4/21/16	<p>Section 523.2.1</p> <p>It gives the websites, state and federal, to do sex offender checks on a monthly basis. It states a copy must go in the employee or volunteers file. When you go to the site and do the WV State Police check on the basic check you can only put in last name and it comes back with a list of everyone with that last name in WV which can be extensive if it's a common name. If you do the advanced it lets you narrow it down but the page that comes up just says no results found and does not show the name of who you inquired about so that will do no good to show who you did the search on for their file. What are they supposed to put in the employee/volunteer file to show this was done?</p> <p>Also, did anybody consider how time consuming this is going to be at the beginning of every month to check 100 employees when you have to enter each employee one at a time for 2 different websites? Not including the Medicaid exclusions we are already doing monthly. It just seems like overkill in addition to the background checks we already do. It's going to take a staff 2 days to get them all done and filed.</p>	C	The monthly requirement has been removed for the sex offender check. The requirement now is to check the sex offender registry upon hire.
