

The final version of the 2015 protocols are designed in a PDF App that can be downloaded directly from the WVOEMS website to your smart device with an interactive Table of Contents. They will not rely on internet or cell connection to function. They can also be printed in their entirety without the navigation buttons showing.

To utilize the navigation feature on your smart device, you must use Adobe Reader to open the protocols. It is a free app for your smart device available from the Play Store or App Store. If you chose to make life easier, there is free App for android called ES File Explorer that will allow you to place the downloaded protocols on the desktop of your smart device instead of in the download folder.

There is a yellow highlighted tab located at the bottom of each page in the lower right hand corner. It states "Go to Table of Contents". Click on the yellow tab and you will be taken to the Table of Contents Page. At this point you can click on any protocol and you will immediately see the selected item. To return to the table of contents, click on the yellow tab found in the lower right corner of the page.

The protocols will become effective January 1, 2015.
