

Acentra Health will maintain a list of pre-approved internet-based training providers. Currently the following provider is approved and requires no advance request for approval.

**Case Manager Training -Initial and Annual Requirements**  
**Population specific training: Traumatic Brain Injury (TBI)**

Model Systems Knowledge Translation Center  
 Internet based training: <https://msktc.org/tbi>  
 Slideshows <https://msktc.org/tbi/slideshows>  
 Fact Sheets <https://msktc.org/tbi/factsheets>

Documentation proving successful completion of training would be a completed posttest (must be developed by the Case Management Provider) and documentation on the program training log.

The training consists of viewing the recorded slideshow, reading the related Fact Sheet and the completion of a Posttest. Competency is defined as passing a graded posttest at no less than 70%.
