<p>* An MOCC inmate who died while receiving hospice care for stage 4 metastatic cancer was tested for COVID-19 shortly before his death and was found to be positive. The treating medical provider determined COVID-19 was not a contributing factor. As the test result was received post-mortem, the positive is not included in the above figures.</p>								
About this report:								
** The positive at SRJ may be a false positive; retest pending.								
Inmates are adults in prisons, jails and work-release facilities. Residents are youths in Juvenile Services facilities. The figures for HCC and MOCC include their satellite work camps.								
Employee figures reflect testing conducted by DCR's medical services providers, and any offsite testing reported to DCR.								
Positive: current (active) cases; NOT cumulative. All positive inmates are placed in isolation.								
Total: cumulative tests; refers to number of tests performed and completed, NOT the number of inmates or residents tested.								
Pending: all inmates/residents awaiting test results remain in isolation.								
Quarantine: inmates/residents NOT showing symptoms but separated because they are new intakes, back from a hospital for unrelated reasons, etc.								
Inmate false positives to date: BCC (1), CRJ (1), MCC (1), NCRJ (1), PHRJ (1), SCC (1), SCRJ (3), TVRJ (1). Employee false positives: BCC (1), NCF (1). All false positives are moved from the positive/recovered columns to the negative column.								
For positive inmates eligible for release, all necessary notifications are provided beforehand. Such releases to date: HCC (2).								
Testing reflects decisions by DCR leadership and facility medical providers, following appropriate guidance and in collaboration with state and local public health authorities.
