Appendix D: List Sampling Frame Coverage Study ..................................................................................28
INTRODUCTION

The Annual Synar Report (ASR) format provides the means for states to comply with the reporting provisions of the Public Health Service Act (42 U.S.C. 300x-26) and the Tobacco Regulation for the Substance Abuse Prevention and Treatment Block Grant (SABG) (45 C.F.R. 96.130 (e)).

How the Synar report helps the Center for Substance Abuse Prevention

In accordance with the tobacco regulations, states are required to provide detailed information on progress made in enforcing youth tobacco access laws (FFY 2019 Compliance Progress) and future plans to ensure compliance with the Synar requirements to reduce youth tobacco access rates (FFY 2020 Intended Use Plan). These data are required by 42 U.S.C. 300x-26 and will be used by the Secretary to evaluate state compliance with the statute. The information to be reported is public (45 CFR 96.130 (f)) and is not confidential. Part of the mission of the Center for Substance Abuse Prevention (CSAP) is to assist states\(^1\) by supporting Synar activities and providing technical assistance helpful in determining the type of enforcement measures and control strategies that are most effective. This information is helpful to CSAP in improving technical assistance resources and expertise on enforcement efforts and tobacco control program support activities, including state Synar program support services, through an enhanced technical assistance program involving conferences and workshops, development of training materials and guidance documents, and onsite technical assistance consultation.

How the Synar report can help states

The information gathered for the Synar report can help states describe and analyze substate needs for program enhancements. These data can also be used to report to the state legislature and other state and local organizations on progress made to date in enforcing youth tobacco access laws when aggregated statistical data from state Synar reports can demonstrate to the Secretary the national progress in reducing youth tobacco access problems. This information will also provide Congress with a better understanding of state progress in implementing Synar, including state difficulties and successes in enforcing retailer compliance with youth tobacco access laws.

---

\(^1\)The term “state” is used to refer to all the states and territories required to comply with Synar as part of the Substance Abuse Prevention and Treatment Block Grant Program requirements (42 U.S.C. 300x-64 and 45 C.F.R. 96.121).
Getting assistance in completing the Synar report

If you have questions about programmatic issues, you may call CSAP’s Division of State Programs at (240) 276-2550 and ask for your respective State Project Officer, or contact your State Project Officer directly by telephone or email. If you have questions about fiscal or grants management issues, you may call the Grants Management Officer, Office of Financial Resources, Division of Grants Management, at (240) 276-1422.

Where and when to submit the Synar report

The ASR must be received by SAMHSA no later than December 31, 2019 and must be submitted in the format specified by these instructions. Use of the approved format will avoid delays in the review and approval process. The chief executive officer (or an authorized designee) of the applicant organization must sign page one of the ASR certifying that the state has complied with all reporting requirements.

The state must upload one copy of the ASR using the online WebBGAS (Block Grant Application System). In addition, the following items must be uploaded to WebBGAS:

- FFY 2020 Synar Survey Results: States that use the Synar Survey Estimation System (SSES) must upload one copy of SSES Tables 1–8 (in Excel) to WebBGAS. **Please note that, beginning with the FFY 2019 ASR, SSES will generate Tables 6, 7, and 8, which are based on the optional microdata on product type, retail outlet type, and whether identification was requested. If your state does not submit these optional data, Tables 6, 7, and 8 will be blank. Tables 6, 7, and 8 are generated for the convenience of the state, and states are not required to submit completed versions of Tables 6, 7, or 8.** States that do not use SSES must upload one copy of ASR Forms 1, 4, and 5, and Forms 2 and 3, if applicable, (in Excel), as well as a database with the raw inspection data to WebBGAS.

- Synar Inspection Form: States must upload one blank copy of the inspection form used to record the result of each Synar inspection.

- Synar Inspection Protocol: States must upload a copy of the protocol used to train inspection teams on conducting and reporting the results of the Synar inspections. This document should be different than the Appendix C attached to the Annual Synar Report.

- A scanned copy of the signed Funding Agreements/Certifications

Each state SSA Director has been emailed a login ID and password to log onto the Synar section of the WebBGAS site.
The following form must be signed by the Chief Executive Officer or an authorized designee and submitted with this application. Documentation authorizing a designee must be attached to the application.

### PUBLIC HEALTH SERVICES ACT AND SYNAR AMENDMENT

42 U.S.C. 300x-26 requires each state to submit an annual report of its progress in meeting the requirements of the Synar Amendment and its implementing regulation (45 C.F.R. 96.130) to the Secretary of the Department of Health and Human Services. By signing below, the chief executive officer (or an authorized designee) of the applicant organization certifies that the state has complied with these reporting requirements and the certifications as set forth below.

### SYNAR SURVEY SAMPLING METHODOLOGY

The state certifies that the Synar survey sampling methodology on file with the Center for Substance Abuse Prevention and submitted with the Annual Synar Report for FFY 2020 is up-to-date and approved by the Center for Substance Abuse Prevention.

### SYNAR SURVEY INSPECTION PROTOCOL

The state certifies that the Synar Survey Inspection Protocol on file with the Center for Substance Abuse Prevention and submitted with the Annual Synar Report for FFY 2020 is up-to-date and approved by the Center for Substance Abuse Prevention.

State: WV

Name of Chief Executive Officer or Designee:

Signature of CEO or Designee:

If signed by a designee, a copy of the designation must be attached.
SECTION I: FFY 2021 (Compliance Progress)

YOUTH ACCESS LAWS, ACTIVITIES, AND ENFORCEMENT

42 U.S.C. 300x-26 requires the states to report information regarding the sale/distribution of tobacco products to individuals under age 18.

1. Please indicate any changes or additions to the state tobacco statute(s) relating to youth access since the last reporting year. If any changes were made to the state law(s) since the last reporting year, please upload a copy of the state law to WebBGAS. (see 42 U.S.C. 300x-26.)

   a. Has there been a change in the minimum sale age for tobacco products?
      ☐ Yes ☒ No
      If Yes, current minimum age: ☐ 19 ☐ 20 ☐ 21 ☐ Other (Please specify.)

   b. Have there been any changes in state law that impact the state’s protocol for conducting Synar inspections?
      ☐ Yes ☒ No
      If Yes, indicate change. (Check all that apply.)
      ☐ Changed to require that law enforcement conduct inspections of tobacco outlets
      ☐ Changed to make it illegal for youth to possess, purchase or receive tobacco
      ☐ Changed to require ID to purchase tobacco
      ☐ Changed definition of tobacco products
      ☐ Other change(s) (Please describe.)

   c. Have there been any changes in state law that impact the following?
      Licensing of tobacco vendors ☐ Yes ☒ No
      Penalties for sales to minors ☐ Yes ☒ No
      Vending machines ☐ Yes ☒ No
      Added product categories to youth access law ☐ Yes ☒ No

2. Describe how the Annual Synar Report (see 45 C.F.R. 96.130(e)) was made public within the state prior to submission of the ASR. (Check all that apply.)

   ☐ Placed on file for public review
   ☒ Posted on a state agency Web site (Please provide exact Web address and the date when the FFY 2021 ASR was posted to this Web address.)

   Web address: https://dhhr.wv.gov/bhhf/Sections/programs/ProgramsPartnerships/AlcoholismandDrugAbuse/Pages/SYNAR.aspx
3. Identify the following agency or agencies (see 42 U.S.C. 300x-26 and 45 C.F.R. 96.130).
   a. The state agency(ies) designated by the Governor for oversight of the Synar requirements:
      West Virginia Department of Health and Human Resources/Bureau for Behavioral Health
      Has this changed since last year’s Annual Synar Report?
      ☐ Yes  ☒ No

   b. The state agency(ies) responsible for conducting random, unannounced Synar inspections:
      West Virginia Department of Health and Human Resources/Bureau for Behavioral Health. The West Virginia State Police serve as the enforcement arm for Synar inspections and issue citations for violations.
      Has this changed since last year’s Annual Synar Report?
      ☐ Yes  ☒ No

   c. The state agency(ies) responsible for enforcing youth tobacco access law(s):
      The West Virginia State Police
      Has this changed since last year’s Annual Synar Report?
      ☐ Yes  ☒ No

4. Identify the following agencies and describe their relationship with the agency responsible for the oversight of the Synar requirements.
   a. Identify the state agency responsible for tobacco prevention activities (the agency that receives the Centers for Disease Control and Prevention’s National Tobacco Control Program funding).
      Department of Health and Human Resources (Bureau for Public Health, Division of Tobacco Prevention (DTP)).

   b. Has the responsible agency changed since last year’s Annual Synar Report?
      ☐ Yes  ☒ No
c. Describe the coordination and collaboration that occur between the agency responsible for tobacco prevention and the agency responsible for oversight of the Synar requirements. (Check all that apply.) The two agencies

☐ Are the same
☐ Have a formal written memorandum of agreement
☒ Have an informal partnership
☐ Conduct joint planning activities
☐ Combine resources
☐ Have other collaborative arrangement(s) (Please describe.) ______________________
☐ No relationship

d. Does a state agency contract with the Food and Drug Administration’s Center for Tobacco Products (FDA/CTP) to enforce the youth access and advertising restrictions in the Family Smoking Prevention and Tobacco Control Act?  
☒ Yes  ☐ No  (if no, go to Question 5)

e. If yes, identify the state agency responsible for enforcing the youth access and advertising restrictions in the Family Smoking Prevention and Tobacco Control Act (the agency that is under contract to the Food and Drug Administration’s Center for Tobacco Products (FDA/CTP)).

WV Department of Health and Human Resources/Bureau for Behavioral Health and the WV State Police. ________________________________

f. Has the responsible agency changed since last year’s Annual Synar Report?  
☐ Yes  ☒ No

g. Describe the coordination and collaboration that occur between the agency contracted with the FDA to enforce federal youth tobacco access laws and the agency responsible for oversight of the Synar requirements. (Check all that apply.) The two agencies:

☒ Are the same
☐ Have a formal written memorandum of agreement
☐ Have an informal partnership
☐ Conduct joint planning activities
☐ Combine resources
☐ Have other collaborative arrangement(s) (Please describe.) ______
☐ No relationship

h. Does the state use data from the FDA enforcement inspections for Synar survey reporting?  
☒ Yes  ☐ No
5. Please answer the following questions regarding the state’s activities to enforce the state’s youth access to tobacco law(s) in FFY 2019 (see 42 U.S.C. 300x-26 and 45 C.F.R. 96.130(e)).

a. Which one of the following describes the enforcement of state youth access to tobacco laws carried out in your state? (Check one category only.)

☐ Enforcement is conducted exclusively by local law enforcement agencies.
☒ Enforcement is conducted exclusively by state agency(ies).
☐ Enforcement is conducted by both local and state agencies.

b. The following items concern penalties imposed for all violations of state youth access to tobacco laws by LOCAL AND/OR STATE LAW ENFORCEMENT AGENCIES (this does not include enforcement of local laws or federal youth tobacco access laws). Please fill in the number requested. If state law does not allow for an item, please mark “NA” (not applicable). If a response for an item is unknown, please mark “UNK.” The chart must be filled in completely.

c. Are citations or warnings issued to retailers or clerks who sell tobacco to minors for inspections that are part of the Synar survey?

☒ Yes  ☐ No

If “Yes” to 5c, please describe the state’s procedure for minimizing risk of bias to the survey results from retailers alerting each other to the presence of the survey teams:

Under the annual contract with the WV State Police (WVSP), the issue of ‘Bias” has been part of the annual contract. The document that the State Police inspection team member will not in any way forward any information regarding inspection schedules to an individual retailer or business associate during the entire inspection period. The Superintendent signs the Agreement and each WV State Trooper, Youth Inspector and Adult Coordinator is provided a copy of their respective protocols. Additionally, the Youth Inspector signs a Participant Agreement that states that they understand that any information they collect or
observe while completing the inspections will be kept confidential to the extent that
the law allows.

d. Which one of the following best describes the level of enforcement of state youth
access to tobacco laws carried out in your state? (Check one category only.)

☐ Enforcement is conducted only at those outlets randomly selected for the Synar
survey.

☐ Enforcement is conducted only at a subset of outlets not randomly selected for
the Synar survey.

☒ Enforcement is conducted at a combination of outlets randomly selected for the
Synar survey and outlets not randomly selected for the Synar survey.

e. Did every tobacco outlet in the state receive at least one compliance check that
included enforcement of the state youth tobacco access law(s) in the last year?

☐ Yes  ☒ No

f. What additional activities are conducted in your state to support enforcement
and compliance with state youth tobacco access law(s)? (Check all that apply
and briefly describe each activity in the text boxes below each activity.)

☒ Merchant education and/or training

The West Virginia Bureau for Behavioral Health, through its six regional grantees
and their sub-grantees, utilize the “See Red” Retailer Education Campaign for
merchant-education purposes. WVDHHR/BBH disseminated the “See Red?”
material to all eligible (for Synar inspection) retailers throughout the state. The “See
Red?” material was revised relative to changes in the photo IDs of youth under 18,
by adding FDA requirement information and information relative to WV State Code
§16-9A-2C (as amended). (the “C” was added to further clarify issuance to
corporations/owners). The “See Red?” material was disseminated to retailers in our
55 counties.

On-line “See Red” retailer education will be developed for owners/corporations to
use in conjunction with their own specific educational materials should they wish to
use it. Of course, this will need to be revised when the law changes to 21. Until
then, we will continue to add state law requirements as well as federal law
requirements.

E34

☒ Incentives for merchants who are in compliance (e.g., nonenforcement
  compliance checks in which compliant retailers are given positive reinforcement
  and noncompliant retailers are warned about youth access laws)

While we do not implement non-enforcement compliant inspections, compliant Synar-inspected retailers receive a signed congratulatory certificate from
WVDDH/BBH’s Commissioner, Christina Mullins. Compliant Synar-inspected
retailers are also listed on the website. Regional grantees may also send
congratulatory letters/certificates, etc for those retailers who did not sell.
Community education regarding youth access laws

The Synar Coordinator annually provides BBH’s six regional grantees with information on the “See Red?” retailer education material as well as information on the WV State Code §16-9A-2 c and information on the Family Smoking Prevention and Tobacco Control Act/FDA to publish in any of their media initiatives. The information also appears on the DHHR/BBH website. Point-of-sale stickers are mailed out to all eligible-for-inspections retailers, including “ID” required stickers for the door or register “point of sale” area for all customers to see. Additional “See Red?” material is provided for exhibit purposes should the retailer wish to display them and use them as training material for their employees.

Media use to publicize compliance inspection results

The FFY 2021 Annual Synar Report has been made available on the WVDHHR website: https://dhhr.wv.gov/bhhf/Sections/programs/ProgramsPartnerships/AlcoholismandDrugAbuse/Pages/SYNAR.aspx for public comment. The ASR will continue to be made available for view on the website. Media information has been made available for grantees’ use should they want to publish names of compliant retailers in their respective newspaper, send thank you letters, etc and is also available on the WVDHHR website. The Synar Compliance Specialist has not been given authorization to publish names of non-compliant retailers.

Names of compliant retailers during Synar inspections are listed by county on the WVDHHR website: https://dhhr.wv.gov/bhhf/Sections/programs/ProgramsPartnerships/AlcoholismandDrugAbuse/Pages/SYNAR.aspx

Community mobilization to increase support for retailer compliance with youth access laws

Due to COVID-19 restrictions, face to face community outreach did not take place face to face as happened in past years. However, a few of our grantees sent out information for their newsletters and information for newspapers as to the law.

Other activities (Please list.)

Once Synar Inspections have been completed and court proceedings held, the Synar Compliance Specialists Staff, will personally visit all retailers who were out of compliance and provide on-site face-to-face TA, so that those retailers are less likely to be in violation in the future. Additionally, the Synar Compliance Specialist will continue to reach out to corporate entities to provide TA once COVID-19 rates lessen.
Every three years the Synar Compliance Specialist and BBH staff, visit at least three retailers (mom and pop, and corporate) in each of the 55 counties in the state asking for feedback on the merchant education as well as what might be added that would be helpful. This will be very helpful in deciding what to include in the updated merchant education for T-21. Additionally, we will be looking over the merchant education efforts of other states/jurisdictions to see if some of their information might be helpful here in WV.

SYNAR SURVEY METHODS AND RESULTS

The following questions pertain to the survey methodology and results of the Synar survey used by the state to meet the requirements of the Synar Regulation in FFY 2019 (see 42 U.S.C. 300x-26 and 45 C.F.R. 96.130).

6. Has the sampling methodology changed from the previous year?

☐ Yes  ☒ No

_The state is required to have an approved up-to-date description of the Synar sampling methodology on file with CSAP. Please submit a copy of your Synar Survey Sampling Methodology (Appendix B). If the sampling methodology changed from the previous reporting year, these changes must be reflected in the methodology submitted._

a. If yes, describe how and when this change was communicated to SAMHSA

A letter of change in methodology was submitted on 12-4-20 to Dr. Thia Walker indicating our original sampling methodology as well as the change in sampling methodology due to a COVID-19 spike prior to the termination of inspections due to further spikes in COVID-19 infections throughout the state.

7. Please answer the following questions regarding the state’s annual random, unannounced inspections of tobacco outlets (see 45 C.F.R. 96.130(d)(2)).

a. Did the state use the optional Synar Survey Estimation System (SSES) to analyze the Synar survey data?

☒ Yes  ☐ No

_If Yes, upload a copy of SSES tables 1–8 (in Excel) to WebBGAS. Then go to Question 8. If No, continue to Question 7b._

b. Report the weighted and unweighted Retailer Violation Rate (RVR) estimates, the standard error, accuracy rate (number of eligible outlets divided by the total number of sampled outlets), and completion rate (number of eligible outlets inspected divided by the total number of eligible outlets).

<table>
<thead>
<tr>
<th>Unweighted RVR</th>
<th>Weighted RVR</th>
<th>Standard error (s.e.) of the (weighted) RVR</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Fill in the blanks to calculate the right limit of the right-sided 95% confidence interval.
RVR Estimate \((1.645 \times \text{Standard Error})\) equals Right Limit

Accuracy rate

Completion rate

c. **Fill out Form 1 (See Appendix A: Forms 1–5 Templates).** *(Required regardless of the sample design.)*

d. **How were the (weighted) RVR estimate and its standard error obtained?**

*Check the one that applies.*

- □ Form 2 (Optional) *(See Appendix A: Forms 1–5 Templates) (Attach completed Form 2.)*
- □ Other *(Please specify. Provide formulas and calculations or attach and explain the program code and output with description of all variable names.)*

e. **If stratification was used, did any strata in the sample contain only one outlet or cluster this year?**

- □ Yes  □ No  □ No stratification

*If Yes, explain how this situation was dealt with in variance estimation.*

f. **Was a cluster sample design used?**

- □ Yes  □ No

*If Yes, fill out and attach Form 3 (See Appendix A: Forms 1–5 Templates), and answer the following question.*

*If No, go to Question 7g.*

Were any certainty primary sampling units selected this year?

- □ Yes  □ No

*If Yes, explain how the certainty clusters were dealt with in variance estimation.*

g. **Report the following outlet sample sizes for the Synar survey.**

<table>
<thead>
<tr>
<th>Effective sample size (sample size needed to meet the SAMHSA precision requirement assuming simple random sampling)</th>
<th>Sample Size</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Target sample size</strong> (the product of the effective sample size and the design effect)</td>
<td></td>
</tr>
<tr>
<td><strong>Original sample size</strong> (inflated sample size of the target sample to counter the sample attrition due to ineligibility and noncompletion)</td>
<td></td>
</tr>
<tr>
<td><strong>Eligible sample size</strong> (number of outlets found to be eligible in the sample)</td>
<td></td>
</tr>
<tr>
<td><strong>Final sample size</strong> (number of eligible outlets in the sample for which an inspection was completed)</td>
<td></td>
</tr>
</tbody>
</table>

h. Fill out Form 4 (See Appendix A: Forms 1–5 Templates).

8. Did the state’s Synar survey use a list frame?
   ☒ Yes ☐ No
   
   *If Yes, answer the following questions about its coverage.*
   
   a. The calendar year of the latest Sampling frame coverage study: 2019
   
   b. Percent coverage from the latest Sampling frame coverage study: 96.3%
   
   c. Was a new study conducted in this reporting period?
      ☒ Yes ☐ No
      
      *If Yes, please complete Appendix D (List Sampling Frame Coverage Study) and submit it with the Annual Synar Report.*
      
      d. The calendar year of the next coverage study planned: 2024

9. Has the Synar survey inspection protocol changed from the previous year?
   ☐ Yes ☒ No
   
   *The state is required to have an approved up-to-date description of the Synar inspection protocol on file with CSAP. Please submit a copy of your Synar Survey Inspection Protocol (Appendix C). If the inspection protocol changed from the previous year, these changes must be reflected in the protocol submitted.*
   
   a. **If Yes, describe how and when this change was communicated to SAMHSA**
   
   b. **Provide the inspection period: From 5/1/2020 to 8/31/2020**
   
   c. **Provide the number of youth inspectors used in the current inspection year:**
      16
      
      *NOTE: If the state uses SSES, please ensure that the number reported in 9c matches that reported in SSES Table 4, or explain any difference.*
      
   d. **Fill out and attach Form 5 in Appendix A (Forms 1–5). (Not required if the state*
used SSES to analyze the Synar survey data.)

SECTION II: FFY 2020 (Intended Use):

Public Law 42 U.S.C. 300x-26 of the Public Health Service Act and 45 C.F.R. 96.130 (e) (4, 5) require that the states provide information on future plans to ensure compliance with the Synar requirements to reduce youth tobacco access.

1. In the upcoming year, does the state anticipate any changes in:

   Synar sampling methodology  □ Yes  ☑ No
   Synar inspection protocol     □ Yes  ☑ No

If changes are made in either the Synar sampling methodology or the Synar inspection protocol, the state is required to obtain approval from CSAP prior to implementation of the change and file an updated Synar Survey Sampling Methodology (Appendix B) or an updated Synar Survey Inspection Protocol (Appendix C), as appropriate.

2. Please describe the state’s plans to maintain and/or reduce the target rate for Synar inspections to be completed in FFY 2020. Include a brief description of plans for law enforcement efforts to enforce youth tobacco access laws, activities that support law enforcement efforts to enforce youth tobacco access laws, and any anticipated changes in youth tobacco access legislation or regulation in the state.

   While we have a good merchant education effort in WV, we are developing an on-line program to be used by retailers in addition to their respective training programs. Right now, we are on hold with the revision until T-21 is passed. Until it is, our efforts will be the same with the See Red? Retailer information citing both state and federal laws. Also, when BBH staff physically visit stores to educate retailers, all information is discussed focusing primarily on federal requirements. Additionally, corporate efforts will be enhanced by addressing the WV Retailers Association to make training available to all corporate employees who sell tobacco products. Initial contact has taken place but has been stalled due to COVID-19.

   Relative to WV law, the enforcement protocol has been written based on WV State Code 16-9A-2c. WV State Code states that both the clerk and store owner/corporation are cited should a sale occur. However, while WV State Troopers have a strict protocol to follow should a buy occur, some county magistrates and prosecuting attorneys choose not to cite the store owner/corporations stating that it would be bad for business. Efforts will be made to address the annual training conference for Magistrates, that is sponsored by the WV Supreme Court in order to describe the ramifications should WV be out of compliance. Letters will also be sent to Prosecuting Attorneys explaining the importance of tobacco compliance inspections and the ramifications of non-compliance. At this time, no changes have been made in the State Code. Should there be a change in State Code requiring customers to be 21 in order to buy tobacco/nicotine products, education efforts will be changed. COVID-19 has paused many of our efforts but once we go back to some semblance of normalcy, our efforts will go forward.

3. Describe any challenges the state faces in complying with the Synar regulation. (Check all that apply and describe each challenge in the text box below it.)
a. Limited resources for law enforcement of youth access laws

b. Limited resources for activities to support enforcement and compliance with youth tobacco access laws

c. Limitations in the state youth tobacco access laws

As stated above, our state law is still 18 while federal law is 21

d. Limited public support for enforcement of youth tobacco access laws

e. Limitations on completeness/accuracy of list of tobacco outlets

f. Limited expertise in survey methodology

g. Laws/regulations limiting the use of minors in tobacco inspections

h. Difficulties recruiting youth inspectors

i. Issues regarding the balance of inspections conducted by youth inspectors age 15 and under

We use minor youth between the ages of 16 and 17 years of age. Ages may be unbalanced due to COVID-19 issues. Parents may have been apprehensive of allowing their child to do inspections even though stringent safety measures were put into place.

j. Issues regarding the balance of inspections conducted by one gender of youth inspectors

This year, due to COVID-19, we used 16 and 17 year old youth whose parents would allow them to do inspections. While we had stringent precautionary measures in place, some parents would not allow their children to do inspections. Therefore, gender make up may not be balanced.

k. Geographic, demographic, and logistical considerations in conducting inspections
l. Cultural factors (e.g., language barriers, young people purchasing for their elders)

m. Issues regarding sources of tobacco under tribal jurisdiction

n. Other challenges (Please list.)

We still have issue with a number of magistrates/prosecuting attorneys not wanting to cite owners/corporations. Therefore, we have addressed this issue with our legal department and that of the WV State Police to see if there is a better way to cite the owner/corporation under WV State Code 16-9A-2.c.

While the clerk is cited at the time of inspection, we now are having WVSP Headquarters reporting on the status of citation information on the owner/corporation. While we have numerous magistrate offices closed to the public due to COVID-19, we have to report those citations as pending.
**APPENDIX A: FORMS 1–5 TEMPLATES**

**FORM 1 (Required for all states not using the Synar Survey Estimation System (SSES) to analyze the Synar Survey data)**

Complete Form 1 in Excel to report sampling frame and sample information and to calculate the unweighted retailer violation rate (RVR) using results from the current year’s Synar survey inspections.

**Instructions for Completing Form 1:** In the top right-hand corner of the Excel form, provide the state name and reporting federal fiscal year (FFY 2020). Provide the remaining information by stratum if stratification was used. Make copies of the form if additional rows are needed to list all the strata.

**Column 1:**  _If stratification was used:_
- 1(a) Sequentially number each row.
- 1(b) Write in the name of each stratum. All strata in the state must be listed.

_If no stratification was used:_
- 1(a) Leave blank.
- 1(b) Write “state” in the first row (indicates that the whole state is a single stratum).

*Note for unstratified samples: For Columns 2–5, wherever the instruction refers to “each stratum,” report the specified information for the state as a whole.*

**Column 2:**
- 2(a) Report the number of over-the-counter (OTC) outlets in the sampling frame in each stratum.
- 2(b) Report the number of vending machine (VM) outlets in the sampling frame in each stratum.
- 2(c) Report the combined total of OTC and VM outlets in the sampling frame in each stratum.

**Column 3:**
- 3(a) Report the estimated number of eligible OTC outlets in the OTC outlet population in each stratum.
- 3(b) Report the estimated number of eligible VM outlets in the VM outlet population in each stratum.
- 3(c) Report the combined total estimated number of eligible OTC and VM outlets in the total outlet population in each stratum.

*The estimates for Column 3 can be obtained from the Synar survey sample as the weighted sum of eligible outlets by outlet type.*

**Column 4:**
- 4(a) Report the number of eligible OTC outlets for which an inspection was completed, for each stratum.
- 4(b) Report the numbers of eligible VM outlets for which an inspection was completed, for each stratum.
- 4(c) Report the combined total of eligible OTC and VM outlets for which an inspection was completed, for each stratum.

**Column 5:**
- 5(a) Report the number of OTC outlets found in violation of the law as a result of completed inspections, for each stratum.
- 5(b) Report the number of VM outlets found in violation of the law as a result of completed inspections, for each stratum.
- 5(c) Report the combined total of OTC and VM outlets found in violation of the law as a result of completed inspections, for each stratum.

**Totals:** For each subcolumn (a–c) in Columns 2–5, provide totals for the state as a whole in the last row of the table. These numbers will be the sum of the numbers in each row for the respective column.

FFY: 2021
FORM 5 (Required for all states not using the Synar Survey Estimation System [SSES] to analyze the Synar survey data)

Complete Form 5 in Excel to show the distribution of outlet inspection results by age and gender of the youth inspectors.

Instructions for Completing Form 5: In the top right-hand corner of the Excel form, provide the state name and reporting federal fiscal year (FFY 2020).

Column 1:   Enter the number of attempted buys by youth inspector age and gender.
Column 2:   Enter the number of successful buys by youth inspector age and gender.

If the inspectors are age eligible but the gender of the inspector is unknown, include those inspections in the “Other” row. Calculate subtotals for males and females in rows marked “Male Subtotal” and “Female Subtotal.” Sum subtotals for Male, Female, and Other and record in the bottom row marked “Total.” Verify that that the total of attempted buys and successful buys equals the total for Column 4(c) and Column 5(c), respectively, on Form 1. If the totals do not match, please explain any discrepancies.

Appendix B (Sampling Design) and Appendix C (Inspection Protocol) are to reflect the state’s CSAP-approved sampling design and inspection protocol. These appendixes, therefore, should generally describe the design and protocol and, with the exception of Question #10 of Appendix B, are not to be modified with year-specific information. Please note that any changes to either appendix must receive CSAP’s advance, written approval. To facilitate the state’s completion of this section, simply cut and paste the previously approved sampling design (Appendix B) and inspection protocol (Appendix C) and respond to Question #10 of Appendix B to provide the requested information about sample size calculations for the Synar survey conducted in FFY 2019.
APPENDIX B: SYNAR SURVEY SAMPLING METHODOLOGY

State: WV
FFY: 2021

1. What type of sampling frame is used?
   - List frame (Go to Question 2.)
   - Area frame (Go to Question 3.)
   - List-assisted area frame (Go to Question 2.)

2. List all sources of the list frame. Indicate the type of source from the list below. Provide a brief description of the frame source. Explain how the lists are updated (method), including how new outlets are identified and added to the frame. In addition, explain how often the lists are updated (cycle). (After completing this question, go to Question 4.)

   Use the corresponding number to indicate Type of Source in the table below.

<table>
<thead>
<tr>
<th>Name of Frame Source</th>
<th>Type of Source</th>
<th>Description</th>
<th>Updating Method and Cycle</th>
</tr>
</thead>
<tbody>
<tr>
<td>FDA</td>
<td>3</td>
<td>Five years ago, we changed our sampling methodology by enhancing the method of canvassing retailers by using the WV Tax Department list for screening the retailer lists for both FDA inspections as well as Synar inspections since the WV Department of Health and Human Resources/Bureau for Behavioral Health is the lead agency for both the FDA and Synar programs. Initially, the Synar Coordinator would receive the retailer list annually from the WV Health Statistics Center. (WVDHHR/BBH statistical contractor) to be screened prior to Synar Inspections (sans bars or adult businesses). Once the WVDHHR/BBH was awarded the FDA contract, it was determined that we would use the same WV Tax Department list to screen/validate the canvassing of both the FDA and Synar lists since all stores sampled for Synar inspections are contained in the entire list of retailers provided by the WV Tax Department. While the Synar Coordinator started out canvassing retailers using the old method, it was quickly realized that using the FDA spreadsheet would be better served since it was a duplication of effort. Therefore, this method took place a few years ago. By utilizing the FDA Retailer Spreadsheet, canvassing the list of retailers is on-going. The seven FDA inspectors and</td>
<td>Annually</td>
</tr>
</tbody>
</table>

   - 1 – Statewide commercial business list
   - 2 – Local commercial business list
   - 3 – Statewide tobacco license/permit list
   - 4 – Statewide retail license/permit list
   - 5 – Statewide liquor license/permit list
   - 6 – Other

FDA

Annually
three FDA Program Managers (one of whom is the Synar Compliance Specialist) either conduct inspections in or validates businesses throughout the year in all of our 55 counties. Changes are made in the TIMS list, which is utilized for FDA inspections. The Synar sample is pulled from the spreadsheet kept by the FDA Inspection Coordinator (deleting bars/adult businesses) thus making them eligible for Synar Inspection. This list includes retailers who sell e-cigarettes and other vapor products. Since our FDA inspectors are continuously on the road in their respective assigned counties, even if not implementing FDA inspections, they know if a store has gone out of business or if there is a new store that has opened. The Program Manager validates store status and calls in any changes. In addition, should there be any further question relative to store status, phone calls are made to county/city departments or post offices to gather additional information. BBH grantees also alert the Synar Coordinator should a change in store status occur. This method of validating retailer canvassing is much more accurate and efficient since it is done on an ongoing basis throughout the year and not just once a year as had been done previously.

3. If an area frame is used, describe how area sampling units are defined and formed.

   a. Is any area left out in the formation of the area frame?

      □ Yes  ☒ No

      If Yes, what percentage of the state’s population is not covered by the area frame?

      _____% 

4. Federal regulation requires that vending machines be inspected as part of the Synar survey. Are vending machines included in the Synar survey?

      □ Yes  ☒ No
If No, please indicate the reason(s) they are not included in the Synar survey. Please check all that apply.

☐ State law bans vending machines.
☒ State law bans vending machines from locations accessible to youth.
☒ State has a contract with the FDA and is actively enforcing the vending machine requirements of the Family Smoking Prevention and Tobacco Control Act.
☐ Other (Please describe.) ________________________________

If Yes, please indicate how likely it is that vending machines will be sampled.

☐ Vending machines are sampled separately to ensure vending machines are included in the sample
☐ Vending machines are sampled together with over the counter outlets, so it is possible that no vending machines were sampled, however they are included in the sampling frame and have a non-zero probability of selection
☐ Other reasons (Please describe.) ________________________________

5. Which category below best describes the sample design? (Check only one.)

☐ Census (STOP HERE: Appendix B is complete.)

Unstratified statewide sample:
☒ Simple random sample (Go to Question 9.)
☐ Systematic random sample (Go to Question 6.)
☐ Single-stage cluster sample (Go to Question 8.)
☐ Multistage cluster sample (Go to Question 8.)

Stratified sample:
☐ Simple random sample (Go to Question 7.)
☐ Systematic random sample (Go to Question 6.)
☐ Single-stage cluster sample (Go to Question 7.)
☐ Multistage cluster sample (Go to Question 7.)
☐ Other (Please describe and go to Question 9.) ________________________________

6. Describe the systematic sampling methods. (After completing Question 6, go to Question 7 if stratification is used. Otherwise go to Question 9.)

7. Provide the following information about stratification.
   a. Provide a full description of the strata that are created.

  
   b. Is clustering used within the stratified sample?

   ☐ Yes  (Go to Question 8.)
   ☐ No   (Go to Question 9.)
8. Provide the following information about clustering.

a. **Provide a full description of how clusters are formed.** *(If multistage clusters are used, give definitions of clusters at each stage.)*

b. Specify the sampling method (simple random, systematic, or probability proportional to size sampling) for each stage of sampling and describe how the method(s) is (are) implemented.

9. Provide the following information about determining the Synar Sample.

a. **Was the Synar Survey Estimation System (SSES) used to calculate the sample size?**
   - [X] Yes *(Respond to part b.)*
   - [ ] No *(Respond to part c and Question 10c.)*

b. **SSES Sample Size Calculator used?**
   - [X] State Level *(Respond to Question 10a.)*
   - [ ] Stratum Level *(Respond to Question 10a and 10b.)*

c. **Provide the formulas for determining the effective, target, and original outlet sample sizes.**

   The SSES Sample Size Calculator was used to determine the minimum adequate sample size. To ensure the study meets SAMHSA precision requirement, a safety margin of 40% is used. Below is the formula for calculating a sample size using a 1-tail test:

   Effective sample size:
   \[ n_e = \frac{1}{(s.e.)^2 + \frac{1}{N}} \]

   Where \( P \) is the previous year’s RVR
   \( s.e = 0.0182 \) is the standard error for the estimate for 3% margin of error for one-sided confidence interval
   \( N \) is the total number of outlets in the sampling frame

   The target sample size \( n_1 \) is the effective sample size for simple random sampling times the design effect from the previous year’s survey.
   The original sample size is determined by:
Where $s$ is a safety margin of 40%, $r_1$ is the previous year’s eligibility rate, and $r_c$ is the previous year’s completion rate.

West Virginia always samples more than the Planned Original Sample Size recommends. Federal Fiscal Year 2021’s Effective and Target (Minimum) Sample Sizes were calculated at 165 while the Planned Original Sample Size was calculated at 249. West Virginia normally rounds up to the next multiple of 50, thus increasing the sample size to 250. However, West Virginia has chosen to have the same sample size as Federal Fiscal Years 2018 through 2020 at 400. Due to this year’s COVID pandemic, West Virginia was only able to sample 144 outlets.

10. Provide the following information about sample size calculations for the Synar survey conducted in FFY 2021.

a. If the state uses the sample size formulas embedded in the SSES Sample Size Calculator to calculate the state level sample size, please provide the following information:

Inputs for Effective Sample Size:
RVR: 6.33%
Frame Size: 2,203

Input for Target Sample Size:
Design Effect: 1.0

Inputs for Original Sample Size:
Safety Margin: 40%
Accuracy (Eligibility) Rate: 95.58%
Completion Rate: 97.43%

b. If the state uses the sample size formulas embedded in the SSES Sample Size Calculator to calculate the stratum level sample sizes, please provide the stratum level information:

[c] area

c. If the state does not use the sample size formulas embedded in the SSES Sample Size Calculator, please provide all inputs required to calculate the effective, target, and original sample sizes as indicated in Question 9.

[c] area
APPENDIX C: SYNAR SURVEY INSPECTION PROTOCOL SUMMARY

State:  WV  
FFY:  2021

Note: Upload to WebBGAS a copy of the Synar inspection form under the heading “Synar Inspection Form” and a copy of the protocol used to train inspection teams on conducting and reporting the results of the Synar inspections under the heading “Synar Inspection Protocol.”

1. How does the state Synar survey protocol address the following?
   a. Consummated buy attempts?
      ☒ Required
      □ Permitted under specified circumstances (Describe: )
      □ Not permitted
   
   b. Youth inspectors to carry ID?
      ☒ Required
      □ Permitted under specified circumstances (Describe: )
      □ Not permitted
   
   c. Adult inspectors to enter the outlet?
      ☒ Required
      □ Permitted under specified circumstances (Describe: )
      □ Not permitted
   
   d. Youth inspectors to be compensated?
      ☒ Required
      □ Permitted under specified circumstances (Describe: )
      □ Not permitted

2. Identify the agency(ies) or entity(ies) that actually conduct the random, unannounced Synar inspections of tobacco outlets. (Check all that apply.)
   ☒ Law enforcement agency(ies)
   □ State or local government agency(ies) other than law enforcement
   □ Private contractor(s)
   ☒ Other

List the agency name(s):  WV State Police serve as the enforcement arm. Regional grantees/sub-grantees serve as Adult Coordinators. The Synar Compliance Specialist monitors approximately 10% of the inspections for quality
assurance purposes. This year, due to COVID-19 rigid procedures were put in place in order to provide as much safety as possible to our Inspection Teams. Those procedures have been included in the attachments in SSES.

3. Are Synar inspections combined with law enforcement efforts (i.e., do law enforcement representatives issue warnings or citations to retailers found in violation of the law at the time of the inspection?)?

☐ Always  ☐ Usually  ☐ Sometimes  ☐ Rarely  ☐ Never

4. Describe the type of tobacco products that are requested during Synar inspections.
   a. What type of tobacco products are requested during the inspection?
      ☒ Cigarettes
      ☒ Small Cigars
      ☒ Cigarillos
      ☒ Smokeless Tobacco
      ☒ Electronic Cigarettes/Electronic Nicotine Delivery Systems (ENDS)
      ☒ Other E-Juice, Rolling papers

   b. Describe the protocol for identifying what types of products and what brands of products are requested during an inspection.
      When using a male youth inspector, every third attempt must be smokeless tobacco since the use of smokeless tobacco is high in West Virginia. The team will decide on what brand to ask for when arriving at the retail establishment seeing what brands are advertised outside of the store cigarette/rolling papers, e-cigarettes, and other vapor products will be requested of the teams to ask for so that 10% of all eligible stores are inspected for paper, e-juice, e-cigarettes, or vapor products.

5a. Describe the methods used to recruit, select, and train adult supervisors.

   The WVDHHR/BBH has six regional grantees who provide prevention services in the state. These six grantees have oversight of a number of counties/sub-grantees within their respective region, and an Adult Coordinator for each of the counties, within a region, serves as the Adult Coordinator for Synar Inspections. They recruit and train Youth Inspectors for their respective counties. Protocol/training is provided to grantees/ Adult Coordinators by the Synar Compliance Specialist. They are provided protocols and training information for each of the Synar team members-Adult Coordinator, WVSP Trooper, and Youth Inspector.

5b. Describe the methods used to recruit, select, and train youth inspectors.

   Once the Synar Compliance Specialist meets and provides protocols to the Adult Coordinators (grantees/sub-grantees), they recruit youth Inspectors from youth they work with within their respective prevention programs (FRNs, church groups, family members, RAZE, SADD, Jr.ROTC, etc). They may utilize group training for the youth Inspectors, or they may train the youth inspector on a one-to-one basis. That determination is left up to the Adult Coordinator.
6. Are there specific legal or procedural requirements instituted by the state to address the issue of youth inspectors’ immunity when conducting inspections?

a. Legal
   ☒ Yes  ☐ No

   *(If Yes, please describe.)*

   Contained within WV State Code §16-9A-7, Tobacco Usage Restrictions
   §16-9A-7 Persons under the age of 18 years may be enlisted by such commissioner,
   superintendent, sheriff’s or chiefs of police or employees of agents thereof to test
   compliance only if the testing is conducted under the direct supervision of the
   commissioner, superintendent, sheriff’s or chiefs or police or employees in first
   obtained and such shall not be in violation of section three of this article and chapter
   when actin under the direct supervision of the commissioner.

b. Procedural
   ☒ Yes  ☐ No

   *(If Yes, please describe.)*

   The above-referenced state law that provides for the immunity, every
   precaution is taken so that the youth will not have to appear in court should a
   citation be contested by the retailer. However, it is up to the county magistrate,
   judge, or prosecuting attorney as to require the youth to appear in court. Since the
   law enforcement officer is the actual witness to the attempted buy, it is seldom
   necessary to call the youth inspector to appear.

7. Are there specific legal or procedural requirements instituted by the state to address the issue of the safety of youth inspectors during all aspects of the Synar inspection process?

a. Legal
   ☒ Yes  ☐ No

   *(If Yes, please describe.)*

   Contained within WV State Code Article 9A, Tobacco Usage Restrictions
   §16-9A-7 a law enforcement officer is required, by law to participate on the
   inspection team on each inspection. Also, youth are not usually assigned to their
   home communities so as not to be conducting inspections in stores where they
   might be recognized.

b. Procedural
   ☒ Yes  ☐ No

   *(If Yes, please describe.*)
Seat belts must be worn by all inspection team members. There is no use of tobacco products during inspections on the way to/from inspections by adults. In most cases, youth from adjacent counties are used to inspect counties selected for Synar Inspections unless the county is large enough to protect their identity. The Law Enforcement Officers (Troopers) are witness to all attempts/buys of tobacco products. Law Enforcement Officers enter the outlet prior to the Youth Inspector. The Youth Inspector immediately leaves the outlet after the attempt to buy and returns to the vehicle where the Adult Coordinator is waiting prior to the return of the law enforcement officer. The vehicle is always parked well away from the main door where owners/clerks are unable to visually see the vehicle. If the youth feels unsafe in a situation or if the outlet is deemed to be unsafe by the law enforcement officer or other adult inspection team member, the inspection of that particular outlet is not completed at that time. The inspection of that outlet would be rescheduled if possible. Due to COVID-19, additional safety requirements were implemented. Copy of those requirements are included in the SSES.

8. Are there any other legal or procedural requirements the state has regarding how inspections are to be conducted (e.g., age of youth inspector, time of inspections, training that must occur)?

a. Legal

☒ Yes ☐ No

(If Yes, please describe.)

b. Procedural

☒ Yes ☐ No

(If Yes, please describe.)

It is advised by the State Synar Coordinator that inspections be implemented during daylight hours if possible, for safety concerns. Youth inspectors must be 16 or 17 years of age and have a WV learner’s permit, driver’s license or state-issued photo ID. The Adult Coordinator must train the Youth Inspectors regarding their protocol, provided by the State Synar Coordinator, prior to start-up inspections.
APPENDIX D: LIST SAMPLING FRAME COVERAGE STUDY

(LIST FRAME ONLY)

State: WV
FFY: 2021

1. Calendar year of the coverage study: 2019

2. a. Unweighted percent coverage found: 96.3%
   b. Weighted percent coverage found: 96.3%
   c. Number of outlets found through canvassing: 190
   d. Number of outlets matched on the list frame: 183

3. a. Describe how areas were defined. (e.g., census tracts, counties, etc.)

   According to SAMHSA recommendations, West Virginia was expected to sample anywhere from 130 to 200 outlets. There were 190 tobacco-selling outlets (that minor youth can access) found in these census tracts during canvassing. Seven (7) of these outlets were determined to be missing from our original 2019 screened list. This gives West Virginia an overall accuracy rate of 96.3%.

b. Were any areas of the state excluded from sampling?
   Yes  No

   If Yes, please explain.

4. Please answer the following questions about the selection of canvassing areas.

   a. Which category below best describes the sample design? (Check only one.)
   Census (Go to Question 6.)

      Unstratified statewide sample:
      ☒ Simple random sample (Respond to Part b.)
      ☐ Systematic random sample (Respond to Part b.)
      ☐ Single-stage cluster sample (Respond to Parts b and d.)
      ☐ Multistage cluster sample (Respond to Parts b and d.)

      Stratified sample:
      ☐ Simple random sample (Respond to Parts b and c.)
      ☐ Systematic random sample (Respond to Parts b and c.)
      ☐ Single-stage cluster sample (Respond to Parts b, c, and d.)
      ☐ Multistage cluster sample (Respond to Parts b, c, and d.)
☐ Other *(Please describe and respond to Part b.)* _____
b. Describe the sampling methods.

30 of West Virginia’s 466 census tracts were randomly chosen to be included in the coverage study. These tracts are located in 13 different counties. When a chosen tract has fewer than seven outlets, an adjacent tract was added to compensate. Each census tract must be canvassed, and all found tobacco retailers must be recorded. The list of retailers found in the coverage study will be compared to the final list of tobacco retailers that was used to randomly select outlets for Synar inspection. (At least 80% of the retailers identified in the coverage study must be on the final list to meet requirements). A WVDHHR/BHHF staff person will receive a map of the census tracts in the counties that were chosen for the study. The goal is to thoroughly canvass all roads within the area shown on the map and record information about all tobacco retailers found in the area. SAMHSA guidelines do not allow us to give a list of the known outlets, as this may affect the validity of the study. The person implementing the coverage study received a map of the census tracts in the counties that were chosen for the study. The goal is to thoroughly canvass all roads within the area shown on the map and record information about all tobacco retailers found in the area. SAMSHA guidelines do not allow giving a list of the known outlets, as this may affect the validity of the study. The HSC census tract map is a guide for the boundaries of the area to be canvassed. Before the canvasser began, the canvasser was to be familiar with the area and plan a route. The canvasser was to review the census tract and county maps provided. More detailed county and city maps may be helpful. Maps may be purchased or borrowed from local offices or stores such as: Chamber of Commerce, state police/sheriff departments, emergency services offices, real estate offices, libraries, and/or Wal-Mart, It is unsafe to drive and read maps, especially in urban areas. The Canvasser was to canvass all roads found within the boundary, even if they do not appear on the map. The Canvasser highlighted or marked off roads on the map as she canvassed them. She canvassed both sides of boundary roads. If there was a question about whether a road is within the boundary, she canvassed the road. She entered all businesses that may sell. The Canvasser formally introduced herself and briefly explained that she was verifying a list of tobacco retailers in the area. The Canvasser wore identification and had a business card available. She showed the Retailer Information Form to the clerk/manager as she asked for information to avoid suspicion. She provided merchant education while in the store.

Results:

There was a total of 30 randomly selected census tracts in West Virginia used for the Coverage Study. These tracts were spread throughout 13 different counties. Eight (8) of the chosen tracts were considered rural as defined by the U.S. Department of Agriculture [http://www.ers.usda.gov/briefing/rurality/whatisrural/] while 12 were considered urban. The remaining 10 tracts were located in a combination of rural and urban areas.

According to SAMHSA recommendations, West Virginia was expected to sample anywhere from 130 to 200 outlets. There were 190 tobacco selling outlets (that minors can access) found in these census tracts during canvassing. Seven (7) of
these outlets were determined to be missing from our original 2019 screened Synar list. This gives West Virginia an overall accuracy rate of 96.3%.

Only two of these seven (7) outlets missing from our original 2019 screened Synar list have been in existence even before the Synar screening process began. One is a department store located in Kanawha County and the other is a vapor product store located in Logan County. They could have not been on the US Food and Drug Administration database and/or overlooked in the screening process.

There were four (4) outlets not in the proper census tracts. They were a convenience store in Brooke County; a convenience store in Harrison County; a supermarket in Kanawha County and a combination gas station/convenience store in Mercer County.

There was only one outlet found throughout the coverage study area that were found to no longer be tobacco retailers and that outlet is out of business which was a pharmacy in Taylor County.

There were some specific issues in completing this study, as expected. West Virginia is primarily a rural state while homes and businesses are sparsely distributed in many of these areas. Many addresses on our Synar list frame contain only a rural route, county, or state route number. This makes it difficult to locate on a map and also for inspectors to find unless they have prior knowledge. Finally, in some cases excessive time, travel, and expenses were unavoidable especially for those inspectors who canvassed the larger census tracts.

c. Provide a full description of the strata that were created.

d. Provide a full description of how clusters were formed.

5. Were borders of the selected areas clearly identified at the time of canvassing?
   ☑ Yes  ☒ No

6. Were all sampled areas visited by canvassing teams?
   ☑ Yes (Go to Question 7.)  ☒ No (Respond to Parts a and b.)
   
   a. Was the subset of areas randomly chosen?
      ☐ Yes  ☑ No

   b. Describe how the subsample of visited areas was drawn. Include the number of areas sampled and the number of areas canvassed.

7. Were field observers provided with a detailed map of the canvassing areas?
<table>
<thead>
<tr>
<th>☒ Yes</th>
<th>☐ No</th>
</tr>
</thead>
</table>

*If No, describe the canvassing instructions given to the field observers.*

8. **Were field observers instructed to find all outlets in the assigned area?**

<table>
<thead>
<tr>
<th>☒ Yes</th>
<th>☐ No</th>
</tr>
</thead>
</table>

*If No, respond to Question 9.*

*If Yes, describe any instructions given to the field observers to ensure the entire area was canvassed, then go to Question 10.*

| The HSC census tract map is a guide for the boundaries of the areas to be canvassed. Before beginning, familiarize yourself with the area and plan a route. Review the census tract and county maps provided. More detailed county and city maps may be helpful. Maps have been purchased or borrowed from local offices or stores such as: Chamber of Commerce, state police/sheriff departments, emergency services offices, real estate offices, libraries, Wal-Mart. While one Canvasser implemented the Coverage Study, it is best to work in pairs. It is unsafe to drive and read maps, especially in urban areas. Canvass all roads found within the boundary, even if they do not appear on a map. You may want to highlight or mark off roads on the map as you canvass them. Canvass both sides of boundary roads. If there is a question about whether a road is within the boundary, canvas the road. Enter all businesses that may sell tobacco. |
9. If a full canvassing was not conducted:
   a. How many predetermined outlets were to be observed in each area? ____
   b. What were the starting points for each area? ____
   c. Were these starting points randomly chosen?
      [ ] Yes  [ ] No
   d. Describe the selection of the starting points.

   e. Please describe the canvassing instructions given to the field observers,
      including predetermined routes.

10. Describe the process field observers used to determine if an outlet sold tobacco.

    When you find a tobacco retailer, complete a Retailer Information Form. Introduce
    yourself and briefly explain that you are verifying a list of tobacco retailers in the area. Wear
    identification. Have your business card available. Show the Retailer Information Form to
    the clerk/manager as you are asking for information, so they are not suspicious. If you like,
    you may also do merchant education while you are in the store.

11. Please provide the state’s definition of “matches” or “mismatches” to the Synar
    sampling frame? (e.g., address, business name, business license number)

12. Provide the calculation of the weighted percent coverage (if applicable).
