Survivors of Loss and Lived Experience

Opioids and Suicide: From the Research

Adults who receive high doses of opioids are at increased risk for suicide

Adults who abuse opioids weekly or more are more likely to engage in suicide planning and attempts

Adults who have an opioid use disorder are 13x more likely to die by suicide than the general population

1. Ilgen et al., 2016; 2. Ashrafioun et al., 2017; 3. Wilcox, Conner & Caine, 2004

WV's Collaborative Approach

- BUILD an infrastructure within the state to address the intersection of overdose and suicide.
- Cross train individuals who work with those in the field to dually assess for suicidality and substance abuse.
- BUILD Suicide Prevention in State Opioid Crisis Response Grants.
- Work with the Quick Response
 Teams and Emergency Departments
 to ensure rapid follow-up and
 linkage to care for both suicide
 attempts and non-fatal overdoses.

2025

The Goal: Reduce the National Suicide Rate 20% by 2025
