

To ensure that Early and Periodic Screening, Diagnosis and Treatment (EPSDT) services are provided in accordance with reasonable standards of medical and dental practice, West Virginia's EPSDT Program, aka HealthCheck, applies the American Academy of Pediatrics' *Bright Futures: Guidelines for Health Supervision of Infants, Children, and Adolescents* to inform the development of policy, procedures and age-appropriate preventive health screening forms made available to all health care providers who see children/youth 0-20 years of age.

The HealthCheck standard compels psychosocial/behavioral, i.e., mental health screening during each EPSDT exam from birth through age 20. With the addition of exams for ages 0-5 and 19-20 to the sample, these results will serve as the true baseline from which quality improvement efforts can be measured.

Percentage of CY 2022 EPSDT Exams Inclusive of Mental Health Screening For Children/Youth Ages 0-20 by HealthCheck Region of Provider
