

Regional Clinical Coordinators

Regional Clinical Coordinators (RCC) can assist and coordinate the activities of the Clinical Review Team/Process by establishing working relationships with community partners and ensuring that the Clinical Review Process is completed as outlined in the established protocols and timeframes. The RCCs also provide resource awareness and system navigation to families, probation staff, therapist, social workers, and other service providers responsible for developing individualized, person-centered treatment plans. RCC services are available to children and families regardless of the child's custodial status (i.e., state versus parental custody).

Please view the West Virginia's System of Care website for more information and how to contact each RCC.
