BACKGROUND

The West Virginia Bureau for Medical Services (BMS) covers reproductive health services for West Virginia Medicaid members when provided by an enrolled physician, physician assistant (PA), or advanced practice registered nurse (APRN) acting within the scope of his/her license. Services include but are not limited to family planning and sterilization services. This section lays out the conditions under which these reproductive health services are covered under Medicaid.

POLICY

519.15 REPRODUCTIVE HEALTH SERVICES

519.15.1 Family Planning Services

West Virginia Medicaid covers family planning services for both male and female members and may be provided as part of a practitioner’s routine care. Federal Regulation 42 CFR § 441.20 provides that each member must be free from coercion and free to choose the method of family planning to be used. The purpose of family planning is to reduce unintended pregnancies. Medicaid family planning services must be documented in the member’s medical record.

In addition to family planning services provided by West Virginia Medicaid, the West Virginia Department of Health and Human Resources Office of Maternal Child and Family Health (OMCFH) Family Planning Program also provides services under the Title X Family Planning program.

519.15.2 Long Acting Reversible Contractive (LARC)

Long Acting Reversible Contraception (LARC) methods, including intrauterine devices (IUDs) and the contraceptive implant, are highly effective forms of contraception and are over 99% effective in preventing pregnancy for three to 10 years depending on the device. Providing women with easy access to LARC methods, including immediately postpartum, greatly reduces the risk of unplanned pregnancies, and improves the health of newborns and mothers by facilitating healthy spacing between pregnancies.

LARCs are covered in an outpatient setting in the physician’s office and in the hospital. Practitioners should inform members, verbally and in writing, of all available forms of contraception and maintain documentation in the member’s record.

LARC reimbursement by setting:

<td>Office</td>
<td>Practitioners performing the insertion of a LARC in an office setting may bill for the device with the appropriate CPT code on a separate CMS 1500 claim with place of service 11.</td>
<td>Practitioners may bill for the professional service associated with the insertion of the LARC device using the appropriate CPT code on a separate CMS 1500 claim with place of service 11.</td>
</tr>
<tr>
<td>Federally Qualified Health Center (FQHC) and Rural Health Clinic (RHC)</td>
<td>Practitioners performing the insertion of a LARC in a FQHC or RHC may bill for the device in addition to the encounter rate, using the appropriate HCPCS code that represents the device, along with the ICD-10 Surgical Code and ICD-10 Diagnosis Code that best describes the services delivered.</td>
<td>The qualified practitioner performing the insertion of the LARC device may bill for the associated professional service in addition to the encounter rate, using the appropriate CPT code on a separate CMS 1500 claim.</td>
</tr>
</tbody>
</table>

**Covered Contraceptive Systems/Implants:** The following list of codes are provided as a reference. This list may not be all inclusive and is subject to updates:
- J7296 Levonorgestrel-releasing intrauterine contraceptive system (Kyleena®) 19.5 mg
- J7297 Levonorgestrel-releasing intrauterine contraceptive system (Liletta®) 52 mg
- J7298 Levonorgestrel-releasing intrauterine contraceptive system (Mirena®) 52 mg
- J7300 Intrauterine copper contraceptive (ParaGard®)
- J7301 Levonorgestrel-releasing intrauterine contraceptive system (Skyla®) 13.5 mg
- J7307 Etonogestrel contraceptive implant system, including implant and supplies (Nexplanon®)

**519.15.3 Emergency Contraceptives**
The morning-after pill, a type of emergency birth control that contains the hormone levonorgestrel, a progestin, (Plan B One-Step®, Next Choice®), or ulipristal acetate, a progesterone agonist-antagonist, (Ella®), is covered by Medicaid as a pharmacy benefit.

West Virginia Medicaid also requires a prescription for over the counter (OTC) emergency contraception if Medicaid is to be the payer. This includes all West Virginia Medicaid women of reproductive potential.

**519.15.4 Sterilization**
Sterilizations are covered for both male and female members in accordance with the Federal Social...
519.15 REPRODUCTIVE HEALTH SERVICES

Security Act, as implemented in regulation 42 CFR 441, Subpart F – Sterilizations, §441.253, §441.254, §441.257, and §441.258 and WV Code Section 9-5-12(e) (SB716). All of the following conditions must be met:

- The member must be at least 21 years of age at the time consent is obtained;
- The member must not be a mentally incompetent individual; and
- The member must have voluntarily given informed consent in accordance with all the requirements prescribed in §441.257 and §441.258 and WV Code Section 9-5-12(e) (SB716)

The West Virginia-specific Consent for Sterilization form must be completed in its entirety. For vasectomies, the form must be attached to the claim for payment consideration and submitted to the appropriate Managed Care Organization (MCO) or Fee-For-Service (FFS) fiscal agent. If any portion of the Consent for Sterilization form is incomplete, inaccurate, or illegible, the claim will be denied. The appropriate Medicaid fiscal agent will not return the consent form for correction, changes, or additions.

For tubal ligations, the form should be kept in the patient file in the doctor’s office. The claim for payment must be submitted to the FFS fiscal agent for both MCO and FFS members.

The Consent for Sterilization form must include, but is not limited to the following information:

- The Date of Surgery form must list the specific date the surgery was performed; “to be scheduled” and “after delivery” is not acceptable.
- The Physician’s Statement section must be fully completed by the physician.
- The Date of Physician’s Signature must occur within one day of the date of surgery.
- The interpreter’s statement, if applicable, must be completed only if the member does not understand the language on the consent form or the language used by the person obtaining consent, and needs an interpreter. If this section is used, the interpreter must sign and date the consent form, using the date informed consent was given.
- The form must be signed and dated by the:
  - Member who wants to be sterilized;
  - Interpreter, if applicable;
  - Person who obtained the consent; and
  - Physician who performed the sterilization procedure.

Informed consent is the voluntary assent from a member that he/she has been informed orally of and given the opportunity to question and receive satisfactory answers concerning sterilization. Informed consent may not be obtained while the member is in any one of the following conditions:

- In labor or childbirth;
- Seeking or obtaining a pregnancy termination;
- Under the influence of alcohol or other substance that affects the individual’s awareness; and/or
- Under anesthesia.

519.15.5 Non-Covered Services

Family planning services do not include procreative management or fertility services. Non-covered services are not eligible for the West Virginia Department of Health and Human Resources (DHHR) Fair Hearings or Desk/Document Review. See 42 § 431.220 When a hearing is required for more information.
