

## Conflict Free Case Management Frequently Asked Questions August 2019

**23.**

**Question:**

Can the CFCM agency be the provider of pass through \$'s such as OT, PT and Speech for an individual? In this instance the OT, PT or Speech would be on contract to provide a service for a specific waiver member but not an employee of the CFCM agency. The reimbursement is primarily "passing through" the agency to pay the professional on contract.

**Response:**

This question, in part, has previously been addressed in FAQ 19: [The CFCM agency can provide Case Management only for the individual waiver participant. All other services, including personal care, contracted therapy services for the individual which they are providing case management for must be provided by a different provider agency.](#)

The response includes "pass through monies as described in the question above. If the participant is self-directing, the CM would, in the role of case manager, have the responsibility to assist the family to find an agency, a provider of service agency for the consumer, to contract with the therapists (OT,PT, SP and/or DT) as appropriately identified in the Individuals Program Plan as is true for any participant on their caseload. The self-directing individual may also opt to use strictly State Plan services for therapies
