

BUREAU FOR MEDICAL SERVICES  
WEST VIRGINIA MEDICAID  
PREFERRED DRUG LIST WITH PRIOR AUTHORIZATION CRITERIA

This is not an all-inclusive list of available covered drugs and includes only managed categories. Refer to cover page for complete list of rules governing this PDL.

EFFECTIVE  
07/01/2021  
Version 2021.3b

- Prior authorization for a non-preferred agent in any class will be given only if there has been a trial of the preferred brand/generic equivalent or preferred formulation of the active ingredient, at a therapeutic dose, that resulted in a partial response with a documented intolerance.
- Prior authorization of a non-preferred isomer, pro-drug, or metabolite will be considered with a trial of a preferred parent drug of the same chemical entity, at a therapeutic dose, that resulted in a partial response with documented intolerance or a previous trial and therapy failure, at a therapeutic dose, with a preferred drug of a different chemical entity indicated to treat the submitted diagnosis. (The required trial may be overridden when documented evidence is provided that the use of these preferred agent(s) would be medically contraindicated.)
- Unless otherwise specified, the listing of a particular brand or generic name includes all legend forms of that drug. OTC drugs are not covered unless specified.
- PA criteria for non-preferred agents apply in addition to general Drug Utilization Review policy that is in effect for the entire pharmacy program, including, but not limited to, appropriate dosing, duplication of therapy, etc.
- The use of pharmaceutical samples will not be considered when evaluating the members' medical condition or prior prescription history for drugs that require prior authorization.
- Quantity limits may apply. Refer to the Limits List on [the BMS Website](#) by clicking the hyperlink.
- Unless otherwise indicated, non-preferred combination products require medical reasoning beyond convenience or enhanced compliance as to why the clinical need cannot be met with a preferred agent or combination of preferred single-ingredient agents.
- Acronyms
  - CL - Requires clinical PA. For detailed clinical criteria, please go to the [PA criteria](#) page by clicking the hyperlink.
  - NR – Denotes a new drug which has not yet been reviewed by the P & T Committee. **These agents are available only on appeal to the BMS Medical Director.**
  - AP - Non-preferred and selected preferred drugs, where indicated, are subject to auto-PA criteria. See PA criteria column.

**HYPOGLYCEMICS, MISCELLANEOUS AGENTS**

**CLASS PA CRITERIA:** Welchol will be authorized for add-on therapy for type 2 diabetes when there is a previous history of a thirty (30) day trial of an oral diabetic agent.

<p>WELCHOL (colesevelam)<sup>AP</sup></p>	<p>colesevelam SYMLIN (pramlintide)*</p>	<p>*Symlin will be authorized with a history of bolus insulin utilization in the past ninety (90) days with no gaps in insulin therapy greater than thirty (30) days.</p>
---	--	---

**HYPOGLYCEMICS, SGLT2 INHIBITORS**

**CLASS PA CRITERIA:** Non-preferred agents will only be approved (in 6-month intervals) if ALL of the following criteria has been met:

- 1) Current A1C must be submitted. Agents in this class will not be approved for patients with a starting A1C of less than (<) 7%.
- 2) Documentation demonstrating 90 days of compliance on all current diabetic therapies is provided.

**BUREAU FOR MEDICAL SERVICES  
WEST VIRGINIA MEDICAID  
PREFERRED DRUG LIST WITH PRIOR AUTHORIZATION CRITERIA**

**This is not an all-inclusive list of available covered drugs and includes only managed categories. Refer to cover page for complete list of rules governing this PDL.**

**EFFECTIVE  
07/01/2021  
Version 2021.3b**

3) Documentation demonstrating treatment failure with all unique preferred agents in the same class.

Re-authorizations will require documentation of continued compliance on all diabetic therapies and A1C levels must reach goal, (either an A1C of  $\leq 8\%$ , or demonstrated continued improvement).

\*Preferred SGLT2 inhibitors and combinations may be approved for a diagnosis of Heart Failure with Reduced Ejection Fraction (HFrEF) with or without Type II DM, Chronic Kidney Disease (CKD) with or without Type II DM, or Atherosclerotic Cardiovascular Disease (ASCVD) with Type II DM without further restrictions.

**SGLT2 INHIBITORS**

FARXIGA (dapagliflozin)* INVOKANA (canagliflozin)* JARDIANCE (empagliflozin)*	STEGLATRO (ertugliflozin)	
---	---------------------------	--

**SGLT2 COMBINATIONS**
