

## safety & well-being

Seeking safety from domestic violence, sexual assault, stalking, dating violence, or human trafficking can be

complicated, and members of the LGBTQ+ community often face added barriers to safety. The Cabell County

STOP Team wants you to know we recognize those obstacles and want to honor your experience. Services are available today, and advocates can help you find your path to an individualized safety plan. Remember, **you're the expert of your situation, and you know what's safest.**

We're here when you're ready to talk through your options and to walk with you on your journey. For more information on LGBTQ+ specific safety planning, visit [branchesdvs.org](http://branchesdvs.org) or scan the QR code on the back of this page.
