Therapeutic Interventions are interventions and research-based strategies designed to achieve the integrated outcomes of the child’s IFSP, through Part C, IDEA services such as speech therapy, physical therapy and occupational therapy.

Teaming/Treatment Planning is a meeting/planning session with the family for the purpose of planning assessments, designing outcomes and interventions or periodic review of the objective and strategies of the child’s IFSP. This service is intended to reduce duplication of services and promote a collaborative service delivery process.

Providers will be credentialed through Title V to assure they meet all relevant licensing requirements and possess suitable qualifications to serve infants and toddlers who are eligible for Part C, IDEA services.

The above referenced therapy providers shall meet the requirements as set forth in 42 C.F.R. §440.110

5. a. Physicians’ Services

Services may be limited by specialty, e.g., pathology, radiology, or by frequency/duration by prior authorization.

b. Medical and Surgical Services Provided by a Dentist

Limitations placed on the procedure for physicians apply when that service is provided by a dentist. Dental coverage for individuals age 21 and over will be limited to repair of fractures of the maxilla and mandible and certain surgical procedures which can be performed by a physician or oral surgeon.

6. a. Podiatrists’ Services

Services may be limited in amount/duration, or by prior authorization. Limitations placed on the service (procedure) for other qualified practitioners apply when the services are provided by a podiatrist.

b. Optometrists’ Services

Coverage will consist of one pair of eyeglasses for adults following cataract surgery.

c. Chiropractors’ Services

Chiropractic Services means services, including any necessary supplies and equipment, provided to a recipient by or under the direction of a qualified chiropractor within the scope of his or her practice under State law. A “chiropractor” is an individual who meets qualifications specified in regulations at 42 CFR 440.60(b) and is licensed pursuant to West Virginia State law. No referral or prior authorization is required for up to 20 visits, combined, of physical therapy, occupational therapy, and chiropractic services.

d. Other-practitioners’ Services

Psychologists: Prior authorization is required for psychotherapy after initial ten (10) sessions.
