

## TBIW CFCM Stakeholder Group

Data request and findings for Friday, February 8, 2019.

### 1.) TBIW Claims Data to get an average of CM Billing Units

KEPRO reviewed six months of claim data for TBIW Case Management to determine an average number of units billed. The average number of units billed were eight (8) units per month.

One (1) unit is 15 minutes.

### 2.) TBIW Provider Agencies were required to offer both CMA and PAA would that resolve the Selection Issue of only having One (1) Case Management Provider.

If the requirement that a TBIW Provider must offer all of the Services under this waiver, is implemented, there would be only three (3) counties that would have limited Case Management Selection ( Only one Provider), those counties are Berkeley ( 4 Members) , Jefferson(1 Member) and Morgan(2 Members) Counties.
