

State Transition Plan Data Analysis 2019

Dr. Rose Lowther-Berman

Program Manager I, West Virginia State Transition Plan

January 31, 2020

Introduction: We are continuing to gather data regarding provider compliance with the Home and Community Based Services Rule criteria. Analysis of the reviews conducted by Kepro and received at BMS by December 17, 2019 revealed the following limitations and delimitations:

Delimitations: Reviews are by different reviewers.

Specialized Family Care homes are analyzed separately from the general residential settings due to their unique nature.

Tags Cited: The total number of tags cited was less than first time and the tags cited were not as scattered throughout the 5 criteria. There were no tags cited under Section 04 and Section 05 in residential provider settings at all. The aggregate number of tags cited also diminished. There were 10% of Residential and 20% of Non-Residential settings that had one or more tags cited. All others (90% of Residential and 80% of Non-Residential) were fully compliant.

Notes:

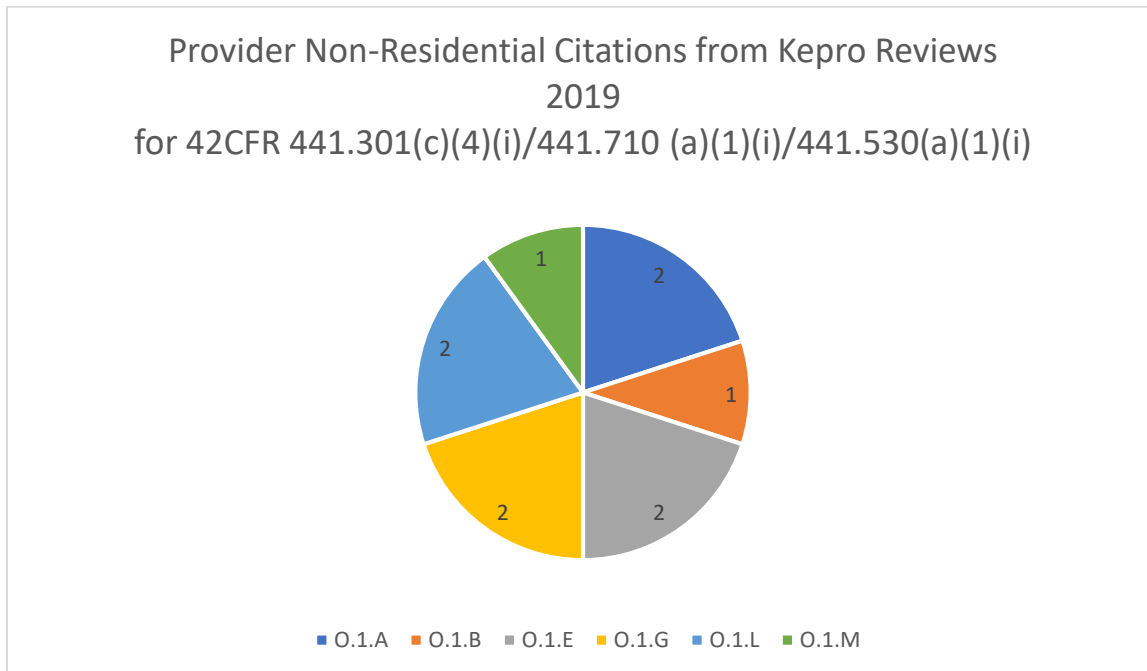

-When Kepro reviewed a provider more than once since the BMS review, the more recent Kepro review is recorded.

-Appendix A includes a list of tag numbers cited (O.1.A et al) and their descriptors.

NOTE:

SOME PROVIDERS HAD MULTIPLE SETTINGS. EACH SETTING WAS ENTERED IN THE DATABASE INDEPENDENTLY, SINCE CITATIONS VARIED AMONG THESE SETTINGS.

ALL DATA WAS ACQUIRED THROUGH ON SITE SURVEYS/REVIEWS OF SETTINGS. WHILE SETTINGS NOT FOUND IN COMPLIANCE WILL RECEIVE/RECEIVED FOLLOW-UP REVIEWS, THE RESULTS OF THESE REVIEWS ARE NOT INCLUDED IN THIS ANALYSIS.

SUMMARY/ABSTRACT

Non-Residential There were no tags which were cited in more than 7% of the non-residential settings in 2019. Tag O.4.A “There are no gates, Velcro strips, locked doors, fences or other barriers preventing individuals’ entrance to or exit from certain areas of the setting.” Was cited in 7% (4) of the settings.

Four tags in Non-Residential, O.1.A, O.1.E, O.1.G and O.1.L were cited in 3% (2) of the settings. These tags are: O.1.A -The setting provides opportunities for regular meaningful non-work activities in integrated community settings for the period of time desired by individuals; O.1.E -Individuals receive HCBS in an area of the setting that is fully integrated with individuals not receiving Medicaid HCBS; O.1.G - The setting encourages visitors or other people from the greater community (aside from paid staff) to be present; and O.1.L - The setting assures that tasks and activities are comparable to tasks and activities for people of similar ages who do not receive HCB services. Three of the four settings cited for O.4.A are owned or leased by the same provider.

Residential There were no tags which were cited in more than 4% of the residential settings in 2019. These tags were O.2.E.i (Gates, Velcro strips, locked doors, or other barriers preventing individuals’ entrance to or exit from certain areas of the setting are not in evidence) and O.2.F.ii (Appliances are accessible to individuals).

Conclusion: There was much progress. At least 93% of all residential and non-residential settings are in compliance. All settings not found in full compliance have submitted Plans of Compliance and are being monitored by KEPRO.

Next Steps Recommended:

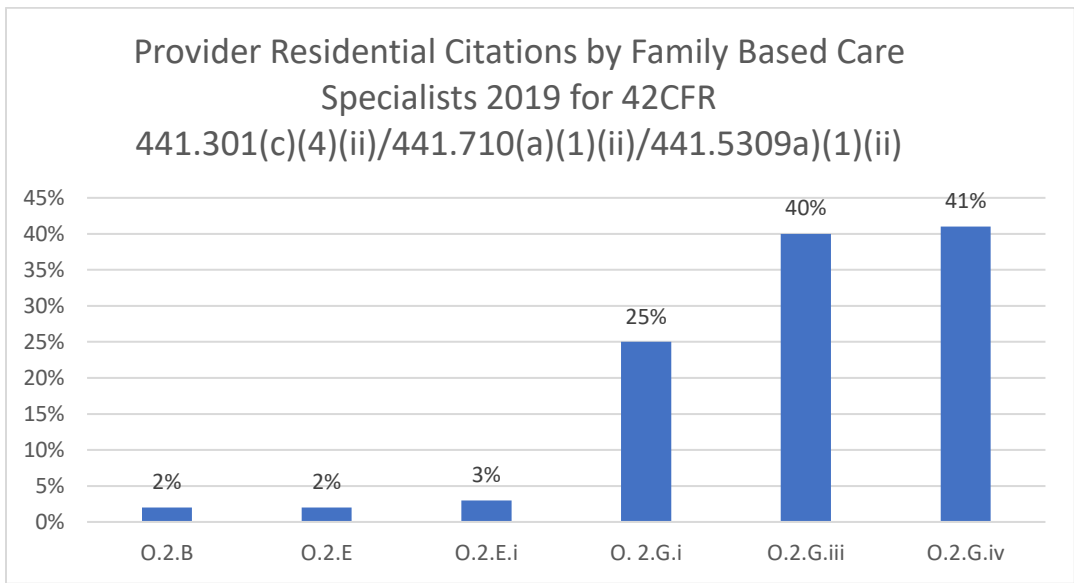

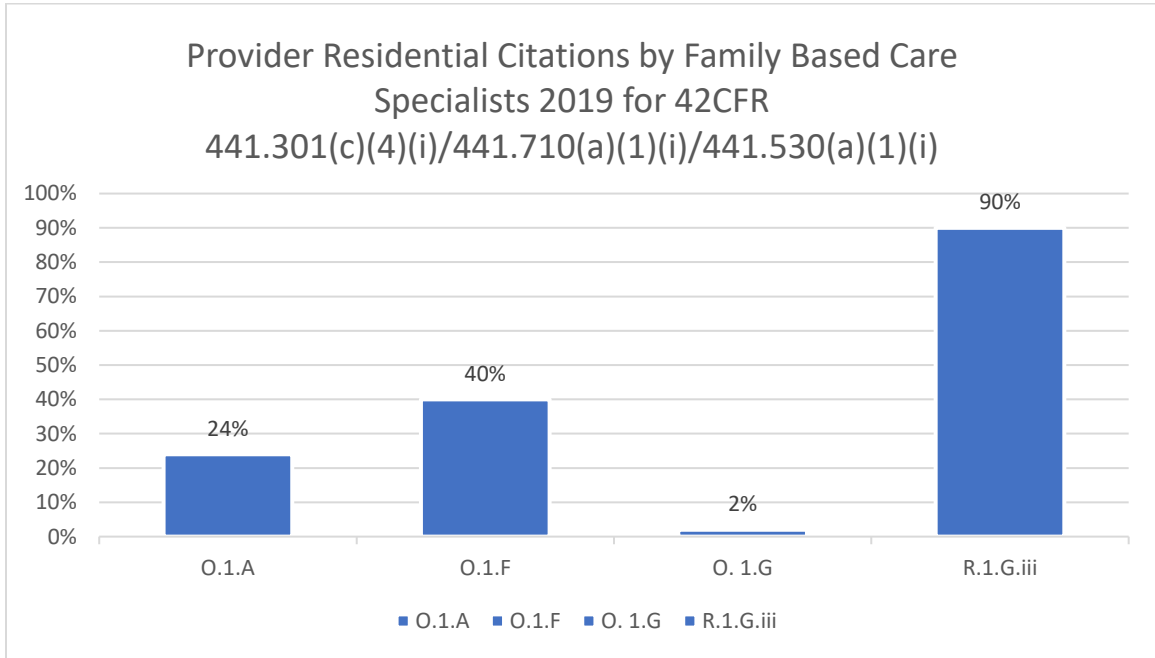

Any needs for increased monitoring have been identified and addressed.

SPECIALIZED FAMILY CARE HOMES ADDED:

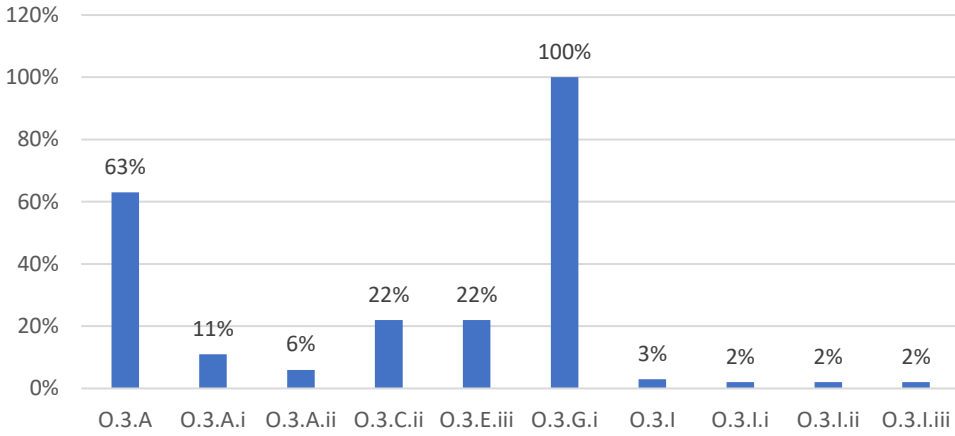

In 2019 the Specialized Family Care homes began being reviewed under the Integrated Services Rule Regulations. The results of those review are given below. The SFC program has 10 regions.
