Classroom Training and Functional Exercises Using the Standard Reunification Method

ABOUT THE STANDARD REUNIFICATION METHOD

The Standard Reunification Method (SRM) provides school and district safety teams with proven methods for planning, practicing and achieving a successful reunification.

ABOUT THE SEMINAR

The Standard Reunification Method - Reunification Exercise (SRM-REx) brings our team to your community where we will work with all stakeholders who have a role in reunification, ensuring a common understanding of the process, establishing the use of common language, and strengthening the relationships that you have built with your stakeholders.

Day 1 of the SRM-REx explores the history, concepts and functionality of the Standard Reunification Method, the key principles and roles involved in the reunification process, and level of effort and materials needed for planning and preparing for reunification. Additionally, participants will receive a brief overview of the Standard Response Protocol and learn about the role that Incident Command plays in reunification.

Day 2 of the SRM-REx features functional exercises where participants will practice the reunification process including role assignment, set up, and mock reunification of “students” with their “parents or guardians.” Participants will experience the reunification process as a part of the reunification team, a student, and a parent, and they will learn how to conduct successful reunifications and reunification exercises.

WHO SHOULD ATTEND

Educators, Administrators, School and District Safety Teams, Campus Supervisors, Law Enforcement, Fire/EMS, Emergency Managers, Victim Advocates

DETAILS

ADDITIONAL MATERIALS

The REx box contains all the necessary materials for conducting a Reunification Exercise including vests, lanyards, Role ID Badges, student & parent IDs, job action sheets, roster data, and more!
