Every time I've talked to someone they have always been kind, very helpful and encouraging! I recommend to every breastfeeding mama and even those who want to learn more! (My husband has even learned from pacify)

Yes	Went to in person	No	Yes	Not helpful. Consultant tried to tell me that lip, tongue, and cheek ties does not effect breastfeeding when it clearly did. Also trying to video chat with a consultant while breastfeeding and moving a phone around so they can see everything is practically impossible and kept losing latch which led her to say it was a latch issue unrelated to ties. Once we got ties released things got better feeding wise but already lost supply due to poor feeding so we had to stop breastfeeding because I was unable to get my supply back.	Yes	Better educated consultants	Better educated consultants	This is a great resource. Just wish the consultant I used was better educated and not going off outdated information.
