

MEMORANDUM OF UNDERSTANDING

This letter is an agreement between the "Change the Future, WV" project and Emerson Elementary School. In order to support the Physical Education Resolution that was passed by the Wood County Board of Education and to promote physical activity within the school, we agree to increase physical activity of all students an additional 15 minutes per day. We will initiate this additional physical activity for the next two school years (2012/2013 – 2013/2014). We understand that this activity can be done within the regular classroom, initiated by the regular teacher and can be in 5 minute increments. This physical activity is in addition to Physical Education and recess. In order to initiate this additional physical activity, the Change the Future, WV project will award the school an amount of \$500.00 to purchase age appropriate physical activity supplies to enhance the additional physical activity. The Physical Educator at the school will provide ideas, suggestions and guidance in the purchase, storage and distribution of the additional supplies. In addition, the teachers will agree to monitor the activity by completing monthly 'class participation' reports. We understand that the guidelines of the Change the Future WV project prohibit the purchase of videos, movies, video games and game systems.
