certification and agency standards.
If it has been determined that a facility has significant deficiencies (defined as one or more deficiencies cited at a severity level of actual harm or immediate jeopardy and/or constituting substandard quality of care on the survey and licensure agency reports), the facility may be denied efficiency incentive for that period. When an audit adjustment results in the allowable costs in the Standard Services component, no increase or decrease in the efficiency incentive will be made.

514.13.44 Inflation Factor

After combining the various components, a factor is assigned to costs as a projection of inflation during the next rate-setting cycle. The amount of change in the Consumer Price Index (CPI) experienced during the six-month reporting period becomes the inflation factor applied to the next six month period. The inflation factor, once set for a given rate period, is not adjusted as it represents what is a reasonable expectation for cost increases.

Regulatory costs, such as minimum wage increases, tax changes, FICA increase, Worker’s Compensation changes, etc., will be considered an inclusive component of the inflation factor.

514.13.45 Audits

Department staff will perform a desk review of cost reports prior to rate setting and will conduct on-site audits of facility records periodically.

514.13.46 Document/Desk Review

Financial and statistical reports submitted by the participating facilities will be subjected to a document/desk review and analysis for rate setting within 60 days of receipt. Incomplete and inaccurate cost reports are not accepted.

514.13.47 Field Audit

Periodic on-site audits of the financial and statistical records of participating facilities will be conducted to assure the validity of reported costs and statistical data. Facilities must maintain records to support all costs submitted on the Financial and Statistical Report and all data to support payroll and census reports. These records must be maintained at the facility or be made available at the facility for review by Department staff (or their representatives) for audit purposes upon notice. **Records found to be incomplete or missing at the time of the scheduled on-site visit must be delivered to the Department within 48 hours or an amount of time agreed upon with audit staff at the exit conference. Costs found to be unsubstantiated will be disallowed and considered as an overpayment.**

514.13.48 Records Retention

Audit reports will be maintained by the Department for five years following date of completion.
514.13.49 Credits and Adjustments

The State will account for the return of the Federal portion of all overpayments to CMS in accordance with the applicable Federal laws and regulations.

514.14 NURSE AIDE TRAINING AND REIMBURSEMENT

In accordance with CFR 483.154 (3), reimbursement is available for nursing facilities that are eligible and approved by OHFLAC to conduct nurse aid training classes in their facility. The educational costs for Nurse Aide training may be reimbursed to the facility where the training and evaluation was held at a maximum of $400 for training and $100 for competency evaluation to equal $500. Reimbursement is only available to the nursing facility after the individual has successfully passed the complete competency evaluation and the training nursing facility verifies the nurse aid has been hired as a nurse aid either at the training facility or another nursing facility. The documentation of employment must be attached to the reimbursement form (see Appendix 3) and it must consist of a letter from the administrator at the hiring nursing facility stating the individual has been hired as a nurse aid, along with dates of hire. This reimbursement is only available to a nursing facility once in a lifetime per individual Nurse Aide.

514. 15 MOUNTAIN HEALTH CHOICES (MHC)

Nursing home services are covered for the Traditional, Basic and Enhanced adult benefit packages with appropriate prior authorization and approval requirements. Service coverage, prior authorization requirements, service limitations and all policy information that must be followed as outlined in this policy.

When a member is admitted to a nursing facility, the member is removed from MHC and placed in the traditional program because it is considered long term care. This occurs on the first of the month following the admission when the member is admitted before approximately the 20th of the month, but no later than the 1st of the second month. Services will be covered upon admission if the member meets all program and eligibility requirements. Inpatient rehabilitation services provided in nursing homes are not covered separately for any adult benefit plans.
WEST VIRGINIA DEPARTMENT OF HEALTH AND HUMAN RESOURCES
AGREEMENT
FOR
NURSING FACILITY PARTICIPATION IN THE TITLE XIX MEDICAID PROGRAM

Nursing Home Name: __________________________________________________________

Address: ____________________________________________________________________

Type of State License: ______Nursing Facility _______ NPI#___________________________

Title XIX Medicaid Provider Number: ______________________________________________

This Agreement, made and entered into on this ___ day of ____ (mo./yr.) by and between the West Virginia Department of Health and Human Resources Bureau for Medical Services, hereinafter designated as the Bureau, and the 

_________________________________________________(name of Nursing Home), a Provider of Service hereinafter designated as the Nursing Home. This agreement is for the purpose of defining the responsibilities of the parties hereto in providing needed medical care in the form of medical services to eligible members under the Medical Assistance Program, Title XIX (Medicaid) of the Social Security Act and for payment of such services.

To participate in the West Virginia Medicaid Title XIX Program, the Nursing Home must:

- be licensed as a nursing home under the applicable State Laws of West Virginia and Local Law;
- meet and maintain the standards for licensure, on a continuing basis;
- be administered by a licensed nursing home administrator who is legally responsible for establishing and implementing policies regarding the management and operation of the home and who holds an approved, current license, as required by State law;
- meet all Federal and State standards for participation in the Title XIX Medicaid Program; and,
- remain in substantial compliance with all other applicable Federal, State, and Local laws, rules, and regulations affecting the health and safety of all residents.

I. THE NURSING HOME AGREES TO FOLLOW THE FEDERAL REGULATIONS 42 PART 483, AS UPDATED AND REQUIREMENTS FOR STATES AND LONG TERM CARE FACILITIES OF THE FEDERAL REGULATIONS.

The Nursing Home agrees to complete and sign this Nursing Home Agreement to participate in the Title XIX Medicaid Program and to keep the information in the agreement current. Any/all succeeding change(s) in this agreement require(s) notification to the Bureau within five (5) working days and will constitute an amendment to this Agreement. Failure to keep the information current constitutes a breach of this Agreement. The Nursing Home will understand that any breach or violation of any of these provisions shall make this entire Agreement, at the Bureau’s discretion, subject to immediate cancellation. This includes all
Changes in Ownership, either in part or whole, of the Nursing Home including administration/management changes and stock or asset transfers for Ownership. This also includes Ownership transfers, either through sale or otherwise; the Nursing Home’s provider number may not be transferred or used by another entity, and payments under this scenario are not reimbursable.

The Nursing Home agrees to accept the Bureau’s payment, in full, for services rendered according to 42 CFR Part 483. The payment will be accepted as payment in full for the care of the resident and no additional charge will be made to the resident, any member of the family, estate or any other payer source for any supplementation of payment for services.

The Nursing Home agrees to provide the Bureau with full and complete information on all persons having an ownership, managerial or controlling interest in the nursing home and to promptly report any changes which would affect the current accuracy of the information required to be supplied. This includes continuance with the provider enrollment application information submitted to the Bureau. The Nursing Home agrees to supply the Bureau or its designee with any / all changes in the current enrollment application within five (5) business working days of a change. The Nursing Home agrees to notify the Bureau of all structural changes proposed in the physical environment prior to implementation and inform the Bureau when the proposed structural changes to the facility are completed.

The nursing home will keep current with Federal Laws, State Laws, Medicaid State Plan Changes, and Medicaid Policy services.

II. THE BUREAU AGREES:

A. To pay for such nursing services in amounts and under conditions determined by the Bureau, for persons receiving nursing care, who have been determined by the Department to be eligible for such assistance under the Title XIX Medicaid Program;

B. To make such payments in accordance with the applicable laws and after a proper claim is submitted and approved;

C. To withhold payments, if necessary, due to irregularity from whatever cause, until such irregularity or difference can be adjusted with the view toward providing excellence in nursing care within the limitations of the law;

D. To provide the Nursing Home reasonable notice of any impending change in its status as a participating Nursing Home with the Bureau for Medical Services;

E. To provide an administrative review procedure for the Nursing Home, in the event the Bureau suspends or cancels the Nursing Home's participation in the Title XIX Medicaid Program or denies payment;

F. To provide methods and procedures for establishing medical review of care and services in accordance with the Title XIX Medicaid Program.

III. THE BUREAU AND THE NURSING HOME MUTUALLY AGREE:

A. That, in the event the Federal and/or State laws should be amended or judicially interpreted so as to render the fulfillment of this Agreement on the part of either party...
infeasible or impossible, or if the parties to this Agreement should be made unable to agree upon modifying amendments which would be needed to enable substantial continuation of the Title XIX Medicaid Program as a result of amendments or judicial interpretations, then, and in that event, both the Nursing Home and the Bureau shall be discharged from further obligation created under the terms of this Agreement.

B. That the term of this Agreement shall be ongoing, or until the Federal and/or State government ceases to participate in the program. Either party to this Agreement may cancel by providing a 30-day written notice to the other party.

C. That the effective date of this agreement will be the date the Nursing Home attains participating status as determined by the Bureau under the Federal standards for participation, and that such determination shall be made a part of this Agreement.

D. That this Agreement shall not be transferable or assignable.

E. It is agreed and understood that, by signing this Agreement, the Nursing Home and the Bureau accept all of the stipulations in the Agreement and agree to each and every

Agreement Effective date shall be: ____________________________
