

## Available Formula Substitutions

### Grocery Store Tips

- These formulas listed below are currently temporarily available for purchase with an eWIC card due to West Virginia's response to the Abbott formulas recall. This list will be frequently updated. If you find a product in the store you are uncertain about, scan it with your WICShopper app to confirm or contact your local WIC clinic to verify.
- If there is a problem at the register, please have the cashier remove the item and then contact your local WIC clinic. WIC is unable to reimburse you for any formula you buy with another payment method.
- **Remember: When switching formulas, it is best to only buy 1-2 cans at first until you know how your baby will tolerate the formula.**
- Note: Similac formulas are returning to shelves as stores have had time to check lot numbers and ensure that only safe products are available for purchase. If you have a cell phone with internet access, you can check lot numbers while in the store if you are concerned. WIC encourages participants to purchase Similac products when they are available. Once the recall has ended, Similac products will once again be the only products available for purchase in stores with WIC benefits.

12-24 ounce  
powder  
container

= 1 container  
from your benefits

27 ounce or  
larger powder  
container

= 2 containers
